

CATALOGUE 2025

Profimess GmbH Purchase control

Welcome to the Profimess catalog.

We are pleased to present our freshly printed, completely revised and expanded 2024/25 product catalog. In this catalog you will find our extensive product portfolio from the areas of flow, level, pressure and temperature clearly compiled. Our range includes a diverse selection of sensors, actuators and indicators for these process variables.

Regardless of whether it is a matter of standard applications or demanding tasks at the limits of what is physically possible, we offer you effective and cost-effective solutions.

The catalog contains detailed technical data on the devices, explanations of how they work and practical application examples.

If you have any further questions, our competent team will be happy to help you by phone or email.

Even if you do not find the right product straight away, you can trust that we will work together to develop a suitable solution for your measuring task.

We look forward to your inquiries and a successful collaboration.

Level

Level-Measurement with Radar /

LR-56 / Radar Level Transmitter with 2-wire Technology / 15

Ultrasonic Level-Measurement and -monitoring /

SE-02 / Compact Ultrasonic Level Meter, submersible, IP68 / 19

ECHO-N / Universal Ultrasonic Level-Sensor / 23

FU-01 / Ultrasonic Level Switch for Vertical Mounting / 27

003 / Mobrey™ Ultrasonic Liquid Level Switch for aggressive Fluids / 31

Level-Monitoring with Floater /

FM-01F / Magnetostrictive Level Meter for continued Level Measuring / 33

FM-02N / REED-Contact-Measuring Transmitter for Continual Level Recording / 41

Bypass Level-Measurement and -monitoring /

MA-400 / Bypass-Magnetic Level Gauge / 69

MA-400M / Mini Bypass-Magnetic Level Gauge / 117

Hydrostatic Level-Measurement and -monitoring /

FD-01 / Hydrostatic Suspension Level Meter for Fluids / 135

FD-GL / Hydrostatic Suspension or Screw-In Level Meter with Shipping or Offshore Approval / 139

FD-03 / Hydrostatic Screw-In Level Meter for Fluids / 145

FD-05 / Hydrostatic Miniature-Level Meter / 149

Conductive Level Monitoring /

KS-01 / Low-Cost Conductive Level Switch	/ 151
KS-01D / Compact Low-Cost Conductive Level Switch to Screw-In	/ 151
ER-01 / Conductive Electrode Relay	/ 153
KS-02 / Conductive Level Switch for Vertical Mounting	/ 157
KS-03 / Conductive Level Switch for Vertical Mounting with Changeover Outputs	/ 159
WD-03 / Conductive Water-Leak-Detector	/ 163

Capacitive Level Monitoring /

FC-01 / Capacitive Level Switch for Liquids, Bulk Goods and Slurry	/ 165
---	-------

Level-Monitoring with Floater /

FS-01 / Rugged Suspension Float Switch	/ 169
FS-01EX / Rugged Suspension Float Switch with ATEX Approval	/ 171
FS-02 / Float Switch for Horizontal Mounting	/ 173
FS-03 / Low-Cost Suspension Float Switch	/ 177
FS-05 / Extra Slender Suspension Float Switch	/ 179
FS-08 / Suspended Float Switch with Internal Weight	/ 181
FS-16 / Teflon® Float Switch for Side Mounting	/ 183
FS-17 / Stainless Steel Float Switch for Side Mounting	/ 187
FS-10 / Suspension Float Switch for Bulk Goods	/ 191
FS-04 / Rugged Float Switch for Horizontal Mounting with Shipping Approval	/ 193
LS-10N / Float Switch for Level Detection	/ 199
LS-14 / Flap Float Switch for Horizontal Mounting made from Plastics	/ 243
LS-15 / Flap Float Switch for Horizontal Mounting made of Stainless Steel	/ 245
LS-15P / Flap Float Switch for Horizontal Mounting made of Stainless Steel with Plug Connection	/ 247
LS-16 / Miniature Float Switch for Vertical Mounting made from Plastics	/ 249
LS-17 / Miniature Float Switch for Vertical Mounting made of Stainless Steel	/ 251
LS-18 / Angled Miniature Float Switch for Vertical Mounting made of Stainless Steel	/ 253

Optoelectronic Level Monitoring /

FO-01 / Optoelectronic Level Switch for Vertical and Horizontal Mounting / 255

FO-02N / Optoelectronic Compact Level Switch / 257

FO-03 / Optoelectronic Level Switch with under Pressure changeable Electronic Unit / 259

FO-04 / Optoelectronic Level Switch for General Applications / 261

FO-05 / Optoelectronic Level Switch High-Temperature Version / 263

Vibrating Fork /

2110 / Tuning Fork Switch for Liquids from Mobrey / 265

FV-01 / Tuning Fork Switch for Liquids / 269

Pressure Bell Level-Monitoring /

FD-02 / Pressure Bell Switch for Level Monitoring / 271

Level Monitoring with Rotating Vane /

DF-02 / Rotating Vane Switch for Bulk Goods / 273

Membrane Level-Monitoring /

MS-04 / Membrane Level Switch for Bulk Goods / 279

Pressure

Hand Operated Test Pumps /

HP-30 / Hand Operated Test Pump to Calibrate and Verify Pressure Devices / 283

Manometer /

PM-63N / Bourdon Tube Pressure Gauge with Nominal Size 63 mm / 285

PM-100N / Bourdon Tube Pressure Gauge with Nominal Size 100 mm / 287

PK-01 / Capsule Element Pressure Gauge made of Brass or St. Steel with Nominal Sizes 63, 100, 160 mm / 289

PF-01 / Diaphragm Pressure Gauge made of Steel or Stainless Steel with Nominal Sizes 100 and 160 mm / 291

Differential Pressure Measurement /

PM-2000 / Differential Pressure Gauge to Indicate Low Differential Pressures of Gases / 293

Pressure Switches /

PS-00 / Low-Cost Pressure Switch / 299

PS-02N / Pressure Switch in Compact Design / 303

PDC-1 / Robust Pressure Switch for Gauge Pressure / 307

PDC-2 / Robust Pressure Switch for Vacuum / 313

PDC-3 / Robust Pressure Switch for Differential Pressure / 319

PDC-4 / Robust Pressure Switch with Stainless Steel Sensor System / 325

PS-04N / Dual Pressure Switch / 331

PS-05 / Electronic Pressure Switch with Stainless Steel Sensor / 335

Manometer with Analogue Output /

PAMU / Bourdon Tube Pressure Gauge with Analogue Output / 339

Pressure Sensors /

PU-01N / Low-Cost Pressure Sensor Accuracy Class 0.5	/ 343
PU-06 / Pressure Sensor Accuracy Class 0.35 or 0.25 with Stainless Steel Sensor Element	/ 347
PU-07 / Pressure Sensor Accuracy Class 0.5 with Ceramics Sensor Element	/ 353
PU-08 / Pressure Sensor Accuracy Class 0.35 or 0.25 for Low Process Pressures	/ 359

Differential Pressure Sensors /

PD-02 / Differential Pressure Sensor for Fluids and Gases	/ 365
PD-04 / Differential Pressure Sensor for Fluids and Gases	/ 369
PMMS / Differential Pressure Sensor for Very Low Gas Differential Pressures	/ 371

Plug-In Display for Pressure Transmitters /

AZ-01N / Plug-In Display to Expand Pressure Transmitters with Analogue Output	/ 375
--	-------

High-Precision Pressure Sensors /

PU-10K/E / High-Precision Process Pressure Sensor with Thread, Flange or Food-Compatible Connection	/ 379
--	-------

Cooling Lanes for Pressure Measurement /

KE-01 / Cooling Tower for Pressure Metering Points up to 250°C	/ 387
---	-------

Digital Manometers /

DM-250 / Digital Pressure Gauge with Ceramic Sensor	/ 389
--	-------

Contact Manometers /

KM-100N / Contact Pressure Gauge	/ 393
---	-------

Mounting Enclosure /

GH-PM / Mounting Enclosure for Magnehelic PM-2000	/ 397
--	-------

Flow

Flow Indicators /

SA-01 / Flow Indicator with Rotor and Self-Cleaning System	/ 399
DA-01 / Flow Indicator with Flap and Simple Scale	/ 401
DA-02 / Flow Indicator with Ball for Visual Flow Indication	/ 403
DA-04 / Plastic Sight Flow Indicator	/ 405
SA-05 / Flow Indicator for General Industrial Applications with Thread Connection	/ 407
SA-06 / Flow Indicator for General Industrial Applications with Flange Connection	/ 409
SA-10 / Bidirectional Flow Indicator made of Stainless Steel or Bronze	/ 411

Vane Operated Flowswitches /

SP-01 / Compact Vane Operated Flowswitch with or without T-Piece	/ 413
SP-03 / Low-Cost Vane Operated Flowswitch with Cable Connection	/ 417
SP-04 / Vane Operated Flowmeter up to DN 600 with Flange or Thread Connection	/ 421
DP-10N / Vane Operated Screw-In Flowswitch made of Brass or Stainless Steel up to 6"	/ 425
DP-10LC / Low-Cost Vane Operated Screw-In Flowswitch	/ 429
DP-20 / Vane Operated Screw-In Flowswitch from Plastics up to 6"	/ 433
DP-30 / Vane Operated Screw-In Flowswitch made of Brass or Stainless Steel up to 2"	/ 433
DP-40 / Vane Operated Flowswitch for Heavy-Duty Applications	/ 437

Piston Type Flowswitches /

DK-01 / Low-Cost Piston Type Flowswitch for Low Flow Volumes with Cable Connection	/ 441
---	-------

Diaphragm Flowmeters /

FL-01 / Diaphragm Flowmeter	/ 443
FL-10 / Diaphragm Flowmeter	/ 447

Variable Area Flow-Measurement and -monitoring /

SW-01 / Miniature Variable Area Flowmeter and -Switch for any Mounting Position	/ 453
SW-02 / Full-Metal Miniature Variable Area Flowmeter and -Switch for any Mounting Position	/ 457
SW-03 / Variable Area Flowmeter and -Switch for Flow from Bottom to Top	/ 461
SW-04 / Full-Metal Variable Area Flowmeter and -Switch for Flow from Bottom to Top	/ 465
SW-05 / Variable Area Flowmeter and -Switch for any Mounting Position	/ 469
SW-06 / Full-Metal Variable Area Flowmeter and -Switch for any Mounting Position	/ 473
SW-07 / Variable Area Flowmeter and -Switch for any Mounting Position for Viscous Media	/ 477
SW-08 / Full-Metal Variable Area Flowmeter and -Switch for any Mounting Position for Viscous Media	/ 481
ST-01 / Analogue Transmitter for Variable Area Flowmeters from the SW series	/ 485
SM-06N / Acrylic Variable Area Flowmeter	/ 487
SM-10 / Miniature Variable Area Flowmeter with Glass Cone	/ 491
SM-12N / Variable Area Flowmeter with Glass Cone	/ 497
SM-15 / Variable Area Flowmeter from Plastics	/ 503
SM-20 / Miniature Full-Metall Variable Area Flowmeter	/ 509
SM-25 / Full-Metal Variable Area Flowmeter	/ 511
SM-30 / Variable Area Flowmeter for Very Low Flow Volumes	/ 519

Calorimetric Flow Measurement and -monitoring /

DT-03 / Calorimetric Flowmeter and Switch for Hydrous Media	/ 523
DT-06 / Calorimetric Flow Switch for Air	/ 527

Impeller Flowmeters /

SM-00 / Vane Wheel Flowmeter for Very Low Flow Volumes	/ 529
SM-04 / Vane Wheel Flowmeter from Plastics, Brass or Stainless Steel up to 100 l/min	/ 537
SD-04 / Vane Wheel Flowmeter with Batching or Switching Electronics	/ 541
SD-05 / Vane Wheel Flowmeter from Plastics up to 1000 l/min	/ 549

Turbine Flowmeters /

SM-08 / Miniature Turbine Flowmeter for Fluid Media	/ 553
SM-11N / Stainless Steel Turbine Flowmeter	/ 563
SM-16 / Battery Powered Turbine Flowmeter	/ 567

Ultrasonic Flow-Measurement and -monitoring /

PF-222 / Portable Ultrasonic Flowmeter for Simple Applications	/ 571
PF-333 / Portable Ultrasonic Flowmeter for General Industrial Applications	/ 573
PF-D550 / Portable Ultrasonic Flowmeter for Dirty or Aerated Liquids	/ 577
U-1000 / Clamp-On Ultrasonic Flowmeter for General Industrial Applications	/ 579
U-1000HM / Fixed Ultrasonic Heat/Energy Meter with Modbus Communication	/ 583
TG-01 / Ultrasonic Thickness Meter	/ 587

Magnetic-Inductive Flow-Measurement and -monitoring /

SI-00 / Compact Electromagnetic Flowmeter	/ 589
SI-01 / Electromagnetic Flowmeter with Flange Connection for Water Applications	/ 597
SI-02 / Electromagnetic Flowmeter with Flange Connection for General Industrial Applications	/ 601
MU-5000 / Measuring Transmitter for Flowmeters Series SI-01 and SI-02	/ 607

Oval Gear Flowmeters /

VO-01 / Oval Gear Flowmeter made of Polypropylen, ECTFE or Stainless Steel	/ 611
VO-02 / Miniature Oval Gear Flowmeter	/ 615

Gear Wheel Flowmeters /

VM-01 / Low-Cost Gear Flowmeter for Viscous Media	/ 619
SD-01 / Plug-In Display for Gear Flowmeters	/ 623
VM-04 / High-Precision Gear Flowmeter for Viscous Media	/ 625

Screw-Type Flowmeters /

VS-02 / Low-Cost Screw-Type Flowmeter made of Aluminum for High Flow Rates / 633

Piston Flowmeters /

VZ-01 / Oil Counter for Media from Light to Heavy Fuel Oil / 637

Thermal Flow Measurement and -monitoring for Gases /

GM-10N / Battery-Operated Thermal Mass Flowmeter for Gases / 645

GR-02 / Thermal Mass Flowmeter for Gases with Intelligent Communication / 649

GS-01N / Counter for Compressed Air, Argon, Nitrogen or CO₂ / 653

GM-50 / Air Velocity Transmitter to Plug or Screw in Pipes or Ducts / 659

Temperature

Resistance Thermometers /

PT-00 / Clamp-On Resistance Thermometer for Flat Surfaces or Pipes / 671

PT-01 / Resistance Thermometer with Plug Connection / 673

PT-02 / Resistance Thermometer with Connection Head / 665

PT-03 / Resistance Thermometer or Thermocouple with Cable Connection / 669

PT-05N / Resistance Thermometer in Wall-mounted Housing / 671

PT-06 / Resistance Thermometer for Pipes / 673

PT-07 / Resistance Thermometer for Ambient Temperatures / 675

Digital Thermometers /

TD-01 / Digital Thermometer with Rigid or Flexible Connection / 677

Gas Expansion Thermometers /

GT-04 / Gas Expansion Thermometer of all sizes with Rigid or Flexible Connection / 681

Bimetallic Thermometers /

BT-01 / Bimetallic Thermometer made of Brass or Stainless Steel / 689

Industrial Thermometers /

MT-01 / Industrial Thermometer with Stem made of Brass, Steel or Stainless Steel / 693

Thermal Elements /

TE-01 / Thermocouple for Vertical or Horizontal Mounting / 695

Temperature Labels /

TA-17 / Temperature Labels for recording of Overheating / 701

Temperature Switches /

TS-01 / Temperature Switch to Screw-In / 705

TS-03 / Wall-Mounting Thermostat with Rigid or Flexible Connection / 707

Infrared Thermometers /

IR-03 / Compact Infrared Thermometer / 713

IR-04 / Infrared Thermometer / 715

Temperature- and Humidity Sensors /

RF-01N / Transmitter for Relative Humidity and Temperature / 719

Accessories

Mechanical Accessories /

BE-01 / Unimpeded Flow Section for Flowmeters	/ 723
WS-64 / Adapter	/ 725
SR-61 / Siphon	/ 727
BG-01 / Flow Limiters from 1 l/min up to 30 l/min	/ 729
BG-03 / Flow Limiters from 1 l/min up to 390 l/min	/ 731
FT-01 / Strainer with or without Magnet Separator	/ 733
NV-01 / Needle Valve made of Brass or Stainless Steel	/ 737
PV-01 / High-Precision Control Valve for Gases and Liquids	/ 739
KG-01 / Ball Valve in Brass or Stainless Steel	/ 743
AH-65 / Manometer Gauge Stopcock according to DIN 16262 A/B & 16263	/ 745
AV-67 / Manometer Gauge shut-off Valve according to DIN 16270 A & 16271 A	/ 747
RS-68 / Shock Preventer	/ 749
GH-01 / IP66 Polyester Housing 55 x 55 x 37 mm	/ 751

Accessories

Electrical Accessories /

UM-01 / Universal Transmitter for RTD, TE, Ohm, Potentiometer mA and mV	/ 753
UM-05 / Universal Transmitter for Rail mounting	/ 757
AZ-02N / Universal Display for Current, Voltage, Resistance (Thermometers), Thermo Elements and Frequencies	/ 761
MSR / Contact Network Relais for REED Switches, one- or two-channel	/ 767
MV-01 / 2/2-way Solenoid Valve for Fluids	/ 771
PR-5225 / Railmounted F/F- or F/I-Converter	/ 777

LR-56

Radar level transmitter with two-wire technology

Features

/ Robust St. Steel Construction

/ 78 GHz high frequency

/ Beam angle

/ Aimer flange for adjustment

/ Purge plug for cleaning

/ LDI for on-site maintenance

Description:

The LR-56 is a 78 GHz FMCW-radar level-sensor based on two-wire technology for ranges up to 100m. Different than an impulse radar, a FMCW-radar sends out a continuous, modulated frequency. The reflected waves are received by the device and, using the time difference between the send and received signals, the level in the tank is being calculated. At this high frequency of 78 GHz, the signal, prior to being send, has to be transformed into an almost time-linear saw-tooth-frequency, to make calculations easier. As a radar sends out electromagnetic waves, the pulses are not slowed down on their way to the medias surface, regardless of the nature of gas between transmitter and media. The LR-56 offers a 4...20 mA two-wire output which displays the level, distance to media surface or capacity in a linear way. A purge plug for self-cleaning from extremely sticky materials is available. An aimer flange can be chosen to adjust the beam angle more precisely, eg. on the outlet. Programming and diagnosis on site is made possible through a local display and input-possibilities, while a remote hand-held unit could also be used for easier access from a distance.

Application:

The range of application for the LR-56 radar-level sensor starts where the ultrasonic- and common radar-pulse level measuring reach their capabilities. As electromagnetic instead of sonic waves are used, temperature, pressure and material of the gasphase above the media do not influence the measuring quality. Foam or dust on the medias surface do not change the quality much either, or can at least be easily overcome, without significant damping of the signal. The quick response of the LR-56 is ideal for most applications with bulk goods, even for extreme dust generating materials and high temperatures up to 200 °C (+392 °F). Bulk goods can be measured to a height of 100 m. The main application areas are: pulverized cement, plastics (pulverized or granulated), grains, coal, woodchips or flue ash.

Technical Specifications:

Meas. principle /	radar-level monitoring	
Frequency /	78 GHz	
min. Distance /	400 mm from sensor	
max. Distance /	40 m or 100 m	
Output /		
Analogue:	4...20 mA	
Communication:	Standard: HART Optional: PROFIBUS PA	
Fail safety:	programmable for max, min or hold (loss of echo), NE43	
Ambient temp. /	-40...+80 °C	
Processtemp./pressure/	40m	100m
Stainless steel: -1 ... 0.5 bar -1 ... 3.0 bar	-40 ... +100 °C (-40 ... +212 °F)	-40 ... +200 °C (-40 ... +392 °F)
Aimer flange: -1 ... 0.5 bar	-40 ... +100 °C (-40 ... +212 °F)	-40 ... +200 °C (-40 ... +392 °F)
Aimer flange: -1 ... 3.0 bar	-40 ... +100 °C (-40 ... +212 °F)	-40 ... +120 °C (-40 ... +248 °F)
Accuracy /	5 mm	
Performance (according to reference conditions IEC60770-1) /	Maximum measured error (including hysteresis and non-repeatability): 5 mm (0.2 inch)	
Dielectric constant ϵ_r/	> 1.6	

Housing /

Material:	stainless steel 1.4404
Cable gland:	M20 x 1.5 or 1/2" NPT via adapter
Purge plug:	1/8" NPT, 30 cfm at max 100 psi
Antenna:	40 m version: PEI 100 m version: PEEK a cleansing of only a few seconds every hour is recommended
Protection class:	Typ 4X/NEMA 4X, Typ 6/NEMA6, IP68 with closed lid
Weight:	3.15 kg incl. 3" flange
Display:	graphic-LCD with bar-graph for the portrayal of level

Process connection /

Universal-flanges:	80, 100, 150 mm st. steel 1.4301; 80, 100, 150 mm st. steel 1.4404 or 1.4435 fitting EN 1092-1 (PN 16)/ASME B16.5 (150 lb)/JIS 2220 (10K)
Aimer flange:	80, 100, 150 mm aluminium with polyurethane-powder coating

¹⁾ Under severe EMI/EMC environments per IEC61326-1 or NAMUR NE21, the device error may increase to a maximum of 25 mm (1 inch)

Electrical Specifications:

Power supply /

4...20 mA/HART:	nominal DC 24 V (max. DC 30 V) with max. 550 Ω
PROFIBUS PA/ Foundation Field Bus:	13.5 mA DC 9...32 V, via IEC 61158-2

Certificates/approvals /

SE-02

Ultrasonic Level Sensors in 2-wire Technology

Features

- / Fluids and bulk solids
- / Non-contacting
- / 4...20 mA output
- / HART[®] communication
- / Low energy consumption
- / Cable lengths up to 1000 m
- / PLC connection
- / IP68
- / ATEX approval optional

Description:

The operating principle of SE-02 level sensors is based on ultrasonic technology. Piezoelectric crystals are electrically incited to emit ultrasonic pulses, which run from the sensor to the surface of the fluid or bulk solid and back again. The SE-02 measures the time, the pulse needs for this distance and evaluates herefrom the distance between sensor and surface. The integrated transmitter generates a 4...20 mA output signal, that is proportional to distance, level, space or volume, whatever has been programmed while setting up the SE-02 via any HART modem and the PC software, which is part of the shipment. The unit provides also a 'fault condition' alarm of either 3.8 mA or 22 mA. The low blank distance of 0.125 meter demonstrates the high performance of SE-02 series. Not only the intelligent electronic of the sensors, but the extremely narrow sound beam, and the insensibility against clutter due to inbuilt components of the container predestine the sensors for a wide range of industrial applications. The SE-02 units are available with a cable-sided 1" male thread, with front threads or front flanges, thus allowing convenient assembly.

Application:

Wherever non-contacting measurement is required, the Profimess' ultrasonic level sensors of the SE-02 series may be used. The units are able to output a signal, that is proportional to level, distance, free space or volume, thus the user can teach in the relation between the shape of the container and the distance between sensor and surface via 16 pair of values. Due to its protection class of IP68 the SE-02 is particularly demanded for water and wastewater applications.

Technical Specifications:

Functions /	level, distance, empty space, volume and linearisation using 16 breakpoints
Material housing /	Valox 357 PBT Optional: PVDF
max. Ambient pressure /	5 bar
Operating temp. /	-40...+80°C
Connection /	1" NPT / BSP male thread on cable device side (front thread or flange optional)
Operating range /	Typ A = 0.125...3 m Typ B = 0.3...6 m Typ C = 0.3...10 m Typ D = 0.5...15 m Higher ranges on request
Frequency /	Typ A = 125 kHz Typ B = 75 kHz Typ C = 50 kHz Typ D = 41 kHz
Sound exiting cone /	< 10°
Measurement uncertainty /	0.25 % of measuring range
Resolution /	Typ A = 2.0 mm Typ B = 2.0 mm Typ C = 2.0 mm Typ D = 2.0 mm
Options /	- sensor face soft foam coating for - type B, C and D or PTFE for unting flange - 1.5" NPT front male thread - 2" NPT front male thread - flood protection head - flange version: DN 50 / DN80 / DN 100 / DN 150 DN 200 ANSI 2" / 3" / 4" / 6" / 8" - ATEX version

Electrical Specifications:

Supply voltage /	10...28 VDC
Output /	4...20 mA (3.8...22 mA) HART® - loop powered (2-wire)
Configuration /	PC software for parameter setting and linearisation via HART® communication (HART® - communicator not included).
Start up time /	4 sec. typical (9 sec. after 12 hours without activity)
Cable length /	5 m, 10 m 20 m, 30 m, 50 m or 100 m (special lengths optional)
Protection class /	IP68
Approvals for	II 2 GD Ex m IIC T4
Ex-versions /	II 1 GD Ex ia IIC T4

Dim., Mounting Thread, front side:

Sensor Type A and Type B

Sensor Type C

Dim., Mounting Thread, cable side:

Sensor Type A

Sensor Type B and Type C

Sensor Type D

Outdoor and open Vessel installation:

Mounted via rear 1" NPT thread

Mounted via optional front thread

The SE-02 ultrasonic sensors can be simply mounted on a bracket, suitable for the application and secured using either the 1" NPT rear or via the 1.5" or 2" front thread, dependant on model. Care should be taken to ensure that the SE-02 sensor is not installed in direct sunlight, in order to avoid errors in the measurement of ambient temperature. Attention should also be taken, when mounting the unit, to ensure that strong windy conditions are avoided, wherever possible, to prevent abnormal operation.

Table 1: Minimum sensor distance

Sensor	Operating range	L = min. Distance
Type A	3 m	125 mm
Type B	6 m	300 mm
Type C	10 m	300 mm
Type D	15 m	500 mm

Closed Vessel installation:

Flange mounted via front thread to a stand pipe

Optional flange mounted to a stand pipe

When mounting the ultrasonic sensor to a stand pipe care should be taken to ensure that the standpipe is of sufficient diameter with reference to its length, see table 2 for details. When using a standpipe, fixed to the top of a vessel, ensure that the open end of the standpipe is clear of any obstructions such as weld seams, gaskets etc. in order to avoid unwanted signal returns.

Table 2: Dimensions standing pipe

Diameter (D)	max. Length (L)
80 mm	220 mm
100 mm	300 mm
150 mm	420 mm
200 mm	560 mm

ECHO-N

Universal Ultrasonic Level-Sensor

Features

- / Contactless measurement
- / No mechanical parts
- / Maintenance and wear-free
- / Simple installation
- / Easy calibration
- / Temperature-compensated

Description:

ECHO-N type ultrasonic level sensors are used when fluids and bulk goods need to be measured continually. The sensor works according to the principle of runtime method. It emits ultrasonic signals and subsequently measures the time elapsed until it receives again the echo reflected by the media surface. The echo runtime is proportional to the distance between the sensor and the medium and, therefore, to the level. Temperature influences are automatically compensated. By means of the Sonic Intelligence echo processing algorithms a filter discriminates between the true echo and false echos caused by electrical noises, acoustic or agitators. The device is supplied as a compact unit in a water-proof plastic housing. A display unit, the connecting terminal and 2 programming keys are located below a cover flap.

Application:

Ultrasonic level sensors are used wherever contamination and conditions of coldness, heat and humidity pose a problem to conventional measuring systems. By deploying ECHO-N, already occupied and soiled probes, hardened membranes, clogged floaters, leaking bubbling-through measuring systems and continual readjustments are a thing of the past. Key applications are: storage vessels, filter beds, waste water pits, food applications.

Electrical Connection:

Display

Mounting:

Location for installation

The ECHO-N must be installed in such a way to allow the sound without obstructions to reach at right angle to the surface of the medium. In any case, there must be a clearance of 250 mm between the lower edge of the sensor and maximum expected level. Distance must be maintained from obstructing structures like wires, tubes, strutting and strong welding seams.

Electrical Specifications:

Power supply /	12 ... 30 VDC, 0.1 A peak
Consumption /	max. 0.75 W, (25 mA at 24 VDC)
Output signal /	4 ... 20 mA, 2-wire
Load /	max. 600 Ω at 24 VDC
Electrical connection /	terminal block
Certificates /	CE, CSA _{US/C}

Technical Specifications:

max. Pressure /	ambient pressure
max. Ambient-temp. /	standard: -30 ... +60°C installation with metal-thread: -20 ... +60°C
Measuring range /	0.25 ... 5 m at 54 kHz
Operating range /	proportional / inversibly proportional
Display /	3-digit LCD-display
Weight /	1.3 kg without flange adapter 1.5 kg with flange adapter
Accuracy /	0.25% of operating range (in air)
Resolution /	3 mm
Temp. compensation /	built in
Beam angle /	12°
Protection /	IP68 / NEMA 6 / TYPE 6
ATEX (on request) /	II 1G Ex ia IIC T4 Ga
Material /	electronic enclosure: PBT transducer: PVDF Copolymer
Process connection /	2" NPT (Taper), ANSI/ASME B1.20.1 R2" (BSPT) EN 10226 G2" (BSPP), EN ISO 228-1 4" sanitary
Flange adapter /	3" universal (fits DN65 PN10 and 3" ASME)
Cable inlet /	1 inlet for M20, optional 1/2" NPT

FU-01

Ultrasonic Level Limit Switch

Features

- / Contactless
- / Bulk goods and fluids
- / Simple commissioning
- / 2 relay contacts or
2 transistor outputs
- / Electronics provided with
fail-safe function

Description:

The FU-01 is a level switch that works without contact to the media. The sensor and evaluating electronic components are located in a housing. Continually emitted ultrasonic signals strike the surface of the measuring medium, are reflected by it and again received as echo. The signal runtime is measured and interpreted as the distance. The device has two setpoints which can be programmed as alarm functions (e.g. Max/Max, Max, Min or Min/Min). As a standard, these outputs are designed as potential-free relay contacts. However, optionally, they can be supplied in transistor version. Complete parameterizing for the FU-01 is operator-friendly as only two keys need to be operated. Current measurement and operating status are displayed on an LCD display unit.

Application:

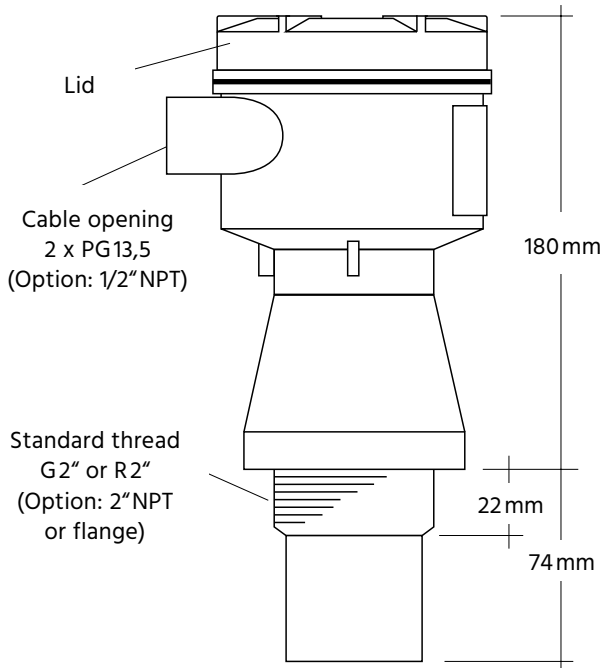

The FU-01 series of ultrasonic level switches is used wherever contactless measuring is advantageous. Typical applications are, for example, in water and effluent management, for bulk goods or in sewage treatment plants. As far as level monitoring is concerned, problems caused by soiling, blockages or corrosion belong therefore to the past.

Technical Specifications:

max. Pressure /	0.5 bar
max. Operating temp. /	-40...+60°C, (for mounting in metal bushing -20...+60°C)
Operating range /	0.25 m to 3 m for bulk goods, 0.25 m to 5 m for fluids and slurries
Operating modes /	Max, Min, Max/Max and Min/Min
Housing /	polycarbonate
Sensor /	Kynar (PVDF) or Tefzel (ETFE)
Weight /	1,5 kg (polycarbonate)
Accuracy /	0.25% of the operating range
Resolution /	3 mm
Beam angle /	12°

Dimensions in mm:

Electrical Specifications:

Display /	3-digit LCD, height 9 mm, to display the distance between sensor and medium, multi-segment graphic for showing the operating status
Operation /	two keys
Protection class /	IP67 / Typ 6 / NEMA 6

Outputs:

Relay output

+ or - DC18 to 30V Two Form 'C' (SPDT) relays can switch external devices such as alarms, relays, contractors, PLCs, DSCs, etc.

Transistor Output: DC version only

Two non-polarized transistor outputs are suitable for connection to PLCs, DSCs, or customer supplied relays.

Ordering Codes:

FU-01 Ultrasonic Level Limit Switch					
Material /	1 = Tefzel (ETFE) 2 = Kynar-Flex (PVDF)				
Process connection /	1 = 2" NPT [(conic), ANSI/ASME B1.20.1] 2 = G2" [(BSPP), EN ISO 228-1] 3 = 4" Tri-Clamp, sanitary version (only for PVDF) 4 = flange assembly (specify flange in detailed text, min. DN80) 5 = R2" [(BSPT), EN 10226]				
Housing /	1 = polycarbonate				
Supply /	1 = 24VDC, with 2 potential-free relay outputs 2 = 24VDC, with 2 transistor outputs 3 = 100 to 230VAC, with 2 potential-free relay outputs				

Mounting:

Mounting on a parabolic roof

Mounting on a flat roof and sound cone

Please mind to install the FU-01 not in range of possible disturbances, like high-voltage- or motor-cables, noise protection or frequency converters. Also, make sure, the sound cone can reach the surface of your medium in an 90° angle, while keeping your distance to the filling, welding seams, ladder spokes and so on.

Mobrey™ 003

Ultrasonic Liquid Level Switch with Dual Thread Mounting

Features

/ 1" or 3/4" threaded mounting

/ Relay or Transistor output

/ 24V AC or DC powered

/ Corrosion resistant

PPS construction

/ Small in-tank dimensions

/ No moving parts

Description:

The moulded body contains two piezo-electric crystals on each side of the gap at the tip of the sensor. An ultrasonic signal is transmitted from one crystal into the gap. If there is air or gas in the sensor gap, the signal is not received by the other crystal. If there is liquid present, the signal will be transmitted across the gap, and the integral electronics will switch the output circuitry to signal the presence of a liquid.

Application:

The Mobrey™ 003 is manufactured in Polyphenylene Sulphide (PPS). It is corrosion resistant in many liquids and can be used even in aggressive liquids such as acids and lyes. The sensor can be mounted in any position in a tank using the 1" or 3/4" BSPT or the 1" NPT threads available. A thread is provided on each side of a hexagonal boss to allow external or internal pole mounting of the sensor. Comprising a one piece moulded body with integral pcb, the Mobrey™ 003 switch is factory sealed and supplied with 10ft (3m) flying lead for customer connection. The Mobrey™ 003 switch meets the EU regulation, is powered with 24 VAC or DC and can be used for high or low level alarm duties to give a voltage free changeover contact or dual solid state transistor output. Typical applications are: low level alarms in header tanks, pump control duty in feeder tanks, high and low alarms in storage tanks, level and pump control in storage tanks and small or thin wall tanks.

Technical Specifications:

Operating pressure /	5 bar
Operating temp. /	-20...+70°C (003S) -40...+105°C (003H)
Ambient temp. /	-20...+70°C (003S) -40...+70°C (003H)
min. liquid specific gravity /	0.50 g/cm ³
max. Viscosity /	5000 cSt. at +20°C
Switching response /	50 ms dry - wet, 0.5 s wet - dry
Hysteresis /	< 4 mm
Repeatability /	± 2 mm
Overall length /	110 mm
Length into tank /	79 mm (ext. mount)
Body diameter /	22 mm
Body material /	Polyphenylene Sulphide (PPS Ryton)
Weight /	200g

FM-01F

Magnetostrictive Level Sensor

Features

- / Simple installation and configuration
- / Insensitive against vibration
- / 2-wire connection 4 to 20 mA
- / HART[®]-protocol optional
- / ATEX- and IECEx zone 0
 - / Up to 450°C
 - / Up to 120 bar
- / Up to 13 meter insertion length
- / Inst. kits offer sensor protection
- / Additional measuring of interface

Description:

A float carrying a permanent magnet moves along a slider tube carried by the fluid level up and down. A magnetostrictive wire is built into this tube through which the electronic components transmit short current impulses that are surrounded by a ring-shaped magnetic field. When this field strikes the static magnetic field of the floater magnet, it results into a torsion impulse that travels in the direction of the sensor head at ultrasonic speed and gets recognized. The time between transmission of current and arrival of the impulse is directly proportional to the distance of the floater which is, therefore, the level. This is measured and converted into a 4-20 mA current signal and is available at the output of the device. On request, the FM-01F can also interrogate two floats at the same time and so the additional interface measurement via HART[®]-Protocol can be realized, even if the interface is an emulsion or a low difference in DK value is present.

Application:

The sensor is used where small and medium levels of even hostile media are measured. The magnetostrictive principle of measurement guarantees maximum accuracy and excellent resistance and strength due to its hermetically sealed stainless steel construction. For applications in liquified gas, in extremely aggressive liquids or mechanically harsh environments, installation kits are available that can be permanently installed with the container. In these fittings, the actual sensor is simply inserted from the outside and has no contact to the interior. Versions with sliding tube of twelve millimeters or six millimeters in diameter which are arranged centrally, laterally or angled at 90 degrees and a flexible design with installation lengths up to 13 meters qualify the FM-01F particularly for use in the chemical and pharmaceutical industry, in biotechnology plants, and pulp, paper and food industries. In case of an installation in hazardous areas, the sensor can be supplied with ATEX and IECEx approval for zone 0.

Versions & installation kits:

FM-01F Magnetostrictive Level Sensor

The standard version of the FM-01F has a centrally arranged sliding tube of 12 mm diameter and a float which is selected according to the specific weight of the medium and resistance to the medium. This sensor is mounted with a compression fitting with stainless steel cutting ring up to 40 bar or a compression fitting with PTFE-clamping ring up to 1.5 bar, making it adjustable in the immersion depth.

For higher process pressures the FM-01F is supplied with a hermetically welded thread or flange and thus can be used up to 120 bar. For limited space a variant with 90 degrees angled sliding tube is available. Mounting to magnetic level gauges (e.g. Profimess MA-400) is enabled by the execution with laterally arranged sliding tube. When the FM-01F is mounted with pipe clamps closely attached to the measuring chamber of the magnetic level indicator the internal float of the magnetic level gauge is detected. Appearances in small laboratory containers with little mounting space are possible by using the variant of the FM-01F with 6 mm sliding tube, which may be arranged centrally or sideways, depending on requirements.

On particularly high containers no gauges with rigid sliding tubes can be used, because on the one hand they can no longer be transported on trucks, but also the assembly effort is very high. In this case, the variants of the FM-01F provide the flexible design (FLEX). The sensor is simply rolled up for transport and unrolled again for installation, so that installation lengths up to 15 meters can be achieved. A load weight on the end of the probe ensures a taut position of the probe, so that the float can move freely.

Function:

As accessories installation kits are available. They consist of a casing pipe with process connection and a float. They are installed in the tank and the magnetostrictive transmitters are introduced from outside. The FM-01F now detects the magnets of the inner float through the pipe wall of the installation kits and measures the level of the liquid inside. In this case, the FM-01F does not come into contact with the medium.

Aggressive liquids:

To detect the level of aggressive fluids installation kits made from PP or PVDF are available. The liquid to be measured here comes in contact exclusively with the selected plastic.

Portable tanks:

Installation kits offer an optimal solution for applications where containers or barrels have to be delivered from supplier to customer. The level can be monitored here both on the supplier side during filling, as well as on the customer side when emptying, without the need of opening the container.

Pressure tanks:

When using installation kits, the FM-01F is in unpressurized area. A pressure test may thus be carried out without the mounted FM-01F. The level sensor can be retrofitted or replaced without opening the container once more.

Installation kits:

Installation kit for LPG-Tanks

Length /	150 mm to 4500 mm

Table Floats:

Depending on the application, different types of floats are available. The necessary ring magnet for the contactless transmission of the level is installed in the float and thus has no contact with the medium. The selection of the float depends on the process conditions (medium, pressure and temperature).

Media spec. weight	min. spec weight	Temperature range	Operat. press. max.	A (mm)	H (mm)	C (mm)	Shape*	Type

Heavy-Duty installation kit

FM-02N

Level Measuring Transmitter for Continual Level Recording

Features

- / Level meas. irrespective of foam, conductivity, pressure and temperature
- / Remote display over extremely large distances
- / Simple assembly, only one-time balancing on commissioning
- / Separation layer measurement of fluids of diff. densities possible
- / Level recording even in narrow spaces, semi-flexible transmitter
- / Measuring transmitter for food applications in 3-A version

Description:

The FM-02N series of level measuring transmitters operates according to the principle of float with magnetic transmission. The float is raised by increasing fluid level in the vessel; subsequently due to the magnetic field of a permanent magnet located within the float it actuates the contacts of a reed contact/resistance chain in the sliding tube. The output signal is therefore a potentiometer value or a 4...20 mA-signal proportional to the level.

Application:

The FM-02N level measuring transmitters are suited for measuring and monitoring the level of nearly all types of fluid media that are not hostile to the materials being used in vessels up to a height of 10 m.

Function:

A ring magnet mounted inside the float actuates with its magnetic field passing through the sliding tube's wall tiny reed contacts which continually tap the measuring voltage on a resistance measuring chain (voltage dividers). This is proportional to the height of the level. The resistance measuring chain is very closely stepped and consists of small chips that are soldered on a PCB. Due to this type of construction the resulting measuring voltage is almost continual. Depending on the design of the measuring transmitter grids (distance from chip to chip) of 5 to 15 mm are available.

internal circuit diagram
level measurement emitter

Accuracy:

Due to the functioning principle of the level measuring transmitter the measuring accuracy cannot be specified as a constant. It rather depends on the measuring length and the grid measuring chain being used. The maximum measuring error can be calculated on the basis of the following equation

$$\frac{\text{Grid}}{\text{Meas. length in mm}} \times 100 \quad \text{e.g.} \quad \frac{12.7 \text{ mm}}{2000 \text{ mm}} \times 100 = 0.635\%$$

Versions:

Every level measuring transmitter consists of following 4 main component groups which are available in different versions depending on the technical requirements:

- sliding tube
- measuring chain
- float
- process connection

Secondary instrumentation such as measuring transmitter, limit value emitter, displays and isolated transmitters (Zener barrier) complete the entire measuring system.

Sliding tube:

The sliding tube is the core of the level measuring transmitter as it holds the measuring chain and it can be supplied in a number of materials, diameters and grid dimensions.

Material and diameters:

- st. steel (Ø 12 mm, 14 mm, 16 mm, 18 mm, 40 mm)
- st. steel ECTFE-coated (Ø 11 mm, 17 mm)
- st. steel PFA-coated (Ø 11 mm, 17 mm)
- Titanium (Ø 12 mm, 14 mm, 18 mm)
- Alloy C (Ø 12 mm, 18 mm)
- PVC (Ø 12 mm, 16 mm, 20 mm)
- PP (Ø 12 mm, 16 mm, 20 mm)
- PVDF (Ø 12 mm, 16 mm, 20 mm)

Grid:

Depending on the diameter and the length of the sliding tube and the version of the FM-02N the following grids of the measuring chain can be supplied: 5 mm, 10 mm, 12.7 mm and 15 mm. The steps 5 mm, 10 mm and 15 mm can additionally be supplied as high-temperature- version HTF and HT (please check table below)

Grid	Resolution (mm)	Temp. range (mm)
5	5 mm	-30...+130°C
5HTF	5 mm	-30...+200°C
5HT	5 mm	-40...+250°C
10	10 mm	-30...+130°C
10HTF	10 mm	-30...+200°C
10HT	10 mm	-40...+250°C
12.7	12.7 mm	-30...+130°C
15	15 mm	-30...+130°C
15HTF	15 mm	-30...+200°C
5HT	5 mm	-40...+250°C
0.2	0,2 mm	-30...+125°C
0.2HT	0,2 mm	-40...+250°C

Float:

Each version has a matching float. However, if the application requires other values in terms of maximum pressure, temperature or low specific gravity, an alternative float can also be fitted in as far as it fits with its bore on the sliding tube of that version. The table 1 and 2 provides an overview of spherical and cylindrical floats, their dimensions, weights and immersion depths.

Output Signal:

In the basic version the FM-02N provides at its cable heads or terminals a potentiometer signal. The resistance change is proportional to filling or to empty level. By a head transmitter (firmly mounted in the terminal box) or a remote transmitter in a cabinet or wall mounted as the proven Profimess UM-01, the resistance reading can be converted into a 4...20 mA 2-wire signal. This transmitter can also be approved according to ATEX for use in explosion-proof areas upon request, and provides in this case an intrinsically safe circuit. It can also be HART-capable or satisfy the Fieldbus Foundation- or the Profibus-protocol on request. A flameproof enclosure for Ex-d applications can also be installed.

Switching contacts Level:

In addition to the level-proportional output signal the FM-02N can be equipped with a level switching contact. This is defined as NO or NC with increasing level. The following switching values are based on:

Function	Closer - NO	Opener - NC	Switch
Switch. voltage	230 V	230 V	230 V
Switch. current	1.0 A	0.5 A	0.5 A
Switch. load	100 VA	40 VA	40 VA

Switching Contacts Temp.:

In addition to the level-proportional output signal the FM-02N can be equipped with a temperature switching contact. This is defined as NO or NC with increasing temperature. The following switching values are based on:

Function	Closer - NO	Opener - NC
Switch. rating	230 V / 0.5 A / 40 VA	230 V / 0.5 A / 40 VA
Range	+80...+160°C	+50...+160°C
Graduation	all 5 K	all 5 K
Accuracy	± 5 K	± 5 K
Hysteresis	30 K ± 15 K	30 K ± 15 K

Temperature Sensors:

In the sliding tube of the FM-02N an additional temperature sensor can be installed as a Pt100 or Pt1000. The measuring resistors meet the following specifications:

Function	Pt100	Pt1000
Operating temperature	-70...+400°C	-70...+400°C
Tolerance	Class B	Class B
Properties	acc. to IEC 751	acc. to IEC 751
Wiring	2-, 3-, or 4-wire	2-, 3-, or 4-wire

Process Connection:

Various options are available as mechanical and electrical connections to the transducer. The following pages offer an overview about which version suits to which process connections. Depending on whether the float fits through the threaded bore or not, the connecting threads are directed in different versions. "Up" installation through the interior, or "down" for the installation from the outside. If the electrical connection is realized via a cable, the maximum temperature on the cable sheath must be taken into account. Standard cable with PVC sheath ranges from -20...+80°C, the version with silicone sheath ranges from -60...+180°C. Other materials such as Teflon cord can also be offered on request for temperatures up to +200°C.

Conn. Type K
connecting cable

Material: acc. to cable definition
Cable gland: PG or M
Protect. cl.: IP55 (optional IP68)
Amb.temp.: -40...+200°C

Conn. Type E
Aluminium terminal box

Material: Al coated RAL 7001
Cable gland: M20 x 1.5
Protection class: IP65
Amb.temp.: -40...+100°C

Conn. Type F
Aluminium terminal box

Material: Al coated RAL 7001
Cable gland: M20 x 1.5
Protection class: IP65
Amb.temp.: -40...+100°C

Conn. Type DA (Exd)
Aluminium terminal box

Material: Al coated RAL 9006
Cable gland: M20 x 1.5
Protection class: IP68
Amb.temp.: -40...+100°C

Level transmitter made of st. steel with thread facing upwards

Version: VAG38PVC

Version: VAG38SIL

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti)
El. Connection /	PVC connecting cable
Process conn. /	G3/8"-male upwards
Sliding tube /	∅ 12 mm for grid 10 mm, 12.7 mm & 15 mm, ∅ 14 mm for grid 5 mm
insert. Length /	≤ 5000 mm
Float /	Z44G15E
sp. Weight /	≥ 800 kg/m ³
Design press. /	-1. . . +25 bar
Design temp. /	-20. . . +80°C
Protection class /	IP55 (optional IP68)
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7

Option

Temp. sensor / Pt100 / Pt1000 IEC 751 Cl. B

Option

Temp. contacts / NO or NC

min. Dimens. / L1 ≥ 50 mm, U = 45 mm

poss.

Approvals / ATEX, PED, GOST, GL, BV, ABS, WHG

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti)
El. Connection /	silicone connecting cable
Process conn. /	G3/8"-male upwards
Sliding tube /	∅ 12 mm for grid 10 mm, 12.7 mm & 15 mm, ∅ 14 mm for grid 5 mm
insert. Length /	≤ 5000 mm
Float /	K52G15E
sp. Weight /	≥ 700 kg/m ³
Design press. /	-1. . . +40 bar
Design temp. /	-40. . . +180°C
Protection class /	IP55 (optional IP68)
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 5HT, 10HT, 15HT, 5HTF, 10HTF, 15HTF

Option

Temp. sensor / Pt100 / Pt1000 IEC 751 Cl. B

Option

Temp. contacts / NO or NC

min. Dimens. / L1 ≥ 55 mm, U = 45 mm

poss.

Approvals / ATEX, PED, GOST, GL, BV, ABS, WHG

**Level transmitter made of st. steel with downward facing thread**

Version: VAG112G

Version: VAG2G

**Technical Specifications:**

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti)
El. Connection /	Type E Aluminium terminal box
Process conn. /	G1 1/2"-male downwards
Sliding tube /	∅ 12 mm for grid 10 mm, 12.7 mm & 15 mm, ∅ 14 mm for grid 5 mm
insert. Length /	≤ 5000 mm
Float /	Z44G15E
sp. Weight /	≥ 800 kg/m ³
Design press. /	-1. . . +25 bar (depending on temp.)
Design temp. /	see table Grid
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HT, 10HT, 15HT, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B
Option	
Temp. contacts /	NO or NC
min. Dimens. /	L1 ≥ 50 mm, U = 45 mm
poss.	
Approvals/	ATEX, PED, GOST, GL, BV, ABS, WHG

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti)
El. Connection /	Type E Aluminium terminal box
Process conn. /	G2"-male downwards
Sliding tube /	∅ 12 mm for grid 10 mm, 12.7 mm & 15 mm, ∅ 14 mm for grid 5 mm
insert. Length /	≤ 5000 mm
Float /	K52G15E
sp. Weight /	≥ 700 kg/m ³
Design press. /	-1. . . +40 bar (depending on temp.)
Design temp. /	see table Grid
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HT, 10HT, 15HT, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B
Option	
Temp. contacts /	NO or NC
min. Dimens. /	L1 ≥ 55 mm, U = 45 mm
poss.	
Approvals/	ATEX, PED, GOST, GL, BV, ABS, WHG

Level transmitter made of st. steel with flange connection

Version: VAF80D18

Version: VAF80D40

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti)
El. Connection /	Type E Aluminium terminal box
Process conn. /	Flange EN DN80 / PN16 / Form B1
Sliding tube /	∅ 18 mm
insert. Length /	≤ 6000 mm
Float /	K72G24E
sp. Weight /	≥ 620 kg/m ³
Design press. /	-1. . . +16 bar (depending on temp.)
Design temp. /	see table Grid
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HT, 10HT, 15HT, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B
Option	
Temp. contacts /	NO or NC
min. Dimens. /	L1 ≥ 60 mm, U = 60 mm
poss.	
Approvals/	ATEX, PED, GOST, GL, BV, ABS, WHG

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti)
El. Connection /	Type E Aluminium terminal box
Process conn. /	Flange EN DN80 / PN16 / Form B1
Sliding tube /	∅ 40 mm
insert. Length /	≤ 10.000 mm
Float /	K300G56E
sp. Weight /	≥ 500 kg/m ³
Design press. /	-1. . . +3 bar
Design temp. /	see table Grid
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HT, 10HT, 15HT, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B
Option	
Temp. contacts /	NO or NC
min. Dimens. /	L1 ≥ 70 mm, U = 90 mm
poss.	
Approvals/	ATEX, PED, GOST, GL, BV, ABS, WHG

Level transmitter made of st. steel - flexible

Version: VAF80FLEX

Version: VAG25FLEX

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti)
El. Connection /	Type E Aluminium terminal box
Process conn. /	Flange EN DN80 / PN16 / Form B1
Sliding tube /	∅ 16 mm
insert. Length /	≤ 10.000 mm
Float /	K72G24E
sp. Weight /	≥ 620 kg/m ³
Design press. /	-1. . . +16 bar (depending on temp.)
Design temp. /	see table Grid
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	12.7
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B

Option

Temp. contacts / NO or NC

min. Dimens. / L1 ≥ 60 mm, U = 60 mm
poss.

Approvals/ ATEX, PED, GOST

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti)
El. Connection /	Type E Aluminium terminal box
Process conn. /	G1"-male downwards
Sliding tube /	∅ 16 mm
insert. Length /	≤ 10.000 mm
Float /	K72G24E
sp. Weight /	≥ 620 kg/m ³
Design press. /	-1. . . +25 bar
Design temp. /	see table Grid
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	12.7
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B

Option

Temp. contacts / NO or NC

min. Dimens. / L1 ≥ 60 mm, U = 60 mm
poss.

Approvals/ ATEX, PED, GOST

Level transmitter made of st. steel - angled

Version: VAWG38SIL

Version: VAWF80G

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti)
El. Connection /	silicone connecting cable
Process conn. /	G3/8"-male upwards
Sliding tube /	ø 12 mm for grid 10 mm, 12.7 mm & 15 mm, ø 14 mm for grid 5 mm
insert. Length /	≤ 3000 mm
Float /	K52G15E
sp. Weight /	≥ 700 kg/m ³
Design press. /	-1. . . +40 bar
Design temp. /	-40. . . +180°C
Protection class /	IP55 (optional IP68)
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HT, 10HT, 15HT, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B
Option	
Temp. contacts /	NO or NC
min. Dimens. /	L1 ≥ 55 mm, U = 45 mm, C ≥ 70 mm
poss.	
Approvals /	ATEX, PED, GOST, GL, BV, ABS

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti)
El. Connection /	Type E Aluminium terminal box
Process conn. /	Flange EN DN80 / PN16 / Form B1
Sliding tube /	ø 18 mm
insert. Length /	≤ 6000 mm
Float /	K72G24E
sp. Weight /	≥ 620 kg/m ³
Design press. /	-1. . . +16 bar (depending on temp.)
Design temp. /	see table Grid
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HT, 10HT, 15HT, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B
Option	
Temp. contacts /	NO or NC
min. Dimens. /	L1 ≥ 60 mm, U = 60 mm, C ≥ 70 mm
poss.	
Approvals /	ATEX, PED, GOST, GL, BV, ABS

Level transmitter made of st. steel - with bypass housing

Version: VABHH

Version: VABHV

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti)
El. Connection /	Type E Aluminium terminal box
Process conn. /	Flange EN DN25 / PN16 / Form B1
Bypass /	∅ 60.3 mm
Mittenabstand /	M ≤ 1000 mm
Float /	Z44G15E
sp. Weight /	≥ 800 kg/m ³
Design press. /	-1...+16 bar (depending on temp.)
Design temp. /	see table Grid
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HT, 10HT, 15HT, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B
Option	
Temp. contacts /	NO or NC
min. Dimens. /	L1 ≥ 130 mm, U = 45 mm
poss.	
Approvals/	ATEX, PED, GOST, GL, BV, ABS

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti)
El. Connection /	Type E Aluminium terminal box
Process conn. /	Flange EN DN25 / PN16 / Form B1
Bypass /	∅ 60.3 mm
Mittenabstand /	M ≤ 1000 mm
Float /	Z44G15E
sp. Weight /	≥ 800 kg/m ³
Design press. /	-1...+16 bar (depending on temp.)
Design temp. /	see table Grid
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HT, 10HT, 15HT, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B
Option	
Temp. contacts /	NO or NC
min. Dimens. /	L1 ≥ 130 mm, U = 45 mm
poss.	
Approvals/	ATEX, PED, GOST, GL, BV, ABS

Level transmitter made of st. steel - 3A sanitary standard

Version: VASG38SIL

Version: VASMRG

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti) roughness depth wetted $\leq 0.4 \mu\text{m}$
El. Connection /	silicone connecting cable
Process conn. /	G3/8"-male upwards
Sliding tube /	$\varnothing 16 \text{ mm}$
insert. Length /	$\leq 5000 \text{ mm}$
Float /	K80G23E2
sp. Weight /	$\geq 750 \text{ kg/m}^3$
Design press. /	-1. . . +40 bar
Design temp. /	-40. . . +180°C
Protection class /	IP55 (optional IP68)
Mount. pos. /	vertical $\pm 30^\circ$
Grid /	5, 10, 12.7, 15, 5HT, 10HT, 15HT, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B
Option	
Temp. contacts /	NO or NC
min. Dimens. /	$L1 \geq 50 \text{ mm}$, $U = 55 \text{ mm}$
poss.	
Approvals /	ATEX, PED, GOST, GL, BV, ABS, 3A

Technical Specifications:

Material /	1.4404 / 1.4435 / 1.4571 (316L / 316Ti) roughness depth wetted $\leq 0.4 \mu\text{m}$
El. Connection /	Type VA st. steel terminal box
Process conn. /	cone acc. to 11851 with groove nut
Sliding tube /	$\varnothing 16 \text{ mm}$
insert. Length /	$\leq 5000 \text{ mm}$
Float /	K80G23E2
sp. Weight /	$\geq 750 \text{ kg/m}^3$
Design press. /	-1. . . +6 bar (depending on temp.)
Design temp. /	see table Grid
Protection class /	IP67
Mount. pos. /	vertical $\pm 30^\circ$
Grid /	5, 10, 12.7, 15, 5HT, 10HT, 15HT, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B
Option	
Temp. contacts /	NO or NC
min. Dimens. /	$L1 \geq 50 \text{ mm}$, $U = 55 \text{ mm}$
poss.	
Approvals /	ATEX, PED, GOST, GL, BV, ABS, 3A

Level transmitter made of brass

Version: MG38PVC

Version: MG112G

Technical Specifications:

Material /	brass, float made of BUNA
El. Connection /	PVC connecting cable
Process conn. /	G3/8"-male upwards
Sliding tube /	∅ 12 mm for grid 10 mm, 12.7 mm & 15 mm, ∅ 14 mm for grid 5 mm
insert. Length /	≤ 5000 mm
Float /	Z40G15NB
sp. Weight /	≥ 700 kg/m ³
Design press. /	-1...+6 bar
Design temp. /	-10...+80°C
Protection class /	IP55 (optional IP68)
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B

Option

Temp. contacts / NO or NC

min. Dimens. / L1 ≥ 30 mm, U = 50 mm
poss.

Approvals/ PED, GOST, GL, BV, ABS

Technical Specifications:

Material /	brass, float made of BUNA
El. Connection /	Type E Aluminium terminal box
Process conn. /	G1 1/2"-male downwards
Sliding tube /	∅ 12 mm for grid 10 mm, 12.7 mm & 15 mm, ∅ 14 mm for grid 5 mm
insert. Length /	≤ 5000 mm
Float /	Z44G15E
sp. Weight /	≥ 800 kg/m ³
Design press. /	-1...+25 bar
Design temp. /	-10...+150°C
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B

Option

Temp. contacts / NO or NC

min. Dimens. / L1 ≥ 65 mm, U = 45 mm
poss.

Approvals/ PED, GOST, GL, BV, ABS

Level transmitter made of Polyamide - flexible

Version: PAFG112G

Version: PAFG2G

Technical Specifications:

Material /	Polyamide / st. steel
El. Connection /	Type E Aluminium terminal box
Process conn. /	G1 1/2"-male downwards
Sliding tube /	ø 12 mm
insert. Length /	≤ 5000 mm
Float /	Z44G15E
sp. Weight /	≥ 800 kg/m ³
Design press. /	-1. . .+1 bar
Design temp. /	-10. . .+80°C
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	12.7
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B

Option

Temp. contacts / NO or NC

min. Dimens. / L1 ≥ 70 mm, U = 45 mm

poss.

Approvals/ GOST

Technical Specifications:

Material /	Polyamide / brass / st. steel
El. Connection /	Type E Aluminium terminal box
Process conn. /	G2"-male downwards
Sliding tube /	ø 12 mm
insert. Length /	≤ 5000 mm
Float /	K52G15E
sp. Weight /	≥ 700 kg/m ³
Design press. /	-1. . .+1 bar
Design temp. /	-10. . .+80°C
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	12.7
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B

Option

Temp. contacts / NO or NC

min. Dimens. / L1 ≥ 70 mm, U = 45 mm

poss.

Approvals/ GOST

Level transmitter made of Titanium

Version: TG38SIL

Version: TG2G

Technical Specifications:

Material /	Titanium
El. Connection /	silicone connecting cable
Process conn. /	G3/8"-male upwards
Sliding tube /	∅ 12 mm for grid 10 mm, 12.7 mm & 15 mm, ∅ 14 mm for grid 5 mm
insert. Length /	≤ 5000 mm
Float /	Z44G14T
sp. Weight /	≥ 750 kg/m ³
Design press. /	-1...+15 bar
Design temp. /	-10...+150°C
Protection class /	IP55 (optional IP68)
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B

Option

Temp. contacts / NO or NC

min. Dimens. / L1 ≥ 50 mm, U = 45 mm
poss.

Approvals/ ATEX, PED, GOST, WHG

Technical Specifications:

Material /	Titanium
El. Connection /	Type E Aluminium terminal box
Process conn. /	G2"-male downwards
Sliding tube /	∅ 12 mm for grid 10 mm, 12.7 mm & 15 mm, ∅ 14 mm for grid 5 mm
insert. Length /	≤ 5000 mm
Float /	K52G14T
sp. Weight /	≥ 600 kg/m ³
Design press. /	-1...+25 bar
Design temp. /	-10...+150°C
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B

Option

Temp. contacts / NO or NC

min. Dimens. / L1 ≥ 55 mm, U = 45 mm
poss.

Approvals/ ATEX, PED, GOST, WHG

Level transmitter made of Alloy C

Version: ALCG38SIL

Version: ALCG112G

Technical Specifications:

Material /	Alloy C
El. Connection /	silicone connecting cable
Process conn. /	G3/8"-male upwards
Sliding tube /	ø 12 mm
insert. Length /	≤ 3000 mm
Float /	Z44G15A
sp. Weight /	≥ 1000 kg/m ³
Design press. /	-1...+45 bar
Design temp. /	-40...+180°C
Protection class /	IP55 (optional IP68)
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HTF, 10HTF, 15HTF, 10HT, 15HT
Option

poss.	
Approvals/	PED, WHG

Level transmitter made of st. steel - ECTFE coated

Version: VAEBF50G

Version: VAEBF80G

Technical Specifications:

Material /	st. steel ECTFE-coated
El. Connection /	Type E Aluminium terminal box
Process conn. /	Flange EN DN50 / PN16 / Form B1
Sliding tube /	∅ 11 mm
insert. Length /	≤ 3000 mm
Float /	Z45G14EC1
sp. Weight /	≥ 950 kg/m ³
Design press. /	-1. .+.16 bar (depending on temp.)
Design temp. /	-40. .+.150°C
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	10, 10HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B
Option	
Temp. contacts /	NO or NC
min. Dimens. /	L1 ≥ 70 mm, U = 70 mm
poss.	
Approvals/	ATEX, PED, GOST, WHG

Technical Specifications:

Material /	st. steel ECTFE-coated
El. Connection /	Type E Aluminium terminal box
Process conn. /	Flange EN DN50 / PN16 / Form B1
Sliding tube /	∅ 17 mm
insert. Length /	≤ 3000 mm
Float /	K73G23EC1
sp. Weight /	≥ 750 kg/m ³
Design press. /	-1. .+.16 bar (depending on temp.)
Design temp. /	-40. .+.150°C
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	5, 10, 12.7, 15, 5HTF, 10HTF, 15HTF
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B
Option	
Temp. contacts /	NO or NC
min. Dimens. /	L1 ≥ 70 mm, U = 70 mm
poss.	
Approvals/	ATEX, PED, GOST, WHG

**Level transmitter made of st. steel - PFA coated**

Version: VAPBF50G

Version: VAPBF80G

**Technical Specifications:**

Material /	st. steel PFA-coated
El. Connection /	Type E Aluminium terminal box
Process conn. /	Flange EN DN50 / PN16 / Form B1
Sliding tube /	∅ 11 mm
insert. Length /	≤ 3000 mm
Float /	Z45G14PF1
sp. Weight /	≥ 1000 kg/m ³
Design press. /	-1...+16 bar (depending on temp.)
Design temp. /	see table Grid
Protection class /	IP65
Mount. pos. /	vertical ±30°
Grid /	10, 10HTF, 10HT
Option	
Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B

Option

Temp. contacts / NO or NC

min. Dimens. / L1 ≥ 70 mm, U = 70 mm
poss.

Approvals/ ATEX, PED, WHG

Technical Specifications:

Material /	st. steel PFA-coated
El. Connection /	Type E Aluminium terminal box
Process conn. /	Flange EN DN50 / PN16 / Form B1
Sliding tube /	∅ 17 mm
insert. Length /	≤ 3000 mm
Float /	K73G23PF1
sp. Weight /	≥ 800 kg/m ³
Design press. /	-1...+16 bar (depending on temp.)
Design temp. /	see table Grid
Protection class /	IP65
Mount. pos. /	vertical ±30°

Temp. sensor /	Pt100 / Pt1000 IEC 751 Cl. B

Option

Temp. contacts / NO or NC

min. Dimens. / L1 ≥ 70 mm, U = 70 mm
poss.

Approvals/ ATEX, PED, WHG

MA-400

Bypass-Magnetic Level Gauge

Description:

A stainless steel measuring tube has two lateral connecting sleeves, which are joined with the vessel to be monitored. Since in this reference vessel the same fluid level is found as that in the tank, a cylindrical float is located always at the height with the liquid level. The float is counter-balanced exactly to the density of the medium and it carries a specially designed disc shaped magnetic system that acts through the stainless steel wall of the measuring tube on an indicator bar which is sensitive to magnetic force. Due to the magnetic force of the float, its pre-magnetized rollers are turned by 180° in such a matter, that all rollers below the float turn their red and the remaining rollers above the float turn their white side to the front. Thus, the observer obtains a precise visual statement of the level in the container. Optionally, the reference tube can be equipped with bistable, magnetic sensitive limit contacts which emit a binary signal when the float has passed the level where the sliding contacts are mounted. Another alternative to the remote transmission of value is adding a reed contact chain FM-02N externally to the measuring tube that would convert the float movement into a stepped resistance or current signal. Instead of the reed contact chain, also a magnetostrictive sensor can be used which breaks up the level at a higher accuracy and provides a 4...20 mA power signal in 2-wire circuit.

Features

/ Up to 25 meter measuring length

/ Up to +400 bar

/ Up to +400°C liquid temperature

/ Stainless steel, titanium,

Alloy C, PVC, PP, PVDF, ECTFE, PFA

/ Flange, thread and welded connections

/ Switching contacts

and measuring transmitter

/ Electrical trace heating

and insulation possible

/ Customized designs

Application:

The MA-400 series of magnetic level gauges has been long in use in large numbers in the entire industry, thus Bypass Float Level technology has a proven record of accurately measuring level in field for over 30 years. Meanwhile, the technology of remote transmission, for example, by using magnetostrictive sensors has been perfected to such extent that it is no way inferior to other methods of level measurement and monitoring. Moreover, the advantage here is that the level can be identified at one glance directly at the measuring point. The electrical signals in the control room can be verified visually without much assembling work. Besides pressure levels up to PN400, also all conceivable variants of draining and ventilation such as valves, ball-cocks or compression and cutting ring fittings are available with us. Just contact us for more details.

Ordering Codes:

Order-no. MA-400. 03192. E. 60. 1. DN15PN16. 0000. ZVA52PN16-200mm. BA. UA. MVA-01N. 0. 1/5

Measuring range (ME):

The distance between the upper and the lower lateral connection is specified in millimeters. The maximum length of a measuring tube is 6000 mm for greater lengths up to 25000 mm, however, several reference tubes must be used. For a length of 2000 mm and above, we recommend equipping the magnetic level gauge with a welded bracket for additional securing (Option /7). If the free space (dugout) between the lower connecting piece and the base or the space (projection) between the upper connecting piece and the ceiling are in one way or the other restricted, the relevant maximum parameter must be specified in detailed text at the time of placing an order. In an empty vessel, the float for the MA-400 is located in the so-called float-sack below the connection and in a full tank in the projection above the connection. This means that these dimensions must correspond with at least the float length. However, since the float's mounting length also depends on the media density, special materials like titanium must be used in case of space constraints, if necessary, in order to reduce the float length.

Measuring tube material:

The measuring tube can be selected from the following materials: stainless steel, coated stainless steel, titanium, Alloy C and various plastics. The decision basis are here the medium, maximum measuring range, pressure and temperature.

Measuring tube diameter:

Depending on the material execution and the pressure in the tank different measuring tube diameter are chosen. The corresponding options are the variants taken from the datasheet.

Process connection:

Flanges as per EN or ANSI, female and male threads or welded ends are the most commonly used features for connecting the MA-400 to the side of the vessel. Customized solutions like aligning the connecting piece on top/ below or on top/laterally or at the bottom/laterally are available on request.

Nominal diameter and pressure level for flange:

The precise name of the connecting flange on the vessel must be specified in a detailed text. Some examples are flange DIN EN 1092-1 DN25 PN16 form B1 or ANSI 1" 300 lbs RF. Standard flanges are DIN EN 1092-1 DN15 PN16 with sealing bar form B1.

Thread for screw neck or bushing:

If a screw neck or a bushing is selected as a variant for the connection, the thread size must be specified in detailed text. Here the standard is G3/4". All normally used inch or metric thread systems are available on request.

Measuring tube connection top:

An overview of the various possible variants of the upper measuring tube connection, such as with ventilation screw, valve or flange, is located on the last page of this data-sheet.

Measuring tube connection bottom:

An overview of the various possible variants of the lower measuring tube connection, such as with drain plug, valve or flange is located on the last pages of this data sheet.

Float type and length:

The matching float is selected from the float tables of this datasheet. The criteria are material resistance to the medium, pressure, temperature and diameter of the float (must fit into the selected measuring tube). From the float length the user determines the surfacing volume of the float at a known specific gravity of the medium being measured. The ideal surfacing volume at which liquid level and magnet system are on one level is shown in bold. Also, the length of the float-sack below the lower connection and in a full tank the projection above the upper connection depends on the selected float length. Should the application be subject to space limitations, it is advisable to choose a lighter float material such as titanium, thus saving on float length.

Indicator bar:

Depending on the ambient temperature at the measuring tube outer wall, indicator bars are chosen with ceramic rollers for temperatures up to 400°C or standard rollers for temperatures up to 200°C. Rotary secured versions guarantee a clean turn around of the magnetic rollers even due to vibration. For rough atmosphere versions with stainless steel jacketed housings are available.

Approvals:

Various approvals are available for the magnetic level gauge type of MA-400 such as ATEX, GL, DNV, GOST, BV, ABS and, if necessary, they are tested with regard to the Pressure Equipment Directive. Since the devices are modular assembled (contacts, sensors, indicator bar etc.) it must be ensured, that all components used meet the required approval.

Options:

With regard to options, specify in detail whether the MA-400 should be provided with electrical limit contacts and as to how many (option /1). A circuit with a protective resistor or a combination of resistors, which offers a behavior according to NAMUR, is available for the contacts (option /2 and /3). Optionally, for remote transmission of level value a reed contact measuring transmitter (option /4 and /5) or a magnetostrictive sensor (option /6) can be mounted externally to the MA-400 which provides a 4 to 20 mA signal at the output (see also FM-01F and FM-02N for details). Mounting brackets stabilize the magnetic level gauge for lengths above 2 meters (option /7). With strong shocks in the container damping springs are recommended at the top and bottom of the measuring tube (option /8 and /9). Solid and removable insulation against cold and heat (option /10, /11 and /12), trace heating against frost (option /13 and /14), angular scales with various engravings (option /15, /16 and /17) and a cover for concealed or isolated indicator bars (option /18) round off the equipment possibilities.

**Bypass-Magnetic Level Gauge made of st. steel PN16**

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm, for ATEX > 4000 mm choose diff. material for chamber and float
specific Weight /	$\geq 400 \text{ kg/m}^3$
Design pressure /	-1. . .+16 bar
Design temp. /	-196. . .+400°C
Chambers /	$\varnothing 60,30 \times 2 \text{ mm}$ $\varnothing 60,33 \times 2,77 \text{ mm} / \text{NACE}$ $\varnothing 63,50 \times 2 \text{ mm}$
Process connection /	see appendix G „Process connections“

opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST

Bypass-Magnetic Level Gauge made of st. steel PN100

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150...25000 mm
specific Weight /	$\geq 390 \text{ kg/m}^3$
Design pressure /	-1...+100 bar
Design temp. /	-196...+400°C
Chambers /	$\varnothing 60,30 \times 3 \text{ mm}$ $\varnothing 60,33 \times 2,77 \text{ mm / NACE}$ $\varnothing 73,03 \times \dots \text{ mm / NACE}$ $\varnothing 76,10 \times \dots \text{ mm}$ (... = calculated wall thickness)
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40...+200°C Aluminium or st. steel / ceramic Temp. -40...+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60...+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST

Bypass-Magnetic Level Gauge made of st. steel PN160

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm
specific Weight /	≥ 480 kg/m ³
Design pressure /	-1. . .+160 bar
Design temp. /	-196. . .+400°C
Chambers /	Ø 73,03 x . . . mm / NACE Ø 76,10 x . . . mm (. . . = calculated wall thickness)
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST

Bypass-Magnetic Level Gauge made of st. steel PN250. . .PN400

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm
specific Weight /	≥ 690 kg/m ³
Design pressure /	-1. . .+250 / +400 bar
Design temp. /	-196. . .+400°C
Chambers /	Ø 73,03 x . . . mm / NACE Ø 76,10 x . . . mm (. . . = calculated wall thickness)
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST

**Bypass-Magnetic Level Gauge made of Stainless Steel without lateral Connections**

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm, for ATEX > 4000 mm choose diff. material for chamber and float
specific Weight /	$\geq 400 \text{ kg/m}^3$
Design pressure /	-1. . .+40 bar
Design temp. /	-196. . .+400°C
Chambers /	$\varnothing 60,30 \times 2 \text{ mm}$ $\varnothing 60,33 \times 2,77 \text{ mm / NACE}$ $\varnothing 63,50 \times 2 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST, GL, DNV, BV, ABS

Bypass-Magnetic Level Gauge made of Stainless Steel in Liquid Gas Design

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm, for ATEX > 4000 mm choose diff. material for chamber and float
specific Weight /	$\geq 460 \text{ kg/m}^3$
Design pressure /	-1. . .+40 bar
Design temp. /	-196. . .+400°C
Chambers /	$\varnothing 88,90 \times 2 \text{ mm}$ $\varnothing 88,90 \times 3,05 \text{ mm / NACE}$ $\varnothing 88,90 \times 2,60 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST, GL, DNV, BV, ABS

**Bypass-Magnetic Level Gauge made of Stainless Steel with Steam Tracing System**

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm, for ATEX > 4000 mm choose diff. material for chamber and float
specific Weight /	$\geq 460 \text{ kg/m}^3$
Design pressure /	-1. . .+ bar
Design temp. /	-196. . .+400°C
Chambers /	$\varnothing 60,30 \times 2 \text{ mm}$ $\varnothing 60,33 \times 2,77 \text{ mm / NACE}$ $\varnothing 63,50 \times 2 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Heating coat /	Heating coat pipe $\varnothing 76,10 \times 2 \text{ mm}$
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST, GL, DNV, BV, ABS

Bypass-Magnetic Level Gauge made of Stainless Steel, differential compensated

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm, for ATEX > 4000 mm choose diff. material for chamber and float
specific Weight /	≥ 350 kg/m ³
Design pressure /	-1. . .+250 bar
Design temp. /	-10. . .+400°C
Chambers /	Ø 60,30 x 2 mm Ø 60,33 x 2,77 mm / NACE Ø 73,03 x . . . mm / NACE Ø 76,10 x . . . mm (. . . = calculated wall thickness)
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST

Bypass-Magnetic Level Gauge made of Titanium PN16. . .PN40

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm, for ATEX > 4000 mm choose diff. material for chamber and float
specific Weight /	≥ 400 kg/m ³
Design pressure /	-1. . .+40 bar
Design temp. /	-196. . .+400°C
Chambers /	Ø 60,30 x 2 mm Ø 60,33 x 2,77 mm / NACE Ø 63,50 x 2 mm
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST, GL, DNV, BV, ABS

Bypass-Magnetic Level Gauge made of Alloy C PN16. . .PN40

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm
specific Weight /	$\geq 610 \text{ kg/m}^3$
Design pressure /	-1. . .+40 bar
Design temp. /	-196. . .+200°C
Chambers /	$\varnothing 60,30 \times 2,77 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 200°C, PED, GOST

Bypass-Transparent Level Indicator made of PVC

Technical Specifications:

Material /	PVC transparent
Flange center dist. /	200..4000 mm
specific Weight /	≥ 600 kg/m ³
Design pressure /	-1..+1 bar
Design temp. /	-15..+60°C
Chambers /	Ø 32,0 x 1,8 mm
Process connection /	see appendix G „Process connections“
Chamber end top /	screw joint
Chamber end bttm. /	screw joint
opt. Insulation /	Ø 24 mm 80 mm long for spec. weight ≥ 900 kg/m ³ 120 mm long for spec. weight ≥ 600 kg/m ³
Switching contacts /	normally open, normally closed or co-contacts, 230 V, 0.5 A, 40 VA electrical connection: PVC cable or plug Hirschmann DIN 43650

Cable connection:

Plug connection:

Bypass-Magnetic Level Gauge made of PVC

Technical Specifications:

Materials /	PVC
Flange center dist. /	300. . .4000 mm
specific Weight /	$\geq 740 \text{ kg/m}^3$
Design pressure /	-1. . .+4 bar
Design temp. /	-15. . .+40°C
Chambers /	$\varnothing 63,0 \times 3 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	screw joint
Chamber end bttm. /	screw joint
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
available Approvals /	PED, GOST

Bypass-Magnetic Level Gauge made of Polypropylene

Technical Specifications:

Material /	Polypropylene
Flange center dist. /	300...4000 mm
specific Weight /	≥ 640 kg/m ³
Design pressure /	-1...+4 bar
Design temp. /	-10...+60°C
Chambers /	Ø 63,50 x 3,60 mm
Process connection /	see appendix G „Process connections“
Chamber end top /	screw joint
Chamber end bttm. /	screw joint
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40...+200°C Aluminium or st. steel / ceramic Temp. -40...+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60...+300°C
opt. Level transmitter /	FM-02N
available Approvals /	PED, GOST

Bypass-Magnetic Level Gauge made of PVDF

Technical Specifications:

Material /	PVDF
Flange center dist. /	300...4000 mm
specific Weight /	$\geq 750 \text{ kg/m}^3$
Design pressure /	-1...+4 bar
Design temp. /	-10...+80°C
Chambers /	$\varnothing 63,00 \times 3 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	screw joint
Chamber end bttm. /	screw joint
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40...+200°C Aluminium or st. steel / ceramic Temp. -40...+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60...+300°C
opt. Level transmitter /	FM-02N
available Approvals /	PED, GOST

Bypass-Magnetic Level Gauge made of st. steel, ECTFE-coated

Technical Specifications:

Material /	st. steel, ECTFE-coated
Flange center dist. /	150. . .3000 mm
specific Weight /	≥ 690 kg/m ³
Design pressure /	-1. . .+16 bar
Design temp. /	-78. . .+150°C
Chambers /	Ø 63,50 x 2 mm
Process connection /	see appendix G „Process connections“
Chamber end top /	flange connection
Chamber end bttm. /	flange connection
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 150°C, PED, GOST

Bypass-Magnetic Level Gauge made of st. steel, PFA-coated

Technical Specifications:

Material /	st. steel PFA-coated
Flange center dist. /	150. . .3000 mm
specific Weight /	$\geq 715 \text{ kg/m}^3$
Design pressure /	-1. . .+16 bar
Design temp. /	-100. . .+250°C
Chambers /	$\varnothing 63,50 \times 2 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	flange connection
Chamber end bttm. /	flange connection
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 250°C, PED, GOST

**Appendix A - Cylindrical float:****Cylindrical float made of PVC, PN4, Type ZPVC50PN4:**

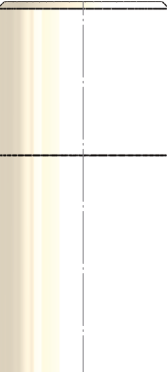

Float length (mm)	150	200	250	300	350	
Float weight (g)	275	316	356	397	437	
emerged float height (mm)		specific weight of media (kg/m ³)				
10	10	-	-	-	-	
20	20	-	-	-	-	
30	30	1170	950	820	750	
40	40	1270	1010	860	780	
50	50	1400	1070	910	810	
60	60	1560	1150	950	840	
70	70	1750	1240	1010	880	
80	80	2000	1340	1070	920	
90	90	2330	1460	1130	960	
100	100	2800	1610	1210	1010	

Float diameter:	50 mm
Design temperature:	-15. . .+40°C
Design pressure:	-1 bar. . .+4 bar
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	float length minus 25 mm

Cylindrical float made of PP, PN4, Type ZPP50PN4:

Float length (mm)	150	200	250	300	350	
Float weight (g)	246	279	311	344	376	
emerged float height (mm)		specific weight of media (kg/m ³)				
10	10	-	-	-	-	
20	20	-	-	-	-	
30	30	1040	840	720	650	
40	40	1140	890	750	670	
50	50	1250	950	790	700	
60	60	1390	1010	830	730	
70	70	1570	1090	880	760	
80	80	1790	1180	930	800	
90	90	2090	1290	990	830	
100	100	2510	1420	1060	880	

Float diameter:	50 mm
Design temperature:	-10. . .+60°C
Design pressure:	-1 bar. . .+4 bar
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	float length minus 25 mm

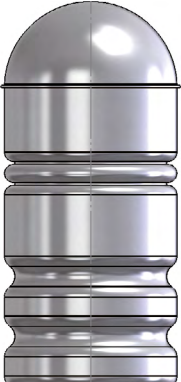

Cylindrical float made of PVDF, PN4, Type ZPVDF50PN4:

Float length (mm)		150	200	250	300	350		
Float weight (g)		278	319	360	401	442		
		emerged float height (mm)			specific weight of media (kg/m³)			
10		10	-	-	-	-	-	-
20		20	-	-	-	-	-	-
30		30	1180	960	830	760	700	
40		40	1290	1020	870	790	730	
50		50	1420	1080	920	820	750	
60		60	1570	1160	960	850	780	
70		70	1770	1250	1020	890	800	
80		80	2020	1350	1080	930	830	
90		90	2360	1480	1150	970	870	
100		100	2830	1620	1220	1020	900	

Float diameter: 50 mm
Design temperature: -10. . .+80°C
Design pressure: -1 bar. . .+4 bar
Distance U: see figure of magnetic level gauge
Distance U with float stop: float length minus 25 mm

Cylindrical float made of st. steel 1.4571 (316Ti), PN16, Type ZVA52PN16:

Float length (mm)		150	200	250	300	350	400	450	
Float weight (g)		253	297	327	362	399	440	472	
		emerged float height (mm)			specific weight of media (kg/m³)				
10		10	-	-	-	-	-	-	
20		20	-	-	-	-	-	-	
30		30	1170	950	800	720	680	600	
40		40	1280	1010	840	740	700	660	
50		50	1420	1080	880	780	720	680	630
60		60	1600	1160	930	810	750	700	650
70		70	1820	1260	980	850	780	720	660
80		80	2110	1370	1050	890	810	740	680
90		90	2520	1500	1110	930	840	770	700
100		100	-	1670	1190	980	870	790	720

Float diameter: 52 mm
Design temperature: -40. . .+250°C (+300°C)
Design pressure: -1 bar. . .+20 bar (+18,5 bar)
Distance U: see figure of magnetic level gauge
Distance U with float stop: float length minus 24 mm
Distance U with dampening spring: float length minus 10 mm

Cylindrical float made of st. steel ECTFE-coated, PN16, Type ZVAE53PN16:

Float length (mm)		150	200	250	300	350	400	450
Float weight (g)		277	329	367	410	456	505	545
emerged float height (mm)		specific weight of media (kg/m³)						
10	10	-	-	-	-	-	-	-
20	20	-	-	-	-	-	-	-
30	30	1200	1000	850	770	730	700	660
40	40	1350	1070	900	800	760	720	670
50	50	1490	1140	940	840	780	740	690
60	60	1680	1230	1000	870	810	760	710
70	70	1910	1330	1050	910	840	780	730
80	80	2220	1450	1120	960	870	810	750
90	90	2650	1590	1190	1000	910	830	770
100	100	-	1770	1280	1060	950	860	790

Float diameter:	53 mm
Design temperature:	-40. . .+150°C
Design pressure:	-1 bar. . .+20 bar
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	Float length minus 24 mm
Distance U with dampening spring:	Float length minus 10 mm

Cylindrical float made of st. steel PFA-coated, PN16, Type ZVAP53PN16:

Float length (mm)		150	200	250	300	350	400	450
Float weight (g)		284	338	378	424	471	523	565
emerged float height (mm)		specific weight of media (kg/m³)						
10	10	-	-	-	-	-	-	-
20	20	-	-	-	-	-	-	-
30	30	1250	1035	885	805	750	715	680
40	40	1385	1105	930	835	775	735	695
50	50	1535	1185	975	870	800	760	715
60	60	1725	1275	1030	905	830	780	735
70	70	1965	1375	1090	950	860	805	755
80	80	2285	1500	1160	995	890	830	775
90	90	2730	1650	1235	1040	925	860	795
100	100	-	1830	1325	1095	965	890	820

Float diameter:	53 mm
Design temperature:	-40. . .+250°C
Design pressure:	-1 bar. . .+20 bar
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	Float length minus 24 mm
Distance U with dampening spring:	Float length minus 10 mm

Cylindrical float made of Titanium, PN16, Type ZT52PN16:

Float length (mm)	150	200	250	300	350	400	450
Float weight (g)	197	245	289	338	381	430	474
emerged float height (mm)		specific weight of media (kg/m ³)					
10	10	-	-	-	-	-	-
20	20	-	-	-	-	-	-
30	30	645	535	475	430	410	395
40	40	710	570	500	450	425	405
50	50	785	610	525	470	440	415
60	60	885	655	555	490	455	430
70	70	1005	710	585	510	470	440
80	80	1170	775	625	535	490	455
90	90	1400	850	665	560	510	470
100	100	1735	945	710	590	530	485

Float diameter:	52 mm
Design temperature:	-30...+150°C (+200°C)
Design pressure:	-1 bar...+16 bar (+10 bar)
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	Float length minus 24 mm
Distance U with dampening spring:	Float length minus 10 mm

Cylindrical float made of Alloy C, PN16, Type ZA52PN16:

Float length (mm)	150	200	250	300	350	400	450
Float weight (g)	197	245	289	338	381	430	474
emerged float height (mm)		specific weight of media (kg/m ³)					
10	10	-	-	-	-	-	-
20	20	-	-	-	-	-	-
30	30	900	770	695	660	625	605
40	40	985	825	730	685	645	625
50	50	1095	880	770	710	665	640
60	60	1230	950	810	745	690	660
70	70	1400	1025	855	775	715	680
80	80	1625	1115	910	815	740	705
90	90	1940	1225	970	855	770	725
100	100	2410	1360	1040	900	805	750

Float diameter:	52 mm
Design temperature:	-196...+200°C
Design pressure:	-1 bar...+16 bar
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	Float length minus 24 mm
Distance U with dampening spring:	Float length minus 10 mm

Cylindrical float made of st. steel 1.4571 (316Ti), PN40, Type ZVA52PN40:

Float length (mm)		150	200	250	300	350	400	450	500	550	600	650
Float weight (g)		197	258	300	342	389	431	472	519	561	603	645
emerged float height (mm)		specific weight of media (kg/m³)										
10	10	-	-	-	-	-	-	-	-	-	-	-
20	20	-	-	-	-	-	-	-	-	-	-	-

**Appendix B - indicator bars:****Versions**

MA-01	Standard
MA-01N	Standard turn proof
MA-01EX	EX
MA-01NEX	EX turn proof
MA-01K	Ceramic rollers up to 400°C
MA-01KN	Ceramic rollers up to 400°C, turn proof

Technical Specifications

Housing /	Aluminium colorless matted
Prot. class /	IP67
Rollers /	Pocan® white / red, MA-01K and MA-01KN ceramic weiss / blue
End part /	Ryton®, black, MA-01K and MA-01KN Aluminium
Viewing glass /	MA-01 and MA-01N Makrolon, else glass
Ambient temp. /	-40...+200°C, MA-01K and MA-01KN -40...+400°C
Media temp. /	-40...+300°C
Turn protect. /	MA-01N, MA-01EXN and MA-01KN max. 180° poss.
Approvals /	ATEX, GOST, GL, BV, DNV, ABS

**Versions**

MVA-01	Standard
MVA-01N	Standard turn proof
MVA-01EX	EX
MVA-01NEX	EX turn proof
MVA-01K	Ceramic rollers up to 400°C
MVA-01KN	Ceramic rollers up to 400°C, turn proof

Technical Specifications

Housing /	Aluminium coated with st. steel
Prot. class /	IP67
Rollers /	Pocan® white / red, MVA-01K and MVA-01KN ceramic weiss / blue
End part /	Ryton®, black, MVA-01K and MVA-01KN Aluminium
Viewing glass /	MVA-01 and MVA-01N Makrolon, else glass
Ambient temp. /	-40...+200°C, MVA-01K and MVA-01KN -40...+400°C
Media temp. /	-40...+300°C
Turn protect. /	MVA-01N, MVA-01EXN and MVA-01KN max. 180°
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS

Appendix C - Angular scales and Sight extension:

Angular scale Versions

WK-AK	Aluminium with adhesive foil (black)
WK-AG	Aluminium engraved
WK-EG	st. steel engraved

Technical Specifications

Angle profile /	WK-AK: Aluminium WK-AG: Aluminium WK-EG: st. steel
Scaling /	WK-AK: in cm (0 cm. . .10 cm. . .20 cm. . .) WK-AG: blank / % / cm / inch WK-EG: blank / % / cm / inch
Width /	40 mm
Ambient temp. /	WK-AK: -40. . .+200°C WK-AG: -40. . .+200°C WK-EG: -40. . .+400°C
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS

Sight extension Versions

PV	Extension for indicator bars
-----------	-------------------------------------

Technical Specifications

Material /	Acrylglas
Width /	35 mm
Depth /	67 mm
Ambient temp. /	-40. . .+100°C
Mounting /	with indicator bar
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS

Appendix D - Switching contacts:

Versions fitted to the indicator bar

MRK-S01 Standard with Cable connection
MRK-S01EXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	Aluminium anodised
Mounting /	right or left side to the indicator bar
Prot. class /	IP65
Ambient temp. (ATEX) /	PVC -20...+80°C (-20...+80°C) SIL -60...+180°C (-25...+180°C) PUR -40...+80°C (-25...+80°C) Radox® -35...+120°C (-25...+120°C)
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

Versions fitted to the indicator bar

MRK-S01EXD press.-proof encapsulation from ATEX

Technical Specifications

Housing /	Aluminium anodised
Mounting /	right or left side to the indicator bar
Prot. class /	IP65
Ambient temp. /	PVC -20...+80°C SIL -25...+120°C PUR -25...+80°C Radox® -25...+120°C
Function /	co-contact, increasing level, bistable
Switch rating /	U_N 250 V / P_{FN} 50 W/VA / P_{PN} 700 mW with Namur switch U_N 15 VDC / I_N 60 mA with protective resistor U_N 250 V / I_N 100 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

Switching contacts:

Versions fitted to the indicator bar

MRV-S01 Standard with cable gland
MRV-S01EXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	Aluminium anodised
El. conn. /	cable gland M20 x 1,5
Mounting /	right or left side to the indicator bar
Prot. class /	IP65
Ambient temp. (ATEX) /	-40...+130°C (-25...+130°C)
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

Versions fitted to the indicator bar

MRQ-S01 Standard with QuickOn-connection
MRQ-S01EXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	Aluminium anodised
El. conn. /	QuickOn
Mounting /	right or left side to the indicator bar
Prot. class /	IP65
Ambient temp. /	-25...+50°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST

**Switching contacts:****Versions fitted to the indicator bar**

MRM-S01 Standard with M12-Plug connection
MRM-S01EXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	Aluminium anodised
El. conn. /	plug M12
Mounting /	right or left side to the indicator bar
Prot. class /	IP65
Ambient temp. /	-25...+90°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, SIL1

**Aluminium Versions fitted to the indicator bar**

MGK-A60 Chambers up to 73 mm, Cable connection
MGK-A60EXI Intrinsically safe acc. to ATEX
MGK-A73 Chambers ab 73 mm, Cable connection
MGK-A73EXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	Aluminium anodised
Mounting /	can be positioned freely
Prot. class /	IP65
Ambient temp. /	PVC -20...+80°C SIL -40...+180°C PUR -40...+80°C Radox® -35...+120°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

Switching contacts:

St. steel version fitted to the indicator bar

MGK-E60	Chambers up to 73 mm, Cable connection
MGK-E60EXI	Intrinsically safe acc. to ATEX
MGK-E73	Chambers ab 73 mm, Cable connection
MGK-E73EXI	Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	st. steel
Mounting /	can be positioned freely
Prot. class /	IP68
Ambient temp. /	PVC -20...+80°C SIL -40...+180°C PUR -40...+80°C Radox® -35...+120°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

St. steel version fitted to the indicator bar

MGK-E60EXD	press.-proof encapsulation from ATEX
MGK-E73EXD	press.-proof encapsulation from ATEX

Technical Specifications

Housing /	st. steel
Mounting /	can be positioned freely
Prot. class /	IP68
Ambient temp. /	PVC -20...+80°C SIL -40...+120°C PUR -40...+80°C Radox® -35...+120°C
Function /	co-contact, increasing level, bistable
Switch rating /	U_N 250 V / P_{FN} 50 W/VA / P_{PN} 700 mW with Namur switch U_N 15 VDC / I_N 60 mA with protective resistor U_N 250 V / I_N 100 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

**Switching contacts:****High-temp. co-contact fitted to the indicator bar**

MGV-HTU Standard with cable gland
MGV-HTUEXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	Aluminium anodised
El. conn. /	cable gland M20 x 1,5
Mounting /	can be positioned freely
Prot. class /	IP65
Ambient temp. /	-40...+300°C with Namur switch -40...+220°C with protective resistor -40...+220°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST

**Proximity switch acc. to NAMUR fitted to the indicator bar**

MGV-NC Standard with cable gland
MGV-NCEXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	Aluminium coated RAL 9006
El. conn. /	cable gland M20 x 1,5
Mounting /	can be positioned freely
Prot. class /	IP65
Amb.temp.- (ATEX) /	-40...+100°C (-40...+73°C)
Function /	nc-contact, bistable
Supply /	5...25 VDC
Nominal-voltage /	8 VDC
Self-inductance & capacity /	100 mH / 30 nF
Intrinsic safety data /	U = 16 VDC, I = 25 mA, P = 34 mW
poss.	
Approvals /	ATEX, GOST, SIL1

Switching contacts:

Standard co-contact fitted to the indicator bar

MGV-U Standard with cable gland
MGV-UEXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	Aluminium anodised
El. conn. /	cable gland M20 x 1,5
Mounting /	can be positioned freely
Prot. class /	IP65
Ambient temp. /	-40. . . +130°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5. . . 7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

Co-contact in plastic housing fitted to the indicator bar

MGV-PU Standard with cable gland
MGV-PUEXI Intrinsically safe acc. to ATEX

Technical Specifications:

Housing /	Polyester / st. steel
El. conn. /	cable gland M20 x 1,5
Mounting /	can be positioned freely
Prot. class /	IP65
Ambient temp. /	-10. . . +100°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5. . . 7 mm
poss.	
Approvals /	ATEX, GOST, SIL1

Switching contacts:

Co-contact in industrial housing fitted to the indicator bar

MGV-AUEXD press.-proof encapsulation from ATEX

Technical Specifications

Housing /	Aluminium coated RAL 9006
El. conn. /	cable gland M20 x 1,5
Mounting /	can be positioned freely
Prot. class /	IP65
Ambient temp. /	-40. . .+100°C
Function /	co-contact, increasing level, bistable
Switch rating /	U_N 250 V / P_{SN} 50 W/VA / P_{PN} 700 mW with Namur switch U_N 15 VDC / I_N 60 mA with protective resistor U_N 250 V / I_N 100 mA
Hysteresis /	5. . .7 mm
poss.	
Approvals /	ATEX, GOST, SIL1

Appendix E - Armaflex® insulation and electrical trace heating:

ART Armaflex® insulation Standard

Technical Specifications

Material /	foam plastics based on synthetic rubber
Fire behaviour /	self-extinguishing, not drippy, not flammable
Nom. thickness /	32 mm
Amb.temp. /	-50...+105°C
UV-resistance /	no

ARH Armaflex® insulation High temperature

Technical Specifications

Material /	foam plastics based on synthetic rubber
Fire behaviour /	self-extinguishing, not drippy, not flammable
Nom. thickness /	25 mm
Amb.temp. /	-50...+150°C
UV-resistance /	yes

HA Electr. trace heating up to TU = 75°C

Technical Specifications

Housing /	GFK black with cable glands M25
Protective shell /	Fluorpolymer
Supply voltage /	230 VAC
Power output /	76 W per meter for 10°C
Holding temp. /	-10°C / frost protect. (32 mm insulation)
Steam flushing /	no
Amb.temp. /	-40...+75°C
poss. Approvals /	ATEX EExe T4, DNV

HB Electr. trace heating up to TU = 150°C

Technical Specifications

Housing /	GFK black with cable glands M25
Protective shell /	Fluorpolymer
Supply voltage /	230 VAC
Power output /	50 W pro Meter for 10°C
Holding temp. /	-10°C / frost protect. (32 mm insulation)
Steam flushing /	yes
Amb.temp. /	-40...+150°C
poss. Approvals /	ATEX EExe T4, DNV

Appendix F - Rock-wool insulation:

SW Rock-wool insulation (removable)

Technical Specifications

Material /	rock-wool with a chrome-nickel cover (removable)
Nom. thickness /	-50 mm
Ambient temp. /	-50. . . +750°C
UV-resistance /	yes

-* depending on the float length

MA-400M

Mini-Bypass Magnetic Level Gauge

Description:

A measuring tube made from a non-magnetizable material has two lateral connecting sleeves, which are joined with the vessel to be monitored. Since in this reference vessel the same fluid level is found as that in the tank, a cylindrical float is located always at the height with the liquid level. The float is counterbalanced exactly to the density of the medium and it carries a specially designed disc shaped magnetic system that acts through the stainless steel wall of the measuring tube on an indicator bar which is sensitive to magnetic force. Due to the magnetic force of the float, its pre-magnetized rollers are turned by 180° in such a matter, that all rollers below the float turn their red and the remaining rollers above the float turn their white side to the front. Thus, the observer obtains a precise visual statement of the level in the container. Optionally, the reference tube can be equipped with bistable, magnetic sensitive limit contacts which emit a binary signal when the float has passed the level where the sliding contacts are mounted. Another alternative to the remote transmission of value is adding a reed contact chain FM-02N externally to the measuring tube that would convert the float movement into a stepped resistance or current signal. Instead of the reed contact chain, also a magnetostrictive sensor can be used which breaks up the level at a higher accuracy and provides a 4 to 20 mA power signal in 2-wire circuit.

Features

- / Low-cost design
- / For simple applications
- / Up to 5 meter measuring length
- / Up to +6 bar
- / Up to +150°C liquid temperature
- / Flange, thread and welded connections
- / Switching contacts and measuring transmitter
- / Electrical trace heating and insulation possible
- / Customized designs

Application:

The MA-400M series of mini-bypass magnetic level gauges has been long in use in large numbers in the entire industry, thus bypass float level technology has a proven record of accurately measuring level in field for over 30 years. Meanwhile, the technology of remote transmission, for example, by using magnetostrictive sensors has been perfected to such extent that it is no way inferior to other methods of level measurement and monitoring. Moreover, the advantage here is that the level can be identified at one glance directly at the measuring point. The electrical signals in the control room can be verified visually without much assembling work. The main fields of application include the level monitoring and level controlling in tanks, agitator- and open vessels with media such as acids, alkalis, fuels, oils etc.

Versions:

Measuring range (ME):

The distance between the upper and the lower lateral connection is specified in millimeters. The maximum length of a measuring tube is 5000 mm. For a length of 2000 mm and above, we recommend equipping the magnetic level gauge with a welded bracket for additional securing (Option /7). If the free space (dugout) between the lower connecting piece and the base or the space (projection) between the upper connecting piece and the ceiling are in one way or the other restricted, the relevant maximum parameter must be specified in detailed text at the time of placing an order. In an empty vessel, the float for the MA-400M is located in the so-called float-sack below the connection and in a full tank in the projection above the connection. This means that these dimensions must correspond with at least the float length.

Measuring tube material and diameter:

As a standard the measuring tube is made of stainless steel (V4A) with a tube outer diameter of 40mm and a wall thickness of 2mm.

Process connection:

Flanges as per EN or ANSI, female and male threads or welded ends are the most commonly used features for connecting the MA-400M to the side of the vessel. Customized solutions like aligning the connecting piece on top/ below or on top/laterally or at the bottom/laterally are available on request.

Nominal diameter and pressure level for flange:

The precise name of the connecting flange on the vessel must be specified in a detailed text. Some examples are flange DIN EN 1092-1 DN25 PN16 form B1 or ANSI 1" 300 lbs RF. Standard flanges are DIN EN 1092-1 DN15 PN16 with sealing bar form B1.

Thread for screw neck or bushing:

If a screw neck or a bushing is selected as a variant for the connection, the thread size must be specified in detailed text. Here the standard is G 3/4". All normally used inch or metric thread systems are available on request.

Measuring tube connection top:

An overview of the various possible variants of the upper measuring tube connection, such as with ventilation screw, valve or flange, is located on the last pages of this data-sheet.

Measuring tube connection bottom:

An overview of the various possible variants of the lower measuring tube connection, such as with drain plug, valve or flange is located on the last pages of this data sheet.

Indicator bars:

Standard versions are colorless mattfinished aluminium and for rough atmospheres with stainless steel coated housing. Optionally rotating backed versions are available (they guarantee clean turnover of the magnetic rollers even due to vibration).

Float type and length:

The matching float is selected from the float tables of this data sheet. The criterias are material and temperature resistance to the medium. From the float length the user determines the surfacing volume of the float at a known specific gravity of the medium being measured. The ideal surfacing volume at which liquid level and magnet system are on one level is shown in bold. Also, the length of the float-sack below the lower connection and in a full tank the projection above the upper connection depends on the selected float length. Should the application be subject to space limitations, it is advisable to choose a lighter float material such as buna, thus saving on float length.

Approvals:

Various approvals are available for the magnetic level gauge type of MA-400M such as ATEX, GL, DNV, GOST, BV, ABS and, if necessary, they are tested with regard to the Pressure Equipment Directive. Since the devices are modular assembled (contacts, sensors, indicator bar etc.) it must be ensured, that all components used meet the required approval.

Options:

With regard to options, specify in detail whether the MA-400M should be provided with electrical limit contacts and as to how many (option /1). A circuit with a protective resistor or a combination of resistors, which offers a behavior according to NAMUR, is available for the contacts (option /2 and /3). Optionally, for remote transmission of level value a reed contact measuring transmitter (option /4 and /5) or a magnetostrictive sensor (option /6) can be mounted externally to the MA-400M which provides a 4 to 20 mA signal at the output (see also FM-01F and FM-02N for details). Mounting brackets stabilize the magnetic level gauge for lengths above 2 meters (option /7). Solid and removable insulation against cold and heat (option /10, /11 and /12), trace heating against frost (option /13 and /14), angular scales with various engravings (option /15, /16 and /17) and a cover for concealed or isolated indicator bars (option /18) round off the equipment possibilities.

Mini-Bypass Magnetic Level Gauge made of Stainless Steel PN6 with lateral Process Connection

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center distance /	150..5000 mm

Option insulation /	Armaflex [®] or rock-wool
poss. Approvals*/	ATEX II 1G2D/2GD c or ATEX II 2GD c liquid temperature max. +150°C, PED, GOST, GL, BV, DNV, ABS

**Appendix A - Indicator bars:****Versions**

MMA-01	Standard
MMA-01N	Standard, over-roll-protected
MMA-01EX	ATEX approval
MMA-01NEX	ATEX approval, over-roll-protected

Technical specifications

Housing /	aluminium - colorless mattfinished
Prot. class /	IP67
Rollers /	Pocan® (ø 10 mm), white / red
End part /	Ryton®, black
Inspec. glass /	MMA-01 and MMA-01N Makrolon®, MMA-01EX and MMA-01NEX glass
Ambient temp. /	-40...+200°C,
Roller rotation /	MMA-01N and MMA-01NEX max. 180°
poss. Approvals /	ATEX, GOST, GL, BV, DNV, ABS

**Versions**

MMV-01	Standard
MMV-01N	Standard, over-roll-protected
MMV-01EX	ATEX approval
MMV-01NEX	ATEX approval, over-roll-protected

Technical Specifications

Housing /	aluminium - stainless steel covered
Prot. class /	IP67
Rollers /	Pocan® (Ø 10 mm), white / red
End part /	Ryton®, black
Inspec. glass /	MMV-01 and MMV-01N Makrolon®, MMV-01EX and MMV-01NEX glass
Ambient temp. /	-40...+200°C,
Roller rotation /	MMV-01N and MMV-01NEX max. 180°
available	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS

Appendix B - Angle scales and sight extension:

Angle scale versions

WK-AK	Aluminium with adhesive foil (black)
WK-AG	Aluminium with engraving
WK-EG	Stainless steel with engraving

Technical specifications

Angle profile /	WK-AK: aluminium WK-AG: aluminium WK-EG: stainless steel
Scaling /	WK-AK: in cm (0 cm. . .10 cm. . .20 cm. . .) WK-AG: blank / % / cm / inch WK-EG: blank / % / cm / inch
Width /	40 mm
Ambient temperature /	WK-AK: -40°C up to +200°C WK-AG: -40°C up to +200°C WK-EG: -40°C up to +400°C
available	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS

Sight extension version

PV	Sight extension for indicator bar
-----------	--

Technical specifications

Material /	acrylic glass
Width /	35 mm
Depth /	67 mm
Ambient temperature /	-40°C up to +100°C
Mounting /	on indicator bar
available	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS

Appendix C - Switching Contacts:

Aluminium versions for chamber mounting

MGK-A40 Standard with cable connection
MGK-A40EXI Intrinsically safe acc. to ATEX

Technical specifications

Housing /	aluminium anodised
Mounting /	free positionable on the chamber
Prot. class /	IP68
Ambient temperature /	PVC -20...+80°C SIL -40...+150°C PUR -40...+80°C Radox® -35...+120°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 30 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
available	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

Aluminium versions for chamber mounting

MGK-A40EXD Explosion-proof enclosure acc. to ATEX

Technical specifications

Housing /	aluminium anodised
Mounting /	free positionable on the chamber
Prot. class /	IP68
Ambient temperature /	PVC -20...+80°C SIL -40...+120°C PUR -40...+80°C Radox® -35...+120°C
Function /	co-contact, increasing level, bistable
Switch rating /	U_N 250 V / P_{FN} 50 W/VA / P_{PN} 700 mW NAMUR EN 60947: U_N 15 VDC / I_N 60 mA with protective resistor: U_N 250 V / I_N 100 mA
Hysteresis /	5...7 mm
available	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

Stainless steel versions for chamber mounting:

MGK-E40 Standard with cable connection
MGK-E40EXI Intrinsically safe acc. to ATEX

Technical specifications

Housing /	stainless steel
Mounting /	free positionable on the chamber
Prot. class /	IP68
Ambient temperature /	PVC -20...+80°C SIL -40...+150°C PUR -40...+80°C Radox® -35...+120°C

Appendix E - Armaflex® insulation and electrical trace heating

ART Armaflex® insulation - standard

Technical specifications

Material /	foam plastics based on synthetic rubber
Fire behaviour /	self-extinguishing, not drippy, not flammable
Nom. thickness /	32 mm
Ambient temp. /	-50...+105°C
UV resistance /	no

ARH Armaflex® insulation - high temp.

Technical specifications

Material /	foam plastics based on synthetic rubber
Fire behaviour /	self-extinguishing, not drippy, not flammable
Nom. thickness /	25 mm
Ambient temp. /	-50...+150°C
UV resistance /	yes

HA Electr. trace heating up to TU = 75°C

Technical specifications

Housing /	GFK black with cable gland M25
Protective shell /	fluoropolymer
Supply voltage /	230 VAC
Power output /	76 W / m at 10°C
Holding temp. /	-10°C / frost protect. (32 mm insulation)
Steam flushing /	no
Ambient temp. /	-40...+75°C
poss. Approvals /	ATEX EExe T4, DNV

HB Electr. trace heating up to TU = 150°C

Technical specifications

Housing /	GFK black with cable gland M25
Protective shell /	fluoropolymer
Supply voltage /	230 VAC
Power output /	50 W / m at 10°C
Holding temp. /	-10°C / frost protect. (32 mm insulation)
Steam flushing /	yes
Ambient temp. /	-40...+150°C
avail. Approvals /	ATEX EExe T4, DNV

Appendix F - rock-wool insulation

SW Rock-wool insulation (removable)

Technical specifications

Material / rock-wool with a chrome-nickel cover (removable)

Nom. thickness / -50 mm

Ambient temperature / -50...+750°C

UV resistance / yes

FD-01

Hydrostatic Level Measurement

Features

- / Capacitive sensor element
with high resistance
against overpressure
- / 2- or 3-wire technology
- / 39.5 mm probe diameter
- / Optionally available
with ATEX-approval

Description:

Hydrostatic level sensors measure the hydrostatic pressure of the fluid column present above the sensor and therefore the fluid level. A ceramic sensor element at the sensor underside picks up this pressure so that the electronic components inside can generate a 4...20 mA or 0...10 VDC signal that is proportional to the level. The suspension on the self-supporting 10 m cable and the design in proven 2-wire technology help perceptibly minimize the cost of installation.

Application:

The FD-01 series of level meters is used at measuring points that require an accurate and stable output signal in regard to the level even under extreme conditions. The high degree of protection IP 68 and corrosion resistance enable the use of the probe universally in vessels, basins, ducts and tanks. The large surface of the membrane, that has a diameter of 25 mm, is particularly suitable for sewage applications.

Electrical Specifications:

Output signal /	4. . .20 mA, 2-wire or 0. . .10 VDC, 3-wire
Supply /	2-wire: 9. . .32 VDC, Ex-version: 14. . .28 VDC 3-wire: 12.5. . .32 VDC
Permissible load /	$R_{\max} = [(U_B - U_{Bmin}) / 0.02]$ Ohm
Current consumption /	max. 21 mA
Influence effects /	
Supply:	0.05% FSO / 10 V
Load:	0.05% FSO / kOhm
Long term stability /	$\leq \pm 0.1$ % FSO / year at reference conditions
Turn-on time /	700 ms
avg. Response time /	< 200 ms
max. Response time /	380 ms
Measuring rate /	5/s
Electrical protection /	
Short-circuit protection:	permanent
Reverse polarity protection:	no damage, but also no function
EMC:	Emitted interference and interference immunity as per EN 61326
Option Ex-protection (only for 4...20 mA / 2-wire) /	ATEX II 1G Ex ia IIB T4 Ga (ATEX II 1G Ex ia IIC T4 Ga for version "pipe mounting") ATEX II 1D Ex ia IIIC T85°C Ga
Safety rel. technical maximum values /	$U_i = 28$ VDC, $I_i = 93$ mA, $L_i = 0$ μ H $P_i = 660$ mW, $C_i = 14$ nF, $C_{\text{gnd}} = 27$ nF
Recommended Ex-amplifier /	KFD2-STC4-EX1
Permissible media temperature in Ex-Zones /	Zone 0 (-10. . .+60°C) for $p_{\text{atm.}}$ 0.8. . .1.1 bar from Zone 1 (-10. . .+70°C)

FD-GL

Hydrostatic Level Measurement in Shipping and Offshore Applications

Features

- / Capacitive ceramic measuring cell
- / 4...20 mA output
- / 2-wire technology
- / Materials 1.4404 or CuNiFe
- / Excellent linearity
- / Negligible temperature errors
- / High long-term stability
- / Option: Pt100 for standard version

Description:

Hydrostatic level sensors measure the hydrostatic pressure of the fluid column that is present above the sensor and therefore the liquid level. A flush-mounted ceramic measuring cell at the bottom of a stainless steel or CuNiFe housing picks up this pressure in such manner that, out of this, the internal electronic element can generate a 4...20 mA signal that is proportional to the level. The installation costs for the suspension at the self-supporting cable and the reliable 2-wire technology design are kept perceivably low. The FD-GL level sensor meets the standard requirements of Lloyds' Register, the Germanischer Lloyd (German Lloyd) and of DNV (Det Norske Veritas), ABS and CCS. The device can optionally also be supplied with ATEX approval or integrated temperature measurement via PT100 in 3-wire-technology.

Application:

The FD-GL hydrostatic level probe has been developed for deployment in shipping and offshore industries. Thanks to its robust and reliable capacitive ceramic measuring cell and the optionally available sea-water resistant CuNiFe housing, the probe is well-suited for using it in ballast tanks. In addition, in the shipping industry it can be deployed, among other things, in fuel and oil tanks as well as in utility and sewage tanks. The built-in electronic element is triple encapsulated in order to prevent condensate entering into the electronic elements through the ventilation hose. The FD-GL hydrostatic level probe can be supplied as suspension type probe, screw-in probe or as flange probe with fixing flange as per DIN DN25 to DN80.

Electrical Specifications:

Output signal /	4...20 mA, 2-wire
Supply voltage /	Standard 10...32 VDC Ex-Version 12...28 VDC
Permissible load /	$R_{\max} = [(U_B - U_{Bmin}) / 0.02] \Omega$
Current consumption /	max. 21 mA
Influencing factors /	
Supply voltage:	0.05% FSO / 10 V
Load:	0.05% FSO / k Ω
Long time stability /	$\leq + 0.1\%$ FSO / year at reference conditions
Turn-on time /	700 ms
mean Response time /	< 200 ms
max. Response time /	380 ms
Measuring rate /	5/s
Thermal effects (offset and span) /	
Tolerance band in compensated range	$\leq + 0.1\%$ FSO -20...+80°C
Electrical protection /	
Short-circuit:	permanent
Polarity reversal:	no damage, no function
EMC:	interference signal and interference proof as per: - EN 61326 - Germanischer Lloyd (GL) - Det Norske Veritas (DNV)
CE-Conformity /	EMC guideline 2014/30/EU
Option Ex-Protection /	Zone 0 : II 1G Ex ia IIB T4 Ga (ATEX II 1G Ex ia IIC T4 for option „mounting in st. steel pipe“)
Safety related technical maximum values /	$U_i = 28$ VDC, $I_i = 93$ mA, $P_i = 660$ mW, $C_i = 105$ nF, $L_i = 0$ μ H; 140 nF connections opp. housing
max. Ambient temperature for ATEX /	Zone 0 : -20...+60°C with $p_{atm.} = 0.8$ bar to 1.1 bar from Zone 1 : -25...+70°C
Connecting cables (factory-provided) /	capacitance signal line/shield also signal line/signal line 160 pF/m inductance signal line/shield also signal line/signal line 1 mikroH/m

Option Pt 100-Temperature Element:

(only with standard version)

Temperature range /	-25...+125°C
Output signal /	3-wire
Resistance /	100 Ω at 0°C
Temperature coefficient /	3850 ppm/K
Supply I_s /	0.3...1.0 mA DC

Technical Specifications:

Accuracy /	standard: $\leq \pm 0.25\%$ FSO option: for $P_N \geq 0,6$ bar ¹ : $\leq \pm 0,1\%$ FSO ¹ Under the influence of disturbance burst according to EN 61000-4-4 (2004) +2 kV accuracy decreased to $\leq \pm 0.25\%$ FSO
Mechanical resistance /	vibration 4g (according to DNV-GL: Class B, curve 2 / basis DIN EN 60068-2-6)
Storage temperature /	-40...+125°C
Media temperature /	-25...+125°C (depending on cable sheath and seal)
Ex-Version /	for use in Zone 0: -20...+60°C for use in Zone 1: -25...+70°C
Weight /	min. 650 g (without cable)
Protection class /	IP 68
Materials /	
Housing:	st. steel 1.4404 or CuNi ₁₀ Fe ₁ Mn (seawater resistant)
Seals (wetted):	FKM (Viton), EPDM or FFKM (from T > -15°C), (other materials on request)
Diaphragm:	standard: ceramic Al ₂ O ₃ 96% option: ceramic Al ₂ O ₃ 99.9%
Cable coating:	TPE-U (flame-resistant, halogen-free, increased resistance against oil and gasoline, resistant against salt and seawater, heavy oil)
Protection cap:	POM-C
Wetted Parts:	cable, housing, seals, diaphragm

FD-03

Hydrostatic Level Measurement

Features

- / 4...20 mA or 0...10 VDC output
- / 2- or 3-wire technology
- / ATEX approval for zone 0 and 20
- / Ceramic sensor element
- / High accuracy
- / Connections stainless steel or PVDF

Description:

The FD-03 series of hydrostatic level sensors processes the static pressure of a fluid by means of a capacitive ceramic sensor element. It is designed with front-alignment and hence avoids nearly all faults due to sediments which is particularly important in the wastewater sector. The measuring transmitter is integrated into the probe and emits, at factory-set operating range, a 4...20 mA output signal based on the 2-wire system or a 3-wire 0...10 VDC output signal.

Application:

The pressure probes FD-03 have been developed for deployment in harsh industrial conditions. They have been extremely efficient especially in the management of sewage plants for obtaining levels in tanks and vessels. The devices are selectable for all DIN ranges up to 200 m water column. Special operating ranges are available on request. The process connection is constructed intentionally in the large surface 1 1/2"-male version. Optionally, other connection types can also be supplied. Even when used in hostile media such as acids and alkalis, FD-03 were able to yield excellent results due to the consistency of the process connection made of stainless steel or PVDF and the capacitive ceramic sensor element made of 96% AL₂O₃ or the even higher resistant 99% AL₂O₃.

Electrical Specifications:

Output signal /	4...20 mA, 2-wire or 0...10 VDC, 3-wire
Supply /	for 4...20 mA output: 9...32 VDC, for Ex-Version: 14...28 VDC for 0...10 VDC output: 12,5...32 VDC

FD-05

Miniature Hydrostatic Level Transmitter

Features

- / Slender 0.63" (16mm)
- / Accuracy 0.25% or 0.1%
- / Up to 200 m water-column
- / 2- or 3-wire-technology
- / <50 ms reaction time
- / Desiccant filter

Description:

This miniature hydrostatic level transmitter measures the height of a water-column, residing above a stainless-steel membrane, via the hydrostatic pressure. A piezoresistive probe converts the registered pressure into a 4...20 mA signal, proportional to the fluids level. The corresponding current output operates with 10 to 33 VDC power supply. The suspension can be carried over the cable and the proven 2- or 3-wire-technology keep the installation costs very low.

Application:

This level transmitter can be used everywhere, where an exact and stable output signal about the level is needed. The sensors very small diameter even enables mounting it through a hole in a tank. With its small membrane, the FD-05 is to be used best with clear fluids, and non-polluted liquids. Possible areas of application could be balast tanks, remote maintenance, ground water monitoring, flood monitoring, surface-water monitoring, drainage systems, environment monitoring, tight pipes & narrow plants and drill hole monitoring.

Technical Specifications:

Service /	compatible liquids
Accuracy /	±0.25% or ±0.10% FS. 4.3...4.9 psi (10...11.54 in w.c.) configured ranges are ±0.30% FS accuracy

KS-01/D

Conductive Level Switches

Features

/ Low-cost electrodes

/ sideways mounting

/ Easy to assemble

/ No mechanics

/ Low maintenance requirements

Description:

The KS-01/KS-01D series of conductive level switches is intended for obtaining the level of conductive fluids in combination with an electrode relay (e.g. ER-01). In case of no fluid between the two electrodes of the KS-01D or the vessel and the electrode of the KS-01, the circuit, provided by the electrode relay, is open and no current flows. As soon as liquid connects the electrodes, a flow of current is picked up by the electrode relay which transmits a switching signal. The KS-01 includes just one electrode, which is insulated against the vessel. The KS-01D contains two electrodes, both flush mounted in a plastic thread from polypropylene.

Application:

- for determining limit level in vessels with conductive fluids
- full or empty reporting
- level controlling between two levels
- overload security
- dry-run protection

Technical Spec. KS-01:

Screw fit electrode / stainless steel V2A with Teflon socket

Technical Spec. KS-01D:

max. Pressure / 6 bar

max. Media temp. / -5...+60°C

Process connection / G 1/2"-male

Electrical connection / 2 m infused cable PVC,
2 wire, 0,25 mm² each

ER-01

Conductive Electrode Relay

Features

- / Single or dual channels
- / 24 V DC or 230 V AC
- / Secured galvanic isolation
- / MIN-MAX control
- / Limit value identification
in conductive fluids
- / Operating and
closed-circuit switchable

Description:

The ER-01 electrode relay outputs a measuring voltage to a ground electrode and to one or more additional electrodes. While immersing the ground electrode and another electrode into the fluid that needs to be monitored, a low AC measuring current flows signaling the presence of a medium. Flow of this AC is intercepted by ER-01 and evaluated. Possible electrolytic disintegration of the medium and hazardous contact voltages are safely avoided, since the measuring current is very low and is not capable of generating any galvanic elements.

The ER-01 series of electrode relays can also be used as simple contact network relay in which, for example, potential-free REED contacts replace the electrodes. This is an important aspect if the maximum power rating of the REED emitter is insufficient for connecting the required heavy loads.

Application:

Electrode relays are used in combination with conductive rod screw type or suspended electrodes (see also Profimess' KS-...), if the level of conductive fluids needs to be registered, controlled or regulated. In this, limit level switching (overflow and dry run) as well as MIN-MAX controls can be implemented. In this case, the relay at the output is changed over when one of the two limit levels is activated, with the result that the filling level reciprocates between these two predefined levels.

Electrical Specifications:

Supply voltage /	ER-01.x.24: 24 V DC ER-01.x.230: 230 V AC, 48-62 Hz (24 V AC, 42 V AC, 48 V DC, 115 VAC 240 V AC and 127 V AC on request)
Power consumption /	max. 1 W / VA

KS-02

Conductive Level Switch

Features

**/ Single or multiple electrodes
(up to 5 setpoints)**

/ Easy to assemble

/ Electrode rods made of st. steel

**/ Electrode relay for limit values,
pump control or pump control
with overflow and dry-run pro-
tection (see Data sheet ER-01)**

Description:

The KS-02 series of conductive level switches is intended, in combination with the electrode relay ER-01, for obtaining the level of conductive fluids. An AC voltage is connected to an electrode insulated from the vessel. When the medium contacts this electrode, a small current flows from the electrode through the medium to the vessel wall (in the case of plastic vessels to a separate ground electrode). This flow of current is picked up by the electrode relay and transmitted as a switching signal.

Application:

- for determining limit level in vessels with conductive fluids
- full or empty reporting
- level control between two levels
- overflow protection
- dry-run protections

Benefits:

- no mechanical moving components
- independent of specific weight of medium
- compact design
- possible to mount vertically or horizontally

Versions:

- KS-02.01. . .05:** Single electrode with fixed screw on thread or with cutting ring joint for adjusting the electrode length
Electrical connection: PVC or silicon cable or polyester terminal housing
- KS-02.25. . .28:** Multiple electrodes
max. number of electrodes depends on size of joint
Electrical connection: polyester terminal housing

Technical Specifications:

- max. Pressure /** 1 bar (single electrode), up to 100 bar, on request pressureless (multiple electrodes)
- max. Media temp. /** +100°C (single electrodes)
+80°C (single electrodes, adjustable and multiple electrodes)
- Coating /** Teflon

KS-03

Compact Conductive Level Switch

Features

- / With integrated electronics
- / 24 V DC supply
- / One switching point or
MIN/MAX control
- / Adjustable sensitivity
- / Electrode material SS, Titanium,
Hastelloy or Tantalum
- / Plastic or stainless steel head

Description:

Inside the connector head of the KS-03 compact conductive switch is an electronic unit that is supplied with 24 V DC to provide a weak AC voltage to the switch's electrode rods. Whenever a conductive fluid establishes a connection between two of the electrodes, it results in an AC current which is recognized by the electronic components; subsequently it activates at the output an NO contact either as a limit switch or as MIN-MAX control. In this way, any excess or shortfall of allowed fill level can be monitored, or a particular level between two predefined levels (emptying or filling) can be maintained.

Application:

The compact conductive switch KS-03 is unbeatable in its versatility. The connector head and the screw joints can be made of plastics or stainless steel; the electrode rods can be made of Hastelloy, Titanium, Tantalum or stainless steel where the rods can be insulated partially or fully using different materials. The electronic component in the connector head of KS-03 offers the option of four different settings of sensitivity which enable under circumstances also capturing interfaces between two fluids with KS-03 if the fluids are adequately different in their conductivity. The attractive pricing and compact design of KS-03 make the device an ideal choice for a number of applications in practically every type of automation in the industry.

WD-03

Water Leak Detector

Description:

The water-leak-detector WD-03 series detects conductive liquids e.g. water in drip pans beneath containers. The WD-03 reacts with visible and audible alarms, as soon as it detects a leak, therefore avoiding expensive damages. The operating principle of WD-03 bases on the conductivity of water or another conductive liquid. The contacts at the bottom of WD-03 detect the resistance alteration that takes place, as soon as these contacts are wetted by the leaking fluid and get therefore galvanically connected. Model WD-03.B is battery powered and offers an audible alarm, a visible alarm by red LED and a solid-state-relay output. A yellow LED indicates also, when the battery is weak. Models WD-03.DN, and WD-03.DY are 11. . 27 V AC/DC line powered and include a DPDT-relay. An additional green LED indicates the active supply voltage. Mounting bracket MB is included. It enables the user to adjust the mounting height of WD-03, if it is placed at the bottom of a drip pan, and the unit shall be mounted in an increased position to avoid false alarms. The mounting height of WD-03 is therefore adjustable down to 0.8 mm ground clearance. The bracket can be attached to a flat surface by using either the attached adhesive strips or mounting screws. Of course, WD-03 may also be mounted to the side wall of a drip pan.

Features

- / Cost-effective
- / Protection against short-circuit
- / Protection against corrosion
- / Easy to install
- / Battery or line powered
- / Audible and visible alarms
- / Green LED indicates supply voltage
- / Relay output

Application:

The WD-03 series is used to detect water and other conductive, non-aggressive liquids. The units are simply mounted beneath HVAC facilities, dishwashers, washing machines, refrigerators, compressors or electrical facilities to detect draining conductive fluids. The WD-03 series is very affordable and offers a reliable protection against the significant cost following the spilling of liquids into sensible areas.

Versions:

Supply voltage /

- WD-03.B: 3 V CR2450 lithium metal battery, user replaceable, lifespan app. 5 years steady state, app. 48 hours during alarm condition
- WD-03.DN: 11. .27 V AC/DC
- WD-03.DY: 11. .27 V AC/DC

FC-01

Limit Level Switch for Bulk Goods, Fluids, Slurries, Interface and Foam Detection

Features

- / Easy to mount
- / Maintenance-free
- / No moving components
- / Adjustable sensitivity

Description:

The FC-01 series of capacitive limit level switches utilizes the different dielectric constant between air and the medium being monitored in order to detect its presence. A plate capacitor, whose electrical properties depend on the dielectric number of the medium surrounding it, is situated within a protective tube made of plastic. The capacity C of this capacitor is captured by measuring the impedance of a circuit loaded with high-frequency current and evaluated. The response sensitivity of the FC-01 can be adjusted directly on the device by means of a simple potentiometer. In the event of a switching operation, the current in the supplying 2-wire loop drops from 20 mA to 4 mA (or increases inversely depending on the polarity) and a transistor or output switches through.

Application:

The FC-01 is suited for monitoring solid and fluid media including slurries and foam. Selectively, the sensor material is made out of Kynar or abrasion-resistant Ryton so that even hostile and abrasive materials can be detected without problem. The range for temperature is kept at a generous range of $-30 \dots +100^\circ\text{C}$ or $-10 \dots +100^\circ\text{C}$ in order to allow a maximum of 10 bar pressure in the entire range. Also with regard to the downstream evaluating electronics the user has no limits. The „Current Sink“ output operates along with 2-wire feeder devices and the transistor output can connect to DC and AC voltages up to 30 V. The FC-01 can be provided with terminal housing for harsh atmospheric conditions or with fixed cable cord and optionally as intrinsically safe version for Zone 0 or Zone 20 (barrier required). For applications in chemically aggressive areas a fully synthetic version is available, which offers a process connection made of PPS instead of stainless steel. The chemical resistance of the FC-01, its insensitivity to high vibrations, its accuracy and, not the least, its affordable price render the FC-01 into a universal device that is capable of replacing a tuning fork-switch, a rotating vane sensor or a float switch in many places.

Electrical Specifications:

Supply voltage /	standard 12...33VDC, intrinsically safe 10...30VDC
Output signal /	falling or rising current 20 on 4 mA or 4 on 20 mA, depending on connection
Switching output /	transistor: 30 V DC/AC, max. 82 mA
Repeatability /	2 mm
Dielectric constant /	min. 1.5
Protection class /	IP65 with cable cord IP68 with housing
Certificates /	Int. safe (barrier required): CSA/FM Class I, II und III, Div. 1, Groups A, B, C, D, E, F, G, T4 ATEX II 1 GD 1/2GD EEx ia IIC T4...T6 T107°C

FS-01

Float Switch

Features

- / Easy to assemble
- / Cost-effective
- / No response lag
- / Maintenance-free
- / Reliable
- / High switching load

Description:

The FS-01 series of float switch operates according to the principle of buoyancy. A hollow float is lifted by the raising level of fluid as long as a switching operation is triggered at an angle of 25° to the horizontal line. The switch can be suspended by means of a screw joint directly in the vessel or, in the case of open vessels, from above. The setpoint is determined by the weight that is always included in the delivery package. The FS-01 consists of an extremely rough, nearly unbreakable polypropylene float. The switch is, therefore, almost unsinkable even due to excessive mechanical stress.

Application:

The FS-01 level switch is suited for level monitoring in fluids as in all types of industrial applications of direct pump controlling thanks to its high power rating. It can be used especially as control for MIN, MAX, FULL, EMPTY, OVERFILL and DRY-RUN.

Technical Specifications:

max. Pressure /	3.5 bar
max. Media temp. /	85°C
Float /	PP
Media density /	0.7 .. 1.15 g/cm ³
Float weight /	200 g without cable
Adjustable weight /	250 g movable on cable
Switching angle /	± 25° to the horizontal line

Electrical Specifications:

Contact /	micro-switch as change-over contact 12, 24, 48 VAC/VDC and 250 VAC - 50/60 Hz 16 A (resistive), 6 A (inductive)
Cable /	3 x 1 mm ² Neoprene or HR HY

FS-01EX

Float Switch

Features

- / ATEX approval for Zone 0 and 20,
gases, dust and vapours
- / HR HY (Hypalon) -coated
float for hostile media
- / HR HY (Hypalon) cable
- / Non-Ex-version with
high switching load
- / Ex-version with gold contacts
for intrinsically safe operation

Description:

In the same way as the simple FS-01, the FS-01EX operates according to the principle of buoyancy. A hollow float is lifted by the raising level of fluid as long as a switching operation is triggered at an angle of 25° to the horizontal line. The float switch can be inserted from the side by means of a screw joint directly in the vessel or, suspended from above with a weight as the pivot into the vessel or duct. The float of the FS-01EX is made of polypropylene as the basic material which is fully coated with HR HY (Hypalon). This material, also used for the FS-01EX cable, has excellent resistance to chemically hostile media. In the Ex version, the FS-01EX has gold-plated contacts instead of a standard micro-switch and must therefore be evaluated by an intrinsically safe power circuit.

Application:

The FS-01EX level switch is suited for level monitoring in chemically hostile fluids as they frequently occur, for example, in sewage treatment plants or pump sumps in contaminated soils. The switch is supplied always in the Hypalon-coated version and the standard version can be loadable with 16 (6) A at 250 VAC. In the ATEX approved variant, the mechanical design remains unchanged; however, the micro-switch is designed for an intrinsically safe power circuit.

Technical Specifications:

max. Pressure /	4 bar
max. Mediatemp. /	FS-01EX.x.1 - without approval: max. 90°C FS-01EX.x.2 - with approval: T6 and Ta at ambient temperature from -20. . .+70°C

FS-02

Float Switch for Horizontal Mounting

Features

- / Suitable in ship-building
- / Max. pressure to 232 bar
- / Robust
- / Stainless steel- and plastic version
- / DN50. . .DN100 flange
- / Pump and level control
- / Explosion proof version

Description:

With the robust float switch of the FS-02 series, a float moves on a rotatable stainless steel lever at the level of the medium to be monitored. A reed contact inside the contact tube is actuated by a permanent magnet when a switching point is reached. This principle enables a contactless and wear-free switching process that does not require any auxiliary energy. The reed contact can be designed as a NO-, a NC- or a changeover contact, with signal processing being universal. A direct connection to a signal amplifier or a contact protection relay or many other evaluating circuits is possible without any problems.

Application:

The float switch FS-02 is used to monitor level limits and is designed for side installation on the tank. Various DIN- or ANSI- flange variants are available as process connections, as well as the square flange that is widely used on the market. The proven technology of this series has established itself in all areas of industry due to its extremely wide application limits with regard to pressure, temperature, media density and durability.

The switching technology via a magnetically controlled REED contact enables the device to be used in explosion-proof areas according to ATEX, insofar as the float switch is operated via an intrinsically safe isolating switching amplifier. The intended function of the FS-02 is not influenced by the conductivity of the medium, foaming, blistering or vibration.

Electrical Specifications:

Switching function /	Reed contact, alternatively normally open (NO), normally closed (NC) or change-over (SPDT) Ex version only change-over
Switching power /	FS-02.x: 230 VAC, 40 VA 1 A 230 VDC, 20 W 0,5 A

FS-03

Float Switch

Features

/ Low-cost design

/ 2 chamber system

/ Compatible with drinking-water

/ Mercury-free

Description:

The FS-03 float switch operates according to the principle of buoyancy. A hollow float is lifted by the raising level of fluid as long as a switching operation is triggered at an angle of 45° to the horizontal line. The switch can be suspended by means of a screw joint directly in the vessel or, in the case of open vessels, from above. The setpoint is determined by the counterweight that must be ordered separately. The FS-03 consists of a polypropylene float with a total of two hollow spaces sealed against each other. The switch is, therefore, unsinkable even due to mechanical damages. As regards the cable material, the user has a choice between PVC or Neoprene.

Application:

The FS-03 level switch is suited for level monitoring in fluids as in all types of industrial applications of direct pump controlling thanks to its high power rating. The switch is small in size and its switching behavior is individually adjustable through a variable weight. It can be used especially as control for MIN, MAX alarm, DRY-RUN and as pump control. The affordable price of FS-03 makes the switch highly recommendable for series deployment in large numbers.

Versions:

FS-03 Float Switch

Cable material: The FS-03 is selectively provided with a PVC or Neopren cable.

Cable length: The cable length can be selected from among 5, 10 and 20 meters.

Electrical Specifications:

Contact /	change-over, 10A ohmic (4A inductive) for 250VAC
Life span /	min. 10 million switching operations
Protection class /	IP 68
Electrical connection /	cable diameter 9 mm, 3-wire with a cross-section of 1 mm ²

Technical Specifications:

Float material /	polypropylene
Float volume /	430 cm ³
Float diameter /	106 mm
Float weight /	250 g without cable
Counterweight /	polystyrene
Media density /	at least 0,8 g/cm ³
Media temperature /	0 bis +50°C
Pressure /	max. 1 bar
Switching angle /	± 45° to the horizontal line

Electrical Specifications:

FS-05

Float Switch for Mounting through 1" Bushings

Description:

The FS-05 plastic float switch is a level switch in which a ball actuates a micro-switch depending on the inclination angle of the float cylinder. The single pole change-over contact changes its switching status depending on if the axis of the FS-05 is inclined by more than 20° positively or negatively to the horizontal line (fluid surface). On the basis of this action, the FS-05 is ideal suited for automating emptying and filling fluid vessels. The special feature of the cylindrical design of this series of float switch is that the maximum external diameter of the floating body does not exceed 29 mm, thereby allowing to insert the switch through an inch-system bushing into the vessel. The high switching capacity allows the user to switch pumps or large magnetic valves directly using the FS-05. In this, for safety-technical reasons, a contact protective relay such as the PROFIMESS MSR-10 should be deployed whenever there is a possibility of humans coming into contact with the measuring medium.

Application:

The FS-05 series of float switches is used in large numbers across several industries. Their excellent price to performance ratio often allows the user to decide in favor of such a plastic switch as against, for example, tuning fork switches or capacitive limit switches. Moreover, expensive downstream electronic units can be avoided since the FS-05 is capable of processing relatively high performance directly. Particularly, if ferrite particles in the measuring medium cause adhesions or float jamming with conventional float magnetic switches, the FS-05 with its non-magnetic switching element can be a dependable alternative.

The FS-05 can be mounted in two different ways. The float switch can be attached either sideways by means of a conventional cable joint so that the cable length projecting into the vessel determines the angle of switching and, therefore, the setpoints or, the FS-05 can be suspended vertically from above. The response points are determined by the position of the displaceable counter weight which is optionally available.

Features

/ High pressure resistance

/ Cost-effective

/ High switching load

/ Neoprene cable

/ Opt. available with counter weight

Electrical Specifications:

FS-08

Suspended Float Switch with Internal Weight

Features

- / Cost-effective
- / Easy to assemble
- / No response delay
- / Maintenance-free
- / Reliable
- / Media temperatures up to 70°C
- / Small switching hysteresis
- / High switching capacity

Description:

The series FS-08 consists of robust plastic float switches for water applications in two different sizes. The main advantage of this series is its internal weight, which allows the float to pass through grease or oil layers that tend to form in wastewater pumping stations and ensure a reliable detection of levels below these layers. The rounded design of the float and the relocation of the external weight inside also reduces the sensitivity to impurities and deposits. A smaller manufactured size for applications in containers with limited spatial conditions, e.g. like shafts and wells, is available. The FS-08 float switch operates according to the principle of buoyancy. A hollow float is lifted by the raising level of fluid until a switching operation is triggered at an angle of 10° to the horizontal line. The switch can be suspended by means of a screw joint directly in the vessel or, in the case of open vessels, from above.

Application:

The FS-08 level switch is suited for level monitoring in fluids as in all types of industrial applications of direct pump controlling thanks to its high power rating. It can be used especially as high or low level alarm, as overflow or dry-running protection and as well as pump control. Compatible mediums are clear, clean fluids, rain water, sewage water, slightly aggressive fluids like oils and mud etc..

FS-16

PTFE Float Switch for Side Mounting

Features

- / High chemical resistance
- / Media temperature up to 150°C
- / High switching load
- / Easy to assemble
- / Reliable
- / Mercury free
- / Rod versions

Description:

The FS-16 series comprises Teflon® float switches having both an excellent temperature and a brilliant chemical resistance. The body of the float switch is made of PTFE with an integrated built-in reed contact. In addition, the cable outlet of the FS-16 can be supplied with a PTFE bellows, so that the cable does not come into contact with the medium. Furthermore, custom-made float switch combinations of up to three floats in a rod version, with a maximum length of three meters are possible. The FS-16 float switch operates according to the principle of buoyancy. A hollow float is lifted by the raising level of fluid as long as a switching operation is triggered at an angle of 20° to the horizontal line. The determination of the setpoint is performed by the lateral installation of the float switch on the desired height.

Application:

The main area of application is the detection of fluid levels (overflow and dry-running). By using at least two floats, one working as a maximum contactor and the other as a minimum contactor, in combination with a bistable contact protection relays from Profimess, automatic level control can be achieved. Design and material selection predestine this float switch for hot, extremely aggressive or contaminated liquids.

Contact protection relais:

We recommend the use of contact protection relays in combination with our float switches.

- Especially for protection of individuals with regard to liquid contact
- Control for automatic filling or emptying via bistable interval relay with locking feature (see also multifunction relay MSR in the section accessories)

FS-17

Stainless Steel Float Switch for Side Mounting

Features

- / Wetted parts stainless steel
- / High chemical resistance
- / Media temperature up to 150°C
- / Up to 15 bar
- / High switching load
- / Easy to assemble
- / Reliable
- / Mercury free
- / Rod versions

Description:

The FS-17 series comprises rugged stainless steel float switches having both an excellent temperature and a high pressure resistance. This series is available in two different designs. Furthermore, custom-made float switch combinations of up to five floats in a rod version, with a maximum length of five meters are possible. The FS-17 float switch operates according to the principle of buoyancy. A hollow float is lifted up by the raising level of fluid until a switching operation is triggered at an angle of 20° to the horizontal line. The determination of the setpoint is performed by the lateral installation of the float switch on the height of the desired position. The complete FS-17 is designed so that the float is hermetically sealed with the pipe inlet.

Application:

The main area of application is the detection of fluid levels (overflow and dry-running). By using at least two floats, one acting as a maximum contactor and the other as a minimum contactor and in combination with a bistable contact protection relays, automatic level control can be achieved. Design and material selection predestine this float switch for very aggressive, pasty or hot liquids.

Contact protection relays:

We recommend the use of contact protection relays in combination with our float switches.

- Especially for protection of individuals with regard to liquid contact
- Control for automatic filling or emptying via bistable interval relay with locking feature (see also multifunction relay MSR in the section accessories)

FS-10

Float Switch for Bulk Solids

Description:

The FS-10 plastic float switch is a level switch in which, depending on the angle of inclination of the floating cylinder, a ball activates a microswitch. The switch works as soon as the vertical axis of the FS-10 is tilted by more than 10° towards right or left. Due to this action, the FS-10 is ideally suited for shutting down a filling operation for grain, flour, granulate material or powders in silos or other containers. There are three basic models of FS-10 available which are different with regard to their applicability in explosion-prone areas. The simplest design does not have the EX approval and is made of a polypropylene hollow body and a Neopren cable. This easily affordable device is capable of covering 80% of all applications. Both the ATEX approved models are allowed either only for dust materials or for gases and dust materials highly prone to explosions. In these devices the basic body is surrounded additionally by a shell made of HR HY (Hypalon), an excellent resistant material, where also the cable is made of this material. In the case of the purely EX variant for dust material, up to 240 V AC / 1A can be connected directly through FS-10 regardless of the EX-approval; the supply system for the gas and dust EX model of FS-10 is handled by an intrinsically safe isolated switching amplifier.

Features

/ ATEX approval for dust and gases in zones 0 and 20

/ Double-shell housing with HR HY (Hypalon) coating

/ High switching capacity due to microswitches

/ Neopren or HR HY (Hypalon) cables

/ Optionally available with counter weights

Application:

The FS-10 series of flow switches offers the ideal solution wherever a bulk material filling operation needs to be shut down in a container. These devices are cost-effective, extremely robust and water-proofed and can be installed easily. The three models of FS-10 cover nearly every type of applications as they comply with the highest requirements for protection against explosion and media resistance. The FS-10 is fixed directly to the cable and suspended into the silo, where optionally a counter weight on the cable acts as the pivot; alternatively FS-10 can be inserted by means of a cable gland. At the output point of FS-10 a potential-free changeover-contact is available which is capable of connecting up to 20A at 250 V AC depending on the design of the device.

Float Switch for Horizontal or Vertical Mounting

Features

/ Suitable in ship-building

/ Cost-effective

/ Robust

/ Square flange or thread connection

/ DN80 to DN150 flange

/ Fixed and adjustable hysteresis

/ Explosion proof version

/ SIL 1

Description:

A float spatially completely separated from the outer side of the vessel moves up and down along with the fluid being monitored. This movement is transmitted by means of a permanent magnet at the end of the float to a change-over contact mounted in an aluminium switch housing which triggers a switching operation when the float reaches the center position. The float can be provided with a rod extension so as to generate different switching hystereses and switching points. The switch housing can be supplied with protection type IP68 so that also applications under water (up to 20 m water column) can be included. Optionally, PROFIMESS GMBH supplies a prefabricated proven counter-flange that is compatible with the standard connection of the FS-04 with square flange and test actuators for a „dry“ simulation of the switching operation.

Application:

The FS-04 series of magnetic float switches is used for limit value switching in fluids. The switches are passive components and operate without any auxiliary power source. Thanks to the wide range of operating temperatures and pressure, including various mounting positions on top, on the side, under water or in potentially explosive areas as well as media-contacted components in stainless steel, the switches can be deployed in many ways. In ship-building, particularly, the FS-04 has gained a significant position since it has an extremely robust design and can be used for operation under the harsh conditions on board without a problem in contrast to many other types of switches.

Technical Specifications:

max. Pressure /	PN25
Weight /	1.8 .. 3.5 kg

Media density /	0.7 g/ccm without extension 0.8 g/ccm to 300 mm extension for float diameter 64 mm 0.85 g/ccm to 300 mm extension for float diameter 52 mm
Certificates /	Atex, Germanischer Lloyd, SIL 1
Option /	Test actuator: with the test actuator the functioning of FS-04 can be checked without dismantling the switch and without changing the level. The test actuator is available as simple steel or stainless steel version.
Counter-flange /	92 mm square counter-flange can be supplied in steel or stainless steel versions which are prepared for direct welding on to the vessel. They can be provided with extended spacer bolts for using a test actuator.
Explosion protection /	The switch housing is available in pressure-compression encapsulation, in which case the protection against ignition is EEx dme IIC T2. . . T6.

LS-10N

Float Switch for Level Detection

Features

- / Up to 15 m insertion length
- / Up to 150 bar and 250°C
- / Top, bottom or lateral mounting
- / Contacts available as NC-contact, NO-contact or change-over contact
- / High repeatability of set points
- / Optionally with temperature sensor
- / Customized designs
- / Stainless steel (ECTFE or PFA coated), Titanium, Alloy C, Brass, PVC, PP, PA, PVDF

Description:

The LS-10N series of level switches operates according to the principle of a float with magnetic transmission. The switch consists of a sliding tube with embedded reed contacts, one or more floats in which ring magnets are mounted, and a connecting module. The float is lifted inside the vessel due to the rising fluid level; subsequently, it actuates a reed contact as a result of the magnetic field of the permanent magnet situated in the float through the sliding tube wall. The reed contact can be designed to function as a NC-contact, NO-contact or change-over contact.

Application:

The LS-10N level switches are suited for monitoring the level of nearly all types of fluid media as an alarm for full or empty levels, for controlling valves and pumps or for alert signals. By deploying potential-free reed contacts, the level switches provide an ideal switching element in combination with PLC controls (apply PLC-contact or series resistor).

When ordering, please specify in detailed text: medium, medium density, operating pressure, operating temperature and special issues

Versions:

Every float switch consists of following three main component groups which are available in different versions depending on the technical requirements:

- sliding tube
- float
- process connection

Sliding tube:

The sliding tube is the core of the float switch as it holds the reed contacts and it can be supplied in a number of materials and diameters.

For example:

- stainl. steel (Ø 8 mm, 12 mm, 14 mm, 16 mm, 18 mm, 40 mm)
- stainless steel electropolished (Ø 8 mm, 12 mm, 14 mm, 16 mm, 18 mm, 40 mm) / Ra appr. 0.8 µm (not attestable)
- stainless steel ECTFE coated (Ø 11 mm, 17 mm)
- stainless steel PFA coated (Ø 11 mm, 17 mm)
- Titanium (Ø 12 mm, 14 mm, 18 mm)
- Alloy C (Ø 12 mm, 18 mm)
- PVC (Ø 8 mm, 12 mm, 16 mm, 20 mm)
- PP (Ø 8 mm, 12 mm, 16 mm, 20 mm)
- PVDF (Ø 12 mm, 16 mm, 20 mm)

Float:

Each variant has a matching float. However, if the application requires other values in terms of maximum pressure, temperature or low specific gravity, an alternative float can also be fitted in as far as it fits with its bore on the sliding tube of that variant. Table 1 and 2 provides an overview of spherical and cylindrical floats, their dimensions, weights and immersion depths.

Process connection:

Various options are available as mechanical and electrical connections to the float switch. The following pages offer an overview about which variant suits to which process connections. Depending on whether the float fits through the threaded bore or not, the connecting threads are directed in different versions. "Up" installation through the interior, or "down" for the installation from the outside. If the electrical connection is realized via a cable, the maximum temperature on the cable sheath must be taken into account. Standard cable with PVC sheath ranges from -20...+80°C, the version with silicone sheath ranges from -60...+180°C. Other materials such as Teflon cord can also be offered on request for temperatures up to +200°C.

Switching contacts level:

These contacts are defined as normally open, normally closed or change-over with increasing level. The following switching values⁽¹⁾ are based on:

Reed contact values - Sliding tube < 12 mm

Function	Normally open	N. closed	change over
Switching voltage	150 V	150 V	150 V
Switching current	0.5 A	0.5 A	0.5 A
Switching load	10 VA	10 VA	10 VA

Reed contact values - Sliding tube ≥ 12 mm

Function	Normally open	N. closed	change over
Switching voltage	230 V	230 V	230 V
Switching current	1.0 A	0.5 A	0.5 A
Switching load	100 VA	40 VA	40 VA

Switching Contact Temp.:

In addition, the float switch for level detection can be equipped with a temperature switching contact. This contact is defined as NO or NC with increasing temperature. The following switching values⁽¹⁾ are based on:

Function	Normally open	Normally closed
Switch rating	230 V / 0.5 A / 40 VA	230 V / 0.5 A / 40 VA
Operating range	+80...+160°C	+50...+160°C
Graduation	every 5 K	every 5 K
Accuracy	± 5 K	± 5 K
Hysteresis	30 K ± 15 K	30 K ± 15 K
Sliding tube	≥ Ø 11 mm	≥ Ø 11 mm

Temperature Sensors:

In the sliding tube of the LS-10N an additional temperature sensor can be installed as a Pt100 or Pt1000. The measuring resistors meet the following specifications:

Function	Normally open	Normally closed
Actuation temp.	-70...+400°C	-70...+400°C
Tolerance	Class B	Class B
Properties	from IEC 751	from IEC 751
Connection Type	2-, 3-, or 4-wire	2-, 3-, or 4-wire
Sliding tube	≥ Ø 8 mm	≥ Ø 8 mm

⁽¹⁾ The values shown are maximum values when using earth conductor. In some cases it is not always technically possible to provide an earth conductor, for example versions with cable- or plug connection and multiple number of contacts. Designs without earth connection should use low voltage only, for example contact protection relays or external protective earth. The electrical details apply to ohmic loads. Capacitive, inductive and lamp loads must be operated using a protective circuit.

Table 3: Electrical Connection

Connection Type K
Connecting cable

Material: as defined cable
Cable gland: PG or M
Prot. class: IP55 (optional IP68)
Ambient temp.: -40...+200°C
No. of contact clamps: max. -

Connection Type E
Aluminium socket

Material: Al coated RAL 7001
Cable gland: M20 x 1,5
Prot. class: IP65
Ambient temp.: -40...+100°C
No. of contact clamps: max. 8

Connection Type F
Aluminium socket

Material: Al coated RAL 7001
Cable gland: M20 x 1,5
Prot. class: IP65
Ambient temp.: -40...+100°C
No. of contact clamps: max. 12

**Float switch made of stainless steel with upward thread connection**

Version: VAG18PVC

Version: VAG18SIL

**Technical Specifications:**

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	PVC connecting cable
Process conn. /	G 1/8"-male upwards
Sliding tube /	ø 8 mm
Insertion length /	≤ 1000 mm
Float /	Z27S10E
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1...+6 bar
Design temp. /	-20...+80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 30 mm, U = 30 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 45 mm

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	PVC connecting cable
Process conn. /	G 1/8"-male upwards
Sliding tube /	ø 8 mm
Insertion length /	≤ 1000 mm
Float /	K29S9.4E
spec. Weight /	≥ 900 kg/m ³
Design pressure /	-1...+35 bar
Design temp. /	-30...+180°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 35 mm, U = 30 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 45 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	150 V / 0.5 A / 10 VA
max. Contacts:	3
Switching funct. /	opener /NC
Switch rating:	150 V / 0.5 A / 10 VA
max. Contacts:	3
Switching funct. /	change over /U
Switch rating:	150 V / 0.5 A / 10 VA
max. Contacts:	2
Prot. class /	IP55
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	-
Approvals:	ATEX, PED, GOST, GL, BV, ABS, WHG, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	150 V / 0.5 A / 10 VA

Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, GL, BV, ABS, WHG, SIL1

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	Silicone connecting cable
Process conn. /	G 3/8"-male upwards
Sliding tube /	ø 12 mm (optional ø 14 mm)
Insertion length /	≤ 5000 mm**
Float /	K52S15E1
spec. Weight /	≥ 680 kg/m ³
Design pressure /	-1. . .+30 bar
Design temp. /	-30. . .+180°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 55 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, GL, BV, ABS, WHG, SIL1

** ATEX = if length of instrument ≥ 4 m please choose diff. material quality for guide tube and float

**Float switch made of stainless steel with downward thread connection**

Version: VAG112G

Version: VAG2G

**Technical Specifications:**

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	Type E - Aluminium socket
Process conn. /	G 1 1/2"-male downwards
Sliding tube /	ø 12 mm (optional ø 14 mm)
Insertion length /	≤ 5000 mm**
Float /	Z44S15E
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. . .+25 bar
Design temp. /	-30. . .+180°C (optional 250°C)
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 50 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	Type E - Aluminium socket
Process conn. /	G 2"-male downwards
Sliding tube /	ø 12 mm (optional ø 14 mm)
Insertion length /	≤ 5000 mm**
Float /	K52S15E1
spec. Weight /	≥ 680 kg/m ³
Design pressure /	-1. . .+30 bar
Design temp. /	-30. . .+180°C (optional 250°C)
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 55 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, GL, BV, ABS, WHG, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, GL, BV, ABS, WHG, SIL1

** ATEX = if length of instrument ≥ 4 m please choose diff. material quality for guide tube and float

Float switch made of stainless steel with flange connection

Version: VAF80G

Version: VAF100G

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	Type E - Aluminium socket
Process conn. /	Flange EN DN80 / PN16 / Form B1
Sliding tube /	∅ 18 mm
Insertion length /	≤ 6000 mm**
Float /	K72S24.4E
spec. Weight /	≥ 620 kg/m ³
Design pressure /	-1. . .+16 bar (temperature-sensitive)
Design temp. /	-30. . .+180°C (optional 250°C)
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 60 mm, U = 60 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 90 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, GL, BV, ABS, WHG, SIL1

Technical Specifications:

Float switch made of stainless steel - adjustable

Version: VAVG12SIL

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	Silicone connecting cable
Process conn. /	G ½"-male downwards
Sliding tube /	∅ 12 mm, adjustable
Insertion length /	≤ 3000 mm
Float /	Z44S15E
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. .+.3 bar
Design temp. /	-30. .+.180°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 50 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, SIL1

Version: VAVG2G

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	Type E - Aluminium socket
Process conn. /	G 2"-male downwards
Sliding tube /	∅ 12 mm, adjustable
Insertion length /	≤ 3000 mm
Float /	K52S15E1
spec. Weight /	≥ 680 kg/m ³
Design pressure /	-1. .+.3 bar (temperature-sensitive)
Design temp. /	-30. .+.180°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 55 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, SIL1

**Float switch made of stainless steel - angled**

Version: VAWG38PVC

**Technical Specifications:**

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	PVC connecting cable
Process conn. /	G 3/8"-AG
Sliding tube /	ø 12 mm (optional ø 14 mm)
Insertion length /	≤ 3000 mm
Float /	Z44S15E
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. . .+25 bar
Design temp. /	-20. . .+80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 75 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA

Approvals:	ATEX, PED, GOST, GL, BV, ABS, SIL1

Float switch with bypass tube made of stainless steel

Version: VAFBHHG

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	Type E - Aluminium socket
Process conn. /	Flange EN DN25 / PN16 / Form B1
Bypassgehäuse /	∅ 60.30 x 2.00 mm
Mittenabstand /	M ≤ 1000 mm
Float /	Z44S15E
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. . .+16 bar
Design temp. /	-30. . .+180°C (optional 250°C)
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 130 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, GL, BV, ABS, SIL1

Version: VAFBHVG

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)

Float switch made of stainless steel - with oval flange

Version: VAFOPAS

Version: VAFOVAS

Technical Specifications:

Materials /	St. Steel/ Aluminium/ Buna
El. connection /	Connector Hirschmann DIN 43650
Process conn. /	Standard Oval flange 80 x 50 mm, PA
Sliding tube /	∅ 12 mm (optional 14 mm)
Insertion length /	≤ 5000 mm**
Float /	Z40S15NB
spec. Weight /	≥ 700 kg/m ³
Design pressure /	0...+0.5 bar
Design temp. /	-10...+80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 50 mm, U = 50 mm, Contact clearance: ≥ 20 mm Float clearance: ≥ 45 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	2
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	2
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	1
Prot. class /	IP65
Optional /	
Temp.-sensor:	-
Temp.-contact:	NO or NC
Approvals:	PED, BV, SIL1

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	Connector Hirschmann DIN 43650
Process conn. /	Standard Oval flange 80 x 50 mm
Sliding tube /	∅ 12 mm (optional 14 mm)
Insertion length /	≤ 5000 mm**
Float /	Z44S15E
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1...+1 bar
Design temp. /	-30...+150°C (optional 250°C)
Mounting pos. /	vertical ±30°
min. Dimensions	L1 ≥ 35 mm, U = 45 mm, Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	2
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	2
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	1
Prot. class /	IP65
Optional /	
Temp.-sensor:	-
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, GL, BV, ABS, SIL1

** ATEX = if length of instrument ≥ 4 m please choose diff. material quality for guide tube and float

**Float switch made of stainless steel - 3A sanitary standard**

Version: VASG38SIL

Version: VASMRG

**Technical Specifications:**

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti) roughness depth wetted $\leq 0,4 \mu\text{m}$
El. connection /	Silicone connecting cable
Process conn. /	G 3/8"-male upwards
Sliding tube /	$\varnothing 16 \text{ mm}$
Insertion length /	$\leq 5000 \text{ mm}^{**}$
Float /	K80S23E2
spec. Weight /	$\geq 750 \text{ kg/m}^3$
Design pressure /	-1. . .+40 bar
Design temp. /	-30. . .+180°C
Mounting pos. /	vertical $\pm 30^\circ$
min. Dimensions /	L1 $\geq 50 \text{ mm}$, U = 55 mm Contact clearance: $\geq 20 \text{ mm}$ Float clearance: $\geq 100 \text{ mm}$

Technical Specifications:

spec. Weight /	$\geq 750 \text{ kg/m}^3$
Design pressure /	-1. . .+6 bar
Design temp. /	-30. . .+180°C
Mounting pos. /	vertical $\pm 30^\circ$
min. Dimensions /	L1 $\geq 50 \text{ mm}$, U = 55 mm Contact clearance: $\geq 20 \text{ mm}$ Float clearance: $\geq 100 \text{ mm}$

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, WHG, 3A, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC

Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, WHG, 3A, SIL1

** ATEX = if length of instrument $\geq 4 \text{ m}$ please choose diff. material quality for guide tube and float

Float switch made of stainless steel - with hub float

Version: VAG2HGG

Version: VAG2HKG

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	Type E - Aluminium socket
Process conn. /	G 2"-AG
Schw.-Gestänge /	∅ 12 mm
Insertion length /	≤ 500 mm
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. . . +16 bar
Design temp. /	-30. . . +180°C (optional 250°C)
Mounting pos. /	vertical ±30°
min. Dimensions /	L1: -, U = - Contact clearance: - Float clearance: -

Approvals:	ATEX, PED, GOST, SIL 1

**Float switch made of stainless steel - with pendulum switch**

Version: VAG112PSG

Version: VAG112PPG

**Technical Specifications:**

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	Type E - Aluminium socket
Process conn. /	G 1 1/2"-male downwards
Schw.-Gestänge /	ø 12 mm
Insertion length /	≤ 3000 mm
spec. Weight /	≥ 1000 kg/m ³
Design pressure /	-1...+3 bar
Design temp. /	-30...+180°C (optional 250°C)
Mounting pos. /	vertical ±30°
min. Dimensions /	L': ≥ 150 mm, U = - Contact clearance: - Float clearance: -

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	Type E - Aluminium socket
Process conn. /	G 1 1/2"-male downwards
Sliding tube /	ø 12 mm
Insertion length /	≤ 3000 mm
Float /	Flat paddle 100 x 40 mm
spec. Weight /	-
Design pressure /	-1...+3 bar
Design temp. /	-30...+180°C (optional 250°C)
Mounting pos. /	vertical ±30°
min. Dimensions /	L': ≥ 150 mm, U = - Contact clearance: - Float clearance: -

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	1
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	1
Switching funct. /	change over /U

Float switch made of brass with upward thread connection

Version: MG18PVC

Technical Specifications:

Materials /	Brass (Float St. Steel)
El. connection /	PVC connecting cable
Process conn. /	G 1/8"-male upwards
Sliding tube /	ø 8 mm
Insertion length /	≤ 1000 mm
Float /	Z27S10E
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. .+.6 bar
Design temp. /	-10. .+.80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 30 mm, U = 30 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 45 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	3
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	2
Prot. class /	IP55
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	-
Approvals:	PED, SIL1

Version: MG18SIL

Technical Specifications:

Materials /	Brass (Float St. Steel)
El. connection /	Silicone connecting cable
Process conn. /	G 1/8"-male upwards
Sliding tube /	ø 8 mm
Insertion length /	≤ 1000 mm
Float /	K29S9.4E
spec. Weight /	≥ 900 kg/m ³
Design pressure /	-1. .+.6 bar
Design temp. /	-10. .+.150°C
Mounting pos. /	vertical ±30°
min. Dimensions	L1 ≥ 35 mm, U = 30 mm, Contact clearance: ≥ 20 mm Float clearance: ≥ 45 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	3
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 V
max. Contacts:	3
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	1
Prot. class /	IP55
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	-
Approvals:	PED, SIL1

Float switch made of brass with upward thread connection

Version: MG38PVC

Version: MG38SIL

Technical Specifications:

Materials /	Brass (Float St. Steel)
El. connection /	PVC connecting cable
Process conn. /	G 3/8"-male upwards
Sliding tube /	ø 12 mm (optional ø 14 mm)
Insertion length /	≤ 5000 mm
Float /	Z44S15E
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. . . +16 bar
Design temp. /	-10. . . +80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 50 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Technical Specifications:

Materials /	Brass (Float St. Steel)
El. connection /	Silicone connecting cable
Process conn. /	G 3/8"-male upwards
Sliding tube /	ø 12 mm (optional ø 14 mm)
Insertion length /	≤ 5000 mm
Float /	K52S15E1
spec. Weight /	≥ 680 kg/m ³
Design pressure /	-1. . . +16 bar
Design temp. /	-10. . . +150°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 55 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, SIL1

Float switch made of brass with downward thread connection

Version: MG112G

Version: MG2G

Technical Specifications:

Materials /	Brass (Float St. Steel)
El. connection /	Type E - Aluminium socket
Process conn. /	G 1 1/2"-male downwards
Sliding tube /	∅ 12 mm
Insertion length /	≤ 5000 mm
Float /	Z44S15E
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. . . +16 bar
Design temp. /	-10. . . +150°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 65 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Technical Specifications:

Materials /	Brass (Float St. Steel)
El. connection /	Type E - Aluminium socket
Process conn. /	G 2"-male downwards
Sliding tube /	∅ 12 mm
Insertion length /	≤ 5000 mm
Float /	K52S15E1
spec. Weight /	≥ 680 kg/m ³
Design pressure /	-1. . . +16 bar
Design temp. /	-10. . . +150°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 70 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, SIL1

**Float switch made of Polyamide - flexible**

Version: PAG112FLEX

Version: PAG2FLEX

**Technical Specifications:**

Materials /	Polyamid, Brass, St. Steel
El. connection /	Type E - Aluminium socket
Process conn. /	G 1 1/2"-male downwards
Sliding tube /	Ø 12 mm
Insertion length /	≤ 5000 mm
Float /	Z44S15E
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. . . +1 bar
Design temp. /	-10. . . +80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 70 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Technical Specifications:

Materials /	Polyamid, Brass, St. Steel
El. connection /	Type E - Aluminium socket
Process conn. /	G 2"-male downwards
Sliding tube /	Ø 12 mm
Insertion length /	≤ 5000 mm
Float /	K52S15E1
spec. Weight /	≥ 680 kg/m ³
Design pressure /	-1. . . +1 bar
Design temp. /	-10. . . +80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 70 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, SIL1

Float switch made of stainless steel / brass - with test function

Version: VAF80GT

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
El. connection /	Type VA - St. Steel socket
Process conn. /	Flange EN DN80 / PN16 / Form B1
Sliding tube /	∅ 18 mm
Insertion length /	≤ 6000 mm
Float /	K72S24.4E
spec. Weight /	≥ 620 kg/m ³
Design pressure /	-1. . .+16 bar (temperature-sensitive)
Design temp. /	-30. . .+180°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 60 mm, U = 60 mm Contact clearance: ≥ 90 mm Float clearance: ≥ 90 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3
Prot. class /	IP67
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, GL, BV, ABS, WHG, SIL1

Version: MG112GT

Technical Specifications:

Materials /	Brass (Float St. Steel)
El. connection /	Type BA - ABS socket
Process conn. /	G 1 1/2"-male downwards
Sliding tube /	∅ 14 mm
Insertion length /	≤ 5000 mm
Float /	Z44S15E
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. . .+16 bar
Design temp. /	-10. . .+100°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 65 mm, U = 45 mm Contact clearance: ≥ 70 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, SIL1

**Float switch made of Titanium with upward thread connection**

Version: TG38PVC

Version: TG38SIL

**Technical Specifications:**

Materials /	Titan
El. connection /	PVC connecting cable
Process conn. /	G 3/8"-male upwards
Sliding tube /	∅ 12 mm
Insertion length /	≤ 5000 mm
Float /	Z44S14T
spec. Weight /	≥ 750 kg/m ³
Design pressure /	-1. . . +15 bar
Design temp. /	-10. . . +80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 50 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Technical Specifications:

Materials /	Titan
El. connection /	Silicone connecting cable
Process conn. /	G 3/8"-male upwards
Sliding tube /	∅ 12 mm
Insertion length /	≤ 5000 mm
Float /	K52S14T
spec. Weight /	≥ 650 kg/m ³
Design pressure /	-1. . . +24 bar
Design temp. /	-10. . . +150°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 55 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, WHG, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, WHG, SIL1

Float switch made of Titanium with downward thread connection

Version: TG112G

Version: TG2G

Technical Specifications:

Materials /	Titan
El. connection /	Type E - Aluminium socket
Process conn. /	G 1 1/2"-male downwards
Sliding tube /	∅ 12 mm
Insertion length /	≤ 5000 mm
Float /	Z44S14T
spec. Weight /	≥ 750 kg/m ³
Design pressure /	-1. . . +15 bar
Design temp. /	-10. . . +150°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 50 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Technical Specifications:

Materials /	Titan
El. connection /	Type E - Aluminium socket
Process conn. /	G 2"-male downwards
Sliding tube /	∅ 12 mm
Insertion length /	≤ 5000 mm
Float /	K52S14T
spec. Weight /	≥ 650 kg/m ³
Design pressure /	-1. . . +24 bar
Design temp. /	-10. . . +150°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 55 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, WHG, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, WHG, SIL1

**Float switch made of Titanium with flange connection**

Version: TF65G

Version: TF100G

**Technical Specifications:**

Materials /	Titan
El. connection /	Type E - Aluminium socket
Process conn. /	Flange EN DN65 / PN16 / Form B1
Sliding tube /	∅ 12 mm
Insertion length /	≤ 5000 mm
Float /	K52S14T
spec. Weight /	≥ 660 kg/m ³
Design pressure /	-1. . . +16 bar (temperature-sensitive)
Design temp. /	-10. . . +80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 55 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Technical Specifications:

Materials /	Titan
El. connection /	Type E - Aluminium socket
Process conn. /	Flange EN DN100 / PN16 / Form B1
Sliding tube /	∅ 18 mm
Insertion length /	≤ 6000 mm
Float /	K80S24T
spec. Weight /	≥ 600 kg/m ³
Design pressure /	-1. . . +16 bar (temperature-sensitive)
Design temp. /	-10. . . +150°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 70 mm, U = 60 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 95 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, WHG, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, WHG, SIL1

Float switch made of Alloy C

Version: ALCG38SIL

Version: ALCF80G

Technical Specifications:

Materials /	Alloy C
El. connection /	Silicone connecting cable
Process conn. /	G 3/8"-male upwards
Sliding tube /	∅ 12 mm
Insertion length /	≤ 3000 mm
Float /	K52S15A
spec. Weight /	≥ 1260 kg/m ³
Design pressure /	-1. . . +55 bar
Design temp. /	-40. . . +180°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 55 mm, U = 45 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Technical Specifications:

Materials /	Alloy C
El. connection /	Type E - Aluminium socket
Process conn. /	Flange EN DN80 / PN16 / Form B1
Sliding tube /	∅ 18 mm
Insertion length /	≤ 6000 mm
Float /	K72S24.4A
spec. Weight /	≥ 820 kg/m ³
Design pressure /	-1. . . +16 bar (temperature-sensitive)
Design temp. /	-40. . . +200°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 60 mm, U = 60 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 90 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, WHG, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4x (5x with Type F - Alu. socket)
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3x (4x with Type F - Alu. socket)
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, WHG, SIL1

Float switch made of PVC with upward thread connection

Version: PVCG38PVC

Version: PVCG1PVC

Technical Specifications:

Materials /	PVC
El. connection /	PVC connecting cable
Process conn. /	G 3/8"-male upwards
Sliding tube /	∅ 12 mm
Insertion length /	≤ 3000 mm
Float /	Z42S14PC
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. . . +1 bar
Design temp. /	-15. . . +60°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 50 mm, U = 40 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 65 mm

Technical Specifications:

Materials /	PVC
El. connection /	PVC connecting cable
Process conn. /	G 1"-male upwards
Sliding tube /	∅ 16 mm
Insertion length /	≤ 3000 mm
Float /	Z54S22PC
spec. Weight /	≥ 750 kg/m ³
Design pressure /	-1. . . +1 bar
Design temp. /	-15. . . +60°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 65 mm, U = 50 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 75 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, WHG, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP65 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, WHG, SIL1

Float switch made of Polypropylene with upward thread connection

Version: PPG18PVC

Technical Specifications:

Materials /	Polypropylene
El. connection /	PVC connecting cable
Process conn. /	G 1/8"-male upwards
Sliding tube /	ø 8 mm
Insertion length /	60 mm
Float /	special
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. . . +1 bar
Design temp. /	-10. . . +80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 12 mm, U = 32 mm Contact clearance: - Float clearance: -

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	1
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	1
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	1
Prot. class /	IP55
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, WHG, SIL1

Version: PPG38PVC

Technical Specifications:

Materials /	Polypropylene
El. connection /	PVC connecting cable
Process conn. /	G 3/8"-male upwards
Sliding tube /	ø 12 mm
Insertion length /	≤ 3000 mm
Float /	Z44S13PP
spec. Weight /	≥ 700 kg/m ³
Design pressure /	-1. . . +1 bar
Design temp. /	-10. . . +80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 40 mm, U = 40 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 65 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, WHG, SIL1

Float switch made of Polypropylene with upward thread connection

Version: PPG1PVC16

Version: PPG1PVC20

Technical Specifications:

Materials /	Polypropylene
El. connection /	PVC connecting cable
Process conn. /	G 1"-male upwards
Sliding tube /	∅ 16 mm
Insertion length /	≤ 3000 mm
Float /	Z56S21PP
spec. Weight /	≥ 600 kg/m ³
Design pressure /	-1. . . +1 bar
Design temp. /	-10. . . +80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 65 mm, U = 50 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 75 mm

Technical Specifications:

Materials /	Polypropylene
El. connection /	PVC connecting cable
Process conn. /	G 1"-male upwards
Sliding tube /	∅ 20 mm
Insertion length /	≤ 6000 mm
Float /	Z80S24PP
spec. Weight /	≥ 500 kg/m ³
Design pressure /	-1. . . +1 bar
Design temp. /	-10. . . +80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 80 mm, U = 65 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 100 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, WHG, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP55 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, WHG, SIL1

Float switch made of Polypropylene

Version: PPG2G

Version: PPF65G

Technical Specifications:

Materials /	Polypropylene
El. connection /	Type A - Polyester socket
Process conn. /	G 2"-male upwards
Sliding tube /	Ø 16 mm
Insertion length /	≤ 3000 mm
Float /	Z56S21PP
spec. Weight /	≥ 600 kg/m ³
Design pressure /	-1. . . +1 bar
Design temp. /	-10. . . +80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 65 mm, U = 50 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 75 mm

Technical Specifications:

Materials /	Polypropylene
El. connection /	Type PA - Polyester socket
Process conn. /	Flange EN DN65 / PN10 / Form A
Sliding tube /	Ø 16 mm
Insertion length /	≤ 3000 mm
Float /	Z56S21PP
spec. Weight /	≥ 600 kg/m ³
Design pressure /	-1. . . +1 bar
Design temp. /	-10. . . +80°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 65 mm, U = 50 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 75 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	SIL

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP65
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	SIL

**Float switch made of PVDF with upward thread connection**

Version: PVDFG38SIL

Version: PVDFG1SIL

**Technical Specifications:**

Materials /	PVDF
El. connection /	Silicone connecting cable
Process conn. /	G 3/8"-male upwards
Sliding tube /	∅ 12 mm
Insertion length /	≤ 3000 mm
Float /	Z44S13PD
spec. Weight /	≥ 850 kg/m ³
Design pressure /	-1. . . +1 bar
Design temp. /	-10. . . +100°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 50 mm, U = 55 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 70 mm

Technical Specifications:

Materials /	PVDF
El. connection /	Silicone connecting cable
Process conn. /	G 1"-male upwards
Sliding tube /	∅ 16 mm
Insertion length /	≤ 3000 mm
Float /	Z56S21PD
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. . . +1 bar
Design temp. /	-10. . . +100°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 65 mm, U = 60 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 90 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	2
Prot. class /	IP55 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, WHG, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	2
Prot. class /	IP55 (optional IP68)
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	PED, WHG, SIL1

Float switch made of stainless steel - ECTFE coated

Version: VAEBF50G

Version: VAEBF80G

Technical Specifications:

Materials /	St. Steel ECTFE coated
El. connection /	Type VA - St. Steel socket
Process conn. /	Flange EN DN50 / PN16 / Form B1
Sliding tube /	∅ 11 mm
Insertion length /	≤ 3000 mm
Float /	KZ45S14EC1
spec. Weight /	≥ 950 kg/m ³
Design pressure /	-1. . . +16 bar (temperature-sensitive)
Design temp. /	-30. . . +150°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 65 mm, U = 50 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 80 mm

Technical Specifications:

Materials /	St. Steel ECTFE coated
El. connection /	Type VA - St. Steel socket
Process conn. /	Flange EN DN80 / PN16 / Form B1
Sliding tube /	∅ 17 mm
Insertion length /	≤ 3000 mm
Float /	K73S23EC1
spec. Weight /	≥ 750 kg/m ³
Design pressure /	-1. . . +16 bar (temperature-sensitive)
Design temp. /	-30. . . +150°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 70 mm, U = 70 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 105 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	3
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3
Prot. class /	IP67
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, BV, WHG, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP67
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, BV, WHG, SIL1

**Float switch made of stainless steel - PFA coated**

Version: VAPBF50G

Version: VAPBF80G

**Technical Specifications:**

Materials /	St. Steel PFA coated
El. connection /	Type VA - St. Steel socket
Process conn. /	Flange EN DN50 / PN16 / Form B1
Sliding tube /	∅ 11 mm
Insertion length /	≤ 3000 mm
Float /	Z45S14PF1
spec. Weight /	≥ 1000 kg/m ³
Design pressure /	-1. . . +16 bar (temperature-sensitive)
Design temp. /	-30. . . +180°C (optional 250°C)
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 65 mm, U = 50 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 80 mm

Technical Specifications:

Materials /	St. Steel PFA coated
El. connection /	Type VA - St. Steel socket
Process conn. /	Flange EN DN80 / PN16 / Form B1
Sliding tube /	∅ 17 mm
Insertion length /	≤ 3000 mm
Float /	K73S23PF1
spec. Weight /	≥ 800 kg/m ³
Design pressure /	-1. . . +16 bar (temperature-sensitive)
Design temp. /	-30. . . +180°C
Mounting pos. /	vertical ±30°
min. Dimensions /	L1 ≥ 70 mm, U = 70 mm Contact clearance: ≥ 20 mm Float clearance: ≥ 105 mm

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	3
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	3
Prot. class /	IP67
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, SIL1

Electrical Specifications:

Switching funct. /	closer /NO
Switch rating:	230 V / 1.0 A / 100 VA
max. Contacts:	5
Switching funct. /	opener /NC
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	5
Switching funct. /	change over /U
Switch rating:	230 V / 0.5 A / 40 VA
max. Contacts:	4
Prot. class /	IP67
Optional /	
Temp.-sensor:	Pt100 / Pt1000 IEC 751 Cl. B
Temp.-contact:	NO or NC
Approvals:	ATEX, PED, GOST, SIL1

LS-14

Miniature Plastic Float Switch for Side Mounting

Features

/ Compact design

/ Only one mechanically moving part

/ Sideways mounting into vessel wall

/ PP or Nylon versions

Description:

The LS-14 series of level switches operates according to the principle of a float with magnetic transmission. The float is lifted inside the vessel due to the rising fluid level; subsequently, it actuates a reed contact as a result of the magnetic field of the permanent magnet situated in the float. Depending on the mounting position of the float switch, the reed contact acts normally opened or normally closed.

Application:

The LS-14 float switches are suited for monitoring the level of nearly all types of fluid media that are non-hostile to the material used as an alarm for full or empty levels, for controlling valves and pumps or for alert signals.

Technical Specifications:

Connecting cable /	0,3 m PE stranded wire
Screw thread type /	LS-14.1: R 1/4" male with counter nut LS-14.2: 1/2" NPT male
Material /	LS-14.x.1: PP LS-14.x.2: Nylon (6-N)
Function of contacts /	NO-contact or NC-contact, depending on mounting variant
max. Pressure /	2 bar rel.
max. Temperature /	LS-14.x.1: -10...+80°C LS-14.x.2: -10...+110°C
min. Media density /	0,8 kg/l (smaller on request)
CE marking /	RoHS
Switching load within EU area /	50 V AC/DC, 0,5 A, 25 VA
Switching load outside EU area /	300 V AC/DC, 0,5 A, 50 VA
Initial contact resistance /	150 mΩ (max.)
Insulation resistance /	10 MΩ (min.)

Dimensions in mm:

LS-14.1

LS-14.2

Installation variants:

Handling:

- / It must be ensured that the values given for voltage, current, and power are not exceeded.
- / When switched on, a load must be connected in series.
- / The electrical details apply to ohmic loads. Capacitive, inductive and lamp loads must be operated using a protective circuit.
- / Not suitable for use in media with ferritic particles.

Ordering Codes:

Order number	LS-14.	1.	1.	2
LS-14 Miniature Plastic Float Switch				
Connection /				
1 = R 1/4" male				
2 = 1/2" NPT male				
Material /				
1 = Polypropylen				
2 = Nylon (6-N)				
Contact /				
2 = 50 V DC/AC, 0,5 A, 25 VA				

LS-15

Miniature Float Switch for Side Mounting

Features

/ Compact design

/ Only one mechanically moving part

/ Sideways mounting into vessel

/ Fully stainless steel version

Description:

The LS-15 series of level switches operates according to the principle of a float with magnetic transmission. The float is lifted inside the vessel due to the rising fluid level; subsequently, it actuates a reed contact as a result of the magnetic field of the permanent magnet situated in the float. Depending on the mounting position, the reed contact acts normally opened or normally closed.

Application:

The LS-15 float switches are suited for monitoring the level of nearly all types of fluid media as an alarm for full or empty levels, for controlling valves and pumps or for alert signals. By deploying potential-free reed contacts, the float switches provide an ideal switching element in combination with PLC controls.

Technical Specifications:

Connecting cable /	0.5 m FEP stranded wire
Screw thread type /	G 1/8"-male, G 1/2"-male, G 3/4"-male, 1/2" NPT-male or 3/4" NPT-male
Material /	float and float bracket are made of stainless steel 1.4301
Function of contacts /	NO-contact or NC-contact, depending on mounting variant
max. Pressure /	5 bar
max. Temperature /	standard -40...+120°C high-temperature -40...+180°C
min. Media density /	0.8 kg/l (0.9 kg/l for special versions with extra short insertion length)
CE marking /	RoHS
Switching load within EU area /	50 V AC/DC, 0.5 A, 25 VA
Switching load outside EU area /	300 V AC/DC, 0.5 A, 50 VA
Initial contact resistance /	150 mΩ (max.)
Insulation resistance /	10 MΩ (min.)

Handling:

- / It must be ensured that the values given for voltage, current, and power are not exceeded.
- / When switched on, a load must be connected in series.
- / The electrical details apply to ohmic loads.
Capacitive, inductive and lamp loads must be operated using a protective circuit.
- / Not suitable for use in media with ferritic particles.

LS-15P

Miniature Float Switch for Side Mounting, Plug Version

Features

- / Compact design
- / Only one mechanically moving part
- / Sideways mounting into vessel wall
- / Fully stainless steel version
- / Electrical connection with DIN plug

Description:

The LS-15P series of level switches operates according to the principle of a float with magnetic transmission. The float is lifted inside the vessel due to the rising fluid level; subsequently, it actuates a reed contact as a result of the magnetic field of the permanent magnet situated in the float. Depending on the mounting position, the reed contact acts normally opened or normally closed.

Application:

The LS-15P float switches are suited for monitoring the level of nearly all types of fluid media as an alarm for full or empty levels, for controlling valves and pumps or for alert signals. By deploying potential-free reed contacts, the float switches provide an ideal switching element in combination with PLC controls.

Technical Specifications:

Connecting cable /	plug EN175301-803 shape A
Screw thread type /	1/2" NPT male
Material /	float and float bracket are made of stainless steel
Function of contacts /	NO-contact or NC-contact, depending on mounting variant
max. Pressure /	5 bar
max. Temperature /	Standard -40...+120°C
min. Media density /	0,8 kg/l
CE marking /	RoHS
Switching load within EU area /	50 V AC/DC, 0,5 A, 25 VA
Switching load outside EU area /	300 V AC/DC, 0,5 A, 50 VA
Initial contact resistance /	150 mΩ (max.)
Insulation resistance /	10 MΩ (min.)

Handling:

- / It must be ensured that the values given for voltage, current, and power are not exceeded.
- / When switched on, a load must be connected in series.
- / The electrical details apply to ohmic loads. Capacitive, inductive and lamp loads must be operated using a protective circuit.
- / Not suitable for use in media with ferritic particles.

Dimensions in mm:

LS-16

Miniature Plastic Float Switch for Vertical Mounting

Features

/ Compact design

/ Only one moving part

/ Mounting from top or bottom

/ PP version

Description:

The LS-16 series of level switches operates according to the principle of a float with magnetic transmission. The float is lifted inside the vessel due to the rising fluid level; subsequently, it actuates a reed contact as a result of the magnetic field of the permanent magnet situated in the float. Depending on the mounting position, the reed contact acts normally opened or normally closed.

Application:

The LS-16 float switches are suited for monitoring the level of nearly all types of fluid media that are non-hostile to the material used as an alarm for full or empty levels, for controlling valves and pumps or for alert signals.

Version:

LS-16 Miniature Plastic Float Switch for Vertical Mounting

Mechanical low-cost float switch made of PP, with contact-free triggering of a reed contact and a screw thread type G 1/8"

Technical Specifications:

Connecting cable /	0.3 m PVC stranded wire (AWG22)
Screw thread type /	G 1/8"-male with counter nut
Materials /	float, stem, counter nut and thread are made of PP, stainless steel 1.4301 stopper; tube made of vinyl (non wetted);
Function of contact /	NO-contact or NC-contact depending on installation of the float
max. Pressure /	2 bar
max. Temperature /	-10°C. . .+80°C
min. Media density /	0.8 kg/l
CE marking /	none, max. switching load is limited to 50 V AC/DC within area of application of low-voltage-directive
Switching load within CE area /	50 V AC/DC, 0.5 A, 25 VA
Switching load outside CE area /	300 V AC/DC, 0.5 A, 50 VA
Initial contact resistance /	150 mΩ (max.)
Insulation resistance /	10 MΩ (min.)

F0-01

Optoelectronic Level Switch

Features

- / Small and compact
- / Easy to mount
- / No mechanical components
- / Easy to maintain

Description:

An optical sensor is mounted in a robust stainless steel housing. It consists of a quartz glass tip which contains an infrared diode, as a transmitter, and a light-sensitive semi-conductor as the receiver. If no fluid moisture touches the sensor tip, the infrared light will be fully reflected by the inside of the quartz glass. However, as soon as it dips into the medium a large portion of the transmitted light can pass into the fluid. Registering this, the receiver initiates a switching operation at the device's PNP transistor output which is then directly displayed by a green LED.

Application:

The field of applications for the optoelectronic level switch is the detection of limit values in a number of fluids. The main advantage is that the method of measurement is to a large extent independent of physical parameters like refractive index, colour, density, dielectric constant or conductivity. The extremely compact design guarantees minimum space; consequently, measurements in very small volumes becomes convenient. It can be mounted anywhere and the range of high pressure and temperature assure a broad spectrum of applications.

Technical Specifications:

max. Pressure /	0...50 bar
max. Media temp. /	-30...+135°C
max. Ambient temp. /	-25...+70°C
Electronic housing /	stainless steel
Sensor housing /	stainless steel
Lighting circuit /	quartz glass
Sealing /	graphite / PTFE
Weight /	approx. 75 g without cable
Accuracy /	± 0.5 mm
Light source /	IR light 930 nm
Ambient light /	max. 10.000 Lux
min. Clearance to opposite-side surface /	> 10 mm > 20 mm with electropolished surface
Assembling position /	any

FO-02N

Optoelectronic Compact Level Switch

Features

- / Compact design
- / Integrated electronic switch
- / Low-maintenance
- / Sensorlengths from 65-3000 mm
- / No moving parts
- / Any mounting position
- / Accuracy ± 2 mm

Description:

An optical sensor is mounted in a robust stainless steel housing. It consists of a borosilicate glass tip which contains an infrared diode, as a transmitter, and a light-sensitive semi-conductor as the receiver. If the sensor tip is not immersed in the fluid, the infrared light will be fully reflected by the inside of the quartz glass. However, as soon as it is immersed into the medium, a large portion of the transmitted light can pass into the fluid. Registering this, the receiver initiates a switching operation at the device's transistor output.

Application:

The field of application for the optoelectronic level switch include tapping limit values in a number of fluids. The main advantage is, that the method of measurement is to a large extent independent of physical parameters like refractive index, colour, density, dielectric constant or conductivity. The extremely compact design guarantees minimum space requirement. In contrast to the FO-01, the FO-02N can be supplied with measuring lengths of up to 3000 mm, so that the user can select the setpoint freely. The direction of switching for the high-performance transistor output on the device is reversible.

Versions:

FO-02N Optoelectronic Compact Level Switch

Power supply: The power supply of the FO-02N should be 12 to 32 VDC.

Sensor length: The sensor is available in six standard-lengths: 150, 300, 500, 750, 1000 and 1500 mm. Other lengths, up to 3000 mm are available on request.

Technical Specifications:

FO-03

Optoelectronic Level Switch

Features

- / Compact design
- / Under pressure removable
electronic part
- / Easy to mount
- / No moving parts
- / Easy to maintain
- / Cost-effective

Description:

The optoelectronic level switch is used for monitoring of liquid levels. An optical sensor is mounted in a glass fiber reinforced polyamide housing. It consists of a quartz glass tip which contains an infrared diode, as a transmitter, and a light-sensitive semi-conductor as the receiver. If the sensor is not immersed in the fluid, the infrared light will be fully reflected by the inside of the quartz glass. However, as soon as it immerses into the medium a large portion of the transmitted light can pass into the fluid. Registering this, the receiver initiates a switching operation at the potential-free relay output, which is also indicated by a light emitting diode directly. The electronic part can be replaced without opening the process, due to the fact that the screw-in part including the glass prism remains installed.

Application:

The area of applications for the optoelectronic level switch is the detection of number of fluids. The main advantage is that the method of measurement is to a large extent independent of physical parameters like refractive index, colour, density, dielectric constant or conductivity. The extremely compact design guarantees minimum space; consequently, measurements in very small volumes becomes convenient. The high pressure and temperature ranges assure a broad spectrum of applications.

Technical Specifications:

max. Pressure /	46 bar (-10...+120°C) 31.5 bar (-30...-10°C)

FO-04

Optoelectronic Level Switch for General Applications

Features

- / Compact design
- / Accuracy ± 2 mm
- / Status LED
- / Easy to mount
- / No moving parts
- / Easy to maintain
- / Cost-effective

Description:

An optical sensor is mounted in a robust stainless steel housing. It consists of a borosilicate glass tip which contains an infrared diode, as a transmitter, and a light-sensitive semi-conductor as the receiver. If no fluid moisture touches the sensor tip, the infrared light will be fully reflected by the inside of the borosilicate glass. However, as soon as it dips into the medium a large portion of the transmitted light can pass into the fluid. Registering this, the receiver initiates a switching operation at the device's PNP transistor output which is then directly displayed by a red LED.

Application:

The applications for the optoelectronic level switch include tapping limit values in a number of fluids. The main advantage is that the method of measurement is to a large extent independent of physical parameters like refractive index, colour, density, dielectric constant or conductivity. The compact design, the possibility of installation in any position as well as the attractive price level recommends the FO-04 especially for general industrial applications.

Typical applications:

- level detection of fluids, such as e.g. oil, water, aqueous media, etc.
- full or empty reporting
- overflow protection
- dry run protection

Technical Specifications:

Accuracy /	± 2 mm
Response sensitivity /	preset, for the detection of watery media and oils

F0-05

Optoelectronic Level Switch High-Temperature Version

Features

/ Up to +170°C media temperature

/ Accuracy ± 2 mm

/ Compact design

/ Easy to mount

/ No moving parts

/ Easy to maintain

Description:

An optical sensor is mounted in a robust stainless steel housing. It consists of a borosilicate glass tip which contains an infrared diode, as a transmitter, and a light-sensitive semi-conductor as the receiver. If no fluid moisture touches the sensor tip, the infrared light will be fully reflected by the inside of the borosilicate glass. However, as soon as it dips into the medium a large portion of the transmitted light can pass into the fluid. Registering this, the receiver initiates a switching operation at the device's PNP transistor output which is then directly displayed by a red LED. For variants with trimmer, the switching status can be read directly on the sensor (internal red LED).

Application:

The applications for the optoelectronic level switch include tapping limit values in a number of fluids. The main advantage is that the method of measurement is to a large extent independent of physical parameters like refractive index, colour, density, dielectric constant or conductivity. The compact construction guarantees minimum space; consequently, measurements in very small volumes becomes convenient. The possibility of mounting in any position as well as the property for use with fluids at high temperatures of up to +170°C assure a broad spectrum of applications.

Typical applications:

- level detection of fluids, such as e.g. oil, water, aqueous media, etc.
- full or empty reporting
- overflow protection
- dry run protection

2110 - Mini-SQUING

Mobrey™ Mini-Squing Compact Vibrating Fork Level Switch

Features

- / 3/4", 1" or 2" Tri-clamp
- / High operating frequency
- / 21...264V DC or AC voltage
- / Least depth for mounting
- / Diagnostic LED

Description:

The 2110 vibrates in the air according to the principle of a tuning fork at the frequency of resonance. When the switch is dipped into a fluid the frequency changes due to the higher inertia of the medium. The integrated electronic components capture this change and link to a load connected in series. For the first time, we succeeded in shortening the sensor element that is contacted by the media to 50 mm length and in keeping its size so narrow that a 3/4" thread is absolutely adequate. The same device can be operated with supply voltages of 21 to 264 V AC or DC, thereby reducing the storage of spare parts to a minimum. The device is provided with a microprocessor that is capable of self-monitoring and fail-safe functions. It triggers a user-defined alarm that indicates a dry-run or wet status through an LED which changes from continuous light to blinking and, in the event of malfunctioning, changes again its frequency.

Application:

The 2110 series of limit switches is intended for recording limit levels in most of the fluids and slurries. The device can process also media with high viscosities or sticky properties without any problem since it is capable of „shaking away“ adhesions by virtue of its function. Irrespective of whether for overflow protection, pump protection, leakage monitoring or pump control, the 2110 is universally applicable and, due to its small dimensions, it can be mounted even in narrow spaces. The switch has a fully stainless steel facing to the media and can be connected with an R3/4" or R1" thread to the process. Optionally, a fitting is available for applications in food-processing industry which enables, together with the 1" variant and an O ring, a smooth joint to the fluid.

Technical Specifications:

Pressure range /	-0.25...+100 bar at 50°C
Temperature range /	-40...+150°C
Ambient temperature /	-40...+80°C (50°C at 150°C on the wet side)
CIP-cleaning /	withstands steam cleaning routines up to max. 150°C
Medium specific weight /	600 kg/m ³
Viscosity /	0.2...10000 cP
Switching point (water) /	approx. 13 mm immersion depth
Hysteresis (water) /	± 1 mm nom.
Switching delay /	1 sec.
Housing /	stainless steel 304
Fork /	stainless steel 316
LED-window /	anti-flammable polycarbonate
Plug /	polyamide, reinforced fiberglass
Plug sealing /	nitrile butadien rubber
Function test /	through magnetic test point during operation

FV-01

Compact Tuning Fork Level Switch

Features

- / Proven vibration principle
- / Short immersion depth of 40 mm
- / Error monitoring
- / Integrated testing function to ensure fault-free operation

Description:

The FV-01 is a compact tuning fork level switch for fluids and slurry. It can be used as overflow, high, low and demand applications, as well as pump protection. It is ideal for use in confined spaces. The vibrating fork is piezoelectric driven and vibrates on a mechanical resonance frequency of approximately 1.100 Hz. When the fork is covered by media, this frequency changes. This change will be registered by the build in oscillator, transforming it into a switching signal. Then, the integrated electronic will send this signal to connected devices. The FV-01 works practically without interferences from chemical or physical qualities of the fluid media. It can even be used under harsh conditions, such as turbulences, air bubbles, foam and external vibratons.

Application:

The 40 mm long vibrating fork makes the FV-01 ideal for deployment in small pipes and confined installations. The compact level switch was created to be used in all industrial fields with process engineering. The preferred field of application includes liquids and slurries, level monitoring and overflow and dry-running protection.

Technical Specifications:

Accuracy /

Switching point:	about 13 mm from the tip

FD-02

Pressure Bell Switch

Features

- / Level monitoring for fluids
- / Filter and air-duct monitoring
- / Dry-run protection for pumps

Description:

In pressure bell switches, the static pressure of the fluid is converted into air pressure in suitable pressure transmitters (tube or hose). The rising level of fluid produces a locked up air space in the pressure transmitter as soon as the level reaches the locking edge. If the level continues to rise an overpressure builds up in the tube which on reaching a value of approx. 50 mm of water column actuates a pressure switch. The tube or the hose must be perfectly pressure-tight as, otherwise, the switching point may change due to air losses in the pressure transmitter tube. The FD-02 is factory-adjusted to a switching point of 50 mm of water column so that it is defined as the tube length minus 50 mm. Normally, the FD-02 is supplied without a pressure transmitter tube to allow the user to select the tube material as per his preference and thereby to customize it to the media to be monitored. In the case of warm, viscous or sticky materials, we suggest maintaining a constantly less air bubble formation over a T-piece connected to a pressurized air supply.

Application:

Pressure bell switches are simple and cost-effective devices for monitoring the level especially in open vessels, sumps and ducts. Since these switches do not have any mechanically moving parts, they are particularly dirt-insensitive. By correctly selecting the pressure transmitter material even hostile media can be monitored economically.

Versions:

FD-02 Pressure Bell Switch

Version:

FD-02.1 - no housing

FD-02.2 - with housing, R 1/2"-female

DF-02

Rotating Vane Level Switch for Industrial Applications

Features

- / Robust aluminium pressure cast or stainless steel housing**
- / Easy to assemble**
- / Can be used as full and empty alerter**
- / Available optionally with shaft extension**
- / Capacity of the contact: 1mA/4VDC up to 2A/250VAC**

Description:

A gear motor situated at a certain rotatable angle in the extension of a shaft is held by means of a spring on a stopper. Over the shaft, the motor drives the vane projecting into a vessel. As soon as the filling material reaches the vane, it is prevented from its further rotation. The reverse torque twists the motor from its end position and actuates a switch. Subsequently, a second switch turns off the motor. If the level goes down, the vane is released and the motor is drawn back by the spring into its end position. In this, the motor is switched on again and the output signal is switched back. The gear motor and both the switches are mounted in an aluminium pressure housing. Precise running of the vane shaft is ensured by 2 encapsulated ball-bearings. In the event of a blockage, a retention coupling prevents damage to the motor. A special type sealing on the shaft prevents dust and humidity from infiltrating into the housing and the ball-bearing.

Application:

The device is suitable for all freely trickling or hardly flowing bulk goods and for goods that tend to bridge, felting or crusting.

Tehcnical Specifications:

Materials /

Housing:	Alu pressure casting (Standard), stainless steel (Option)
Sealing ring:	NBR (optionally Viton or PTFE)
Shaft and Vane:	stainless steel 1.4301 (optionally 1.4571)
Nuts:	steel, Zn plated

Temperature range /

Ambient temp.:	-20...+70°C
Bulk goods temp.:	-25...+80°C (Standard) (up to +1000°C with high temp.-option)

Pressure range /

-0.5...+ 5 bar (Standard),
(optional -0.9...+10 bar)

Consumption /

MS-04

Membrane Level Switch for Bulk Goods

Features

- / Can be used as full & empty detector
- / Easy to assemble
- / Does not require space in the vessel
- / Neopren, Viton or stainless steel membranes
- / High temp. version up to 200°C
- / Output signal: change-over contact with high switching cap. (4 A / 250 V)

Description:

The MS-04 series of membrane level switches consists of a plastic or aluminium housing with a membrane held in place by a fastening ring. They are mounted aligned into the vessel wall and, therefore, do not project into the vessel. The bulk material applies pressure against the membrane which is prestressed by a spring and thereby actuates a micro-switch. Depending on the type of bulk material and its weight, the devices can be supplied with different membrane diameters and membrane material.

Application:

The device is suitable for all freely trickling or hardly flowing bulk materials in non-pressurized vessels.

Technical Specifications:

Material /

Housing:	plastic, fiber glass reinforced or aluminium
Membrane:	NBR, Viton or stainless steel
Mounting ring:	aluminium, Zn plated steel or st. steel

HP-30

Pneumatic Manual Testing Pump for Pressure Device Calibration

Features

/ Complete with box and accessories

/ Can be combined with different testing devices

/ Wide range of pressure

/ Smooth-running precision adjustment

Description:

Calibration manual testing pump is intended for generating pressure for the purpose of inspection, adjustments and calibration of mechanical and electronic pressure gauges by using reference measurements. At the top end of the pump, an analogous or digital reference pressure gauge is screw mounted and, at the same time, the test piece is connected on the side by means of a hose included in the delivery. On activating the pump, equal pressure is exerted on both the devices. Subsequently, the test piece can be compared with the reference device and, if necessary, settings or calibration adjustments can be made. First, considerable amount of pressure is built up by a pincer mechanism; the testing pressure is then set accurately by means of an easily adjustable precision regulating valve.

Application:

Despite its compact size, the calibration manual testing pump HP-30 facilitates testing pressure generation easily and accurately. It features also a reversing switch for generating vacuum. Therefore, pressure switches, pressure gauges (manometers) and pressure sensors can be tested or set within the range of $-0.95 \dots +40$ bar where air is used as the testing medium. As against hydraulic testing pumps, this offers a simple and neat solution.

Technical Specifications:

Pressure generation /	0 .. 40 bar
Vacuum generation /	0 .. -0,95 bar
Delivery connections /	G1/2"-female (free-wheel swivel nut with sealing) for reference device. G1/4"-female at the end of the testing hose for the test piece
Material /	Anodized aluminium, brass (partly nickel-plated)
Testing pressure settings /	Fine regulating valve (large volume variator)
Dimensions /	approx. 220 x 105 x 63 mm
Weight /	approx. 510 g
Series range of supply /	<ul style="list-style-type: none"> • Calibration manual pump HP-30 with selected reference device • test piece connecting hose • user manual • robust plastic material box with contoured foam-rubber padding
Optional accessories /	Adapter and sealing sets for test piece NO-contact, maintenance set for HP-30 (O rings, sealings etc.)
Higher pressures /	Hydraulic testing pumps on request

PM-63N

Bourdon Pressure Gauge

Features

- / Quality class 1.6
- / Brass or VA movement
- / Filled or unfilled
- / Protection class IP65 / IP54

Description:

Bourdon pressure gauges in the PM-63N series can be supplied in brass or stainless steel designs in filled or unfilled conditions. A drawn brass or stainless steel pipe shaped into a spiral is filled with the medium which deforms irrespective of the pressure. This movement is indicated by a measuring instrument which can be attenuated by the glycerin filling available optionally so that vibrations are heavily mellowed down. The natural lubricating action of glycerin reduces the wear and tear of moving parts and penetration of corrosive gases and prevents formation of water condensation. The stainless steel version allows measurement of pressure even in the most hostile fluids and gases. The pressure gauges are selectively equipped with a G1/4 B threaded connection at the bottom or centre respectively off-centre at the back.

Application:

Bourdon pressure gauges are used across all types of industrial applications. They are particularly suited for measuring points where no power supply is available. The PM-63N.1 series of pressure gauges is widely used in machine and equipment manufacturing, in pumps, compressors or block-type thermal power plants, since often the requirements on the consistency of media must necessarily be moderate. On the other hand, the PM-63N.2 series of chemical pressure gauges is capable of resisting more hostile media and, therefore, are used frequently in chemical and petrochemical industries, in the food-processing segment, in pharmaceutical production or in power stations where they have a proven record of unflinching service for decades.

PM-100N

Bourdon Pressure Gauge

Features

- / Quality class 1.0
- / Stainless steel housing
- / Brass or SS movement
- / Filled or unfilled
- / Protection class IP65 / IP54

Description:

Bourdon pressure gauges in the PM-100N series can be supplied in brass or stainless steel versions in filled or unfilled condition. A drawn brass or stainless steel pipe shaped into a spiral is filled with the medium which deforms irrespective of the pressure. This movement is indicated by a measuring instrument which can be attenuated by the glycerin filling available optionally so that vibrations are heavily mellowed down. The natural lubricating action of glycerin reduces the wear and tear of moving parts and penetration of corrosive gases and prevents formation of water condensation. The stainless steel design allows measurement of pressure even in the most hostile fluids and gases. The pressure gauges are selectively equipped with a G1/4 B threaded connection at the bottom or eccentrically at the back. On request, they can be fitted with up to two magnetic spring or inductive contacts. We supply also pressure gauges in larger nominal sizes such as 6" (160 mm) or 10" (250 mm), or special designs of 4" (100 mm) and 2.5" (63 mm) devices. Please contact us in this regard.

Application:

Bourdon pressure gauges are used across all types of industrial applications. They are particularly suited for measuring points where no electrical power supply is available. The PM-100N.1 series of pressure gauges is widely used in machine and equipment manufacturing, in pumps, compressors or block-type thermal power plants, since often the requirements on the consistency of media must necessarily be moderate. On the other hand, the PM-100N.2 series of chemical pressure gauges is capable of resisting more hostile media and, therefore, are used frequently in chemical and petrochemical industries, in the food-processing segment, in pharmaceutical production or in power stations where they have a proven record of unflinching service for decades. The PM-100N pressure gauges optionally equipped with switching contacts can also be used for electronic pressure monitoring.

PK-01

Capsule Element Pressure Gauge

Features

- / Quality class 1.6
- / Millibar range
- / Anti-corrosive
- / Zero point correction

Description:

The PK-01 capsule element pressure gauges are intended for measuring small, negative and positive overpressures in gaseous media. The measuring element in such a device comprises two diaphragm halves that are joined by welding. These actuate an indicator when pressure is exerted on them inside which is then display the system pressure on a scale made of aluminium. The standard versions of the devices supplied are made of brass; however, optionally they can be fitted with a stainless steel movement. Also another version with 10x overpressure safety can be delivered. The available housing sizes are 2.5" (63 mm), 4" (100 mm) or 6" (160 mm) with stainless steel housing provided with connections radially at the bottom or centrally at the back. On request, other versions can be supplied.

Application:

Capsule element pressure gauges are optimally suited for measuring very small pressures in gaseous media. Typical applications are found in medical engineering, air-conditioning, in production of gas or in laboratories. For example, the applications are for leak detection, filter status measuring, emission measuring or, using the stainless steel version, for monitoring hostile and corrosive media.

Technical Specifications:

Accuracy class /	quality class 1.6

PF-01

Diaphragm Pressure Gauge

Features

/ Highly viscous media

/ Crystallizing media

/ Resistant to shocks and vibrations

/ Highly safe on overpressure

Description:

The diaphragm springs are thin, circular and wavy membranes that are fixed between two crimped rings and impacted by the media on one side. The membrane deflection due to pressure exerted by the media is utilized to display the pressure by means of an indicator element.

Diaphragm pressure gauges are resistant to vibrations and, optionally, they are available with safeguards against high overpressure. As the diaphragms are suitably coated, the devices can be used even under very rough conditions and hostile materials.

Application:

Thanks to their design principle and product material, diaphragm pressure gauges meet any rigorous requirements that are encountered when deployed in industrial production plants. Open connecting flanges allow their use for highly viscous, crystallizing and polluted media since in this version there is no clearance volume which may cause build up of deposits. Diaphragm pressure gauges are widely used in food-processing and beverage industries as well as in the manufacturing of machines, installations and plants.

Technical Specifications:

PM-2000

Magnehelic® - Differential Pressure Gauge for Gases

Description:

The PM-2000 differential pressure gauge used in thousands operates according to the Magnehelic principle. In this, the rear side of a membrane is loaded with the positive while the front side of the membrane is loaded with the negative connection to a differential pressure which causes a mechanical deflection. The membrane is equipped with a U-shaped permanent magnet where its mechanical movement is transferred without touch to a similarly magnetic helix at the end of which directly the indicator of PM-2000 is located. The membrane deflection is, therefore, directly proportional to the indicator movement and the operating range only depends on the membrane's material properties. During such transfer of movement there are no losses due to friction; with the result even the smallest differences in pressure can be captured. The movement and the scale are located in an extremely robust aluminium housing that is suitable for mounting on a switch panel. The indicator made of aluminium has a red, clearly visible tip and is sapphire-mounted to withstand shocks. The housings are fitted with an overpressure plug made of silicon rubber for protection against overpressure in models capable up to 100 kPa. The indicator stoppers are made of rubber which prevent damage to the indicator in case of wide deflections. In every PM-2000, the user can readjust the zero point for the device by means of a setting screw that is mounted directly in the plastic cover.

Application:

The PM-2000 differential pressure gauges are used in large numbers for monitoring air filters and air speeds. Their unique construction allows measurement of even the smallest variations in pressures in fans and blowers, blood or respiratory pressures, overpressure in rows of chimneys, pressure drop in pressure plates and in many other situations. The extraordinarily robust construction with high degree of accuracy and variety of operating ranges and units are combined in an affordable product. Optionally, customer-specific scale types, adjustable marking indicators, limiting value display by means of LEDs and a wide choice of accessories are available. The delivery includes tube bushings for connecting to NPT-female of the housing and a complete set of accessories for mounting on a switch panel.

Features

- / Proven and renowned technology
- / Resistant to shocks and vibrations
- / Accuracy class 2%
- / All common operating ranges and units
- / Ideally suited for filter monitoring
- / Panel mounting

- ** Option HP

Versions:

Operating range /

A large number of operating ranges and physical units are available. All standard variants are listed in the table "Operating ranges". Please enquire for special type operating ranges.

Options /

CB Chrome bezel option: A chrome plated aluminum bezel for an aesthetically pleasing finish when mounting on metal surfaces such as control panels

SB Stainless steel bezel option: 304 stainless steel electro polished Ra 16 finished bezel

SS Corrosion resistant brushed 304 stainless steel bezel

G Green Transparent Overlay
(to highlight and emphasize critical pressures)

R Red Transparent Overlay
(to highlight and emphasize critical pressures)

Y Yellow Transparent Overlay
(to highlight and emphasize critical pressures)

ASF Additional features for the indicator with an adjustable marking signal flag

HP Overpressure safety up to 80 psi (5.52 bar) ensured by a thicker housing. A 4 13/16" – board cutout is necessary for assembly as against the standard cutout (4 9/16").

LT Media temperatures up to -28°C possible as against the standard up to -6.67°C.

MP Overpressure safety up to 35 psi (2.41 bar) ensured by a thicker housing. A 4 13/16" – board cutout is necessary for assembly as against the standard cutout (4 9/16").

SP An LED on the scale alerts if the limiting value that can be set from the front exceeds. The unit requires a power supply of 12 to 24 VDC and an MP- or HP housing.

SSK A large number of special type scales are available on request.

HA High Accuracy Magnehelic® Gage. Accuracy within 1% and weatherproof. Also includes mirrored scale overlay and a six point calibration certificate.

AHU1 Furnished with attached surface mounting plate.

AHU2 Furnished with attached surface mounting plate and including A-481 installer kit (2 plastic static pressure tips and 7' of PVC tubing).

M A mirrored scale overlay is also available to assist in reducing parallax error.

FC Factory calibration certificate.

NIST NIST traceable calibration certificate.

Technical Specifications:

Media /	air and non-hostile and non-inflammable gases (optionally version for natural gases on request)
Housing /	aluminium casting, iridite-immersed external machining burnt-in dark gray forging
Accuracy /	± 2% F.S. in the entire range at 21°C (restrictions see operating range table)
Weight /	510 g (HP- and MP-models 963 g)
Pressure /	-0.677 bar to 1.034 bar maximum static pressure (2.41 bar in the MP option, 5.52 bar in the HP option)
Overpressure /	blow out plug opens at approx. 1.72 bar (only in standard devices)
Temperature /	-6.67...+60°C (-28°C for option LT)
Mounting position /	vertical, scale towards the front
Process connection /	2 x 1/8"-NPT-female, one pair of connections on the side, one additionally at the back (closure plugs for one pair supplied)
Zero point /	can be set with the correction screw from the front

Options /

- CB = Aluminium bezel, coated with chrome
- SB = st. steel bezel 304, electropolished
- SS = st. steel bezel 304, corrosion resistant, brushed
- G = green sight glass
- R = red sight glass
- Y = yellow sight glass
- ASF = marking indicator can be set
- HP = highly safe on overpressure
- LT = for lower temperatures down to -28°C
- MP = medium safe on overpressure
- SP = LED for setpoint display (no output)
- SSK = special type scale with coloured marking (ret, green, mirror) on request
- HA = high accuracy, weatherproof, mirrored scale 6 point calib. certificate
- AHU1 = furnished with attached surface mounting plate
- AHU2 = like AHU1, but additional 2 plastic static pressure tips and 7" of PVC tubing
- M = mirrored scale overlay
- FC = factory calibration certificate
- NIST = NIST traceable calibration certificate

PS-00

Low-Cost Pressure Switch

Features

- / Settings can be made on location
- / Long mechanical life span
- / Small dimensions
- / Silver or gold contacts
- / Critical media version
(paint, grease etc.) on request

Description:

A spring-loaded membrane or (in higher ranges of pressure) a spring-loaded piston form the measurement technical basis for the Profimess' Low-Cost Pressure switch PS-00. Under the influence of pressure the operating element actuates an electrical micro-switch that is equipped with silver contacts and thus ensures a long life span. By means of a setting screw the pre-tension for the spring can be smoothly adjusted, with the result that the setpoint can be varied along entire range of setting.

Application:

Mechanical pressure switches are used in all areas where an electrical signal is required depending on the specified pressure parameters. These devices are predestined - thanks to small dimensions, high reliability and long life span – especially for applications in the construction of machines and installations. Due to excellent price to performance ratio, the PS-00 range of pressure switches are suited for OEM applications as well regardless of average to high numbers.

Technical Specifications:

Operating range /	see ordering codes
Mode of setting /	by setting screw, under pressure
Switch. hysteresis /	15...30% of set point value
Tolerance /	PS-00.1.: ± 0.2 bar PS-00.2.: ± 0.5 bar PS-00.3.: ± 3.0 bar PS-00.4.: ± 5.0 bar PS-00.5.: ± 100 mbar

PS-02N

Compact Pressure Switch

Features

- / Compact
- / Robust
- / 6 Pressure ranges
- / Up to 600 bar
- / Plug connection

Description:

Mechanical pressure switches are intended for pressure-dependent switching on and off an electrical circuit. A pressure switch can be used as a control device as well as for visual or acoustical control for an operating point. The PS-02N series of compact pressure switches is designed as piston or diaphragm pressure switches depending on the pressure range. Both the versions are similar in construction where, in the case of the former, a spring-loaded piston actuates the micro-switch while, in the case of the latter, a spring-loaded elastomer membrane assumes this function. The setpoints can be set by means of a female hexagon SW5. Fine adjustments are optionally possible depending on customer requirements. The contacts for the micro-switch can be gold-plated on request so as to minimize the electrical transitional resistance, if necessary.

Application:

Thanks to the compact design of the PS-02N series and the broad spectrum of pressure range of 1 bar to 600 bar in 6 levels, these switches are well-suited for machine and vehicle manufacturing, packaging industry, pneumatic and hydraulic technologies and for equipment manufacturing.

Electrical Specifications:

Switching Element /	changeover contact (SPDT)
Electrical connection /	plug DIN EN 175301-803A or plug M 12x1, 4-pole or plug M 12x1, 4-pole with 2 m tipped cable or cable gland with 0,7 m cable
Protection class /	IP65 for plug connections IP68 for cable gland with 0,7 m cable
EX-Versions /	intrinsically safe design on request EEx ia (U _{max} = 28 V, I _{max} = 50 mA)
Options /	approval for shipping as per GL US-approval as per UL Low hysteresis LH

Technical Specifications:

Media temp. /	-40...+80°C for piston switch -20...+80°C for diaphragm switch -50°C on request
Switching frequency /	max. 60/min for piston switch max. 30/min for diaphragm switch
Repeatability /	±1% for piston switch ±2% for diaphragm switch
Housing /	Aluminium, st. steel 1.4305 on request
Wetted parts /	NBR, PTFE with bronze and st. steel 1.4301; for piston switch: steel FKM, EPDM, CR instead of NBR
Setting Screw /	st. steel 1.4305 (SW5)
Pressure connection /	G1/4"-female, 1/4"-NPT-female straight or angular (others on request)
Total weight /	approx. 350g

PDC-1

Pressure Switch for Non-Hostile Fluids and Gases

Features

- / Extremely resilient
- / Universal connection
- / Hysteresis can be set
- / Wide span of measuring

Description:

The PDC series of mechanical pressure switches is characterized by their extreme resilience. The PDC-1 has a robust housing made of sea-water resistant aluminium die casting. Depending on the pressure range, it has a connection fitting in copper and brass or stainless steel with a G1/2"-male and a G1/4"-female thread. Excrescent pressure changes at the connection act on an internal measuring diaphragm the movements of which are transferred to a high-performance micro-switch through a connecting bridge. The setpoint is set externally by rotating a spindle for nominal value that directly modifies the pre-tension of a spring. In addition, the construction has a counter-pressure spring that ensures a very stable connection even at low set-points. The PDC series of pressure switches can be provided with a terminal housing in IP65 and a blue cable gland, to allow the operation in hazardous areas (in connection with a suitable isolating switch amplifier) or even as an Ex-d version.

Application:

The PDC-1 series of pressure switches is used in applications where high requirements are placed on the switch's life span and mechanical strength. Due to the fact that the pressure-sensing measuring diaphragms are only less loaded – considering their permissible values – the PDC-1 guarantees an excellent long-term stability at minimal setpoint drift. Consequent to its design, the upstroke of the pressure diaphragms is limited by means of a stopper so that high overpressure safety is ensured even in small operating ranges. A number of operating ranges are available of which also a version with adjustable hysteresis can be supplied. This enables the user to accurately control a span of pressures with only a single device. Thanks to its material quality, flexibility of connections and high switching load of the micro-switch, the PDC-1 is predestined for use across all sections of the industry.

Technical Specifications:

Operating range /	refer to table
Mounting position /	vertically upright and horizontal (operating range A and B only vertically upright)
max. Pressure /	refer to table
max. Media temperature /	-25°C to +70°C (-15°C...+60°C for ranges A, B and C) short spell up to +85°C. Cooling elements are recommended for higher temperatures
Setpoint /	Can be set externally by means of screw-driver on the spindle
Repeatability /	< 1% of working range (for pressure ranges > 1 bar)
Adjustment /	The scales are calibrated for decreasing pressures. The reading corresponds therefore to lower setpoint, the upper setpoint is higher by the hysteresis
Lead sealing /	On request, ex-factory; sealing can also be undertaken later
Vacuum /	All PDC-1 besides the PDC-1.x.C can be impacted by vacuum; the device will not be damaged
Vibration /	Up to 4g no significant deviations
Mechanical Life span /	10 x 10 ⁶ for room temperature and sinusoidal pressure impact. Life span depends highly on the sort of pressure impact. This value is therefore just a guide value. For applications with pulsating pressure or pressure surges we recommend the use of a pressure surge reducer.
Electrical Life span /	100,000 switching cycles at nominal current 8 A, 250 VAC
Isolation /	overvoltage category III, pollution degree 3, rated impulse voltage 4000V, fullfills DIN VDE 01 10
Hysteresis /	In PDC-1.1.A to PDC-1.1.M the hysteresis cannot be set. In PDC-1.2.D to PDC-1.2.M the hysteresis can be set as specified in the following tables.

Process connection /	G1/2"-male (pressure gauge connection acc. DIN 16288), G1/4"-female acc. ISO 228 part 1. Using the G1/2"-male the PDC-1 can be directly screwed on to the pressure pipe, alternatively fastening by means of 2 screws (4mm Ø) on a plane surface is also possible.
Housing material /	Aluminium casting GD Al Si 12 (sea-water resistant)
Sensor material /	refer to following tables
rel. Humidity /	15%...95%, non-condensing

PDC-2

Vacuum Switch

Features

/ Robust design

/ 6 operating ranges under vacuum

/ Zero point excess deviation

/ Adjustable hysteresis

Description:

The PDC series of mechanical pressure switches is characterized by their extreme resilience. The PDC-2 has a robust housing made of sea-water resistant aluminium pressure casting. Depending on the pressure range, it has a pressure port made of brass or stainless steel and a membrane or a bellows made of Perbunan, Cu Zn or stainless steel and a G1/2"-male and a G1/4"-female thread. Excess pressure changes at the connection act on an internal measuring diaphragm the movements of which are transferred to a high-performance micro-switch through a connecting bridge. The setpoint is set externally by rotating a spindle for nominal value that directly modifies the pre-tension of a spring. In addition, the construction has a counter-pressure spring that ensures a very stable connection even at low set-points. The PDC series of pressure switches can be provided with a terminal housing in IP65 and a blue cable gland, to allow the operation in hazardous areas (in connection with a suitable isolated switch amplifier), or even as an EEx-d version.

Application:

The PDC-2 series of pressure switches is used in applications where high requirements are placed on the switch's life span and mechanical strength. Due to the fact that the pressure-sensing measuring diaphragms are only less loaded – considering their permissible values – the PDC-2 guarantees an excellent long-term stability at minimal setpoint drift. Consequent to its design, the upstroke of the pressure diaphragms is limited by means of a stopper so that high overpressure safety is ensured even in small operating ranges. A number of operating ranges are available of which also a version with adjustable hysteresis can be supplied. In the selection of a range, attention has been paid to cover smaller pressure spans close to the zero point as well as the entire range vacuum. Thanks to its material quality, flexibility of connections and high switching load of the micro-switch, the PDC-2 is predestined for use across all sections of the industry.

Technical Specifications:

Operating range /	see table
Mounting position /	vertically upright and horizontal (operating range A only vertically upright)
max. Pressure /	see table
max. Media temperature /	-25...+70°C (-15...+60°C for range A) short spell up to +85°C. Cooling elements are recommended for higher temperatures
Setpoint /	can be set externally by means of screw-driver on the spindle
Repeatability /	< 1% of working range (at pressure ranges > 1 bar)
Adjustment /	The scales are calibrated for decreasing pressures. The reading corresponds therefore to lower setpoint, the upper setpoint is higher by the hysteresis
Lead sealing /	On request, ex-factory; sealing can also be undertaken later
Vibration /	Up to 4g no significant deviations
Mechanical Life span /	10 x 10 ⁶ for room temperature and sinusoidal pressure impact. Life span depends highly on the sort of pressure impact. This value is therefore just a guide value. For applications with pulsating pressure or pressure surges we recommend the use of a pressure surge reducer.
Electrical Life span /	100,000 switching cycles at nominal current 8 A, 250 VAC
Isolation /	overvoltage category III, pollution degree 3, rated impulse voltage 4000V, fulfills DIN VDE 01 10
Hysteresis /	In PDC-2.1.A to PDC-2.1.F the hysteresis cannot be set. In PDC-2.2.B to PDC-2.2.F the hysteresis can be set as specified in the following tables.

Process connection /	G1/2"-male (pressure gauge connection acc. DIN 16288), G1/4"-female acc. ISO 228 part 1. Using the G1/2"-male the PDC-2 can be directly screwed on to the pressure pipe, alternatively fastening by means of 2 screws (4mm Ø) on a plane surface is also possible.
Housing material /	Aluminium pressure casting GD Al Si 12 (sea-water resistant)
Material of pressure sensor /	refer to following tables
rel. Humidity /	15%...95%, non-condensing

PDC-3

Differential Pressure Switch

Features

- / Compact
- / Robust design
- / 9 different pressure ranges
- / Various materials
- / Plug connection

Description:

Mechanical pressure switches of the PDC series are characterized by their male mechanical resilience. The PDC-3 has a robust housing made of sea-water resistant aluminium pressure casting and, depending on the pressure range, it has an aluminium or stainless steel 1.4305 connection fitting. Both types of connections are provided with G1/4"-female thread. Excescent pressure changes at the connections act on a double chamber system with stainless steel diaphragm or Perbunan membrane, the movements of which are transferred to a high-performance micro-switch through a connecting bridge. The setpoint is set externally by rotating a spindle for nominal value that directly modifies the pre-tension of a spring. In addition, the construction has a counter-pressure spring that ensures a very stable connection even at low set-points. The PDC series of pressure switches can be provided with a terminal housing in IP65 and a blue cable gland, to allow the operation in hazardous areas (in connection with a suitable isolated switch amplifier) or even as an EEx-d version.

Application:

The PDC-3 series of pressure switches is suited for regulating and monitoring differential pressure from millibar range to 2-digit bar range. Due to the fact that the pressure-sensing measuring diaphragms are only less loaded – considering their permissible values – the PDC-3 guarantees an excellent long-term stability at minimal setpoint drift. Consequent to its design, the upstroke of the pressure diaphragms is limited by means of a stopper so that high overpressure safety is ensured even in small operating ranges. The PDC-3 can be mainly used for monitoring filters or gas and fluid flow across all sections of the industry.

Technical Specifications:

Operating range /	see table
Mounting position /	vertical to the top
max. Pressure /	see table
max. Media temperature /	-25...+70°C short spell up to +85°C, use cooling elements for higher temperatures
Setpoint /	can be set externally by means of screwdriver on the spindle
Repeatability /	< 1 % of working range (for pressure ranges > 1 bar)
Adjustment /	The scales are calibrated for decreasing pressures. The reading corresponds therefore to lower setpoint, the upper setpoint is higher by the hysteresis
Lead sealing /	On request, ex-factory; sealing can also be undertaken later
Vibration /	Up to 4g no significant deviations

PDC-4

Pressure Switch with Stainless Steel Sensor System

Features

- / Fully stainless steel 1.4571
- / Resistant to hostile media
- / Plug connection
- / Adjustable hysteresis

Description:

The PDC series mechanical pressure switches is characterized by their excellent mechanical strength. The PDC-4 has a robust housing made of sew-water resistant aluminium pressure casting. It has a stainless steel 1.4571 connection fitting provided with a G1/2"-male and a G1/4" female thread. Excesrent pressure changes at the connection act on an internal measuring diaphragm the movements of which are transferred to a high-performance micro-switch through a connecting bridge. The set-point is set externally by rotating a spindle for nominal value that directly modifies the pre-tension of a spring. In addition, the construction has a counter-pressure spring that ensures a very stable connection even at low set-points. The PDC series of pressure switches can be provided with a terminal housing in IP65 and a blue cable gland, to allow the operation in hazardous areas (in connection with a suitable isolated switch amplifier) or even as an EEx-d version.

Application:

The PDC-4 series of pressure switches is used in applications where high requirements are placed on the switch's life span and mechanical strength and where the PDC-1 is ruled out due to its limited resistance to the particular medium. Due to the fact that the pressure-sensing measuring diaphragms are only less loaded – considering their permissible values – the PDC-4 guarantees an excellent long-term stability at minimal setpoint drift. Consequent to its design, the upstroke of the pressure diaphragms is limited by means of a stopper so that high overpressure safety is ensured even in small operating ranges. A number of operating ranges are available of which also a version with adjustable hysteresis can be supplied. This enables the user to accurately control a span of pressures with only a single device. Thanks to its material quality, flexibility of connections and high switching load of the micro-switch, the PDC-4 is predestined for use across all sections of the industry.

Technical Specifications:

Operating range /	see table
Mounting position /	vertical to the top

Type	Setpoint range	Hysteresis (average)	max. Pressure	Wetted parts	Sketch Nr.	Manufacturer number
PDC-4.22.G	0.5...6 bar	0.25...2 bar	16 bar	1.4571	1 + 18	DNS6-203
PDC-4.22.H	1...10 bar	0.45...2.5 bar	16 bar	1.4571	1 + 16	DNS10-203
PDC-4.22.I	3...16 bar	0.8...3.5 bar	25 bar	1.4571	1 + 16	DNS16-203

* In case of high vacuum conditions, close to the theoretically possible low-pressure of -1 bar, use of the switch is subject to restrictions due to extraordinary conditions of vacuum technology. However, the vacuum switch itself will not be damaged at maximum low-pressure.

PS-04N

Dual Pressure Switch

Features

- / Stainless steel connection
- / Self-monitoring
- / Two setpoints
- / Analogue output
- / 4-digit 14-segment LED-display
- / Adjustable keypad lock

Description:

The PS-04N dual pressure switch consists of a pressure sensor with downstream electronic component. Built in a compact stainless steel housing, conceived for rough industrial conditions to make it stable against interference and shock and vibration-proof, it offers to the user everything that today's state-of-the-art pressure measurement and monitoring technology demands. The pressure is sensed by a ceramic or a piezoresistive sensor. Its accuracy rating is 0.5% of full scale value and the repeatability better than 0.1% full scale. This meets any requirement. The PS-04N is controlled by a microprocessor and capable of self-monitoring with error output. Its maximum configuration offers 2 transistor limiting contacts with adjustable setpoint, adjustable hysteresis and adjustable time lag. The measured value is legibly displayed on a digital connection display and, additionally, put out through a 4. .20 mA or 0. .10 VDC socket. All parameters can be easily programmed by means of a diaphragm keypad.

Application:

With its pressure range of 0 bar up to 600 bar, the PS-04N dual pressure switch covers a wide spectrum of applications and, therefore, is used across all types of industries. Typical applications are the accumulator charge connection, the locking pressure monitoring and the lubricant control, to name a few. For example, the additional analogous signal can be used for regulating pressure or for reporting functions. Using only one device, the user has simultaneously two setpoints, an onsite display an analogous output for remote transmission, thus replacing a pressure gauge, a mechanical pressure switch and a pressure sensor.

Technical Specifications:

max. Ambient temp. /	-10...+70°C
max. Storage temp. /	-30...+80°C
max. Media temp. /	-25...+100°C
Compensated range /	-10...+70°C
Temperature influence for zero-point /	< ± 0.2% of full scale / 10 K
Temperature influence on Measuring range /	< ± 0.3% of full scale / 10 K
Linearity error /	<± 0.5% of full scale at 25°C
Repeatability /	± 0.1% of full scale
Resolution /	12 Bit (4096 steps per meas. span)
Scan rate /	1000/s
Weight /	ca. 200 g
Dimensions /	110 x 41 mm without counter plug
Operating elements /	3 press keys with perceptible pressure point
Sensor element /	ceramics or piezoresistive
Process connection /	G- or NPT-1/4"-male thread or 1/2"-male thread front flush
Wetted parts /	st. steel 1.4301, brass MS58, FKM or EPDM

Electrical Specifications:

Display /	4-digit 14-segment LED-display, height of digits 9 mm, red
Connection /	plug connector M12 x 1, 4- or 5-wire
Protection class /	IP65, Class III (IP67 on request)
Supply voltage /	15 VDC up to 32 VDC, reverse polarity protected (SELV, PELV)
Power consumption /	ca. 50mA without load
Shock resistance /	50 g (11 ms) as per DIN EN 60028-2-27
Vibration /	20 g (10...2000 Hz) as per DIN EN 60028-2-26
Analogue outputs /	
Power output:	4...20 mA
Voltage output:	0...10 VDC
Load:	max. 10 mA
Adjusting range:	25...100% of full scale
Refreshing rate:	2 ms
PNP-Transistor-Switching-outputs /	
Switching function:	NO / NC, window and diagnostic modes adjustable
Load:	max. 500 mA, short-circuit safe
Adjustability of setpoint and resetpoint:	0...125% of full scale
Delay:	0...50s adjustable
Switching Frequency:	max. 100 Hz
Display:	LED(s) red

Versions:

PS-04N Dual Pressure Switch

Electronic housing:

The electronic housing is made from the materials stainless steel V2A, FKM and PA/PC. The pressure connection is 320° turnable against the housing.

Sealing:

Depending on the media, choice is possible from among: FKM, e.g. for hydraulic oil and EPDM, e.g. for brake fluid.

Operating range:

The ranges from 0. . .0.2 bar up to 0. . .600 bar are standard ranges. Special operating ranges are available on request.

Outputs:

The full version of PS-04N provide two PNP transistor outputs and an additional analogue output at standard. Other versions are downgraded in several steps.

Process connection:

The user may choose between G1/4"-male thread, 1/4"-NPT-male thread, G1/2"-front flush diaphragm with male thread connection and 1/2"-NPT-front flush diaphragm with male thread connection. Front flush versions are always equipped with a piezoresistive sensor element. UNF- and CETOP-connections are available on request.

Sensor:

The PS-04N is equipped with a piezoresistive sensor element at standard. Operating ranges from 0. . .10 bar rel. up to 0. . .400 bar rel. can also be equipped with a sensor element from ceramics.

PS-05

Electronic Pressure Switch with Stainless Steel Sensor

Features

/ Display and housing turnable

/ Accuracy up to 0,25%

/ Up to 4 switching outputs

/ Many different process connections

/ 2- or 3-wire

/ 4 digit LED-display

Description:

The PS-05 pressure switch and sensor combines a display with a pressure sensor. Four PNP switching outputs can be used, as well as a current and a voltage output. The switching points can be adjusted easily and completely boundless within the menu, because the display can be rotated in two directions, so virtually any orientation of the display is possible. Further adding to its versatility, a whole lot of different dimensions can be chosen for the PS-05, such as bar, mbar, mWC and so on. While being used in a difficult application, the PS-05 will be protected from the medium by a front-flush-diaphragm. This way, a clogging of the measuring unit will be avoided.

Application:

The PS-05 pressure switch can be used for liquids and gases alike. The pressure connection made from stainless steel makes it compatible with a variety of media. Should the media be very aggressive, thick or have a very high temperature and therefore require different configurations, the transmitters can be outfitted with isolating diaphragms. Especially the flexible display makes the PS-05 useful and versatile device for many areas e.g. for pneumatic, process engineering, environment technology and in general measurement technology.

² Welded version only with pressure ports according to EN 837; possible for nominal pressure ranges $P_N \leq 40 \text{ bar}$

PAMU

Chemical Pressure Gauge with Integrated Pressure Measuring Transmitter

Features

/ Mechanical and electronic system

/ Independent

/ Display visible from distance

/ Fully stainless steel

/ Optionally Ex-version

Description:

In the PAMU type of devices two parallel systems measure the excrescent pressure at the process connection independent of each other. The first one is a Bourdon pressure gauge of proven stainless steel technology that is intended for clearly legible display of the measurement onsite. In case of high frequent pressure changes, we recommend optionally available silicon oil filling for the device, as this would counteract the quivering of the indicator. At the same time, a pressure measuring transmitter integrated into the housing of the pressure gauge functions as a remote encoder with its 4...20 mA 2-wire output and thus enables processing of the measurement in control or other display units.

Application:

Well-tested and long-standing pressure measuring technology in robust design combined with modern electronics, so as to unify the benefits of both the systems into a single device. Right under the roughest conditions of the equipment, the user obtains a measurement directly at the measuring point despite sensitive hi-tech devices and thus will be able to read into the operations in the system even if there is an outage of electrical power. Chemical pressure gauges with an integrated pressure measuring transmitter are used often in the chemical industry as well as in the manufacturing of machines and equipment.

Technical Specifications:

Nominal size /	NG100 (NG160 on request)
Process connection /	Standard G 1/2" B male, CrNi-Steel 1.4571, facing downwards; optional G 1/4" B, 1/2" NPT and 1/4" NPT connections
Damping /	Manometer available with non- conductive insulating oil
Accuracy /	
Manometer:	< 1.0% of full scale value (Class 1.0 as per EN 837-1)
max. Temperature /	
Media temp.:	-40. . . +100°C

PU-01N

Pressure Transmitter for OEM Applications

Features

/ Compact design

/ Integrated amplifier

/ Affordable price to performance ratio

/ Broad-based media compatibility

Description:

The PU-01N series of pressure measuring transmitters belongs to the top-class products among pressure sensors which are ideally suited for OEM applications considering their attractive price levels. In PU-01N, the close-lying pressure is measured, depending on the pressure range, by means of a piezo-resistive or a thin-film sensor element. The pressure-dependent resistance signal output by this sensor element is converted into a power or voltage signal through an amplifier. Alternatively, a power signal of 4...20 mA in 2-wire method or a voltage signal of 0...10 VDC in 3-wire method can be delivered from the transmitter. Other types of output signals are available on request.

Application:

The PU-01N series of pressure measuring transmitters is always used for measuring pressure in fluid or gaseous media, if the process does not demand absolute accuracy but a fair repeatability is sufficient for it. All wetted parts are made of stainless steel in order to cover a wide range of media. In case of particularly difficult media, we recommend mounting the PU-01N along side a diaphragm seal (most used types on request). The high overload capacity of the devices, their resistance from corrosion, mechanical vibrations, mechanical shocks and temperature and their durable stability are highly valued for use in the entire industry.

Technical Specifications:

Process connection /	G1/4" B male
Wetted Parts /	stainless steel 316L (from 10 bar rel. st. steel 316 and 13-8PH)
max. Pressure /	overrange limit [bar]: 2-times operating range end value
max. Media temp. /	-30...+100°C with seal at process connection NBR ¹ (standard)
max. Ambient temp. /	-30...+100°C
max. Storage temp. /	-40...+100°C

PU-06

Pressure Measuring Transmitter for General Industrial Applications Class 0.25 or 0.35

Features

- / Accuracy class up to 0.25
- / Stainless steel sensor
- / Robust design
- / High precision and linearity
- / Excellent media compatibility
- / Excellent long-term stability
- / Variety of electrical and mechanical connections
- / Optional Ex- and SIL 2-version

Description:

The high quality pressure sensors of PU-06 series are accurate and reliable transmitters that measure the applied pressure by a piezo-resistive sensor element (not wetted). The pressure-dependent resistance signal output by this sensor element is converted into a current or voltage signal. Selectively, a current signal of 4 to 20 mA in 2-wire method or a current signal of 0 to 20 mA respectively a voltage signal of 0 to 10 VDC in 3-wire method can be supplied. Other types of output signals are available on request. The PU-06 with the front flush sensor element is particularly suited for sticky or tenacious media as the media cannot creep into the device and destroy or clog it.

Application:

The PU-06 pressure transmitters are used for measuring pressure in fluid or gaseous materials. The sensor element is made of stainless steel and therefore compatible with a variety number of media. If the measured media require other conditions due to hostile nature, viscosity or temperature of the media, the transmitters can be equipped with diaphragm seals to allow flange connections, milk tube joints or tri-clamp joints (other types on request). Due to its compact design, accuracy and material combination the PU-06 is perfectly suited for a wide range of industrial applications.

Version:

PU-06 Pressure Measuring Transmitter Class 0.35 or 0.25

Output signal: Possible output signals are: 4...20 mA in 2-wire method (optional as SIL 2- or/ and intrinsically safe version) or 0...20 mA respectively 0...10 VDC in 3-wire method (other output signals on request).

Calibration: On request, the devices can be calibrated for operating ranges „E“ up to „U“ at absolute pressure.

Process connection: On request, the devices can be supplied for operating ranges „B“ up to „O“ with a front flush sensor, that can even be welded to the pressure port. In this case wetted parts are fully stainless steel, because no gasket is necessary. This is recommended for viscous or sticky media.

PU-07

Pressure Measuring Transmitter with Ceramic Sensor Class 0.5

Features

- / High chemical resistance
- / Measuring cell from ceramics
- / Up to 600 bar
- / 4...20 mA or 0...10 VDC
- / Protection class IP 65 / IP 67
- / Variety of electrical and mechanical connections
- / Optional Ex- and SIL 2-version
- / Optional pressure port made from PVDF
- / Suitable for oxygen (on request)

Description:

Series PU-07 pressure transmitters are equipped with a chemical resistant thick-film ceramic measuring cell and are especially well suited for viscous, pasty, contaminated and aggressive media as well as for low-pressure oxygen applications. In this measurement method, depending on the measuring range, the applied physical pressure on the sensor is converted into a pressure-proportional electronic signal which is either available as 4...20 mA in 2-wire technology or as 0...20 mA respectively as 0...10 VDC in 3-wire technology. Other options are Ex-, SIL2- and Ex-SIL2- as well as customized designs.

Application:

The PU-07 pressure transmitters are used for measuring pressure in fluid or gaseous materials. By the option with front flush diaphragm the devices are particularly suited for sticky or tenacious media as the media cannot creep into and destroy or clog them. Versions with the optional pressure port made from PVDF find their use in many aggressive media, to which stainless steel is not resistant. Due to compact design, accuracy and material combination, this series is recommended for a wide range of industrial applications.

Versions:

PU-07 Pressure Meas. Transmitter Class 0.5

Output signal: Possible output signals are:

4...20 mA in 2-wire method (optional as SIL 2- or/ and intrinsically safe version)

or 0...20 mA respectively 0...10 VDC in 3-wire method (other output signals on request).

Calibration: On request, the devices can be calibrated for operating ranges „C“ up to „R“ at absolute pressure.

Process connection: On request, the devices can be supplied for operating ranges „A“ up to „K“ with a semi-flush sensor. This is recommended for viscous or sticky media.

PU-08

Low Pressure Measuring Transmitter with Ceramic Sensor Class 0.25 or 0.35

Features

- / High chemical resistance
- / Ceramic measuring cell
- / Up to 20 bar
- / 4...20 mA or 0...10 VDC
- / Protection class up to IP 68
- / Variety of process connections
- / Optional pressure port made of PVDF
- / Optional intrinsically safe ver.

Description:

Series PU-08 pressure transmitters are equipped with a chemical resistant, capacitive ceramic measuring cell for detection of low system pressures. Optional configurations such as versions with a 99,9% Al₂O₃ ceramic diaphragm or a thermoplastic connection made of PVDF expand the wet-side area of applications. Depending on the selected operating range, physical pressure is converted into a proportional electrical signal, which is either available as 4...20 mA in 2-wire technology or as 0...10 VDC in 3-wire technology. For applications in explosive areas, intrinsically safe versions are available.

Application:

Series PU-08 pressure transmitters are used in the measurement of low system pressure of liquid or gaseous media. Due to compact design, accuracy and high media resistance, PU-08 are ideal for a wide range of applications, for example in environmental technology, process technology, laboratory technology as well as in industrial technology. Preferred media are water, fuels, oils and gases.

Versions:

PU-08 Pressure Measuring Transm. Class 0.35 or 0.25

Output signal:

Possible output signals are: 4...20 mA in 2-wire method (optional as intrinsically safe version) or 0...10 VDC in 3-wire method (other output signals on request).

Calibration: On request, the devices can be calibrated for operating ranges „H“ up to „O“ at absolute pressure (other on request).

Process connection: Optional, the devices can be supplied with a G 1/2" DIN 3852 open pressure port made of PVDF. This is recommended for aggressive media, due to the high chemical resistance.

PD-02

Differential Pressure Transmitter for Fluids and Gases

Features

- / Accuracy class 0.5%
- / 2 piezo-resistive st. steel sensors
- / Separation through diaphragms
- / Stainless steel 1.4535 diaphragms
- / Diff. pressure from 20 mbar to 16 bar
- / High static overpressure
- / Shock and vibration protection

Description:

The PD-02 differential pressure transmitter detects the pressure levels present at its two process connections by means of two piezo-resistive sensor elements and records the difference between their measuring signals. The generated signal proportional to the differential pressure is internally amplified and output to the pins of PD-02 either as a 4 to 20 mA 2-wire signal or as a 0 to 10 V DC 3-wire signal for further processing. For the wetted parts, only stainless steels 1.4404 and 1.4435 and FKM sealing material (others on request) are used in this design, whereby PD-02 can cater to a wide range of fluids or gasses when selecting the media.

Application:

The compact design of the PD-02 differential pressure transmitter allows integration of devices even in installations or machines with restricted conditions of space. The transmitters are stable for long periods, robust against shocks and vibrations and are secure against static pressure that can reach up to 30-times the differential pressure range. There are 12 standard operating ranges from 0...20 mbar to 0...16 bar differential pressure available to the user. As process connections, male as well as female thread systems can be used. If necessary, also the UNF thread system can be supplied which is mostly in demand in the refrigeration technology. The PD-02 differential pressure transmitters are used in areas such as:

- / Machine construction
- / Plant manufacturing
- / Filter monitoring
- / Hydraulics
- / Flow measurement with orifices or dynamic pressure sensors

Measuring ranges:

Nominal pressure [bar]	0.2	0.4	1	2.5	6	16
Differential pressure range [bar]	0..0.02 up to 0..0.2	0..0.04 up to 0..0.4	0..0.1 up to 0..1	0..0.25 up to 0..2.5	0..0.6 up to 0..6	0..1.6 up to 0..16
Permissible static pressure, one-sided [bar]	0.5	1	3	6	20	60

Technical Specifications:

Accuracy /

- ≤ ± 0.5 % FSO: Diff. pressure range with TD from 1:1 up to 1:5
- ≤ ± 1.0 % FSO: Differential pressure range with TD > 1:5 up to 1:10 (Characteristic line deviation as per IEC 60770 limiting point setting (non-linearity, hysteresis, repeatability))

Permissible load /

Power output 2-wire:
 $R_{max} = [(U_B - U_B \text{ min}) / 0.02A] \Omega$
 Voltage 3-wire: $R_{min} = 10 \text{ k}\Omega$

Influencing factors /

Voltage supply: 0.05% FSO / 10V
 Load: 0.05% FSO / kΩ

Long period stability /

≤ ± 0.2 % FSO / year

PD-04

Differential Pressure Transmitter for Fluids and Gases

Features

- / Accuracy 1%
- / Compact and lightweight
- / Fast reaction
- / High reliability
- / Ranges from 1 bar to 6 bar
- / Easy installation

Description:

The Series PD-04 Differential Pressure Transmitters are suitable for measuring over-pressure, under-pressure, and differential pressure in compatible gases and liquids with 1% accuracy. The PD-04 is suitable for all measuring tasks in commercial, industrial or sanitary applications. Dual pressure sensors convert pressure changes into a standard 4 to 20 mA or 0 to 10 VDC output signal.

Application:

The compact design of the PD-04 differential pressure transmitter allows integration of devices even in installations or machines with restricted conditions of space. The transmitters are stable for long periods, robust. The PD-02 differential pressure transmitters are used in areas such as:

- / Heat exchangers
- / Fan coils/air handlers
- / Core testing applications
- / Hydraulic systems
- / High line pressures/low DP
- / Pumps
- / Commercial/industrial processes
- / Sanitary process

Technical Specifications:

Accuracy /	± 1% from -5...+60° C
Stability /	± 1% FS / Year
Process connections /	1/4 female NPT 1/4 female BSPT
Relative humidity /	10% to 90% non condensig
Ambient temperature /	-10...+60°C

PMMS

Differential Pressure Transmitter for non-combustible Gases

Description:

PMMS series of differential pressure transmitter is a versatile transmitter for monitoring differential pressure and air velocity. The plus- and minus inputs of the PMMS are connected to a differential pressure of a non-combustible gas. The electronic of the unit converts this pressure either into a 0...10 VDC- or a 4...20 mA-analogue output signal. This compact package is loaded with features such as field selectable english or metric ranges, a field upgradeable LCD display, adjustable damping of the output signal (with optional display) and the ability to select a square root output for use with Pitot tubes and other similar flow sensors (e.g. orifice plates) to measure air velocities.

Application:

The patented magnetic sensing technology of the series PMMS provides an exceptional long term performance and enables the transmitter to be the single solution for a huge amount of pressure- and airflow applications. Available are four models with different operating ranges from 0...60 Pa up to 0...7 kPa. All of the units provide four different selectable full scale values. Differential pressure transmitters of the series PMMS are the perfect solution to be used in cleanroom applications, monitoring of sluices or the detection of the grade of pollution of air filters. All models can be ordered with a duct mount static pressure probe, which can be mounted directly to the duct either with a split flange or with a mounting gland. Other typical applications for the PMMS are e.g. the monitoring of ventilators and blowers, air-filters, overpressure in rows of chimneys, the measuring of low respiratory and blood pressures and the recording of air velocity in building automation processes.

Features

- / Low-Cost
- / Accuracy class 1%
- / Selectables ranges from 0...7 kPa
- / Analogue output for current or voltage
- / Perfect for monitoring filter pressure and air velocity
- / Optionally with field upgradeable LCD-display
- / Optionally with Pitot tube
- / Display 180° rotatable

Technical Specifications:

Accuracy /	± 1% FSO
Stability /	± 1% FSO / year
max. Op. pressure /	ranges 0 and 1: 3.6 psi ranges 2 and 3: 6 psi
max. Burst pressure /	all ranges 6 psi
Media temperature /	-20. . . +70°C

- / Available for hazardous areas

Description:

The AZ-01N attachable display unit is suited for all measuring transmitters with a 4...20 mA output in 2-wire or a 0...10 V output in 3-wire technology. The display is mounted only between the plug and the cable box and is instantaneously ready to operate. By default, the AZ-01N has a plug connector as per ISO4400. Optionally, other versions with plug connector M12x1, 5-pole and BINDER 723, 5-pole can also be supplied. Further versions are possible on request. The display unit is freely programmable. The parameters such as scaling, decimal point, attenuation, setpoint adjustment etc. can be set easily over the keypad on the front. The parameters are stored in an EEPROM and continue to be present even when there is an outage. Exceeding the range limits in both directions can be displayed as error messages. The integrated diagnostic system continuously monitors all functions of the display. The unit of measurement specified at the time of ordering will be imprinted below the display film ex factory to ensure protection against deletion. As a practical alternative, the customer can fix a label with another unit on the display film. A set of sticker labels is included in the delivery.

Electrical Specifications:

Analogue signal /	4. .20 mA, 2-wire or 0. .10 VDC, 3-wire
Auxiliary power /	2-wire system: supply from the current loop (voltage drop <6 VDC) Ex-version max. 28 VDC for combination of transmitter and AZ-01N 3-wire system: unit is supplied parallel to the transmitter $U_{Bmin} = 8 \text{ VDC} \cdot U_{MUmin}$ $U_{Bmax} = U_{MUmax} \cdot 36 \text{ VDC}$ (U_{MU} = supply voltage of used transmitter)
Switching output /	0, 1, or 2 independent open collector PNP-outputs
Switching load /	standard max. 125 mA load, protected against short-circuiting, $U_{switch} = U_B - 2 \text{ VDC}$ optionally ATEX-approval max. contact power at a setpoint of 70 mA, for two setpoints 70 mA as sum of both outputs
Repeatability:	< ± 0.1% FSO
Switching frequency:	max. 10 Hz
Switching cycles:	> 100 x 10 ⁶
Time delay:	0. .100 s
Electric protection /	
Short-circuit prot.:	permanent
Polarity reversal:	no function in case of interchanged connections but no damage
Electromagnetic compatibility:	Interference signal and Interference-proof as per EN61326
Option Ex-approval:	Zone 1: II 2G Ex ia IIC T4 Gb (only in combination with 4. .20 mA, 2-wire)
Safety-related maximum values	$U_i = 28 \text{ VDC}$, $I_i = 93 \text{ mA}$, $P_i = 660 \text{ mW}$, $C \approx 0 \text{ nF}$, $L_i \approx 0 \text{ }\mu\text{H}$, plus cable inductivities 1 $\mu\text{H/m}$ and capacities 100 pF/m
Display /	
Type:	4-digit, red LED-display,
Digits height:	7 mm
Digits width:	4.85 mm (angle 10°)
Range:	-1999. .+9999
Accuracy:	0.1% ± 1 Digit
Refreshing:	new value every 0. .10 s, adjustable
Digital damping:	0.3. .30 s, adjustable

Technical Specifications:

Mechanical strength /	Vibration 5 g RMS (20. .2000 Hz) shock 100 g / 11 ms
Storage temperature /	-40. .+85°C
Ambient temperature /	-25. .+85°C (Ex-Schutz +70°C)
Material /	housing out of PA 6.6, polycarbonate
Weight /	approx. 150 g
Data-security /	non-volatile EEPROM
Protection class /	IP65
Programmable features /	<ul style="list-style-type: none"> · dezimal point · zero and span · damping · updating time for displayed measuring value · actuating and deactuating values of setpoints · switching delay · hysteresis or window mode · password protection

PU-10K/E

Process Pressure Transmitter

Description:

The PU-10 K/E process pressure transmitter has been developed to meet the highest demands in the processing industry. A piezo-resistive pressure sensor of high signal stability is used as a base element. The downstream amplifier electronic component linearizes the sensor signal and compensates the temperature errors. A 4 to 20 mA output signal is present in 2-wire method with a HART® frequency signal to make the PU-10 K/E into an intelligent device. In the version with display, parameters like offset, span and attenuation are programmable over a keypad. By means of the HART® component this information can be transmitted via a PC or hand-held programming device. A good readable visible LCD display (optional) shows the measuring value and displays it visually by means of an additional bar graph indicator. The PU-10 E (with stainless steel sensor) has an accuracy of 0.1% of the end value of the operating range. It can be equipped with two different variants of housing. By means of a temperature decoupler mounted between the process connection and the electronic component, measurements up to 300°C media temperature can be obtained.

Features

/ Acc. up to 0.1% FSO IEC 60770

/ HART®- communication

/ ATEX-approval

/ Up to 300°C media temperature

/ All common flange and

thread connections

/ St. steel or ceramic sensor

/ LCD display

/ Adjustable offset, span,

attenuation etc.

Application:

Today's pressure measurement technology places high demands on measurement device manufacturers regarding the sealing materials used, material contacting components besides temperature and overload safety. In addition to this, accuracy and, not the least, the price to performance ratio, too, play a decisive role in the selection of a suitable measuring device. The PU-10 K/E signifies the development of a new series of pressure measuring transmitters which meets these requirements to justify their highest standards. Sensor elements are available from stainless steel or ceramic and are therefore compatible with nearly any type of medium, especially because the standard sealing material Viton is supplemented by a number of special designs. Optionally, connections from Hastelloy can also be supplied. Besides the normal inch-system thread, also flange and DRD connections are used as an interface with the processing, offering thus a wide range possibilities to meet any type of requirement. Intelligent electronics are embedded in one of the two robust connection housings that were especially conceived for use in harsh industrial environment. The PU-10 K/E is compatible with nearly any task of pressure measurement in the industry. Ask us for special customized versions in regard to process connections, sealing material and so on.

Electrical Specs. PU-10K:

Output signal /	4 . .20 mA, 2-wire with Hart [®] -communication; intrinsically safe version (option)
Auxillary power /	$U_B = 12 . .28$ VDC
Power consumption /	max. 25 mA
Accuracy ¹⁾ /	for nominal pressure: $0.16 . .0.4$ bar $\leq \pm (0.2 + (TD-1) \times 0.02)$ % FSO for nominal pressure: $1 . .20$ bar $\leq \pm (0.1 + (TD-1) \times 0.01)$ % FSO with turn-down = nominal pressure range / adjusted range
Permissible load /	$R_{max} \leq [(U_B - U_{Bmin}) / 0.02 A] \Omega$, HART [®] : $R_{min} = 250 \Omega$
Influencing factors /	
Auxillary power:	0.05 % FSO / 10 V
Load:	0.05 % FSO / k Ω
Long-time stability /	$\leq \pm 0.1\%$ FSO / year at reference cond.
Response time /	200 ms - without consideration of electronic damping
Operating rate /	5/s
Settings /	
Attenuation:	0 . .100 s
Offset:	0 . .80 % FSO
Span:	turn-down of span: max. 1:5 (span min. 0.02 bar)
Electrical protection /	
Short-circuit protection:	permanent
Reverse polarity protection:	no damage, but also no function
Electromagnetic compatibility:	emission and immunity according to EN 61326
ATEX-Protection /	
St. steel Field-housing:	Zone 0/ ²⁾ II 1/2G Ex ia IIC T4 Ga/Gb Zone 20: II 1D Ex ia IIIC T85°C Da
Aluminium pressure-cast housing:	Zone 1: II 2G Ex ia IIB T4 Gb Zone 20: II 1D Ex ia IIIC T85°C Da
Pressure-resistant:	Aluminium pressure-cast housing Zone 1: II 2G Ex d IIC T5 Gb
Safety-related maximum values:	$U_i = 28$ V, $I_i = 98$ mA, $P_i = 680$ mW, $C_i = 0$ nF, $L_i = 0$ μ H, $C_{GND} = 27$ nF

¹⁾ Accuracy according to IEC 60770 - limit point adjustment (non-linearity, hysteresis, repeatability)

²⁾ The designation depends on the nominal pressure range. Nominal pressure ranges ≤ 60 mbar are marked with „2G“. For nominal pressure ranges > 60 mbar and < 10 bar see the notes under the EC type-examination certificate.

max. Ambient temp.:
 - Zone 0: $-20 . .+60^\circ\text{C}$ at p_{atm} 0.8 . .1.1 bar
 - from Zone 1: $-40 . .+70^\circ\text{C}$ intr. safe
 - pressure-resistant encl. $-20 . .+70^\circ\text{C}$

Display (Option) /

Temperature decoupler

KE-01

Cooling Line for Pressure Metering Points up to 200°C

Features

- / Available in brass, steel or stainless steel
- / Pressure up to 600 bar
- / Temperature up to 200°C
- / Female thread for instrument
- / Gauge connection to measuring point

Description:

The full stainless steel cooling tower KE-01 connects a pressure measuring point, which is due to high media temperatures too hot for a direct connection, to a pressure instrument like a pressure gauge, a pressure switch or a pressure sensor. The cooling tower reduces the temperature of the pressure medium significantly by air circulation and thermal radiation, in order to avoid wrong measuring values or damages of the pressure instrument. It is recommended to use the cooling tower KE-01 at process temperatures in excess of 100°C.

Application:

Too high media temperatures at pressure metering points are frequently restricting the facility to display, measure and evaluate the process pressure accurately, thus pressure instruments are usually calibrated to a specified temperature range or the inaccuracy caused by higher or lower temperatures is compensated. Temperatures out of this range lead to disproportionate imprecision or damage of the internal electronic components. In this case the cooling tower KE-01 offers a priceworthy and practical solution, which increases the measuring accuracy and the lifespan of such instruments.

DM-250

Digital Pressure Gauge with Ceramic Sensor

Features

- / Accuracy $\leq \pm 0.25\%$ FSO BFL
- / Operating ranges up to 600 bar
- / Rotatable display housing
- / Min/Max function
- / Offset- and endpoint calibration
- / Switch-off automatic configuration
- / NPT or G thread
- / Selectable pressure units
(bar, mbar, psi, InHg, cmHg, mmHG,
hPa, kPa, MPa, mH2O, InH2O)

Description:

The battery-powered digital pressure gauge series DM-250 has been designed for pressure measurements in hydraulic and pneumatic systems. Characteristics such as accuracy, reliability and a good overload resistance forms the base for the use of this series in the entire industry. All models are equipped with a stable, rotatable plastic display housing with a 2-line LC display, which guarantees a good readability even under unfavorable mounting conditions. The handling and configuration is menu-driven via three miniature push buttons.

Besides showing information about the nominal pressure range (e.g. limit exceeding), several pressure units and the position of decimal point can be set as well as minimal and maximal pressure of the process can be read. Furthermore, the instruments zero and end point can be calibrated and the configuration of the power off function is possible. Factory defaults can be loaded via menu.

Application:

Today, in the industry, conventional Bourdon tube pressure gauges are increasingly replaced by digital manometers, since these devices are more accurate, long lasting and stable and possess additional characteristics that are impossible for mechanical manometers due to their design. Especially users from the areas listed below will profit from these facts:

- Environmental technology
- Laboratory technology
- Machine construction
- Plant manufacturing
- Pneumatic & Hydraulic
- Research & Development
- etc.

Technical Specifications:

Operating ranges /	see table 1
Measuring rate /	5 per sec.
Accuracy /	± 0.25 % FSO BFSL (accuracy according to IEC 60770 - minimum value setting (non-linearity, hysteresis, repeatability))

KM-100N

Contact Pressure Gauge

Features

- / Brass and chemical versions
- / Nominal size 4" (100 mm)
- / Optional vibration attenuation
- / Up to 4 inductive or snap action contacts
- / All levels of pressure
- 1...2500 bar as per DIN
- / Negative pressure ranges

Description:

Contact pressure gauges are suited for controlling and regulating processes by means of excess processing pressure. In this, the switching contacts open or close depending on the indicator position in the pressure gauge. If the medium to be monitored does not tend to crystallize or harden, pressures from -1 bar up to 2500 bar can be displayed and monitored easily. In critical situations, optionally the pressure gauge is equipped with a diaphragm seal for the pressure. In KM-100N with oil filling, possible excess pressure pulsations or mechanical vibrations are subdued. This extends the life span and the quality of legibility in the devices significantly. Snap-action contacts are used under rough industrial conditions while switching high currents. In case of excess or below par electrical switching load at the contacts, we recommend using a protective relay for the contacts such as Profimess MSR_x. On the other hand, touch less engaging of inductive contacts facilitates precise setting for the switching point and has no effect on the pressure measurement system. By using these contacts even applications in the hazardous areas can be covered. For controlling the inductive switching contacts, always a separate control device is necessary which normally has a control power circuit as per NAMUR.

Application:

The KM-100N series contact Bourdon pressure gauges is used in the whole industry. As against a simple pressure switch, they possess the major advantage of enabling visual inspection of the excess process pressure even if the power supply is interrupted due to power outage or cable failure. Snap-action contacts are engaged without potential, thus allowing the user maximum freedom to select the evaluator unit. The KM-100N is supplied with a standard G1/2"-male, however, optionally many other special type connections are feasible, assuring compatibility to a variety of processes.

Versions:

Movement: The process connection, the pressure gauge's tubular spring and the indicator element are available as brass or also fully stainless steel versions where the latter is recommended for applications with hostile media.

Oil filling: In case of pulsations or vibrations in the plants the KM-100N with polybutene oil filling can be ordered by which indicator trembling can be attenuated and thus extend the life span of the movement.

Process connection: The KM-100N has a standard G1/2"-male connection. Optionally, many other thread types can be manufactured as special versions. Position of the connection is either in the vertical to bottom direction or excentrically towards back.

Contact type: The choice can be a snap-action contact or an inductive contact.

Snap-action contacts are electromechanical alarm contacts that make or break electric circuits. A magnetic snap-action contact is a mechanical contact with a make/break capacity up to 30 W / 50 VA (without oil filling).

The signal output will be retarded or advanced and analog to the movement of the instrument pointer. Instruments with magnetic snap-action contacts can be used for all operating conditions, also with liquid-filled instruments.

Inductive alarm sensor contacts are inductive contacts to DIN 19234 resp. NAMUR. They are certified for use in hazardous areas of zone 1 and zone 2. The signal output is instantaneous and analog to the movement of the instrument pointer. Liquid filling in the instrument is possible.

Optionally, for the inductive contacts an integrated amplifier is available that is mounted directly into the housing of slit initiators.

This has a PNP- transistor output and can connect directly to small outputs, for example, in SP controls.

No. of contacts: Up to four contacts can be used. The use of a change-over-contact is considered as a double contact.

Contact function: It must be specified if the power circuit is expected to be contacted at increasing pressure (1 = NO-contact) or broken at increasing pressure (2 = NC-contact). In the case of snap-action contact the power circuit is broken or contacted mechanically, where as in inductive contacts the electrical resistance in the coils changes. Thereby, in the case of a NO-contact the current in the control circuit is set on "HIGH" state while it shifts to "LOW" as a NC-contact.

Operating range: Various DIN op. ranges from -1. . . +2500 bar are available. Please contact us for special operating ranges.

GH-PM

Mounting Enclosure for Magnehelic PM-2000

Features

- / Robust enclosure made of ABS
- / Nonvolatile screws
- / Two bulkhead connectors
- / Protection class IP66

Description:

Enclosures of GH-PM series are particularly designed for differential pressure indicators and switches of Magnehelic PM-2000 series. They allow a simple and safe wall mounting, professional wiring and offer two tight connections for both high and low pressure.

Application:

Differential pressure indicators for low differential pressure ranges are used in many, many industrial applications and in health technology worldwide. Wherever no panel with the particular cutout for Magnehelics is present, or where the Magnehelic offers an additional analog or relay output, Profimess supplies the indicators pre-mounted in the enclosure GH-PM. The pressure and electronic connections will therefore stay clean, dry and protected against incorrect operation.

SA-01

Flow Indicator with or without Rotor, with Wiper for Self-Cleaning

Features

/Gases

/Low viscous liquids

/ Small dimensions for assembly

/ Brass and stainless steel versions

/ Any mounting position

/ Optionally, with or without rotor

Visual indicating of flow

/ With internal wiper blades for
internal cleaning of the sight glass

Description:

The SA-01 series of flow indicators is intended for visual indication of flow through a pipe. The medium passing through it can be viewed through a sight glass. Optionally, a rotor placed into the flow is set into motion by the medium which serves as a visual confirmation of the flow. Wiper blades mounted in the device get pressed inside against the sight glass. By simply rotating the sight glass manually, the inside can be cleaned of deposits, formation of algae or calcification without the need to interrupt the process. Thus, elaborate maintenance and cleaning operations can be dispensed with.

Application:

The SA-01 series of flow indicators is deployed for monitoring fluids of low and medium viscosities (up to 150 cSt) in pipes. Optionally the unit can indicate the flow of gases and is equipped with ball bearings in this case.

- / Large inspection window
- / High temperature range
- / Reading possible on both sides
- / Visual evaluation of media
- / Excellent media compatibility

Description:

The DA-01 series of flow indicators is meant for visual and quantitative control on fluid measuring substances. The device has large surfaced sight glasses fitted on both sides and provided with a graduated scale. A fine polished stainless steel flap fitted within the flow area gets lifted by the flow of media and, depending on the volume of flow, shows the current rate of flow on the scale. The flap is mounted on a stainless steel axis and operates with fine linearity purely depending on the gravitation. The DA-01 can be mounted vertically as well as horizontally. Due to its high temperature resistance it can be deployed in many ways.

Application:

Flow indicators are deployed for visual and quantitative control of fluid and gaseous media. The device has versatile applicability, especially in the construction of equipment, in process measurement technology or as general monitoring of compressors, cooling subassemblies, blowers and others.

DA-02

Sight Flow Indicator

Features

- / Buckle-free glass-mounting
- / Large inspection window
- / High temperature range
- / Reading possible on both sides
- / Visual evaluation of media
- / Excellent media compatibility

Description:

The DA-02 series of flow indicators is intended for visual monitoring of fluid and gaseous media. The measuring medium lifts a Teflon® ball resting on the valve of the housing. As the volume of flow increases the ball becomes visible in the dome made of borosilicate glass. From its position, it is possible to draw a conclusion on the current volume of flow. The device is suited for mounting it horizontally with its dome showing upwards.

Application:

Flow indicators are deployed for visual and quantitative control of fluid and gaseous media. The device has versatile applicability, especially in the construction of equipment, in process measurement technology or as general monitoring of compressors, cooling subassemblies, blowers and others.

DA-04

Plastic Sight Flow Indicator

Features

- / Air and Gases
- / Small dimensions for assembly
- / Resistant to many chemicals
- / Any mounting position
- / Temperature max. 80°C
- / Pressure max. 10 bar

Description:

The DA-04 Series Flow Indicators are designed to provide a visual indication of flow through a pipeline and are very rugged with good structural integrity. The position and the centrifugal movement of the rotor and the liquid state of the medium can be observed through the polycarbonate outer wall. The rotor is used here as an indicator of how strong the flow is, since the number of revolutions of the rotor increases with increasing flow.

Application:

The DA-04 flow indicators are used to monitor gases or liquids with low and medium viscosities (up to 150 cSt) in pipelines.

Areas of application:

- Water
- Oil
- Coolants
- Chemicals
- Air and gases
- Corrosives

Technical Specifications:

SA-05

Sight Flow Indicator with Female Thread in Gray Cast Iron, Steel Casting or Stainless Steel

Features

/ Temperature up to 280°C

/ G1/4" to G2"

/ PN16, PN25 or PN40

/ Indicator with flap,

drip tube or rotor

/ Optionally with NPT connection

Description:

Flow indicators are intended for visualization of flows in pipes. In the case of SA-05, a drip tube or a rotating plastic rotor or a movable flap are viewed through two glasses mounted in a robust flow armature for visual control of flow. Air bubbles and solid particles flowing along or the rotor's rotation speed and the position of the deflected flap enable the observer to quantitatively estimate the volume of flow.

Application:

The SA-05 series of flow indicators possesses a cylindrical female thread connection which can also be designed as a conical NPT thread. They can be deployed for up to 40 bar of maximum pressure and 280°C maximum temperature. The range of materials available includes gray cast iron, steel casting or stainless steel with soda-lime or borosilicate glass. Due to these properties the SA-05 is mainly deployed in the entire manufacturing and processing industry.

SA-10

Flow Indicator from Stainless Steel or Bronze

Features

/ Reasonable pricing

/ Up to 16 bar

/ Up to 200°C

/ Low pressure drop

/ Wide flow range

/ Nominal widths from DN8. . .DN40

Description:

Profimess' flow indicators SA-10 offer a cost-effective solution wherever it is important to recognize flow condition in pipes of nominal widths from 8. . .40 mm at a glance. The ratio between maximum and minimum flow is exceptional and the pressure drop is low even at the end of the recommended flow range. The sight flow indicators SA-10 work both horizontally and vertically and inverted flow can pass through them.

Application:

The selectable material combinations stainless steel and bronze predetermine the flow indicators SA-10 for 'aggressive media applications'. Even the indication of a marine water flow or the operation within a saline environment is easily possible, because bronze, as against stainless steel, aluminium or brass, is one of the rare metals resistant against salt water and oceanic climate. The units serve of course also water, oil, lubricants, coolants and many more fluids. A further benefit of using sight flow indicators of SA-10 series is, that the user can not only estimate the flow velocity in the pipe, but also get an impression of fluid condition. This enables him to recognize at an early stage, if e.g. overheating or a leak cause a color change or a pollution of the flowing liquid.

SP-01

Vane operated Flowswitch

Features

/ With or without T-piece,

for pipe sizes of 1/4" to 6"

/ Brass, stainless steel and PVC
designs with T-piece

/ Low pressure drop

/ Reed contact or
micro-switch versions

Description:

The SP-01 series of flowswitches operates according to the proven principle of a displaced vane. The flowing medium strikes the baffle disc mounted at the end of a pendulum. The resulting dynamic pressure deflects the pendulum. Subsequently, a permanent magnet mounted at the other end of the pendulum switches an adjustable reed contact. Different setpoints can be achieved by shifting the reed contact situated outside the medium.

Application:

The SP-01 series of vane flowswitch is suited for monitoring setpoints in low-viscosity fluids. Normally, the setpoint is adjusted during the process. As an option a version of the SP-01 flowswitch is available, that can be applied to explosion-proof areas. These units do not need any certification, because they are, according to the realised estimation of the risk of ignition, no ignition source and therefore not part of the ATEX directive. These switches are always equipped with a blue connection cable of 1.5 m length.

Ver. and Operating ranges:

SP-03

Low-Cost Vane Operated Flowswitch with Cable Connection

Features

- / With T-piece or screw-in thread
- / For pipe sizes of 3/8" up to 6"
- / T-pieces from brass, st. steel or PVC
- / Cost effective
- / Independent of pressure
- / Low pressure drop
- / Stainless steel pendulum system
- / Simple exchangeability of the entire pendulum system

Description:

The SP-03 series of vane operated flowswitches operates according to the proven dynamic pressure principle. If the flowing medium strikes the pressure plate at the lower end of the pendulum, the pendulum system is moved. This action is supported by a pretensioned leaf spring. Therefore it can be operated without friction. A permanent magnet attached to the upper end of the pendulum system operates a reed contact which is sealed against the flow medium. Different setpoints can be achieved by shifting the reed contact situated outside the medium.

Application:

The SP-03 device type has proven itself to be a simple, reliable and cost-effective solution for monitoring setpoints in low-viscosity liquids. Normally, the setpoint is adjusted during the process. However, on request fixed setpoints can be pre-set at factory for rising or falling flows.

Technical Specifications:

max. Pressure /	SP-03.[1-3, 6-8]: 25 bar SP-03.[4-5]: 2.5 bar

SP-04

Digital Flowmeter/Switch with Way-Deflection-System

Features

- / 4...20 mA or 0...10 V DC output
- / Optional RS 232 interface
- / Totalizer
- / 2 separately adjustable switching contacts
- / Soil-resistant
- / For pipes up to DN600
- / LCD display for flow & total volume
- / Operating range 1:10

Description:

Profimess' measuring device SP-04 is a flow transmitter with a digital display of the current flow, analogue output, totalizer, voltage output and two adjustable switching relays with display of the setpoints for monitoring the flow rate. An RS 232C interface is optionally available. The flowing medium moves a baffle plate mounted to a pendulum and thus generates the measured displacement. The spring-loaded pendulum alters its position depending on the flow. The position of a magnet fixed to the pendulum is recorded by a Hall sensor located outside the measuring chamber and transmitted to the microchip-controlled electronics where it is processed. This 2-chamber system ensures that no fluid can penetrate the electronics housing even if the device is defective.

Application:

The SP-04 series of flowmeters and -switches is used for detection of thin-bodied media in nominal diameter ranges up to DN600. Particularly in the range of DN50 upwards the extremely cost-effective price-performance ratio is perceptible. Measurement by means of a baffle plate is independent of the conductivity of the medium due to which also glycol, oils and other hydrocarbons can be captured without problems. The SP-04 can be adapted to a large number of processes thanks to different material combinations.

Technical Specifications:

max. Pressure /	SP-04.GW and SP-04.AU 25 bar SP-04.FL 16 bar

DP-10N

Vane operated Flowswitch

Features

- / Proven technology
- / Easy to install
- / Low pressure drop
- / Brass and stainless steel
- / Good repeatability

Description:

The DP-10N series of flowswitches transmits the movement of the vane mounted in the pipe which is proportional to the flow over a spring-supported rocker mechanically to a high-performance micro-switch. The setpoint can be modified by customizing the spring tension. The 3 standard vanes can be deployed for a nominal diameter range of 1" to 3". A fourth vane can be customized for larger nominal diameters or for reducing the switching values by shortening it to a desired length. In addition, the DP-10N can be supplied designed for a reduced adjustment range so that it can be deployed also for minimum switching values.

Application:

The DP-10N vane switches are used wherever fluid or air flows need to be reliably monitored. The switches are used for monitoring minimum as well as maximum flow. Typical areas of application include monitoring of coolant and lubricating circulation, protection against dry-runs in pumps or safeguard against defects. The DP-10N is designed as robust device to allow its use across the entire industry.

Technical Specifications:

max. Pressure /	DP-10N.1.1:	8 bar

DP-10LC

Vane operated Flowswitch

Features

- / Proven technology
- / Easy to install
- / Low pressure drop
- / Brass and stainless steel
- / Good repeatability
- / Low cost
- / For water or air

Description:

The DP-10LC series of flowswitches transmits the movement of the vane mounted in the pipe which is proportional to the flow over a spring-supported rocker mechanically to a high-performance micro-switch. The setpoint can be modified by customizing the spring tension. The 3 standard vanes can be deployed for a nominal diameter range of 1" to 3". A fourth vane can be customized for larger nominal diameters or for reducing the switching values by shortening it to a desired length. In addition, the DP-10LC can be supplied designed for a reduced adjustment range so that it can be deployed also for minimum switching values.

Application:

The DP-10LC vane switches are used wherever fluid or air flows need to be reliably monitored. The switches are used for monitoring minimum as well as maximum flow. Typical areas of application include monitoring of coolant and lubricating circulation, protection against dry-runs in pumps or safeguard against defects. The DP-10LC is designed as robust device to allow its use across the entire industry.

DP-20/30

Vane operated Flowswitch

Features

/ Easy to assemble

/ Cost-effective

/ Reliable

/ Excellent strength

/ For fluids and air

Description:

The DP-20 model is unique due to its simple but reliable design. An external magnet actuates a switch that is fully protected within a leak-proof housing. The body and the vane are manufactured of chemically resistant polyphenylene sulphide. The vane which can be shortened has well-sculpted divisions for pipes of DN 25 to DN 150.

The DP-30 model is smaller and more compact than the DP-20 and it is available in brass or stainless steel versions on account of which the switch can be deployed for pressure levels up to 138 bar. A unique switch setting enables a quick change-over of the contact function. By releasing two screws and subsequently shifting the shedded reed contact either of the NC-contact or the NO-contact functions can be selected. The vane has a shortening pattern that indicates at which point it must be separated for the 6 pipe nominal diameters of 1/2" to 2".

The DP-20 as well as the DP-30 indicate the correct flow direction of the medium over an indexing arrow on the body side.

Application:

Vane switches offer a simple and cost-effective method of monitoring the flow of a medium. The vane moved by dynamic pressure switches an electrical contact magnetically when the flow exceeds or falls a certain value. This type of monitoring flow is successfully used in the entire industry wherever the media being monitored do not indicate any significant levels of pollution or too high speeds of flow.

DP-20 Vane Operated Flowswitch made from Plastic

Technical Specifications:

Wetted materials /

Vane and body:	PPS
Pin and spring:	316 SS or Inconel®
Magnet:	Ceramic 8

max. Pressure / 10 bar

max. Media-temp. / +100°C

Process connection / 1" NPT-male

Weight / 130 g

Installation / with arrow in direction of flow

Mounting position / Actuation/deactuation flow rates are based on horizontal pipe position and are nominal values. The device can not be used vertically.

DP-40

Vane operated Flowswitch for heavy-duty applications

Features

- / Leak proof body
- / Free-Swinging vane
- / Electrical unit can be replaced
- / Thread, tee or flange installation
- / Field adjustable multilayer vane
- / Up to 1000 or 2000 psig
- / 5000 psig on special request
- / Weatherproof NEMA4
- / ATEX or IECEx

Description:

The DP-40 Flow Switch is rugged and reliable, ideal for automatically protecting equipment and pipeline systems against damage from reduction or loss of flow. A unique magnetically actuated switching design gives superior performance. There are no bellows, springs, or seals to fail. Instead, a free swinging vane attracts a magnet within the solid metal switch body, actuating a snap switch by means of a simple lever arm. Time tested in thousands of pipeline installations and processing plants around the world this series is weatherproof, designed to meet NEMA 4 and explosion-proof (listing included in specifications). The DP-40 can be used in pipes 1 1/2" and up.

Application:

- / Protects pumps, motors and other equipment against low or no flow
- / Controls sequential operation of pumps
- / Automatically starts auxiliary pumps and engines
- / Stops liquid cooled engines, machines and processing when coolant flow is interrupted
- / Shuts down burner when air flow through heating coil fails
- / Controls dampers according to flow

Actuation rates are based on air at standard conditions.

For gases at other pressures, temperatures, or specific gravities, consult factory for equivalent flow approximations.

DK-01

Low-Cost Piston Type Flow Switch for Low Flow Volumes with Cable Connection

Description:

The DK-01 series of compact piston type flowswitches operates according to a modified variable area principle and is used for monitoring the flow of low-viscosity fluids. In this method, a piston equipped with a built-in permanent magnet, is held in a defined position by a spring. Depending on the rate of flow, the medium slides the piston against the strength of the spring. If the flow exceeds or drops below of the present set-point, the reed switch outside the medium is activated without contact via the permanent magnet.

Features

- / For low-viscosity fluids
- / Fixed factory-set setpoint
(between 0.1 and 2.5 l/min)
- / Compact construction
- / Easy to install
- / Cost effective
- / Mounting in any position
- / Reed contact output

Application:

The DK-01 series is used for monitoring the flow of low-viscosity fluids in pipes. They offer a reliable solution for ensuring the minimum flow rate and thereby protecting high-quality systems and installations from damage. For applications with contaminated media or media with ferritic components, we recommend the use of strainers (for example the FT-01, a strainer with or without magnetic separator in the section accessories) of our catalogue.

Typical applications are:

- / Coolant circulation systems
- / Lubricant circulation systems
- / Water circulation systems

Technical Specifications:

Set-point range /	0.1 .. 2.5 l/min
Switching hysteresis /	ca. 0.1 l/min
max. Pressure /	25 bar, higher on request
max. Media temp. /	+100°C
max. Ambient temp. /	+70°C
Process connection /	R 1/4"-female thread or hose nozzle for 8 mm flexible tube, other on request
Mounting position /	any
Materials (wetted parts) /	
Body housing:	brass or stainless steel, other on request
Piston:	POM
Spring:	stainless steel 1.4410
Magnet:	hard ferrite OX 300

Dimensions in mm:

Piston type flowswitch with 8 mm hose nozzle at both sides

Piston type flowswitch with R 1/4" female thread at both sides

Electrical Specifications:

Electrical connection /	stranded wire 2-core, 0.5m cable
Contact /	reed contact, NO-contact
max. Switching voltage /	200 V
max. Switching current /	1 A
max. Switching load /	15 W

Handling:

- / It must be ensured, that the values given for voltage, current, and power are not exceeded.
- / When switched on, a load must be connected in series.
- / The electrical details apply to resistive loads. Capacitive, inductive and lamp loads must be operated using a protective circuit.

/ An inflow section of 10 times and an outflow section of 5 times of the nominal pipe diameter is recommended. Therefore our „BE-01 - Inflow and Outflow Sections for Flowmeters“ may be used.

FL-01

Diaphragm Flow Meter

Description:

The FL-01's body contains a thin, elastic diaphragm, made of stainless steel, which covers the entire flow cross-section. It is bent through the flowing liquid, until it touches a bow-shaped stopper. The magnetic field of a plastic-encapsulated magnet, sitting right on the diaphragm, is detected by an external sensor. The optional available measuring-transducer, installed on the outside of the housing, owns a back-lit, well-readable LCD-Display, which shows measured values and parameters in a clear and easy to understand way. The FL-01 has either a 0...10 VDC- or 4...20 mA-output-signal and two switching outputs which can be used as PNP- or NPN-transistor-outputs, if needed. The device can be controlled and programmed with a magnet ring. By turning the ring left or right, parameters, such as hysteresis or switching points, can easily be changed.

A further option, the electronic unit can be ordered as a counter, with external reset, antivalent switching-outputs and current-value display, or, as a current-value display with analogue output, volume-pulse-output and counter.

Features

- / Analogue output
- / 2 switching outputs
- / Well-readable, back-lit display
- / Changeable dimensions
- / For industrial applications
- / Small and compact in size
- / Easy installation

Application:

The new developed measuring-system of the FL-01 offers, by the fact, that it manages without any bearing a very good reproducibility and is practically free of hysteresis. In addition, the response time of the measurement is extremely small, due to the small mass of the spring diaphragm and the nearly complete coverage of the flow cross section. Therefore the instruments allows the detection of even the smallest starting values and a large measuring range of up to 1:100. Compared to some other principles of flow measurement, e.g. the calorimetric or the impeller system, the dynamics of the entire flow cross-section are detected in the FL-01 and not just a supposedly representative point in the center or at the edge of the flow profile. Straight inlet and outlet sections have a considerably less influence on the measurement result. The FL-01 connectors on the input and output sides are flanged to the measuring system at the factory, so if the device needs to be serviced, the connecting screws can be removed easily from the flange and the measuring-unit removed, without removing the connectors from the pipe. This flowmeter is a universally applicable, robust instrument, which is used in the entire industry. The excellent price-performance ratio and its multitude of technical advantages make it economically viable at many measuring points to replace old technologies, such as impeller or turbine flowmeters, with the FL-01.

FL-10

Flow Rate Indicator

Features

- / For liquid media
- / For media viscosities up to 600 cSt
- / Pressure up to 200 bar max.
- / Mechanical flow indication
- / Weatherproof enclosure box (IP65)
- / May be installed in any position
- / Size range from 1/4" to 8"
- / Adjustable under operating conditions
- / ATEX approved Explosion-proof models available

Description:

A spring loaded stainless steel flap inside the FL-10 is rotated around a symmetrical axis due to the upcoming flow and opens therefore a variable aperture. This rotation moves the mechanically coupled pointer on the clearly visible flow scale of the FL-10 proportional to the flow. The rotary motion can be used for mechanical display only, for switching a microswitch when the adjusted setpoint is reached or even to put out a 4...20 mA analogue output. The FL-10 can easily be used within potentially explosive atmospheres thanks to its ATEX approvals for the switching unit and the output module. The unique construction of the FL-10 allows an installation in any mounting position.

Application:

The FL-10 side flow indicators with flap are among the most robust flowmeters on the market. In theory, the user can completely disassemble and reassemble the device on site without any functional restriction. The devices are durable, accurate, and versatile. There are many material combinations for a variety of liquid media and sizes from DN10 to DN200, as well as pressure levels up to 200 bar. Larger variants can be supplied for intermediate flange mounting (sandwich) on request. Various options for the electrical outputs of the indicators predestine the FL-10 series against many other sight flow indicators and offers the customer a perfect industrial product.

SW-01

Miniature Variable Area Flowmeter and Switch

Features

- / Small dimensions for assembly
- / Brass and stainless steel versions
- / Scales for water and air
- / Mounting in any position
- / Highly accurate switching
- / Very low switching hysteresis

Description:

The SW-01 series of flowmeters and switches operates according to a modified variable area principle. Using a spring, the float is introduced into a cylindrical sight glass. The flowing medium moves the float in the direction of flow and the upper edge of the float indicates the flowing volume on the scale mounted on the sight glass. A reed contact is situated outside the device. This reed contact is infused in a stepless adjustable housing and thus protected from external influences. When the float reaches along with its integrated magnet the position of the reed contact, the contact blades get closed. If the volume of flow is higher the float continues to move (maximum up to the stopper that prevents overriding of the operating range). This ensures a bistable switching action at any time.

Application:

The SW-01 series of variable area flowmeters and switches is intended for measuring and monitoring low-viscosity fluid or gaseous media, for example, in cooling systems for welding machines, laser and pipe installations, pump monitoring, compressors and so on. In actual application, a switching hysteresis of only 0.5-1.5 mm float stroke has been achieved by careful selection of the reed contacts being used.

Miniature Variable Area Flowswitch

Features

- / Small dimensions for assembly
- / Brass and stainless steel versions
- / Scales for water and air
- / Mounting in any position
- / Highly accurate switching
- / Very low switching hysteresis

Description:

The SW-02 series of flowswitches operates according to a modified variable area principle. Using a spring, the float is introduced into a cylindrical hole. The flowing medium moves the float in the direction of flow and the upper edge of the float corresponds to the scale mounted on the body of the SW-02. A reed contact is situated outside the device. This reed contact is infused in a stepless adjustable housing and thus protected from external influences. When the float reaches along with its integrated magnet the position of the reed contact, the contact blades get closed. If the volume of flow is higher the float continues to move (maximum up to the stopper that prevents overriding of the operating range). This ensures a bistable switching action at any time.

Application:

The SW-02 series of variable area flowmeters and switches is intended for measuring and monitoring low-viscosity fluid or gaseous media, for example, in cooling systems for welding machines, laser and pipe installations, pump monitoring, compressors, high-pressure cleaners and so on. In actual application, a switching hysteresis of only 0.5 .. 1.5 mm float stroke has been achieved by careful selection of the reed contacts being used.

Variable Area Flowmeter and Switch

Features

- / Compact design
- / Brass and stainless steel versions
- / Scales for water and air
- / Highly accurate switching
- / Very low switching hysteresis
- / Robust design without glass measuring tube
- / Suitable for high operating pressures

Description:

The SW-04 series of flowmeters and switches operates according to a modified variable area principle. The float is introduced into a cylindrical slit nozzle. The flowing medium moves the float in the direction of flow. An externally mounted indicator instrument is magnetically coupled with the float and indicates the flowing volume on the scale mounted on a scale. A reed contact is situated outside the device. This reed contact is infused in a stepless adjustable housing and thus protected from external influences. When the float reaches along with its integrated magnet the position of the reed contact, the contact blades get closed. If the volume of flow is higher the float continues to move maximum up to the stopper that prevents overriding of the operating range. This ensures a bistable switching action at any time.

Application:

The SW-04 series of variable area flowmeters and switches is intended for measuring and monitoring low-viscosity fluid or gaseous media, for example, in cooling systems for welding machines, laser and pipe installations, pump monitoring, compressors, pump circulation, high pressure installations and so on.

Variable Area Flowmeter and Switch, Mounting Position Independent

Features

**/ Any mounting position,
no need of recalibration**

/ Compact design

/ Brass and stainless steel versions

/ Highly accurate switching

/ Very low switching hysteresis

**/ Non-abrasive burnt-in
scale on sight glass**

Description:

The SW-05 series of flowmeters and switches operates according to a modified variable area principle. Using a spring, the float is introduced into a cylindrical slit nozzle. The flowing medium moves the float in the direction of flow and the upper edge of the float indicates the flowing volume on the scale mounted on the sight glass. A reed contact is situated outside the device. This reed contact is infused in a stepless adjustable housing and thus protected from external influences. When the float reaches along with its integrated magnet the position of the reed contact, the contact blades get closed. If the volume of flow is higher the float continues to move maximum up to the stopper that prevents overriding of the operating range. This ensures a bistable switching action at any time.

Application:

The spring action and magnetic float ensure absolute functional safety. Due to the spring mounted inside that presses the float in the opposite direction of flow into its initial position, the device can be deployed in any mounting position. No readjustment is required as the artificially matured spring is under pretension. The SW-05 series of variable area flowmeters and switches is intended for measuring and monitoring low-viscosity fluid, for example, in cooling systems for welding machines, laser and pipe installations, pump monitoring, compressors and so on.

SW-07

Variable Area Flowmeter and Switch

Features

- / For viscous media from
30 cSt up to 600 cSt
- / Any mounting position,
no need of recalibration
- / Compact design
- / Brass and stainless steel versions
- / Highly accurate switching
- / Very low switching hysteresis
- / Non-abrasive burnt-in scale on glass

Description:

The SW-07 series of flowmeters and switches operates according to a modified variable area principle. Using a spring, the float is introduced into a cylindrical slit nozzle. The flowing medium moves the float in the direction of flow and the upper edge of the float indicates the flowing volume on the scale mounted on the sight glass. A reed contact is situated outside the device. This reed contact is infused in a stepless adjustable housing and thus protected from external influences. When the float reaches along with its integrated magnet the position of the reed contact, the contact blades get closed. If the volume of flow is higher the float continues to move maximum up to the stopper that prevents overriding of the connecting range. This ensures a bistable switching action at any time.

Application:

The spring action and magnetic float ensure absolute functional safety. Due to the spring mounted inside that presses the float in the opposite direction of flow into its initial position, the device can be deployed in any mounting position. No readjustment is required as the artificially matured spring is under pretension. The strong pretension of the spring in combination with an aperture in the float limit the effect of the medium's viscosity fluctuations to a minimum in comparison with other normal float flowmeters. The SW-07 series of variable area flowmeters and switches is intended for measuring and monitoring viscous fluids, for example, in centrally controlled lubrication systems, oil circulation lubrication systems, transformer oils and so on.

SW-08

Viscosity-Compensated Variable Area Flowmeter, independent of Mounting Position, High-Pressure Version

Features

- / For viscous media from
30 cSt up to 600 cSt
- / Any mounting position,
no need of recalibration
- / Compact design
- / Brass and stainless steel versions
- / Highly accurate switching
- / Very low switching hysteresis
- / Robust design without sight glass
- / Suitable for high operating pressures

Description:

The SW-08 series of flowmeters and switches operates according to a modified variable area principle. The float is introduced into a cylindrical slit nozzle. The flowing medium moves the float in the direction of flow. An externally mounted indicator instrument is magnetically coupled with the float and indicates the flowing volume on a scale. A reed contact is situated outside the device. This reed contact is infused in a stepless adjustable housing and thus protected from external influences. When the float reaches along with its integrated magnet the position of the reed contact, the contact blades get closed. If the volume of flow is higher the float continues to move maximum up to the stopper that prevents overriding of the connecting range. This ensures a bistable switching action at any time.

Application:

The spring action and magnetic float ensure absolute functional safety. Due to the spring mounted inside that presses the float in the opposite direction of flow into its initial position, the device can be deployed in any mounting position. No readjustment is required as the artificially matured spring is under pretension. The strong pretension of the spring in combination with an aperture in the float limit the effect of the medium's viscosity fluctuations to a minimum in comparison with other normal float flowmeters. The SW-08 series of variable area flowmeters and switches is intended for measuring and monitoring viscous fluids, for example, in centrally controlled lubrication systems, oil circulation lubrication systems, transformer oils and so on.

ST-01

Analogue Transmitter for Variable Area Flowmeters from the SW series

Features

/ Additional analogue signal

/ Easy solution

/ Economic

Description:

The analogue transmitter ST-01 will be simply installed on the outside of a VA flowmeter. A hall-effect sensor detects the magnetic floaters position inside the measuring device and sends out an analog signal of 4...20 mA or 0...10 V. The signal can then be used by most common devices. The transmitter is installed and configured on new flowmeters from factory. It is available for any VA flowmeter of the SW-series (SW-01 to SW-08).

Application:

The ST-01 Signal can be used e.g. for alarm functions. Its main task, however, is to forward the current flow value with the signal.

Technical Specifications:

Accuracy /	± 1 % of full scale ¹
Operating temp. /	-20...70 °C
Storage temp. /	-20...80 °C
Repeatability /	tbd.
Housing /	aluminium, blue anodized (optional 1.4571)

¹ The actual accuracy depends on the flow sensor used.
On request the accuracy of the flow sensor used can be significantly increased by a customized calibration.

Electrical Specifications:

Analog output /	4...20 mA or 0...10 V
Power supply /	24 VDC (19...30 VDC)
Power consumption /	< 1 W
Current output /	max. load 600 Ω
Power output /	max. current 10 mA
Connection /	round plug M12x1, 5-wire
Protection class /	IP 65 & IP 67

Dimensions in mm:

Connections:

Attention: Pin 5 must not be electrically connected! We strongly recommend use of a four core cable.

SM-06N

Variable Area Flowmeter made of Acrylic

Features

- / Local indication without auxiliary power supply
- / Excellent readability
- / Compact design
- / Scales for water and air
- / Process connection of brass or stainless steel
- / Optional with regulating valve
- / Accuracy class 3.0 or 5.0

Description:

SM-06 variable area flowmeters operate according to the variable area principle in which the measuring element such as a stainless steel ball can move in a conical flow tube in vertical direction. When the medium being measured begins to flow from bottom to top, the float, too, moves to top until a dynamic equilibrium of forces freezes it at a certain height. The position that the float reaches in this manner is proportional to the volume flow. The scale value that can be read at the center of the measuring ball, therefore, corresponds to the flow rate. If the excessive volume of flow needs to be regulated, the SM-06 provides optionally a regulating valve to easily allow flow volume control.

Application:

Variable area flowmeters made of acrylic are a cost-effective alternative to glass-made devices. Especially users in the fields of:

- Machine construction
- Medical engineering
- Pharmaceutical industry
- Chemical industry and in
- Research & Development

Where flow indicators are used in large numbers for simple applications and maximum accuracy is not a decisive factor, stand to benefit from this. An important aspect while assembling these devices is that the flow must always be from bottom to top and the medium is free from abrasive solid particles which, otherwise, may cause scratches inside the plastic tube and render it opaque.

Technical Specifications:

Media /	compatible gases and liquids
Process connection /	1/8"-IG NPT. Version 2: W80 and W81 GPM water have 1/4" NPT back-connections or 3/8" NPT end-connections. These versions aren't available with brass valves.
Mounting position /	vertical

SM-10

Variable Area Flowmeter with Sight Glass for Small Flow Volumes

Features

/ Indication without power supply

/ For fluids and gases

/ Brass or stainless steel

/ With built-in needle valve

/ Alarm output on request

/ Accuracy class 1.0, 2.5 or 4.0

Description:

The SM-10 series of flowmeters operates according to the proven variable area principle. The flowing medium moves the float in a conical measuring tube in the opposite direction of gravitational force. The height of the float is a measure for the flow and it can be read from a non-abrasive and burnt-in scale. Optionally, inductive contacts fixed on the sight glass can be used for obtaining limit values. As a standard, all devices are equipped with a needle valve for precise regulation of flow.

Application:

The SM-10 series of variable area flowmeters is primarily intended for controlling and monitoring low-viscosity fluid or gaseous media. For standard conditions, scales for water or air are predefined and enable a quick and simple dimensioning of the devices. For other media or different process conditions specially customized scales are available.

Operating principle:

The flowmeter operates on the float measuring principle. The float adjusts itself so that the buoyancy force A, acting on it, the form drag W and its weight G are in balance:

$$G = A + W.$$

The height of the float is read on the scale of the measuring glass and indicates the flow rate. The top edge of the float marks the reading line for flow values.

1.0	5	100	0.018
2.5	50	1000	0.150
4.5	160	4300	0.480

SM-12N

Conical Glass Flowmeter as per the Variable Area Principle

Features

- / For fluids and gases
- / Wide range of measuring
- / Easy to read scale
- / Low pressure drop
- / Turnable splinter shield
- / Optional limit switch

Description:

A float made of plastic or metal gets lifted by a fluid flowing vertically through a conical glass tube and set into rotation. Its upward movement stops at a point where the gravitational and dynamic forces become equal against each other. The body's position in the cone, therefore, depends of the flow with the result that the volume of flow can be read from the scale engraved on the sight glass.

Application:

Six different sight glass geometries and four different float materials allow a wide range of measuring with the SM-12N for all types of fluids and gases which are compatible with material being used. This data sheet provides an overview of possibilities for water and air at atmospheric state. Please ask us for different media, pressures or temperatures. The SM-12N series of variable area flowmeters is deployed wherever a volume of flow needs to be displayed without electrical means. Specially manufactured floats produce a negligible pressure drop. Often the advantage is that the characteristics of the material being measured can be assessed visually through the glass tube.

Technical Specifications:

Materials /

Process conn.:	AISI 316L - st. steel 1.4404

Measuring tube:	L6; L7	P0; P1	P2	P4
P_{max} [bar]:	16	10	8	6

Temperature / -25...+100°C

Mounting length / 375 mm (thread, clamp),
425 mm (flange)

Weight / 1.7...7.1 kg (see Table 4)

Mounting position / vertical, flow from bottom

Operating ranges / 0,002 l/h to 10 m³/h water (20°C)
0,1 l/h to 160 m³/h air (20°C, 1 bar abs.)

Range / 10:1 for P measuring tubes
20:1 for L measuring tubes

Accuracy / Class 2.5 for tube L613-L623
(as per VDI 3513) Class 1.6 for tube L624-L747
Class 1.6 for tube P051-P471

Versions:

Operating range code: To determine the operating range code, the desired operating range is ascertained in the relevant tables (Table 1 for water and fluids; Table 2 for air and gases) and the code is determined according to the measuring tube, the float and the other listed criteria. For example, the code [P]-[0]-[51]-[SS]-[0]-[3]-[N] indicates the operating range of 10 to 100 l/h water, a float in stainless steel 1.4571 without preparation for a limit contact, this means, without magnets in the float.

Process connection: G female thread, NPT female thread, EN and ASME flanges in stainless steel are available as variants for the connection. The table 3 (Model specification) provides information as to which measuring tube can be fitted with which connection.

Valve: A number of device variants can be equipped with a regulating valve. Optionally, the valve can be made of brass or stainless steel. Depending on the version, the valve can be mounted at the inlet or outlet. The table 3 (Model specification) provides information as to which measuring tube can be combined with which valve. The valves are connected to the flowmeter on site.

Limit contact: All type P measuring tubes can be equipped with REED contacts which require a magnetic float (the operating range code takes this into regard). Optionally, MIN contacts (normally closed) or MAX contacts (normally open) are available.

Electrical Specifications:

Limit contact /	REED, bistable (potential-free)
Voltage /	230 V max.
Switching current /	2 A max.
Switching load /	40 VA or 40 W
Temperature /	-10...+70°C
Protection class /	IP65
Self-capacity /	0 nF
Self-inductivity /	0 mH
Connecting cable /	LIYY 2 x 0,34 mm ² , 1 m long
Housing /	Polystyrene
Weight /	35 g

SM-15

Plastic Flowmeters as per the Variable Area Principle

Features

- / For every industrial application
- / For fluid and gaseous media
- / Simple and robust design with high operational safety
- / PVC, PA, PSU and PVDF versions
- / Low pressure drop
- / Easy to assemble
- / High resolution scale
- / Optional alarm contacts and analogue output

Description:

The SM-15 series of flowmeters operates according to the proven variable area principle. The float gets lifted by the flowing medium and indicates the flow with its upper edge on the scale attached to the device. If floats with integrated magnets are used, optionally, alarm contacts or a measuring transmitter can be attached to the device. All devices possess a male thread on the measuring tube and are additionally equipped with standard PVC adhesive sleeves. As an option, also female threaded fittings made of PVC, PP, brass or stainless steel can be supplied.

Application:

Due to a wide variety of materials and easily interchangeable measurement scales, the SM-15 series plastic flowmeters can be deployed for most of media including hostile media. The main areas of application are water treatment, effluent technology, chemical and food-processing industries and many others.

Technical Specifications:

Meas. transmitter (optional):

Materials /

- Measuring tube: **PVC-U**; transparent
Polyamide; transparent, with heavily reduced humidity absorption
Polysulfon; transparent
PVDF; opaque (yellowish-white)
- Float: PVDF, optional PVDF with integrated magnet (>1% lead of the REACH candidate list)
- Seals: EPDM, optional FPM
- Tube connections: PVC, optional PP, brass, st. steel

max. Pressure /

- PVC: 10 bar at +20°C, 1 bar at +60°C
- Polyamide: 10 bar at +30°C, 1 bar at +75°C
- Polysulphone: 10 bar at +40°C, 1 bar at +100°C
- PVDF: 10 bar at +40°C, 1 bar at +110°C

max. Temperature without joints at 1 bar /

- PVC: +60°C
- Polyamide: +75°C
- Polysulphone: +100°C
- PVDF: +110°C

max. Temperature with joints made of /

- PVC: +60°C
- PP: as per temperature parameters for the relevant measuring tube, but max. +80°C
- Brass, st. steel: as per temperature parameters for the relevant measuring tube

Mounting position /

vertical, flow from bottom to top

Assembly /

with moderation line 5-7 x DN before and after the device

Accuracy /

Cl. 4 as per VDI/VDE 3513, Bl. 2

Accessories /

- Limit value switch: bistable contacts, NO-contact or NC-contact function
- Analogue output: Measuring device with integrated measuring transmitter, 4...20 mA

Attention: Limit contacts or measuring transmitters operate only in combination with a float with integrated magnet.

Version /

reed chain

Housing material /

ABS

Assembly /

adjustable to dove-tail rail of the measuring tube

Supply voltage /

18...30 VDC

Analogue output signal /

4...20 mA, 2-wire
(output can be calibrated/ set)

Electrical connection /

plug connection M12, 4-pole,
with counter-plug angular 90°

Measuring length /

114 mm

Resolution /

3.5 mm

max. Operating temp. /

0...+70°C

max. Ambient temp. /

-20...+70°C

max. Ambient pressure /

atmospheric 0.8...1.1 bar

max. rel. Humidity /

20...85%

CE marking /

DIN EN 61326-1, DIN EN 55022/B

Protection class /

IP 65 (with plug)

The optionally available measuring transmitter for the flowmeter SM-15 is clipped to the dove-tail rail mounted on the measuring tube. The unit comprises a reed chain, the respective evaluation and implementation. Thanks to the 2-wire technology voltage supply and output signal do not run separated from each other. The exact magnet field sensors of the receiver capture the height of the magnetic float and convert its position continually into a 4...20 mA output signal. This signal can be directly further processed.

- 2. Signal (-)
- 3. n.c.
- 4. n.c.

Wiring diagram

Indicator Dimensions:

For the media water (in l/h) and air (in Nm³/h) at relative operating pressures of 0, 1, 2 and 3 bar, standard scales are available.

For other media such as air at higher operating pressure, HCL (30%), NaOH (30%) and, for the units m³/h, l/sec., l/min, USGPM or IGPM, special type scales can be supplied on request.

These supplementary special type scales can be attached later easily and reliably on the flowmeter. There is no need of any modifications to the measuring device.

For other media and/or operational conditions, special type scale can be offered on request.

For this, the following data is required:

- Medium
- Operating pressure
- Operating temperature
- Operating density
- Operating viscosity

Limit contacts (optional):

Version /	bistable reed contacts.
Contact function /	NO-contact or NC-contact for rising flow
Assembly /	adjustable to dove-tail rail of the measuring tube
Switching load /	max. 230 VAC, max. 0.5 A, max. 10 VA
Operating temp. /	0...+55°C
Hysteresis /	10 mm
Connection layout /	2-wire, irrespective of polarity

Operating Ranges (Table 1):

SM-20

Variable Area Flowmeter for Small Flow Volumes in Compact Design

Features

- / For fluids and gases
- / Operating pressures up to 400 bar
- / Operating temperatures up to 250°C
- / Scales for all operational conditions individually designed
- / Local display, MIN. MAX. contacts or analogue output
- / Measuring tube fully st. steel 1.4571
- / Optionally available with valve

Description:

The SM-20 series of flowmeters operates according to the proven variable area principle. The conical float is introduced into a cylindrical measuring tube. The flowing medium moves the float in the direction of flow. The movement of the float is magnetically transferred to a display unit situated outside the measuring tube. The display unit is provided with a scale that is designed to match the operational conditions. Additionally, it can also be equipped with contacts or an analogue output.

Application:

The SM-20 series of variable area flowmeters is intended for measuring and monitoring low-viscosity fluid or gaseous media, for example, in cooling systems for welding machines, laser and pipe installations, pump monitoring, compressors and so on. Due to the fact that for all wetted parts high quality stainless steel 1.4571 has been used, the device is excellently suited for even hostile media.

Technical Specifications:

Materials /	wetted parts made of stainless steel 1.4571 housing made of 1.4301
max. Pressure /	PN 100 (standard), PN 10, 40, as per ordering codes (higher pressures up to 400 bar on request)
max. Temperature /	
local display:	-25...+250°C (+150°C with valve)
with contacts:	-25...+135°C
with analogue output:	-25...+65°C (lower temperatures on request)
Protection class /	IP 66/67
Accuracy /	± 4% of operating range value
Options /	Ex-approval, pulse output
Contact /	
Type:	inductive (as per DIN EN 60947-5-6) SC2-NO
Nominal voltage:	8 VDC
Output signal:	≤ 1 mA or ≥ 3 mA
Hysteresis:	< 0.5mm
Analogue output /	
Supply:	14...30 VDC
Output:	4...20 mA
Load resistance:	(U-14V) / 20 mA, 500Ω max.
El. connection:	quick connect QUICKON
Pulse output:	available on request
Ex-Version:	available on request

Ranges:

No. of operating range	Water 20°C - l/h	Air 20°C. 1.013 bar abs. NI/h	Pressure drop mbar
1 (W/A)	0.1..1	4...40	6
2 (W/A)	0.16..1.6	6...60	6
3 (W/A)	0.25..2.5	10...100	6
4 (W/A)	0.4..4	15...150	6
5 (W/A)	0.6..6	20...200	6
6 (W/A)	1..10	32.5...325	8
7 (W/A)	1.6..16	50...500	8
8 (W/A)	2.5..25	80...800	8
9 (W/A)	4...40	140...1400	11
10 (W/A)	6...60	200...2000	11
11 (W/A)	10...100	325...3250	11
12 (W/A)	16...160	500...5000	13
13 (W/A)	25...250	800...8000	13

Attention: For versions without valve, operating ranges 12 and 13 come with connection joints 3/8" (Code 42...)

SM-25

Variable Area Flowmeter with Flange Connection, Irrespective of Viscosity

Features

- / For fluids and gases
- / Operating pressures PN16, PN40, PN63, PN100 as standard, higher pressures up to 700 bar on request
- / Operating temperatures up to +370°C
- / Scales for all operational conditions, individually designed
- / Local display, MIN. MAX. contacts or analogue output
- / Measuring tube fully st. steel 1.4404
- / Optionally with PTFE lining

Description:

The SM-25 series of flowmeters operates according to the proven variable area principle. The float is introduced into a conical measuring tube where the medium's viscosity has nearly no effect on the float's movement. The flowing medium moves the float in the direction of flow. The movement of the float is magnetically transferred to a display unit situated outside the measuring tube. The display unit is provided with a scale that is designed to match the operational conditions. Additionally, it can also be equipped with contacts or an analogue output.

Application:

The SM-25 series of variable area flowmeters is intended for measuring and monitoring fluid or gaseous media of any type. Due to the fact that for all wetted parts high quality stainless steel 1.4404 has been used, the device is excellently suited for hostile media as well as for use in the food-processing industry (by using Tri-Clamp or milk tube joints).

How to order:

1. Choose a version
2. Select the desired process connections from the Table „Process connections“
3. Select the operating range as per the Tables „Operating ranges“
4. Select the display component and the desired output signals
5. Determine the required options

1. Versions

Depending on the medium the SM-25 series of flowmeters is available in fully stainless steel 1.4404 (SM-25.1) or with PTFE lining versions for all wetted parts (SM-25.2).

Other materials such as Monel, Hastelloy, tantalum are available on request (SM-25.9).

Technical specifications:

Measurable media /	fluids, steam and gases
Operating ranges /	see tables 3a and 3b
Ratio of op. range /	10 : 1
Accuracy /	
SM-25.1:	Class 1.6 (DN15 - DN100)
SM-25.1:	Class 2.5 (DN125 - DN150)
SM-25.2:	Class 2.5 (DN15 - DN100)
Process connection /	siehe Tabelle „Prozessanschlüsse“
max. Pressure /	see Table „Process connections“ (op. pressures up to 700 bar on request)
Operating temperature /	
SM-25.1:	-180. . .370°C
SM-25.2:	-80. . .130°C
	(Note max. operating temperatures of display unit and possible options)
Materials /	
SM-25.1:	all wetted parts are st. steel 1.4404, (AISI 316 L)
SM-25.2:	all wetted parts are st. steel 1.4404, (AISI 316 L) with PTFE coating
Mounting position /	vertical
Direction of flow /	from bottom
Mounting length /	see Table „Process connections“
Straight inlet /	
DN 15-65:	none
DN 80-100:	min. 5D
Protection class /	IP 66 with stainless steel housing IP 66 with aluminium housing IP 66/67 NEMA 4, 4x, 6 (not available for Ex d housings)

4. Display Unit

Basically, the display unit consists of a stainless steel or aluminium housing with an indicator magnetically coupled to the float. The scale may be designed for units of flow or in percentage. In the display unit, measuring transmitter and contact components can be mounted.

Indicator mechanical /

Media temp.: -25...+110°C (for higher or lower operating temperatures from -80...+370°C order option „Insulation distance“)

Contacts /

Type: inductive proximity switch SC3.5-NO as per DIN EN 60947-5-6 (NAMUR)

Media temp.: -25...+120°C at T_{amb} = +60°C (outside this temperature range order option ‘Insulation distance’)

Nominal voltage: 8 VDC

Output signal: ≤ 1 mA or ≥ 3mA

Explosion prot.: Ex ia IIC T6

Recomm. acc.: isolated switch amplifier Type SE01 (see under “Options”)

Electrical measuring transmitter /

Output signal: 0...20 mA, 4...20 mA

Display: LCD, 8-digit (programmable for display of units of flow or as non-reversible total volume counter)

Auxiliary power: see Table 4d

max. Load: 4-wire: ≤ 500 Ohm
2/3-wire: ≤ (U-14,0 V) / 20 mA, max. 500 Ω

Op. temperature: -25...+70°C (outside this temperature range order option ‘Insulation distance’)

El. connection: M16 x 1,5 or 1/2” NPT

Intrinsically safe Electrical measuring transmitter /

Technical specifications like standard version, except:

Output signal: 4...20 mA

Op. temperature: -25...+70°C (outside this temperature range order option ‘Insulation distance’)

Ex-protection: Ex ia IIC T6 Gb acc. to Ex certificate

Recomm. acc.: feeding device Type SE11 (see under “Options”)

Pulse output: on request

The temperature graphs are reference values for size DN100. They may be influenced negative by trapped heat, external heat sources or radiated heat and influenced positive for smaller sizes. Insulation means rock wool between tube and indicator. Units with electronic transmitter can show the temperature of the internal transmitter on the display. Units with PTFE lining are usable up to 130°C. For units with explosion proof certification the temperature limits according the certificate of conformity must be regarded. The minimum ambient temperature for indicators is -25°C (lower temperatures on request).

5. Options:

5a. Insulation distance (SM-25.A):

For media temperatures outside the values specified under Technical specifications, an insulation distance of 95 mm is created between the measuring tube and display unit. With this the temperature resistance can be increased up to values as specified for the measuring tube.

5b. Attenuation (SM-25.D):

It is recommended to provide attenuation of the float for gas applications under the following conditions:

Float type	Operating pressure \geq
SM-25.D.1:	L 1 bar
SM-25.D.2:	M 5 bar
SM-25.D.3:	S 10 bar

(for SM-25.1 only (stainless steel))

5c. Heating:

Heating elements (steam cover) are meant for maintaining a certain media temperature in the measuring tube. Heating elements with 3 different process connections are available:

SM-25.H.1:	DIN-flange DN15 PN40
SM-25.H.2:	DIN-flange DN25 PN40
SM-25.H.3:	NPT 1/4" female thread

(see also Table 1, „Process connections“)

5d. Oil and grease-free (SM-25.F):

For applications with oxygen the devices free of oil and grease can be supplied.

5e. Tests and certifications

on request

5f. Measuring point labels,

customer-specific scale labeling:

Please specify exact text for labels.

5g. Isolated switching amplifier (Type SE-01):

Version:

as per DIN EN 50227 (NAMUR)

Supply voltage output:

SE-21.1: 230VAC/DC, 1 channel, 1 change-over contact

SE-21.2: 230 VAC/DC, 2 chan., 2 change-over contact

SE-21.3: 24 VDC, 1 channel, 1 change-over contact

SE-21.4: 24 VDC, 2 channel, 2 change-over contact

Switching load:

max. 250 VAC, max. 2A

Control power circuit

intrinsically safe [EEx ia] IIC

5h. Transm. power supply for intrinsically safe operation

(Type SE-11):

Output:

0/4...20 mA, with galvanic

separation of inlet and outlet

Supply voltage:

SE-11.1: 230 VAC

SE-11.2: 24 VAC/DC

max. load:

750 Ohm

Control power circuit:

intrinsically safe [EEx ia] IIC

Dimensions in mm:

SM-25 – Housing Type 0 (st. steel)

SM-25 – Housing Type 2 (aluminium)

SM-30

Variable Area Flowmeters for very low flow rates

Features

/ Indication without power supply

/ For fluids and gases

/ Stainless steel

/ High resistance to pressure
and temperature

/ Compact design, no inlet and
outlet sections

/ Optional: limit switch

Description:

The SM-30 flow meter works according to the proven float principle. The flowing medium moves from bottom to top to lift the float against gravity in a conical metal tube. The height of the float is a measure of the flow and can be read off directly.

Application:

Variable area flowmeters of the SM-30 series are mainly used to measure liquid and gaseous media. Due to their robust design, they are particularly suitable for difficult operating or environmental conditions.

The devices are particularly suitable for measuring small amounts of:

- Process or carrier gases
- Nitrogen, CO₂ or other industrial gases
- Flushing media for measuring systems
- Air or water
- Chemicals and additives
- Lubricants, coolants and anti-corrosion agents

Technical Specification:

Measuring principle /	variable area measuring principle

DT-03

Calorimetric Flow Sensor in Compact Design with Optional Analogue Output

Description:

The sensor system of the DT-03 series flow sensor is based on the calorimetric principle. A heated measuring resistance is mounted into a stainless steel sleeve in such a manner that the fluid carries the heat proportional to the inflow velocity. The heat output that must be fed to the sensor in order to maintain the resistance temperature constant is, therefore, a measure for the volume of flow. A second PT100 measuring resistance is located inside the sleeve within the flow to measure the temperature of the media. This will rule out temperature changes in the streaming fluid being interpreted erroneously as change of flow. The electronic components in the DT-03 receive information from the sensor about the flow and the temperature and convert them into a PNP or NPN switching output, a 0..10 V DC or 4..20 mA analogue output or an impulse output. At the 4-pole output plug of the DT-03 an analogue output and a switching output (on request as impulse output) are tapped that can be freely assigned ex factory to the parameters of volume and temperature.

Application:

The flow sensors of the DT-03 series are the logical consequence of Profimess' proven DT-01 and DT-02. Due to the new method of outputting flow and temperature also as analogue or impulse output and combining both the parameters, the application spectrum of the calorimetric technology has experienced a vast expansion in the technology of fluid measurement. The DT-03 sensors are used wherever flow and temperature of fluid media need to be tapped in narrow spaces and wherever it would be advantageous, due to the type of fluid, to use entirely stainless steel switches for the wetted parts without any moving components. In order to ensure maximum error sensitivity of the sensor, the DT-03 should be mounted for direction of flow from bottom to top as this will facilitate optimum ventilation even in extremely low flow speeds.

Features

- / No moving parts
- / Optionally with temperature output
- / Switch or transmitter
- / Mounting in T pieces of 3/8" to 2"
- / Wetted stainless steel

Technical Specifications:

Operating range velocity /	water 2...150 cm/s or 3...300 cm/s, oil on request
Accuracy /	± 10% set point value (tested on water with 10xD in inflow and outflow in rising tube)
Reproducibility /	± 1%
Switching hysteresis /	flow 4% set point, temp. approx. 2°C
Temperature gradient /	max. 4°C/s or rather 4 Kelvin/s
Op. range temp. /	0...70°C, 0...120°C with gooseneck
Storage temperature /	-20...+80°C
Materials /	wetted st. steel 1.4571, others 1.4305
Operating pressure /	max. 100 bar, 200 bar on request (if necessary, consider pressure level of T-piece)
Operating temp. /	0...70°C (electronics)
Weight /	approx. 200 g (standard version)
Assembly /	staved cross points to inflow
Programming the setpoints /	by means of magnet supplied along, the magnet is brought between 0.5 and 2 seconds to the marking on the label. The excrement measuring value is stored as limit value, the LED changes to O.K. status. Longer or shorter magnetizing times than 0.5 or 2 seconds are ineffective (protection against external magnetic fields)

Electrical Specifications:

Power supply /	24 VDC ± 10%
Power consumption /	max. 100 mA
Connection /	round pin connector M12 x 1, 4-pole
Switching output /	Transistor output Push Pull, line short circuit and reverse polarity protected
Switching current /	max. 100 mA
As frequency output /	max. 2000 Hz
Analogue output /	4...20 mA max. load 500 Ohm or 0...10 VDC
Display /	yellow LED (ON = o.k., OFF = Alarm)
Setting /	through magnet
Protection class /	IP67

Dimensions in mm:

DT-06

Calorimetric Air Flow Switch

Features

- / Titanium sensor surface
- / No moving parts
- / Simple assembly
- / DC- and AC version available
- / Protection class IP 65
- / Relay output
- / LED function display
- / Cost-effective

Description:

Electronic flow switches operate on the basis of the calorimetric principle. They use the physical effect that a flowing medium absorbs heat and conducts it away. The sensor tip contains two temperature-dependent resistors as well as a heat source. The heat source generates a local temperature rise in the medium which is detected by one of the PTCs. When the medium flows, energy is conducted away from the heat source, i.e. it is cooled. The resulting temperature change is an indication of flow. To avoid a falsification of the result of the measurement by change of the medium temperature, a second PTC is used for temperature compensation. The difference in resistance of both PTCs is used for a temperature compensated statement by the electronic evaluation system „Medium flows“ or „medium does not flow“ as compared with a predefined set-point or limiting value.

Application:

The DT-06 series is intended for cost-effectively detecting and signalling of changing air flow within specified limits, it can be mainly used for monitoring air conditioners as well as ventilation systems. Typical applications are Function control of blowers and fans, Filter condition monitoring, Flap position monitoring for air distribution

Technical Specifications:

Operating range /	100...1000 cm/s
Greatest sensitivity /	100...400 cm/s
Switch point adjustment /	potentiometer
Power-on delay time /	60 s
Response time /	3...60 s

SM-00

Impeller Flowmeter for Small Volumes of Fluid

Description:

The SM-00 is a universally applicable flowmeter for small to medium volumes of thin fluid. A rotor mounted on one side on a bearing pin is made to rotate by a flow obliquely directed through a nozzle where the rotor's blades are equipped with magnets. A Hall effect sensor mounted externally on the flow housing emits a small voltage impulse every time when one of the magnets passes by its front side. The electronics of the SM-00 are capable of receiving these impulses and translating them into an NPN Open-Collector rectangular signal that will be made available to the plug output.

Features

/ Arnite, Larton® G/40 or PVDF

/ Up to 100°C

/ Up to 20 bar

/ Wide choice of operating range

/ Excellent media resistance

Application:

The SM-00 is the ideal device especially for tapping small volumes of flow of chemically hostile fluids. The available material combinations are Arnite, Larton® G/40 and PVDF which can be deployed in many areas of the chemical industry. With its range of up to 100°C and 20 bar, for a plastic device the limits in regard to pressure and temperature are very outstretched and the Open-Collector signal in NPN form can be evaluated by any common control device. The available connection threads are G1/4" female thread as well as G1/2" male thread where the user has the option to place both the inlet and the outlet of flow on a single side of the SM-00 or, to have, preferably, one connection on the right side and another on the left side of the flowmeter.

The unique impeller bearing of the SM-00 ensures a long life for the SM-00. As against many other devices available in the market, the rotor is not mounted on both sides but it practically „floats“ during operation over a one-sided bearing pin. Thus, the design of the device ensures durability and, consequently, maximum possible rotational speed of the impeller.

Technical Specifications:

Material /	
SM-00.1:	Housing made of PBT 35%GF (Arnite) bearing pin made of stainless steel 1.4305 (1.4571 optional) O-Ring made of silicon (Viton or EPDM optional) rotor made of PVDF magnets made of ceramic Sr Fe O
SM-00.2:	Housing made of PPS 40%GF (Larton® G/40) bearing pin made of stainless steel 1.4305 (1.4571 optional) O-Ring made of silicon (Viton or EPDM optional) rotor made of PVDF magnets made of ceramic Sr Fe O
SM-00.3.1:	Housing made of PVDF Bearing pin made of st. steel 1.4305 (1.4571 or PCTFE (nozzle PTFE) optional) O-Ring made of Viton (EPDM optional) Rotor made of PVDF Magnets made of ceramic Sr Fe O
SM-00.3.(2. . .3):	Housing made of PVDF Bearing pin made of PCTFE O-Ring made of Viton (EPDM optional) Rotor made of PVDF magnets made of ceramic Sr Fe O (not wetted)
Flow volume /	depends on the version and nozzle, see Tables 1 and 2
Accuracy /	± 2% of MV
Reproducibility /	< ± 0.25%
Temperature range /	
SM-00.1:	-10. . .+65°C
SM-00.2:	-10. . .+100°C
SM-00.3:	-10. . .+100°C
Pressure /	max. 20 bar at 20°C
Mounting position /	horizontal pos. recommended
Nozzle sizes /	see Tables 1 and 2
Process connection /	G1/4" female on one side or G1/4"male on both sides (left/right), or G1/2"male on both sides (for large operating ranges only)

Electrical Specifications:

Supply voltage /	4,5. . .24 VDC
Power consumption /	5. . .13 mA
Output /	rectangular impulse NPN open collector
Signal load /	20 mA max.
Current leakage /	10 µA max.
El. connection /	3Pin -AMP 2.8 x 0.8 mm (counter-plug available as accessory)
Duty Cycle /	50% ± 5%

4 = Bearing pin in st. steel 1.4571 instead of 1.4305 for versions in Arnite and Larton® G/40					
5 = Bearing pin in st. steel 1.4571 instead of 1.4305 for versions in PVDF with one-sided thread					
6 = Bearing pin in PCTFE instead of st. steel 1.4305 for versions in PVDF with one-sided thread					

Versions:

Material version: The basic body of the SM-00 can be made of materials such as Arnite, Larton® G/40 or PVDF where the Arnite and Larton versions are intended for standard applications while the PVDF version has been developed for applications in the chemical industry.

Connections: The available thread connections are G1/4" female thread and G1/2" male thread which allow the user to decide placing both the flow inlet and outlet on the same side of the SM-00 or, preferably, one connection on the right side and another on the left side of the flowmeter. The possible operating ranges vary with different versions as detailed in the Tables 1 and 2.

Nozzle size: The nozzle at the inlet of the SM-00 enables an oblique direction flow within the body of the SM-00 and is largely responsible for the dynamic functioning of the flowmeter and, therefore, for the length and position of the linear operating range. The relationship between the nozzle size and operating range is detailed in the Tables 1 and 2. The operating ranges given in these tables indicate the linear range of the relevant version. The specified pressure drop occurs when the full scale value of the measuring range is reached.

Options: The bearing pin in the Arnite and Larton® G/40 versions of the SM-00 is made of stainless steel 1.4305 as a standard and the sealing ring is made of silicon. If the medium in question has special requirements in regard to the material, the bearing pin can be also supplied in stainless steel 1.4571 and the O-Ring in Viton or EPDM. The PDVF version of the SM-00 is used, especially when the requirements of strength on the flowmeter are very high. In the case of the variant with thread connection, the bearing pin is made of stainless steel 1.4305 on the one side and, in those with thread connections on both sides it is made of PCTFE. Optionally, the stainless steel pin in the one-sided version can also be replaced by a PCTFE pin. In this „chemical“ version, the impeller magnets are fully infused and hence not wetted.

Electrical Connection

All given values are average and have been measured for water at room-temperature and horizontal position.
The actual values differ, depending on the application, by an accuracy of $\pm 2\%$ of MV.

Impeller Flowmeter, Switch and Indicator in Modular Design

Features

- / Robust and compact flow sensor
- / Variety of materials
- / Location-independent
- / Operating range ratios up to 40:1
- / No inflow outflow lines required
- / Different measuring transmitters can be mounted directly or are available for DIN rail mounting

Description:

The SM-04 series of impeller flowmeters consists of a sensor and an optionally available measuring transmitter. The sensor has an impeller that is fitted in a housing made of PPS, brass or stainless steel. The impeller is set into rotation by the streaming medium. Depending on the material version, this rotational movement is tapped by an inductive, optical or Hall sensor-system and output as a frequency signal which is proportional to the flow. For the evaluation of the signal, different types of measuring transmitters are available which can amplify, convert or display the impulse signal from the sensor.

Application:

Due to their modular design, the SM-04 series of impeller flowmeters represents a versatile measuring and monitoring system for all low-viscosity fluids that do not corrode the materials being used.

Technical Specs - Sensor:

max. Pressure /

SM-04.1:	16 bar
SM-04.3/4:	100 bar

max. Temperature /

SM-04.1:	0...+60°C
SM-04.3/4:	0...+100°C

Accuracy / ± 3 % of MV

Reproducibility / ± 1 % of FSV

Electrical Specs - Sensor:

Supply voltage /

PNP/NPN:	10...30 V DC
NAMUR:	7...12 V DC

Power consumption /

Inductive:	10 mA
NAMUR:	7 mA
Hall Sensor:	30 mA

Output current max. /

Inductive:	200 mA
NAMUR:	7 mA
Hall Sensor:	100 mA

Output circuit / PNP, NPN or NAMUR

Short-circuit proof / yes

Polarity-reversal proof / yes

El. connection / 2 m cable or plug connection

Protection class / IP 67

Electrical Specs - Display:

Supply voltage / 18...30 VDC

Power consumption / < 1 W

Output signal / 0/4...20 mA max. load 500 Ω
(or 0/2...10 VDC, min. 1 Ω on request)

Switching outputs / 2 x transistor outputs „Push-Pull“safe against short-circuit and pole-reversal) max. I_{out} = 100 mA

Hysteresis / adjustable, direction of hysteresis depends on MIN and MAX

Technical Specs - Display:

Display / graphical LCD-display 32x16 pixels, backlight, indicates measuring value and unit

LED-indicator / flashes simultaneously with displayed message

Media temp. /

SM-04.1:	0...+60°C
SM-04.3/4:	0...+70°C (0...+100°C with optional gooseneck)

El. connection / for round plug connector M12x1, 5-pole

Protection class / IP 67 (IP 68 when oil-filled)

Materials /

Clamps:	stainless steel (1.4301)
Housing:	stainless steel (1.4305)
Adapter:	CW614N nickel-plated
Glas:	mineralglas hardened
Magnet:	samarium-cobalt
Ring:	POM

El. Specs - Analogue Output:

Output current / 4...20 mA at 10...30 VDC

Output voltage / 0...10 V at 15...30 VDC max. 20 mA

El. Connection Sensor:

Connection example: PNP NPN Optional: NAMUR

Plug connection M12x1

Wetted Parts - Sensor:

Type	SM-04.1	SM-04.3	SM-04.4
Housing	PPS (Fortron 1140L4)	brass (CW614N nickel-plated)	stainless steel (1.4305)
Cover	PPS (Fortron 1140L4) (opt. PPS)	brass (CW614N nickel-plated)	stainless steel (1.4305)
Connection	PVDF (opt. stainless steel (1.4305) or CW614N nickel-plated)	brass (CW614N nickel-plated)	stainless steel (1.4305)
Rotor	PVDF with 10 clamps (opt. 2 or 5 clamps)	PVDF with 5 magnets, glued with epoxy resin (opt. 2 magnets)	PVDF with 5 magnets, glued with epoxy resin (opt. 2 magnets)
Clamps	stainless steel (1.4310) (opt. titanium or Hastelloy ®)	-	-
Bearing	Iglidur X	Iglidur X	Iglidur X
Axis	ceramic (ZrO ₂ -TZP)	Keramik (ZrO ₂ -TZP)	Keramik (ZrO ₂ -TZP)
Sealing	FKM (opt. EPDM or NBR)	FKM (opt. EPDM, NBR or Kemraz)	FKM (opt. EPDM, NBR or Kemraz)

Materials for not wetted parts:

PVC-cable, st. steel (1.4305, 1.4301) and
CW614N nickel-plated

SM-04 Flow Sensor with Impeller

Version /

- 1 = with PPS housing, inductive pickup
- 3 = with brass housing, Hall sensor
- 4 = with stainless steel housing, Hall sensor

Size of housing /

- 1 = 50 x 50 mm, for 3/8" tube
- 2 = 70 x 70 mm, for 1" tube

Process connection /

- 1 = female thread G
- 2 = male thread G
- 3 = hose spout
- 9 = other connection, please specify in detailed text

Operating ranges /(applicable for water 25°C):

- SM-04.x.1 only:
- 1 = 0.1 .. 1.5 l/min (0.1 .. 0.5 l/min linearized)
 - 2 = 0.2 .. 10 l/min (0.2 .. 2 l/min linearized)
 - 3 = 0.4 .. 12 l/min (0.4 .. 2 l/min linearized)
- SM-04.x.2 only:
- 4 = 2 .. 30 l/min (2 .. 3 l/min linearized)
 - 5 = 3 .. 60 l/min (3 .. 5 l/min linearized)
 - 6 = 4 .. 100 l/min (4 .. 6 l/min linearized)

Electrical connection /

- 1 = 2 m cable (standard)
- 2 = plug connection M12x1

Output circuit /

- 1 = PNP impulses
- 2 = NPN impulses
- 3 = NAMUR (SM-04.1 only)
- 4 = mounted frequency receiver with a setpoint
- 5 = mounted frequency receiver with power output 4 .. 20 mA, 3-wire
- 5a = mounted frequency receiver with voltage output 0 .. 10V
- 6 = digital mounted transmitter with 2 transistor switching outputs, display and analogue output 4 .. 20mA, 3-wire (0 .. 10 VDC on request)

Options /

- 0 = none
- 1 = with transparent cover PSU (SM-04.1 only)

SD-04

Impeller Flowmeter with Dosing or Switching Electronics

Features

- / Nominal diameters DN06 to DN50
- / Pressure-proof up to 16 bar
- / DC- or AC power supply
- / Variety of materials
- / Flanges and connections for food-processing applications
- / Available as NAMUR transmitter for ATEX zone 0 or 20 on request

Description:

An impeller made of PVDF is set into motion by a flowing medium. It generates through completely compound-filled magnets an impulse signal in the transmitter electronics proportional to the flow. Depending on the version the measuring transmitter, this signal is converted into different functions. In the simplest version, the complete unit is battery powered and displays the current flow rate and additionally two resettable counters. The next level has a 4...20 mA signal and a pulse output, which is designed as a transistor output, and, in addition, two resettable totalizers that can be used as the main and day counters. Naturally, also the current flow rate can be displayed and furthermore two additional relay outputs are available, if switchpoints are necessary. The full version of SD-04 includes a dosing device with 2 totalizers, 2 relays and 3 dosing modes. The dosing volume can be set through a keypad, binary inputs or pulse-modulated through a PLC. The dosing device is capable of determining the K factor of other flow sensors by means of „Teach-in“ or, in the same way, to enhance (litre-wise) the accuracy of the inbuilt own sensor. Moreover, for testing the system a flow can be simulated in a „dry“ run, thereby meeting the highest requirements of modern dosing technology. The sensor and electronics are connected to each other through a simple bayonet lock; therefore, the electronics are easily interchangeable. Pick-up sensors and transmitter variants can be interchanged in any manner.

Application:

Thanks to the variety of materials and connectivity in the flow pick-up sensor in the SD-04, the user has immense possibilities of application. Polypropylenes, PVDF and PVC offer a choice of synthetic materials that are resistant to nearly all hostile media and, materials such as brass and stainless steel logically supplement the choice favoring metals. All commonly used thread variants, DIN and ANSI flanges in stainless steel and Tri-Clamp supports and welded ends are available as connectors and thus enable coupling the SD-04 to nearly any process. The nominal diameter ranges from DN06 to DN50 and covers, therefore, a wide range of flows.

Technical Specifications:

Nominal diameter /	DN06 to DN50
Operating range /	0.5 ..1200 l/min
Flow velocity /	0,3 ..10 m/s (hall transducer version) 0,5 ..10 m/s (batterie version - coil transducer)

Accuracy /

Teach-In:	± 1% of measured value
Standard K-Factor:	+ 2.5% of measured value (at 10 m/s)

Linearity / ± 0.5% of F.S. (at 10 m/s)

Repeatability / ± 0.4% MW

Viscosity & Pollution / clean, neutral or aggressive fluids
max. 300 cSt / 1% max.
(particle size: 0.5 mm max.)

Media temperature /

PVC:	0 ..+50°C
PP:	0 ..+80°C
PVDF, brass, st. steel:	-15 ..+100°C (high temperature on request)

Operating and storage temperature of sensor housing /

PVC:	-15 ..+60°C
PP:	-15 ..+80°C
VA, Ms, PVDF:	-15 ..+100°C

Rel. humidity / ≤ 80%, non-condensed

max. Pressure Fitting /

Plastic:	10 bar up to 20°C (see P-T diagram)
Metal:	16 bar (40 bar on request)

Materials Fitting /

Seal:	FKM (EPDM)
Housing:	PVC, PP, PVDF, brass (CuZn ₃₉ Pb ₂) stainless steel (316L - 1.4404)
Screws:	stainless steel (316L - 1.4404)
Impeller:	PVDF (PP or stainless steel on request)
Axis and bearing:	ceramics (Al ₂ O ₃)

Materials Electronics /

Housing, cover, lid, nut:	PC
Front film:	polyester
Screws:	stainless steel
Cable, plug or glands:	PA

Wetted parts /	fitting, impeller, axis, bearing and seal
Display /	15 x 60 mm, 8-digit LCD, alpha-numeric, 15 segments, 9 mm high
Norm /	2014/68/EU
Certificate /	EN-ISO 10204 DIN 4762 DIN 4768 ISO/4287/1

Impeller sensors ensure reliable operation in the range of 0.3 to 10 m/s flow velocity which means that their accuracy of 0.5% from one end of the range plus 2.5% of the measured volume is available for a range of 1:33. In dosing technology, especially the SD-04 has hardly any match, considering its variety in respect to volume specifications, resistance to different media and, not the least, its excellent price to performance ratio.

Nominal Diameter Options:

--- not recommended
* choose a pipe size DN40 [or DN50 for any * marked fitting] for the following fittings with process connector:
External Thread SMS 1145
Weld-on end SMS 3008, BS4825-1/ASME BPE/DIN 11866 Line C or DIN 11850 Line 2/DIN 11866 Line A/DIN EN 10357 Line A
Clamp SMS 3017, BS 4825-3/ASME BPE or DIN 32676 Line A

Electrical Specifications:

Dosing unit /

Supply voltage:	12...36 VDC \pm 10%, filtered and controlled, SELV circuit with non-dangerous energy-level, or 115 / 230 VAC 50/60 Hz
Cable:	50 m max., shielded, 1.5 mm ² max.
Cable gland:	M20 x 1.5 or plug EN 175301-803
Reverse polarity protection DC:	yes
Current consumption:	\leq 100 mA at 12 VDC - with relay \leq 50 mA at 36 VDC - with relay \leq 55 mA at 115/230 VAC - with relay (without consumption of digital input and pulse output)
4 digital inputs:	switching threshold Von: 5 to 36 VDC switching threshold Voff: 2 VDC max. input impedance: 9.4 k Ω galvanic insulation, protected against polarity reversals and voltage spikes functions selections of dosing volume and Start/Stop actuation

Transistor output /

2x NPN or PNP, potential free;
default for output 1: pulse output
default for output 2: batch state
configurable and parameterizable 0.6-2200 Hz, 5-36 VDC, 100 mA max. line drop 2.7 VDC at 100 mA
duty cycle:
> 0.45 if 0.6 < frequency < 300 Hz
> 0.4 if 300 < frequency < 1500 Hz
< 0.4 if 1500 < frequency < 2200 Hz
galvanic insulation, protected against overvoltage, polarity reversals and short circuits

Relay output /

2 relays (currentless open), parameterizable

Switching load:	230 VAC, 3 A, or 40 VDC, 3 A (ohmic load) max. switching capacity 750 VA (ohmic load)

SD-05

Plastic Impeller Flowmeter

Features

- / DN25 to DN50
- / 5 to 1000 l/min in four operating ranges
- / Wetted parts out of PP, ECTFE, ceramic and Viton
- / 4 to 20 mA or pulse output
- / Optionally with switching contacts
- / Intended for operating pressures up to 10 bar

Description:

The SD-05 impeller flowmeter measures thin fluids according to the impeller wheel principle. An impeller wheel made of ECTFE that holds moulded magnetic pins on its five vanes projects into a polypropylene fitting. Since less flow velocity is present at the edge of the pipe than in the centre a torque causes the rotor to rotate proportionally to the flow on the axis made of ceramic. An externally mounted electronic element records the rotating speed of the impeller by means of a Hall effect sensor that emits a voltage impulse whenever a magnet crosses it and, through an amplifier, produces an NPN impulse signal at the PINs of connector. In the version with 2-wire output the impulse signal is readily converted internally into a power signal. In contrast to this, in the case of the 3-wire version, as also in a variant with impulse output and two additional threshold value relays, an SD-05 equipped with a "normal" impulse output can be easily converted into a flowmeter with 3-wire power output or one with a Push-Pull impulse output and threshold value relay by replacing the mating plug.

Application:

The most significant characteristic of flowmeters in the SD-05 series is that the materials used are plastics and, therefore, even the most hostile fluids do not pose any problems. This device offers particularly a dependable solution for deploying it in fully desalinated water where metallic components are often ruled out. The measuring range of all the four available nominal diameters of SD-05 scales at 1:50 which means that minimum 5 and maximum 1000 litres per minute can be recorded. By virtue of its design the SD-05 causes only a negligible pressure drop within the piping system and is, therefore, a cost-effective alternative for measuring low-viscous fluids.

Electrical Specifications:

Pulse output (SD-05.xx.x.x.IM) /

Function:	NPN-open-collector
Supply voltage:	4.5 . .24 VDC
Current:	max. 15 mA at 24 VDC
El. connection:	plug connector as per EN 175301-803A (cubical-shaped)
Protection class:	IP65

Analogue output 2-wire (SD-05.xx.x.x.A2) /

Supply voltage:	15 . .24 VDC
Current:	4 . .20 mA, 2-wire
Damping:	factory adjustable in steps of one second
El. connection:	plug connector as per EN 175301-803A (cubical-shaped)
Protection class:	IP65
Ambient temp. at the plug:	max. +55°C

Analogue output 3-wire (SD-05.xx.x.x.A3) /

Supply voltage:	15 . .24 VDC
Current:	10 . .40 mA
Damping:	factory adjustable in steps of one second
El. connection:	plug connector as per EN 175301-803A (cubical-shaped)
Protection class:	IP65
Ambient temp. at plug connector:	max. +55°C
Mounting:	The electronic modul is easily plugged between the plug connector and the mating plug of the SD-05 and transforms the pulse output into an analogue output. The correlation between analogue output and operating range is adjusted with a REED switch at the plug connector. This electronic modul can be field upgraded at any time.

Pulse output Push-Pull and two additional threshold value relays (SD-05.xx.x.x.FK) /

Supply voltage:	4.5 . .24 VDC
Current:	10 . .220 mA
Outputs:	1 x complementary final stage (11 mA, 24 VDC), 2 x semiconductor relays (0.1 A/24 VDC)
Damping:	factory adjustable in steps of one second

El. connection: plug connector as per EN 175301-803A (cubical-shaped) with one meter cable

Protection class: IP65

Ambient temp. at plug connector: max. +55°C

Mounting: The electronic module can be easily connected between the plug connector and the mating plug of the SD-05, transforming the pulse output into a push-pull pulse signal (suitable for PNP and NPN inputs). It also sets two limit switches on the semiconductor relay available. The measuring and limits are set via a REED switch on the connector. This model can be retrofitted on existing installations.

Technical Specifications:

Measuring principle /	rotating vane
Sensing system /	Hall effect, non-contacting
Operating ranges /	5 . .250 l/min, DN25 10 . .400 l/min, DN32 15 . .600 l/min, DN40 20 . .1000 l/min, DN50 at 0.15 . .10 m/s and 42 Hz per m/s
Accuracy /	± 3% on calibrated range
Repeatability /	< 1% on calibrated range
Operating pressure /	10 bar max. (at +22°C)
Burst pressure /	>15 bar (at +22°C)
Operating temperature /	0 . .+80°C
Viscosity range /	0.5 . .20 cSt
Housing material /	Polypropylene
Rotor /	5 blade rotor from ECTFE with encapsulated magnets
Axis/Bearing /	ceramic Al ₂ O ₃
O-Ring /	FKM (optionally EPDM)

DN40 / G1 1/2"	120	125	40	80	75
DN50 / G2"	125	135	50	89	75

Impulse characteristic curve:

Calculation formula for the frequency determination of the flowmeter:

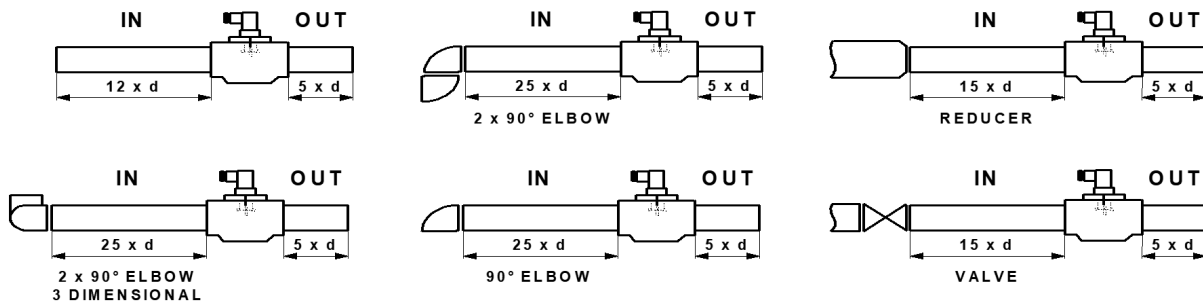

$$\text{Frequency [Hz]} = 42 \times \text{Flow [m/sec]}$$

Example for Frequency determination:

$$500\text{l/min at DN 50} \rightarrow \text{Frequency} = 42 \times 4.9 \text{ [m/sec]} = 205.8 \text{ Hz}$$

Installation Instructions:

Different types of piping and flow obstacles such as fittings, fittings, dirt traps, etc. cause different sized interference profiles whose smoothing is determined in line (pipe) lengths according to DIN 1952. In order to ensure optimum function, the installation should be made according to DIN 1952 as far as possible.

SM-08

Miniature Turbine Flowmeter for Fluid Media

Features

**/ High accuracy of measurement
and resolution**

/ Low deviation in mass-production

/ Plastic, brass or st. steel designs

/ Pressure-proof up to 300 bar

/ High temperature resistance

/ Convenient dim. for assembly

/ Affordable low-cost alternative

Description:

The SM-08 series of flowmeters operates according to the principle of a turbine wheel. In this the fluid flows into the turbine body and gets deflected by the guide blades at an angle of 90°. The resulting tangential flow sets a rotor into a rotation that is proportional to the flow. Depending on the device version, this rotational movement is converted into an output frequency by means of an inductive proximity sensor or a Hall sensor. A main feature of the turbine flowmeter SM-08 is that the deviation in mass-production is very low compared to other similar designs. Consequently, individual tuning for each turbine to match the particular downstream electronic unit becomes unnecessary; the SM-08 is thus ideally suited for use in series applications.

Application:

Due to their compact design, wide range of measurement and highly accurate measuring, the SM-08 series of turbine flowmeters is suitable for applications in the following areas:

- Cooling water measurement
- Medical engineering
- Plastics industry
- Solar installations
- Machine tools
- Photo laboratories
- Tapping and dosing installations
- Cooling and heating applications
- Heat volume logging
- and many more...

Measuring principle & Dimensions:

SM-08.15:
Op. range 2 . . 20 (2 . . 40) l/min
Axial turbine flowmeter
with guide blades

The fluid flowing into the flowmeter gets divided by the guide blades into four partial jets which strike the rotor from four directions and set it into rotation. Due to the uniform load on the bearing from four sides, the forces become largely neutralized and the wear is reduced to a minimum. In addition, extremely hard bearing material such as sapphire and carbide metal ensure extraordinary long life span.

SM-08.25:
Op. range 4 . . 80 (4 . . 160) l/min
Axial turbine flowmeter

The fluid streaming into the flowmeter sets the turbine wheel into rotation. Due to the high-quality sapphire bearing and low RPM, the turbine has an extraordinarily long life span. The rotor RPM is converted into an electrical pulse signal (frequency).

SM-08.40:
Op. range 0.4 . . 25 m³/h
Axial turbine flowmeter
with partial stream evaluation

In the center of the brass-made turbine body a plastic turbine system is situated. An annular gap is designed around the turbine system. Part of the fluid stream sets the turbine into rotation while the other part of the stream is allowed to pass through the annular gap without obstruction. The rotor RPM is then converted into an electrical pulse signal (frequency). Due to high-quality sapphire bearing and low RPM, the turbine has an extraordinarily long life span.

Accessory – SM-08:

Type	Description
SM-08.Z.L3	connecting cord for turbine-flow-sensors with tipped coupling M12 x 1, 4-Pin, shielded, L = 3 m T _{max.} = 70°C
SM-08.Z.L5	as above, however L = 5 m
SM-08.Z.L10	as above, however L = 10 m
SM-08.Z.S	coupling box M12 x 1, 4-Pin, for self-customization

Limit Value Emitter (optional) SM-08. . .VE(P)

Description: The SM-08 can be transformed into a flowswitch with the help of an optional limit value emitter. The turbine delivers a flow-proportional frequency signal to a microprocessor. This monitors the set minimum flow and activates the alarm contact without potential, if the flow falls short. Even a likely blockage in the turbine is reliably identified and signaled. Besides the switching output (contact), optionally, an impulse signal is available, so in addition to the safe monitoring, a continuous or temporary flow measurement can also be performed.

Areas of application: Monitoring of cooling circuits in high-end equipment such as laser installations, HF generators etc.

Switch position	Setpoint in l/min

 - Housing:** PA transparent

Electrical Connection:

Measuring Transmitter (optional) SM-08. . .Ax

All SM-08 series of turbine flowmeters can be equipped with an integrated F/I measuring transmitter. With this they transmit an analogue signal output of 4. . .20mA instead of the im-pulse output.

Technical Specifications:

Ouput /	4. . .20mA, power limiting at ~26mA
Scaling /	as per Ordering codes SM-08.15, SM-08.25, SM-08.40. other scaling on request
Supply voltage /	18. . .30VDC
max. Power /	30 mA
max. Load /	250 Ohm to GND
El. connection /	4-Pin plug, M12 x 1
max. Media temp. /	80°C
Residual ripple /	0.2 mA _{SS} over the entire range
Type /	3-wire, galvanically not separated
Casing material /	PA
Protection class /	IP54

SM-11N

Stainless Steel Turbine Flowmeter

Features

- / Accuracy at $\pm 0.5\%$ of measured value
- / Operating ranges up to 550 m³/h
- / Suitable for plug-in display SD-01
- / Up to 400 bar
- / Carbide metal or PTFE bearings
- / Flange or tube connection

Description:

The turbine wheel of the flow meter SM-11N is positioned concentrically on both sides and it rotates inside the housing proportionally to the mean flow velocity. An inductive Pick-Up screw-mounted on the housing wall deflects the turbine wheel's rotational movement and outputs a sinus-shaped power signal to the amplifier below the plug connector which in turn generates a square-shaped impulse signal in the PNP 3-wire circuit. Optionally, the bearings for the SM-11N can be made of PTFE or carbide metal, while all other wetted parts are made of stainless steel. This allows the SM-11N to conveniently measure a wide range of low viscosity fluids.

Application:

The turbine flow meter SM-11N is used if flow volumes of low viscosity fluids need to be measured highly accurately. The permissible temperature range up to 120°C and pressure levels up to 400 bar make the device capable of handling a wide range of applications covering the entire industry. Depending on the process, the user can opt for a tube or flange connector. At the output of SM-11N a PNP transistor impulse signal is available which is compatible with most downstream evaluation devices and, if required, can be easily converted into a 4...20 mA or 0...10 V DC analogue output. Moreover, the Profimess plug-in display SD-01, can be mounted directly between the plug and the cable box of the SM-11N and does not require additional power supply, offering an excellent way to visualize the measured value.

Technical Specifications:

Accuracy /	see table „Bearing types“
Mounting position /	horizontal $\pm 5^\circ$
Housing material /	stainless steel 1.4541
Flange material /	steel 1.0566 or stainless steel 1.4541
Bearing material /	PTFE or carbide metal
Pressure /	see table for connector types
Media temperature /	-20°C to +120°C for steel flange connection -30°C to +120°C for stainless steel flange connection or tube connection
Ambient temp. /	-20°C to +60°C for steel flange connection -30°C to +60°C for stainless steel flange connection or tube connection
Required inlet section /	10 x pipe diameter to achieve the specified accuracy
Required outlet section /	5 x pipe diameter to achieve the specified accuracy

SM-16

Turbine Flowmeter for Fluid Media without Auxiliary Power Supply

Features

- / Counter and/or flowmeter versions
- / Local 6-digit LCD display
- / Battery-operated, replaceable
- / Aluminium, nylon or st. steel versions
- / Operating ranges up to 1135 l/min
- / Convenient dimensions for assembly
- / ATEX II 1G Ex ia IIC T6

Description:

The SM-16 series of turbine flowmeters consists of an interchangeable turbine which is built into a flow housing made of nylon, aluminium or stainless steel and a local evaluator and display electronic unit. This functions as a total and a partial volume counter and as a flowmeter. The turbine wheel is set into rotation by the streaming medium. The ferrites embedded into the turbine blades are scanned through an inductive pick-up system. The sequence of impulses generated thus is proportional to the flow and is displayed by means of a microprocessor controlled electronic unit.

Application:

Due to the interchangeable battery the devices do not depend on external power supply and, therefore, they can be deployed without extensive cabling wherever flow volumes need to be accurately measured or counted locally. The integrated microprocessor allows on-the-spot calibration with the result that accuracy is increased or the device can be adjusted, apart from water, for even highly viscous media.

Technical Specifications:

Medium /	low-viscosity (higher viscosities with on-the-spot calibration)
Process connection /	1/2" ISO female thread (only operating range 14) 3/4" ISO female thread (only operating range 11, 12, 16) 1" ISO female thread (only operating range 15) 1 1/2" ISO female thread (only operating range 17) 2" ISO female thread (only operating range 13, 18)
max. Temperature /	-18...+60 °C
max. Pressure /	
Al-housing:	20 bar
Nylon-housing:	10 bar
St. steel-housing:	100 bar - A high pressure version up to 200 bar for the st. steel housing is available on request.
Supply /	2x lithium battery, approx. lbattery life: 5 years
Display /	LCD, 6-digit automatic On and Off switching
Accuracy /	only applies to low-viscosity liquids:
Range 11:	bis ± 5% ***
Range 12,13,14:	± 1.5%
Range 15,16:	± 1.0%
Range 17,18:	± 0.75% (± 1.0% possible with on-site calibration)
*** Accuracy can vary up to ± 5% depending on installation and fluid type. Field calibration is recommended for best accuracy.	
Protection class /	IP 44

Special Versions /

For the operating range 10...100 l/min, a low-cost version of the SM-16 for petrol, diesel and kerosene in aluminium or another version for water in nylon that operates with accuracy of 5 % and up to 20 bar for aluminium housing, 10 bar for nylon housing pressure is available (without ATEX approval). The max. operation temperature is from -10...+54°C. These versions function purely as flow counters.

PF-222

Portable Ultrasonic Liquid Flowmeter according to Transit-Time Difference Method

Description:

The portable ultrasonic liquid flow meters of the PF series measure the flow in a closed pipe according to the cross correlation method without the need for any mechanical parts to be inserted through the pipe wall. Two ultrasonic transducers are mounted to the pipe with a fastening rail. In the course of commissioning, individual data of the measuring point, like for example the medium, pipe material, pipe diameter, wall thickness etc., is entered into the transmitter. The ideal separation distance of the two transducers is then calculated by the transmitter in response to the entered data concerning the pipe and fluid characteristics. In the measuring mode the transducers work alternating as emitter and receiver. The transit time of the ultrasound between the transducers is measured once in flow direction and once against the flow direction. Because the ultrasound transmitted in the same direction as the liquid flows is faster than against it, a time difference which is directly proportional to the flow velocity of the liquid and independent of the individual features of the fluid results. The PF-222 is capable to transmit the recorded flow data as analog output or pulse output and also in alphanumeric text on the built-in LCD backlit graphic display as flow rate or velocity together with totalized values. The internal battery of the PF-222 allows up to 14 hours of operating time, depending on the output utilisation and backlight usage. The PF-222 is delivered either with transducers A for pipe sizes 13 mm to 115 mm or with transducers B for pipe sizes 50 mm to 1000 mm.

NEW: The PF-222 can now be operated with both sensor pairs A/B.

Application:

- Building services
- Pump verification
- Leak detection
- Fuel oil measurement
- Filter sizing and inspection
- Ultrapure water
- Hydraulik system testing
- Heavy fuel oil
- Balancing systems
- and much more...

Features

- / Measurement through the pipe
- / Non-contacting
- / Easy to install
- / For pipes up to 1000 mm
- / Operating temp. up to 135°C
- / Reynoldsnumber correction
- / Cost effective
- / Ideally suited for difficult media

Dimensions in mm:

Technical Specifications:

Equipment
PF-222.A / evaluation unit with backlit graphic display
 0/4...20 mA-output
 language options:
 German, English, French, Spanish
 transducers A or
 pipe outer diameter 13...115 mm
 temperature range -20...+135°C
 extra strong IP67 carrying case from
 PP foam inlay and double walls, cable,
 instruction manual, ancillary equipment
 transducer guide rails with all mounting
 hardware
 test piece for confirmation of correct
 system operation

The version PF-222.B contains the following:

transducers B for pipe outer diameter 50...1000 mm
temperature range -20...+135°C

instead of the transducers A. The rest of the equipment is identical.

The PF-222.A/B version contains both pairs of sensors, the rest of the version is identical.

Flow range / 0.1...20 m/s, bi-directional

Accuracy / ± 0.5% up to ± 2% of measuring value
 for flow velocities > 0.2 m/s
 and pipe inner diameters > 75 mm
 ± 3% of measuring value for
 flow velocities > 0.2 m/s
 and pipe inner diameters 13-75 mm

Electrical Specifications:

Outputs / 3 x Pulse Output: Pulse or Frequency.
 Opto Isolated MOSFET relay.
 4...20mA flow proportional output,
 optically isolated 1500 volts 620 ohms
 maximum load.
 Frequency max. 200 Hz
 Pulse > 100 V AC/DC, 150 mA

Display / 64 x 240 Pixel

Exposition / continuous display of battery status,
 signal strength and flow information
 (counter and flow)

Keypad / 16 keys

Supply voltage / rechargeable battery or line voltage

Battery capacity / 14 hours, 2,5 charge time

Line voltage / 110...240 VAC, 50 Hz ± 10%

Approval / CE

PF-333

Portable Ultrasonic Liquid Flowmeter according to Transit Time Difference Method

Description:

The portable ultrasonic liquid flow meters of the PF series measure the flow in a closed pipe according to the transit-time difference method without the need for any mechanical parts to be inserted through the pipe wall. Two ultrasonic transducers are mounted to the pipe with a fastening rail. In the course of commissioning, individual data of the measuring point, like for example the medium, pipe material, pipe diameter, wall thickness etc. is entered into the transmitter. The ideal separation distance of the two transducers is then calculated by the transmitter in response to the entered data concerning the pipe and fluid characteristics. In the measuring mode the transducers work alternating as emitter and receiver. The transit time of the ultrasound between the transducers is measured once in flow direction and once against the flow direction. Because the ultrasound transmitted in the same direction as the liquid flow is faster than against it, a time difference which is directly proportional to the flow velocity of the liquid and independent of the individual features of the fluid results. The PF-333 is capable to transmit the recorded flow data as analog output or pulse output and also in alphanumeric text or graph on the built-in LCD backlit graphic display as flow rate or velocity together with totalized values. The internal battery of the PF-333 allows up to 14 hours of operating time depending on the output utilisation and backlight usage. The internal logger can store up to 100.000k data points. By use of the provided Windows® based software the logged data can be output directly to a PC using the RS232/USB interface or stored in the instrument`s non-volatile memory for downloading at a later time.

Features

- /NEW: Optional as heat meter
- / Measurement through the pipe

PF-D550

Portable Doppler Flow Meter for Dirty or Aerated Liquids

Features

- / Measurement through the pipe
- / Easy calibration
- / No pressure drop
- / Ideal for problem liquids
- / For pipes ½" to 180" ID
- / Operating temp. up to 120°C
- / 300,000 point data logger
- / 4...20 mA output (AC powered)
- / 10-Digit totalizer
- / AC/DC operation
- / Built-in rechargeable battery

Description:

The PF-D550 ultrasonic sensor injects high frequency sound through the pipe wall and into the flowing liquid. Gas bubbles or solids suspended in the liquid reflect the ultrasonic signal back to the sensor. When this sound is reflected from moving bubbles or particles it is returned to the sensor at an altered frequency. This frequency shift is called the Doppler effect. The PF-D550 continuously measures the change from its transmitted frequency to the received frequency to accurately calculate flow.

Application:

The PF-D550 works best with difficult liquids in applications that would damage regular flow meters. Because the sensor is mounted on the outside of the pipe, there is no contact with the moving fluid. The ultrasonic sensor straps onto the outside of pipes 12.5 mm (½") ID or larger and measures flow in common pipe materials: PVC, carbon steel, stainless steel, cast iron, fiberglass and lined pipes... any pipe that conducts ultra-sound. Doppler signals cannot be transmitted through pipe walls which contain air pockets (materials like concrete and wood), or loose insertion liners (with an air gap between the liner and pipe wall). Because the sensor is so easy to install you can test any application and pipe material in a few minutes.

Recommended for: Sewage, Treated Wastewater, Aerated Water, Sludge and Slurries, Chemicals and Solvents, Viscous Liquids, Abrasives, Food Products, Pulp Stock, Acids and Caustics.

U-1000

Ultrasonic Flow Meter based on Transit Time Difference Method for permanent Installation

Description:

The U-1000 is a clamp-on, ultrasonic flowmeter that uses a multiple slope transit time algorithm to provide accurate flow measurements. An ultrasonic beam of a given frequency is generated by applying a repetitive voltage pulse to the transducer crystals. This transmission goes first from the Downstream transducer to the Upstream transducer. The transmission is then made in the reverse direction, being sent from the Upstream transducer to the Downstream transducer. The speed, at which the ultrasound is transmitted through the liquid, is accelerated slightly by the velocity of the liquid through the pipe. The subsequent time difference is directly proportional to the liquid flow velocity. Having measured the flow velocity and knowing the pipe cross-sectional area, the volumetric flow can be easily calculated. The U-1000 is scheduled for fixed installation, easy to install and requires the minimum of information to be entered by the user. The instrument displays the required separation after the pipe internal diameter and material are entered. Both the electronics and guide rail housings form an integral unit that is attached to the pipe using the supplied jubilee clips. Power to the unit is provided by an external 12 - 24V AC/DC power supply. The U-1000 is intended to operate on steel, copper and plastic pipes with maximum 180 (225) mm OD. Compact, rugged and reliable, the U-1000 has been designed to provide sustained performance in industrial environments.

Application:

Flow-metering and monitoring as:
Hot water meter, heat meter, chilled water meter, drinking-water meter, ultrapure water meter and for process water

Features

- / **NEW: wall mounted display**
- / **Measurement through the pipe**
- / **Easy calibration**
- / **For steel-, plastic- or copperpipes**
- / **For 22 (25) mm to 115 mm OD**
or 125 mm to 180 (225) mm OD
- / **Operating temperatures up to 85°C**
at wall mounted display up to 135°C
- / **LCD display with backlights**
- / **Integrated pulse or frequency output**
- / **4 to 20 mA output (optional)**
- / **Modbus (optional)**
- / **Supply 12 to 24V AC/DC (external)**

Version:

U-1000 Ultrasonic Flow Meter

- / Measurement of the flow velocity and flow rate
- / Recommended for hot water < 85°C, chilled water, portable water and demineralised water
- / Configurable pipe size between 22. . .115 mm or 125. . .180 mm outer diameter
- / Pipe materials: steel, plastic and copper
- / Simplified guide rail & sensor assembly
- / Clamp-on sensor
- / LCD display with backlight
- / Display: 2 line x 16 characters
- / Key pad: 4 key tactile feedback membrane keypad
- / Password controlled menu structure
- / Menu language: english
- / Selectable units: m/s, ft/s, l/s, l/min, gal/s, gal/min, USgal/s, USgal/min, m³/min, m³/h, litres, m3, gals, USgals
- / Integrated pulse- or frequency output and optional 4. . .20 mA output or Modbus

U-1000 HM

Fixed Ultrasonic Heat/ Energy Meter with Modbus Communication

Description:

The U-1000 HM is a clamp-on thermo-, heat- and energy meter based on ultrasound which is installed on the outside of a pipeline without any complications. The device measures the flow and return temperatures via PT100 sensors and the flow rate with ultrasound. An ultrasonic beam of a given frequency is generated by applying a repetitive voltage pulse to the transducer crystals. This transmission goes first from the Downstream transducer to the Upstream transducer. The transmission is then made in the reverse direction, being sent from the Upstream transducer to the Downstream transducer. The speed, at which the ultrasound is transmitted through the liquid, is accelerated slightly by the velocity of the liquid through the pipe. The subsequent time difference is directly proportional to the liquid flow velocity. Having measured the flow velocity and knowing the pipe cross-sectional area, the volumetric flow can be easily calculated. The temperature sensors measure the heat difference at the inlet and the outlet point. Together with the flow rate, the U-1000 HM then calculates the corresponding amount of heat. The values can be output individually or summed. In addition, there is a Modbus compatibility so that the device can also be used as a component in an aM & T or BEM system. The U-1000 HM is designed like the U-1000 for fixed installations. It is easy to install and requires a minimum of information that must be entered by the user. The device requires 12-24V AC/DC from an external source. The U-1000 HM is designed to work on steel, copper and plastic pipes with an outside diameter up to 180(225) mm.

Application:

Heat-metering and monitoring as:

Warm water meter, heat meter, chilled water meter, drinking-water meter, ultrapure water meter and for process water.

Features

- / **NEW: wall mounted display**
- / **Heat- and Energy-measuring**

TG-01

Ultrasonic Thickness Meter

Features

/ 11 common materials pre-configured

/ Battery powered

/ Easy to use

Description:

The ultrasonic wall thickness meter TG-01 can measure the layer thickness of a variety of materials because of their different sound speed ranges. There are 11 pre-configured materials. The device uses a specially developed, microprocessor controlled circuit to quickly calculate the run time of the reflected ultrasonic pulse with high accuracy. The TG-01s speed of sound can be adjusted between 500. .9000 m/s to determine the layer thickness of any materials. This has also the advantage, that the coating of a pipe does not need to be removed (non-destructive measurement).

Application:

The TG-01s typical applications are to find the wall thickness of the pipe when programming a clamp-on ultrasonic transmitter without cutting or removing a section of the pipe. But it can also be used to test for wearing out of materials, corrosion and coating, for industrial applications, within the car- machine- or tool-industry, as well as for safety maintenance for any other kind of hollow body.

Technical Specifications:

Measuring range /	1.5 ...200 mm wall thickness
Resolution /	0.1 mm
Display /	10 mm, 4-digit, LCD
Battery /	4 x 1.5V AAA
Sound velocity /	500. . .9000 m/s (configurable)
Accuracy /	± 0.5%
Humidity /	< 80%
Temperature range /	0. . .50 °C
Materials /	steel, cast iron, aluminium, red copper, brass, zinc, quartz glass, polyethylene, PVC, gray cast iron, nodular cast iron
Dimensions /	120 x 60 x 30 mm
Weight /	approx. 170 g without battery
Certificate /	CE

SI-00

Miniature- Electromagnetic Flowmeter

Features

- / Wetted parts out of st. steel 1.4404, PEEK and FKM
- / Displays flow bidirectionally
- / Op. range 0. . .600 l/min in 5 sizes
- / Additional temperature measurement from -20. . .+80°C
- / Minimum conductivity 20 µS/cm
- / Viscosity up to 70 mm²/s at 40°C
- / Two output channels for 4. . .20 mA or 0. . .10 VDC, pulse or alarm
- / Including totalizer and batching function
- / Operating pressure up to 16 bar

Description:

The measuring principle of the magnetic flow meter is based on Faraday's law. The flow of a conductible liquid within a magnetic field causes an electrical voltage, which is proportional to the velocity of the flow. A measuring pipe out of the very rugged plastic material PEEK is installed in the stainless steel fitting of the SI-00. This construction is suitable to isolate the liquid from the metallic fitting to make the induced measuring voltage useable. Magnetic coils located on the outside generate a magnetic field inside the measuring pipe and small stainless steel electrodes measure the voltage, which is then amplified and processed by the powerful electronic of the SI-00.

Application:

The electromagnetic flowmeter SI-00 combines the advantage of the electromagnetic measuring principle and an ultramodern amplifier electronic to a device of the latest generation. There are no wishes left regarding easy operation and versatility of the measuring value processing. The device detects and processes the medium temperature, the actual flow and the fluid consumption. Setpoints, as well as analogue and pulse signals in different combinations are provided by the SI-00 at two output connections. The setpoints can be programmed as N.O./N.C. or window function always with adjustable hysteresis. In case of activated start-up delay the setpoints work at the normal operating condition within the programmed period of time as soon as the flow reaches 0,5% of the full scale value after switch on, to ensure that no alarm occurs if the flow value is under the threshold just because of the starting condition of the plant or machine. The analogue output can be used as 4. . .20 mA- or 0. . .10 VDC-signal and can be assigned to the temperature or to the flowrate. Zero and span are free adjustable, but the minimum measuring span has to be 20% of the full scale value. The consumption is added or subtracted (depending on the flow direction) by the SI-00 and displayed. The positive flow direction is marked with an arrow on the unit. The outputs of the SI-00 always refer to the positive direction.

The counter is reset either through external pulse, through programmable automatic reset time from one hour to eight weeks or manually by the touch of a button. One of the outputs of the SI-00 can be used to realize a batching process. In this operating mode the switching output of the SI-00 is activated to control e.g. a solenoid valve after the preset amount has passed through the flowmeter. In case of not reaching the preset amount the user can choose either to wait for further flow or to reset the counter automatically.

SI-01

Electromagnetic Flowmeter for Water Applications

Features

- / Cost-effective
- / Separate or compact measuring transmitter
- / NBR or EPDM lining
- / DN25 to DN1200
- / DIN or ANSI flange

Description:

The SI-01 series of electromagnetic flowmeters is always a combination of measuring pick-up SI-01 and measuring transmitter MU-5000 which can be either directly mounted on the pick-up or separately mounted on the wall by means of a fixing metal plate. The measuring pick-up consists of a magnetically non-conductive measuring tube with plastic lining, magnetic coils fastened diametrically on the tube and at least two electrodes which are inserted through the tube's wall and establish contact with the measuring medium. As current passes through the magnetic coils, a clocked magnetic field is generated which penetrates the magnetically non-conductive measuring tube and induces in the electrically conductive medium a voltage proportional to the flow velocity. The electrodes inside the tube tap this voltage and pass it on to the measuring transmitter MU-5000. Now the transmitter generates a current signal in the range of 4. . . 20 mA which is linearly connected to the mean velocity of flow. The measuring pick-up has a SENSORPROM memory module in which its individual data is stored. The result is that nearly every measuring pick-up of the SI-01 series can be operate along with every MU-5000 measuring transmitter without the need for prior parameterization.

Application:

Electromagnetic flowmeters are suited for measuring nearly all electricaly conductive fluids, pulp and slurry that have a conductivity of at least 5 micro-Siemens. Temperature, pressure, density and viscosity are of no consequence for the method of measurement so long as the measurement is performed within the velocity range of 0.25. . . 10 m/s and the permissible material specifications do not fall short or are not exceeded. The main applications for the SI-01 series are found in the following areas, Water removal, Water treatment, Water distribution, Effluent treatment, Industrial water applications and Filtration installations. For applications that necessitate higher temperatures or pressure, more hostile media or other nominal diameter ranges, the high-quality measuring pick-up of the SI-02 offers a reliable solution.

Technical Specifications:

Measuring principle /	electromagnetic induction
Exciter frequency /	1.56 Hz...12,5 Hz depending on ND
Conductivity of medium /	at least 5 µS/cm (micro Siemens)
Operating range /	0.25...10 m/s for the specified accuracy, below and above this greater deviations
Accuracy /	± 0.4% ±1mm/s

Protection class /	IP67 (IP68 on request)
EMC /	2014/30/EU

(see also Measuring transmitter MU-5000)

Measuring transmitter /

In principle, the SI-01 is suited for operations with a directly mounted measuring transmitter or for separate mounting. The MU-5000 measuring transmitter can be used universally (see data sheet MU-5000), hence it can be mounted directly on the measurement pick-up or positioned away from it by means of a wall fixture. If the SI-01 is required as a spare, since the MU-5000 measuring transmitter is already available, only the measurement pick-up can be ordered without the measuring transmitter.

Electromagnetic Flowmeter for General Applications

Features

- / Universally applicable
- / Separate or compact measuring transmitter
- / Variety of lining material
- / DN15 to DN2000
- / DIN- or ANSI flanges
- / High-temperature version
- / Pressure level up to PN100

Description:

The SI-02 series of electromagnetic flowmeters is always a combination of measuring pick-up and measuring transmitter MU-5000 which can be either directly mounted on the pick-up or separately mounted on the wall by means of a fixing metal plate. The measuring pick-up consists of a magnetically non-conductive measuring tube with plastic lining, magnetic coils fastened diametrically on the tube and at least two electrodes which are inserted through the tube's wall and establish contact with the measuring medium. As current passes through the magnetic coils, a clocked magnetic field is generated which penetrates the magnetically non-conductive measuring tube and induces in the electrically conductive medium a voltage proportional to the flow velocity. The electrodes inside the tube tap this voltage and pass it on to the measuring transmitter MU-5000. Now the transmitter generates a current signal in the range of 0(4) . . 20mA which is linearly connected to the mean velocity of flow. The measuring pick-up has a SENSORPROM memory module in which its individual data is stored. The result is that nearly every measuring pick-up of the SI-02 series can be operate along with every MU-5000 measuring transmitter without the need for prior parameterization.

Application:

Electromagnetic flowmeters are suited for measuring nearly all electrically conductive fluids, pulp and slurry that have a conductivity of at least 5 micro-Siemens. Temperature, pressure, density and viscosity are of no consequence for the method of measurement so long as the measurement is performed within the velocity range of 0.25 . . 10 m/s and the permissible material specifications do not fall short or are not exceeded. Applications for the SI-02 series are found in a wide range of industrial segments since the material combinations ensure resistance to nearly all media in respect of different electrodes and lining materials.

Technical Specifications:

Measuring principle /	electromagnetic induction
Exciter frequency /	12.5/15 Hz for DN15...DN65 6.25/7.5 Hz for DN80...DN150 3.125/3.75 Hz for DN200...DN1200 1.5625/1.875 Hz for DN1400...DN2000

Protection class /	IP67 (IP68 on request)
EMC /	2014/30/EU

(see also Measuring transmitter MU-5000)

Measuring transmitter /

In principle, the SI-02 is suited for operations with a directly mounted measuring transmitter or for separate mounting. The MU-5000 measuring transmitter can be used universally (see data sheet MU-5000), hence it can be mounted directly on the measurement pick-up or positioned away from it by means of a wall fixture. If the SI-02 is required as a spare, since the MU-5000 measuring transmitter is already available, only the measurement pick-up can be ordered without the measuring transmitter.

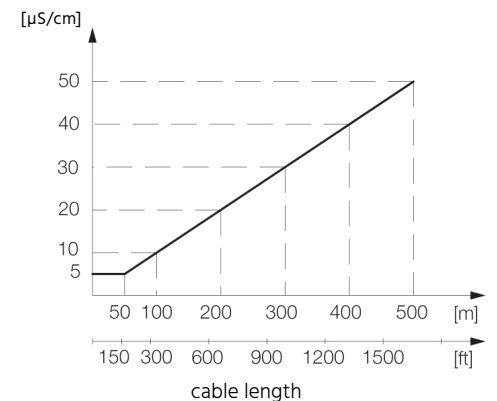

Separate mounting /

Flow-Nomogramm SI-01 / SI-02:

MU-5000

Measuring Transmitter for Electromagnetic Flowmeters SI-01 and SI-02

Features

- / Easy to assemble
- / Separate or compact
- / Easy commissioning and
maintenance
- / Optimal dynamics
- / Self-diagnostics
- / IP67

Description:

The MU-5000 is a high-performance measuring transmitter based on a micro-processor with built-in alphanumeric multi-language display. The MU-5000 is always a part of SI-01 or SI-02 series of measurement pick-up. It supplies power to its magnetic coils and evaluates the signal transmitted by the electrodes. On the output side, the device has a power output of a 0(4) to 20 mA signal as well as an active and a passive impulse output. All outputs can be adjusted in unidirectional (positive flow direction only) as well as bidirectional (forward and backward) way and, a parameterizable limit value can be evaluated with an additional relay. A programmable time-constant acts on the display and output signals. Moreover, the measuring transmitter has a digital input with which the internal counter can be set to zero or the output signal can be controlled or fixed. The measurement pick-ups of the SI-01 or SI-02 series possess a SENSORPROM memory module in which their individual data is stored. The result is that every measurement pick-up of the SI series can operate along with every MU-5000 measuring transmitter without the need for prior parameterizing. After connecting the MU-5000 to a measurement pick-up the specific data is read into the MU-5000 and it begins to function immediately. The standard accuracy of the MU-5000 is $\pm 0.4\% \pm 1 \text{ mm/s}$ of the measured value. In combination with the SI-02, however, the system can also be supplied optionally with calibration set to $\pm 0.2\% \pm 1 \text{ mm/s}$.

Electrical Specifications:

Supply voltage /

AC/DC-Version: 11...30 VDC or 11...24 VAC
AC-Version: 115...230 VAC +10%-15% (50...60 Hz)

Power consum. /

AC/DC-Version: 9 VA at 24 VAC
($I_N = 380 \text{ mA}$, $I_{ST} = 8 \text{ A}$ (30 ms))
or
11 W at 12 VDC
($I_N = 920 \text{ mA}$, $I_{ST} = 4 \text{ A}$ (250 ms))
AC-Version: 17 VA at 230 VAC

Cable insertion /

M20 x 1.5 at DIN-flanges or
1/2"-NPT at ANSI (AWWA)-flanges

Protection class /

Compact version: IP67
19"-slider: IP20

EMC-Function /

IEC/EN 61326-1 (any environment)
IEC/EN 61326-2-5

Digital input /

11...30 VDC, activation time 50 ms,
current for 11 VDC $I = 2,5 \text{ mA}$,
current for 30 VDC $I = 7 \text{ mA}$
 $R_i = 4,4 \text{ k}\Omega$

Digital output /

Frequency: 0...10 kHz, 50% scan ratio
(uni-/bidirectional)
Time-constant: 0.1...30 s, adjustable
Impulse (active): 24 VDC, 30 mA,
 $1 \text{ k}\Omega \leq R_i \leq 10 \text{ k}\Omega$, short-circuit-proof
Impulse (passive): 3...30 VDC, max. 110 mA,
 $200 \Omega \leq R_i \leq 10 \text{ k}\Omega$
Time-constant: 0.1...30 s, adjustable

Relay output /

Time-constant: change-over realy,
as the current output
Load: 42 VAC at max. 2 A,
24 VDC at max. 1 A

Power output /

Output signal: 0...20 mA or 4...20 mA
Load: < 800 Ohm
Time-constant: 0.1...30 s adjustable

Galv. Isolation /

All inputs and outputs are galvanic
isolated.

Display and Keypad /

Counter: two 8-digit counter for
forward, backward and net flow
Display: back-lit alphanumeric text, 3x20 characters for
display of flow rate, counter values, settings and
errors, display of backward flow by minus symbol.
Time-constant: time-constant as current output time-constant

Technical Specifications:

Measuring principle /

magnetic-inductive with clocked
constant field

Empty tube /

empty tube identification (special cable
required for separate mounting)

Zero point setting /

automatic

Creep vol. suppression /

0...9.9% of max. flow

Exciter frequency /

depend on sensor size

Electrode input impedance /

$> 1 \times 10^{14} \text{ Ohm}$

Accuracy /

$\pm 0,4\% \pm 1 \text{ mm/s}$ (optional $\pm 0,2\% \pm 1 \text{ mm/s}$)

Ambient temperature during operation /

-20...+60°C with display
-20...+60°C without display

Storage temperature /

-40...+70°C

Materials /

Compact version: fiberglass reinforced polyamide
(on request stainless steel AISI 316)
19"-slider: standard 19" slider (aluminium/steel) as per
DIN 41494 width 21 TE, height 3 HE

Vibration-proof /

Compact version: 18...1000 Hz any, 3.17 g effectively,
sinusoidal in all directions as per
DIN IEC 68-2-36
19"-slider: 1...800 Hz, 1 g, sinusoidal in all
directions as per DIN IEC 68-2-36

Weight /

Compact version: 0.75 kg
19"-slider: 0.8 kg

Power supply:

1) Note
Special cable with individual wire shields (shown as dotted lines) are only required when using empty pipe function or long cables

Dimensions in mm (inch):

VO-01

Low-Volume Oval Gear Flowmeter

Description:

The VO-01 low volume oval gear flowmeter measures fluids in the viscosity range of 5 to 200 cSt according to the principle of positive displacement. Two interlocked oval gear-wheels made of PEEK rotate inside the measuring chamber as a result of the flow and, effectively, defined volumes are channelled through the VO-01 proportional to the rotating speed. An externally mounted electronic element records the rotating speed of the oval gear-wheel pair by means of a non-contacting Hall effect sensor that emits a voltage impulse whenever a magnet crosses it and, through an amplifier, produces a rectangular impulse signal at the PINs of the plug connector. In the version with 2-wire output the impulse signal is readily converted internally into a power signal. In contrast to this, in the case of the 3-wire version, as also in a variant with impulse output and two additional threshold value relays, a VO-01 equipped with a "normal" impulse output can be easily converted into a flowmeter with 3-wire power output or one with a Push-Pull impulse output and threshold value relays by replacing the mating plug.

Features

- / Plastic or stainless steel housing
- / Measuring range from 8 l/h
- / Cost-effective
- / 4...20 mA or pulse output
- / Optionally with switching contacts
- / Intended for fluid viscosities
from 5 to 200 cSt

Application:

Oval gear flowmeters of VO-01 series offer a cost-effective solution when low volume flows in the range of low to medium viscosities need to be measured and monitored. For the housing, the materials used can be polypropylene, ECTFE and stainless steel; however, the oval gear-wheels are always made of PEEK. Therefore, it is possible to design a device in a way that only plastics come into contact with the flow medium. The result is that the range of application of the VO-01 is extended to measuring even hostile fluids which, otherwise, are corrosive on metals. Typical applications for the VO-01 are, for example:

- monitoring lubrication points
- measuring consumption of fuel or lubricants
- manufacturing of paints and dyes
- processing of solvents.

Ground	PIN 3		PIN 3	brown
Relay 1-A				yellow
Relay 1-B				grey
Relay 2-A				pink
Relay 2-B				blue

Electrical Specifications:

Pulse output (VO-01.xx.xx.xx.xx.IM) /

Function:	complementary final stage (suitable for PNP- or NPN-inputs)
Supply voltage:	+4.5...+24 VDC
Current:	max. 11 mA at 24 VDC
El. connection:	plug connector as per EN 175301-803A (cubical-shaped) or round cable LiYY 3 x 1.4 mm ² , length 3 m
Protection:	IP65

Analogue output 2-wire (VO-01.xx.xx.xx.xx.A2) /

Supply voltage:	+15...+24 VDC
Current:	4...20 mA, 2-wire
Damping:	factory adjustable in steps of 1 sec.
El. connection:	plug connector as per EN 175301-803A (cubical-shaped)
Protection:	IP65
Ambient temp. at plug connector:	max. 55°C

Analogue output 3-wire (VO-01.xx.xx.xx.xx.A3) /

Supply voltage:	+15...+24 VDC
Current:	10...40 mA
Damping:	factory adjustable in steps of one sec.
El. connection:	plug connector as per EN 175301-803A (cubical-shaped)
Protection:	IP65
Ambient temp. at plug connector:	max. 55°C
Mounting:	The electronic modul is easily plugged between the plug connector and the mating plug of the SD-05 and transforms the pulse output into an analogue output. The correlation between analogue output and operating range is adjusted with a REED switch at the plug connector. This electronic modul can be field upgraded at any time.

Pulse output Push-Pull and two additional threshold value relays (VO-01.xx.xx.xx.xx.FK) /

Supply voltage:	+4.5...+24 VDC
Current:	10...220 mA
Damping:	factory adjustable in steps of one second
Outputs:	1 x complementary final stage (11 mA, 24 VDC), 2 x semiconductor relays (0.1 A / 24 VDC)
El. connection:	plug connector as per EN 175301-803A (cubical-shaped) with one meter factory connected cable
Protection:	IP65
Ambient temp. at plug connector:	max. 55°C
Mounting:	The electronic modul is easily plugged between the plug connector and the mating plug of the SD-05 and transforms the pulse output into Push-Pull output (suitable for PNP and NPN inputs). Additionally two alarm outputs are provided. The correlation between analogue output and operating range and the setpoints are adjusted with a REED switch at the plug connector. This electronic modul can be field upgraded at any time.

Pulses per Litre:

Range 8. . .40 l/h

Pressure Drop:

Range 14. . .80 l/h

VO-02

Miniature Oval Gear Flowmeter

Features

/ Aluminium or st. steel

/ Small build

/ For ranges from 0,001 l/min

/ Up to 80 bar

/ From 0,5 mPas

Description:

In addition to our proven oval gear flowmeters series VO-01, the new series VO-02 has been designed for tiny ranges (from 0,001 l/min). These meters are very precise and can measure the smallest amounts of fluid. These instruments are using the volume-measuring principle, where the media running through the housing sets gears into motion. Within those gears are magnets, which trigger a Hall-sensor. The sensor then sends out squarewaves, whose frequency is proportional to the flowing media. Whether the meter is used for low or highly viscose media, the volume of the tooth space remains the same, so the meters can be used either way. The VO-02 has a standard PNP impulse output, while the housing is available in either aluminium or stainless steel.

Application:

The VO-02 are perfectly designed for measuring the flow of oils. For example mineral- and plant-oils, plant based fuels, diesel and a variety of lubricants.

Flow range up to 0,3 l/min:

Flow range up to 1,75 l/min:

	VO-02.1	VO-02.2

VM-01

Gear-Wheel Volume Sensor for Viscous Fluids, for OEM Applications

Features

**/ For media with viscosities
between 20. . .4000 cSt**

/ Excellent price/performance ratio

**/ Aluminium housing,
steel gear-wheels**

/ Low pressure drop

/ High pressure resistance

/ Convenient dim. for assembly

Description:

The VM-01 series of the flowmeter measuring sensor consists of a pair of toothed wheels which is driven by the flow of fluid according to the working principle of a gear-wheel pump. The bearing for the measuring sensor is designed as a radial and axial sliding contact bearing (VM-01.2: ball bearing). The gear-wheel movement is scanned by means of a magneto-resistive sensor that is hermetically separated from the measuring chamber. The gear-wheel diameter of the VM-01 is ideal due to its low resistance to flow and especially low sound level.

Application:

The gear-wheel flowmeters of the VM-01 series are mainly used for measuring consumption, control of filling operations and for monitoring lubrication points. Due to their small dimensions and, particularly, due to the low pricing, they are suitable for OEM applications.

Versions and Ranges:

Type	Op. range (l/min)	Viscosity range (cSt)	Connection	Geo. tooth volume cm ³	Resolution (pulse/l)

SD-01

Plug-In Display for Gear-Wheel Sensors

Features

- / Display and F/I converter**
- / Capable to simple dosing**
- / No additional auxiliary power supply**
- / Upgrade for sensors already supplied**

Description:

The SD-01 series is a universally applicable on-the-spot display for all gear-wheel volume sensors of Profimess GmbH provided with the plug connection as per DIN43650. The display is simply inserted between the plug and plug socket of the volume meter. Optionally, the display unit can display the flow as the current value or the accumulated volume as the sum. In the basic version, the SD-01 transmits the rectangular signal from the gear-wheel volume sensor without modifying it. In the next extended level, the device is equipped with a F/I converter which translates the rectangular signal in into a freely parametrizable 0(4) to 20mA signal. Another method is to equip the display unit with two relay contacts which can be used for monitoring MIN/MAX parameters of a flow volume or to implement a simple dosing function. All necessary settings for the SD-01 are stored in an EEPROM and are preserved even in the event of a power failure. If previously supplied gear-wheel volume sensors need to be upgraded with the SD-01, the user can remove just the plug PCB of the sensor and mount the display unit without much effort.

Application:

In practice, use of impulse emitting volume sensors is widely popular. Often the user wishes, on the one hand, to process the measured value within his guide system but, on the other hand, also make it available on-the-spot so as to optically monitor maintenance work or regulating operations. Also, many controls are capable of processing only analogue inputs but not impulse signals or, for this purpose, an expensive impulse input card must be added. The SD-01 plug-in display offers an ideal and cost-effective solution to this problem. This version with the display of the accumulated volume and two relay contacts is moreover capable of dosing through the connected volume sensor by connecting one of the relay outputs to a magnetic valve and by utilizing the second as the START/STOP input. This feature turns the volume sensor/SD-01 unit into a practical dosing system.

Electrical Specifications:

Supply voltage /	10...19 VDC or 18...28 VDC
Power consumption /	120 mA max.
Display /	7-segment LED, 7.62 mm, red

VM-04

High-Precision Gear-Wheel Volume Sensor for Viscous Fluids

Features

- / For viscosities above 1 cSt
- / Excellent price to performance ratio
- / Cast or st. steel versions available
- / Accuracy better than 0.3% of MV
- / High resolution
- / Pressure-proof up to 400 bar
- / Convenient dim. for assembly

Description:

The VM-04 series of the flowmeters measuring sensor consists of a pair of toothed wheels which is driven by the flow of fluid according to the working principle of a gear-wheel pump. The bearing for the measuring sensor is designed as a radial or axial sliding contact bearing. The gear-wheel movement is scanned by means of two magneto-resistive sensors which are phase displaced by 90° and hermetically separated from the measuring chamber. The two-channel scanning enables a higher resolution of measurement and detection of direction of flow by means of suitable electronic devices. Optionally, all devices can be supplied with an explosion-proof design with separate switching amplifier. The gear-wheel flowmeter VM-04 is outstanding due to its low resistance to flow and especially low sound level.

Application:

Due to their excellent accuracy of measurement along with high resolution, these devices are especially suited for use in test beds for measuring small and least volumes of flow. Some of the areas of deployment are:

- Measurement of consumption
- Controlling filling operations
- Dosing oils and chemicals
- Measurement of flow for paints and varnishes
- Ratio regulation for polyol and isocyanate

VS-02

Screw Spindle Flowmeter for Viscous Fluids

Features

- / Viscosity independent up to 40k cSt
- / Light and compact design
- / Bi-directional operation
- / Switching-, analogue- or pulse outputs
- / Cost-effective
- / Ranges up to 3800 l/min
- / Applicable up to 350 bar
- / Media temperature up to +150°C

Description:

The screw spindle flowmeter series VS-02 is developed for metering lubricating and viscous fluids in accordance with volumetric principle employing two cycloid steel spindles with a screw-shaped profile to rotate as the medium passes the flow chamber. The spindles form a geometric precise defined measuring chamber, through which accurately measured fluid is forwarded which is then detected by the Hall sensor outside the flow chamber. The output of the basic version VS-02.2 is pulse signal which may be connected to serve back-end PNP or NPN inputs, it supplies a square wave signal. With further options electronic housings can be screwed on the flowmeter body. These different electronics amplify the signal and deliver current or voltage outputs and/or drive the LCD-display. The electronic sensors are replaceable during active operation since the sensors never have contact to the medium.

Application:

Typical applications for the screw spindle flowmeter series VS-02 are cost-effective measurements of large volume flow of viscous fluids up to 3800 l/min. The flowmeters are also applicable for aqueous fluids like soap, paste or emulsions, and specially for oil, which show no abrasive behavior and which are compatible to the used materials of the flowmeter. Because of the volumetric principle of the VS-02 almost no viscosity depended error occurs up to 40 000 cSt. The units can be operated according to their corresponding versions up to 350 bar and +150°C.

VZ-01

Oil Counter for Light to Heavy Fuel Oil

Features

- / Mounting on pressure or suction side
- / Space-saving and flexible mounting
- / Temperature-independent
- / Viscosity-independent

Description:

The VZ-01 series of volume counters are rotary piston meters that function without auxiliary electrical power. A hollow slitted cylinder is situated in a cylindrical housing. Due to the guide slot, the cylinder makes oscillating movements as soon as the measuring chamber is flooded with the medium. The piston movement is transmitted magnetically to a totalizing roller counter which totalizes the volume of flow over a certain period. If necessary, the counter can be equipped with a remote value emitter designed as a reed or inductive contact which will transmit an electrical impulse for each defined volume.

Application:

Rotary piston meters are used wherever flow of oil or liquid fuel needs to be tapped in a simple but highly accurate method without depending on auxiliary electrical power. Some of the typical examples are in its deployment in the bunker piping in ships or as measurement of consumption in the forerun and return in diesel engines. Using the VZ-01 even simple dosing processes can be controlled where even hostile media can be measured by using special type of materials (Teflon or stainless steel pistons, stainless steel chamber). A major advantage of the volume counters is that the outcome of measurement does not depend on temperature and viscosity. This represents a plus point in some applications as against float devices or measuring turbines.

Technical Specifications:

Counter /	roller counter in litres
Process connection /	flange- or thread connection
Flow range /	0.5 up to 30000 l/h
Permissible media /	heating fuel (extra-light, light, medium and heavy), Naphta, Bunker C, gasoil and other lubricating media
Options /	display in US-gallons (1 gallon corresponds to 3.785 litres) outpaired units for differential measurement of fuel consumption approvals as per GL, LR and DNV

Electrical Specifications:

Switching element /	RE, RV = Reed-tubes with protective gas contact IN = inductive slit initiator as per IEC 60947-5-6
Switching voltage /	RE, RV = max. 48 V DC/AC protection class III (SELV) IN = 5 to 15 VDC
Switching current /	RE, RV = max. 50 mA ($R_i = 47 \Omega / 0.5 \text{ W}$) IN = > 3 mA bei 8 VDC / 1 k Ω
Standby current /	RE, RV = open contact IN = < 1 mA at 8 VDC / 1 k Ω
Switching load /	RE, RV = max. 2 W
Switching time /	RE = 40% to 60% (impulse value 1.0 and 0.1 l/Imp.) 30 to 70% (impulse value 0.00125 and 0.00311 l/Imp.) RV = 50% \pm 10% IN = 50% \pm 10%
Ambient temperature /	RE = -10°C to +60°C RV = -10°C to +70°C IN = -10°C to +70°C
Protection class /	RE = IP50 (IEC 60529) RV = IP65 (IEC 60529) IN = IP65 (IEC 60529)
Electrical connection /	RE = on plug connector with cable \varnothing 3.5 mm to \varnothing 5 mm RV = fixed cable 3 m length (2 x 0.14 mm ²) IN = plug for cable (2 x 0.35 mm ²)

Electrical Specifications of display with two selectable pulse- and analogue outputs FA:

Display /	8-character LCD with identification of the parameter, height of numbers 8 mm, flow rate (meter load) using bar indicator
Display values /	total volume, resettable volume, flow rate
Ambient temperature /	-25°C . . +70°C
Power supply /	24 VDC (6 . . 30 VDC)
Data preservation /	by non-volatile memory (EEPROM)
Protection class /	IP66 (IEC 60529)
Output versions /	Version 1: 1 potential free digital output (Rel. 1), adjustable and 1 passive analogue output 4 . . 20 mA Version 2: 2 potential free digital outputs (Rel.1 + Rel. 2) each adjustable
Analogue output /	
Power supply:	6 . . 30 VDC
Load RL:	max. (U-5) V / 0.0215 A [Ω]
Resolution:	16 Bit
Error:	max. \pm 0.2 mA
Update interval:	< 1 s
Digital output /	
Update intervall:	< 1 s
max. Voltage:	48 V DC/AC
max. Current:	50 mA
ON - resistance:	\leq 100 Ω
OFF - resistance:	\geq 10 M Ω
Insulation voltage:	> 100 V DC/AC
max. Output frequency:	200 Hz

Versions:

VZ-01 Oil Counter

max. Temperature: In case of oil counters belonging to the sizes 04M, 04 and 08 the media temperature must not exceed 60°C. And in case of sizes 15 to 50 the maximum media temperature is 130°C. Optionally, a high-temperature version up to 180°C is available.

Process connection: The VZ-01 of sizes 04M, 04 and 08 have only thread connections as per the table „Sizes“ (on the following page). The sizes 15 to 40 offer a choice between thread or flange connections.

Nominal pressure: The nominal pressure for thread connections is PN 16 while for flange connections either PN 25 or PN 40 can be selected.

Impulse emitter: See table „Sizes“ on the following page.

The electronic display FA is a top-mounted unit, that provides two selectable outputs, either as one adjustable pulse- and one additional 4 to 20 mA-analogue output or as two adjustable pulse outputs. The displayed values are total volume, resettable volume and flow rate.

C = 100 mPa.s D = 200 mPa.s

E = 500 mPa.s

Viscositylines for VZ-01.15 to VZ-01.50

A = 5 mPa.s B = 25 mPa.s

C = 50 mPa.s D = 100 mPa.s

E = 200 mPa.s F = 500 mPa.s

If the pressure drop is above 1 bar, we recommend using the next greater nominal diameter for the counter. Maximum permissible pressure drop = 3 bar.

GM-10N

Battery powered thermal Mass Flowmeter for Gases

Features

- / Standard AA battery powered
- / Touchscreen with password protection
- / Flow units changeable
- / Totalizer
- / High accuracy and dynamic
- / Extremely quick response time
- / No inflow and outflow lines required
- / Real gas calibration
- / Optional multigas
- / Optional 24 VDC supply
- / Optional regulating valve
- / Optional switching contacts

Description:

The GM-10N with its integrated touchscreen, offers thanks to autonomous operation with standard AA batteries and its insensitivity to pressure surges a highly accurate alternative to variable area flowmeters. The device has a CMOS flow sensor that enables a quick response speed due to its extremely small dimensions, while ensuring excellent accuracy. An all-metal body made of aluminium or stainless steel is equipped in its interior with a flow rectifier and subsequent resistance that divides the volume flow of gases into a defined main and an auxiliary flow. The auxiliary flow is guided through a measuring chamber in which the approximately 1 mm sensor is directly located. The sensor gets cooled by the mass flow of gas in such manner that its heat loss is proportional to the number of gas molecules flowing along regardless of their packing density. Consequently, the mass flow can be ascertained in a wide area without compensating for pressure and temperature. This principle of measurement is unique as against conventional methods like the variable area principle because no inflow and outflow lines are required. In its basic version, the GM-10N displays the standard and the total volume flow as a numerical value on its touchscreen. In addition to the numerical values, the standard volume flow is also shown graphically by a bar graph. The GM-10N can be supplied in its extended levels with additional precision regulating valve and / or adjustable switching contacts.

Application:

The GM-10N series of thermal gas mass flowmeters has been developed to replace on a longterm basis the variable area flowmeter that enjoyed a fine track-record for years for small gas flows. In contrast to this measurement system, it offers obvious advantages like higher accuracy and insensitive to pressure and temperature changes and it can be deployed even without auxiliary power supply. The device is suited for a number of various gases and covers the volume flow range up to 450 NI/min air. Considering these advantages, the GM-10N can be used in different areas of the industry like, for example, gas supply systems, semiconductor productions, welding technology, machine construction, supply

of compressed air, fuel cells, fermenters, chemical engineering, laboratories, ovens, burners, medical engineering, analyzing devices, laser technology, surface coating and so on. In the laboratory applications especially, the GM-10N is often deployed along with its optionally available integrated manual regulating valve since it permits adjustment of very low gas volume flows and maintenance of constant levels.

Versions:

GM-10N Battery powered, thermal Mass Flowmeter for Gases

Normally, the GM-10N works as a battery-powered thermal mass flowmeter displaying the standard and the total volume flow as a numerical value on its touchscreen. In addition to the numerical values, the standard volume flow is also shown graphically by a bar graph. In the next extended level, a manual regulating valve is added to the device to accurately regulate the volume flow. Optionally, the GM-10N can be supplied with electrical switching contacts with or without a regulating valve. However, in this case an external 24 VDC power supply is necessary since the battery capacity is insufficient for operating the switching outputs.

Measuring tube material: The measuring tube can be made of anodized aluminium or electropolished stainless steel depending on the media. However, the CMOS sensor is wetted and deployment of the GM-10N is therefore limited to measuring and regulating non-hostile gases. The sealing material used is FKM, optionally it can be supplied in EPDM.

Accuracy and span: There are two versions of accuracies available. The more affordable standard variant measures at an accuracy of ± 2% of full scale value (ranges > 200 NI/min ± 3% of full scale) and has a measuring span of 1:50.

The more accurate version has an accuracy of ± 1% of full scale and a measuring span of 1:100 (for units with process connection G 1/4" and measuring ranges up to 50 NI/min with real gas calibration only).

Medium: As measuring media all non-hostile and dry gases can be considered. Gases that are not listed in the ordering codes but comply with these requirements can be ordered as special medium. All devices are supplied ex-factory in real gas calibration.

Flow units: It can be chosen between a large number of standardized and normalized flow units of the Imperial, US customary and SI measuring systems (with user adjustable reference conditions). The units are selectable from the integrated menu both for the actual and the totalized flow.

Alarm functions: In the version with contacts, the GM-10N provides three configurable alarms with 5 different selectable triggers (e.g. min. alarm, max. alarm, windows alarm, overflow alarm and totalizer alarm).

Options: Alternative sealing materials, external 24 VDC power supply instead of battery-operation, a housing for switch panel mounting, separately deliverable calibration protocols and a multigas calibration (e.g. one measuring device can be used for up to 3 different gases or gas mixtures) are available as options at additional charges.

GR-02

Thermal Mass Flowmeter and Controller for Gases

Features

/ Insensitive to pressure and temp.

/ Short response times

/ Highly accurate and dynamic

/ Low pressure drop

/ Serial interface

Description:

The GR-02 series of mass flowmeter for gases has a CMOS flow sensor that is capable of measuring at very high accuracy according to the thermal principle that applies to gas flow. The measurement pick-up is located directly within the gas flow and detects the quantum of heat that the passing gas molecules carry off a heating element. With its significantly small dimensions and direct contact to the medium, the GR-02 is capable of measuring at extremely fast speeds of response time. The measuring tube can be delivered in aluminium or stainless steel where the measuring chamber is always made of plastic. This limits its use to non-hostile gases or gaseous mixtures with only low hostile content. A major advantage of the thermal measuring principle is that the volume flow can be measured and put out under standard conditions, largely independent of the process pressure and the gas temperature. Selectively, the GR-02 can be supplied as a mere flowmeter with analogue output signal or as flowmeter and controller with integrated regulating valve. In the version with valve, the flow of gas volume is regulated proportionally to an analogue input signal while this unit can also be seen as a „constant gas source“. The parameters of the PI-controller, the operating range settings, selection of media and many other features can be verified and modified through suitable Windows software over the serial RS-485 interface.

Application:

The GR-02 series represents the new generation of thermal mass flowmeters for gases. The extremely cost-effective CMOS technology combines a dependable accuracy of up to $\pm 0.3\%$ of the full scale value + $\pm 0.5\%$ of measured value, fast response times and excellent dynamics to a flowmeter and controller that offers maximum operational convenience. Considering the advantages like modular construction of the measuring system, its assembly in any position and the convenience of cleaning the measuring pick-up without elaborate recalibration, the GR-02 can be deployed in various applications

Electrical Specifications:

Supply voltage /	24 VDC (18-30 VDC) (15 VDC on request)
Power consumption /	meter max. 100 mA controller max. 250 mA
Electr. connection /	D-Sub plug 9-pole
Output signals analogue /	4...20 mA, 0...10 VDC, 0...5 VDC, 1...5 VDC, 2...10 VDC or 0...20 mA
Output signals digital /	RS-485; Modbus RTU (Slave); Lab View-VI's available; optional: Profibus DP-V0, DP-V1
Set point value input for regulator /	4...20 mA, 0...10 VDC, 0...5 VDC, 1...5 VDC, 2...10 VDC or 0...20 mA
Starting time /	<1 sec.
EMC /	EN 61326-1
Protection class /	IP 50
Software /	<ul style="list-style-type: none"> - Reading of actual values for flow and temperature. - Specification of set point values - Entering regulator parameters - Changing gases - Optional recording of measuring data through logging function

Technical Specifications:

Measuring medium /	dry, non-hostile gases (see also listing in the Ordering codes)
Accuracy /	
GR-02.x.1:	± 1.0 % of full scale value
GR-02.x.2:	± 0.3 % of full scale value + ± 0.5% of full measured value
Pressure sensitivity /	< 0.2 % per bar (typically N2)
Repeatability /	± 0.2 % of full scale value
Dynamics /	
GR-02.x.1:	1:50
GR-02.x.2:	1:100
Response time /	80 ms; controller 500 ms
In- and outflow lines /	none
Pressure /	0.2...11 bar a (controller max. 8 bar)
Temperature /	0...50°C
Temp.-sensitivity /	< 0.025% per °C
Materials /	aluminium anodized, optional stainless steel electropolished
Seals /	Viton, EPDM, optional FFKM
Mounting position /	any (above 5 bar horizontal)
Gas connection /	G 1/4"-female up to 60 NI/min, above G 1/2"-female
Testing pressure /	16 bar a
Longterm stability /	< 1% measured value / year
Leakage rate /	< 1x 10 ⁻⁶ mbar l/s He

Dimensions in mm:

Sizes	A	B	C	D	E	F	G

Versions:

GR-02 Thermal Mass Flowmeter & Controller

The GR-02 is supplied as a mere flowmeter or as a flow controller with integrated regulating valve. The meter estimates the current volume flow and transmits it in the form of an analogue signal at the output. The controller functions like a „constant gas source“. The device measures the volume flow as the actual value and transmits it as analogue output. At the same time, the set point value is fed to the input of the GR-02 in the form of another analogue signal. The electronics estimate the difference in the regulation and adjust the integrated valve by means of an interface-programmable PI controller.

Accuracy and span: There are two versions of accuracies available. The more affordable standard variant measures at an accuracy of $\pm 1.0\%$ of full scale value and has a measuring span of 1:50. The more accurate version has an accuracy of $\pm 0.3\%$ of full scale value + $\pm 0.5\%$ of measured value at a span of 1:100.

Basic body and seals: The measuring tube of the GR-02 is made of aluminium or stainless steel. The CMOS sensor is however, always made of plastic and constantly wetted. The standard sealing material is Viton; optionally also EPDM is available.

Output signals: The signal pattern over which the measured volume flow can be tapped at the output of the GR-02, is either 4...20 mA, 0...20 mA, 0...5 VDC, 1...5 VDC, 0...10 VDC or 2...10 VDC.

Set point value signal for controlling function: If the GR-02 is designed as a flowmeter and controller, the set point value of the flow must be set as an analogue signal. This is either 4...20 mA, 0...20 mA, 0...5 VDC, 1...5 VDC, 0...10 VDC or 2...10 VDC. The mere flowmeter version of the GR-02 has no set point value input.

Pressure ratios in regulating function: The integrated regulating valve of the GR-02.2 as a flowmeter and controller must be set for inlet and outlet pressure. For this reason, both these values must be specified as absolute pressure in [bar].

Medium: As measuring media all non-hostile, dry gases can be considered. Gases that are not listed in the Ordering codes but comply with the requirements can be ordered as special type medium. All devices are supplied ex factory with real gas calibration.

Operating range: There are various operating ranges from 0-25 Nml/min up to 0-450 NI/min available. Customer-specific full scale values are available on request.

GS-01N

Compressed Air Counter with Switching- and Analogue-Output

Description:

The GS-01N series compressed air counter is a thermal mass flow-meter for gases according to the principle of hot-wire anemometer that is equipped with an electronic unit that has been developed specifically for applications in the field of industrial compressed air. A calorimetric measuring unit consisting of a heated and a temperature measuring resistor form the sensor component of the GS-01N. A volume of compressed air passing through the measuring tube carries off the heat from the heated resistor that is proportional to the velocity. The resulting electrical change of the heated resistor is evaluated by means of the measuring bridge and the effect of media temperature is compensated by the measuring resistance. The extremely user-friendly designed electronic unit has two outputs which can be adjusted optionally as a PNP transistor output for incorporating a limit value switch or an impulse output or as an analogue output for transmitting a 4...20 mA signal (for flow, temperature or pressure). Thus, the possible combinations of outputs for the GS-01N are:

- / **2 x NO-contacts / NC-contacts**, adjustable with regard to position and hysteresis of the setpoint or as Window function
- / **1 x NO-contact / NC-contact** and an additional analogue output (scalable) or
- / **1 x NO-contact / NC-contact** and an additional impulse output (programmable).

The rotatable 4-digit digital display on the GS-01N displays either the accumulated sum of the compressed air flow (consumption of compressed air) in Nm^3 or the current value of the flow in Nm^3/min or in Nm^3/h optically. The maximum value that can be displayed is $4000 \cdot 10^3 \text{m}^3$ where at such high values a yellow LED indicates that the displayed 4-digit value must be multiplied by the factor 1000. On pressing a button, the device can display the current media temperature and the accumulated sum after the last counter reset. Using a programming device, the display can be adjusted to let it remain switched off in RUN mode. An automatic Reset function of the totalizer can be programmed to different time intervals. In addition, the GS-01N has a minimum and a maximum memory that can store the lowest and the highest value measured until its next resetting.

Features

/ **New:**

Temperature monitoring and pressure monitoring included

/ Analogue or pulse output

/ Display of current value or total

/ Can be used as preselection counter

/ Independent of pressure and temp.

/ Max. and min. value memory

/ Low pressure drop

/ Additional temperature monitoring

Application:

Today, consumption of compressed air in machines and equipment is a cost factor that cannot be ignored at all. Due to this fact the consuming industry increasingly demands measuring devices which, on the one hand, help satisfactorily monitor consumption of compressed air and, on the other hand, do not cause additional pressure drop within the system which in turn would further escalate costs. The new compressed air counter GS-01N is our answer to this problem. It enables visual check of current consumption on a clearly readable display and, it can display the volume of compressed air consumed up to a point like a „water clock for air“ and store the value. Two programmable switching contacts trigger an alarm in the event of exceeding or falling short of a defined volume flow and, optionally, they can be programmed using window technology. It means that a defined range is considered as „good“ and, on escaping this Window alarm is sounded. Optionally, the user may avoid one of the switching outputs and, instead, opt for an impulse or analogue output or program the switching output as the preselection counter. The fact that the GS-01N is a mass flowmeter based on the thermal principle also underlines the advantages of measuring volume flow largely regardless of pressure and media temperature and implies a pressure drop in the range of only few millibars.

The accuracy of $\pm 3\%$ of measured value + $\pm 0.3\%$ of full scale value and the option of operating range up to 700 Nm³/h round off a device that pays off within the shortest span of time, not the least, due to its excellent price to performance ratio.

The integrated temperature measurement enables temperature-sensitive processes, such as drying processes, to be monitored and the production quality to be ensured. The compressed air meter thus contributes to increasing process reliability.

Versions:

GS-01N Compressed Air Counter with Switching- and Analogue-Output

The GS-01N can be supplied in 5 versions with different nominal diameters and volume flow ranges measurable by them. The available connection sizes are: G1/4", R1/2", R1", R1 1/2" and R2". The tapping ranges are in the same sequence 0 - 18 Nm³/h, 0 - 90 Nm³/h, 0 - 270 Nm³/h, 0 - 492 Nm³/h and 0 - 840 Nm³/h. The sizes G1/4" and R1/2" are also available for argon, CO₂ and nitrogen.

GM-50

Air Velocity Transmitter

Features

- / Operating ranges up to 75 m/s
(15000 ft/min) in 8 levels
- / Optional LED display
- / 6 different mounting lengths
- / 4...20 mA output
- / Digital filter

Description:

The GM-50 series of air velocity transmitter is the ideal instrument for measuring air velocities in large pipes and ducts. The device uses a mass flow sensor that allows accurate measurement at different flow velocities and temperatures. The rate of cooling in a heated measuring resistance is estimated which is directly proportional to the velocity of flow streaming along. At the output of the GM-50 the measured value can be tapped in the form of a 4 to 20 mA signal selectively in 3- or 4-wire system. In addition, the device has an optionally available LED display on which the measured value is displayed digitally, and an adjustable filter that attenuates the output with the time element of 0.5 to 15 seconds. The result is that a possible turbulent, restive flow does not lead to strong fluctuations in the output and the display. Since the GM-50 as a mass flowmeter always refers its measured values to air pressure and, in this respect, it is calibrated at factory to a standard status, it is possible to recalibrate the sensor to another pressure within the framework of parameterization.

Application:

The flow velocity of air or emission flow is often measured in the air-conditioning, ventilation and building technologies. Modern sensor elements of the GM-50 enable accurate and convenient measurement regardless of the air temperature at an enormously large span of operating range. Outmoded measuring instruments such as apertures, dynamic pressure probes or tubes can be conveniently replaced by the GM-50 with its principle of thermal mass flow measurement. In the course of commissioning, the user has a choice of eight different operating ranges between 0...1.25 and 0...75 m/s respectively 0...250 and 0...15000 ft/min, can customize to existing air pressure and adapt the 4...20 mA value of the output to his evaluator electronics. All settings for the device are performed through two keys and a potentiometer extremely easily.

Technical Specifications:

Media /	clean air and compatible, non-flammable gases
Operating range in m/s /	0..1.25; 0..2.5; 0..5; 0..10;

PT-00

Surface Resistance Thermometer

Features

- / Easy and fast assembly
- / For round and plane surfaces
- / Temp. range of -50. . . +260°C
- / Different protection fittings
- / Less thermal mass

Description:

The PT-00 series of resistance thermometers are surface temperature sensors on the basis of Pt100. Depending on the requirement, the devices can be supplied with permanent connecting cable or with housing and cable gland. A Pt100 temperature sensor is inserted into the protection fitting in 2-wire circuit which changes its ohmic resistance depending on the temperature. According to the version, the surface fittings are screw-mounted through a mounting hole or clamped by means of strap retainers to the surface to be measured. These thermometers are available in aluminium or stainless steel.

Application:

Thanks to their easy and fast assembly by means of strap retainers, hose band clips or screws, the PT-00 series of surface resistance thermometers well suited for a number of applications such as temperature measurement in closed pipelines as well as on plane surfaces. Since the temperature is measured indirectly, there is no interference with the process medium and, moreover, there is no or very less mechanical groundwork required at the location of measurement. The temperature transmitters in the PT-00 series are not affected by any operational pressure or chemical influences of the medium, thus ensuring their durability. Due to the less thermal mass of the PT-00, the object being measured is not at all affected which enormously simplifies a streamlined measurement of surface temperature.

Versions:

PT-00 Surface Resistance Thermometer

The PT-00 series of contact resistance thermometers is supplied with various fittings for screw-mounting or for fastening with strap retainers or hose clips. In PT-00.1 and PT-00.2 versions, the electrical connection is made through a clamp housing while, in all other versions, it is implemented through a 2.5 meter long cable that has silicon or PTFE sheathing depending the type of fittings.

Protection class: The various versions of PT-00 with clamp housing belong to the IP54 protection class as a standard. Optionally, IP65 protection class is also available.

Accessories: Installation kit (clamping band and thermal conductance paste) for pipes up to a max. diameter of 100 mm.

Technical Specifications:

Connection /	pipe ends Sn-plated, with wire sleeves
Connecting cables /	silicone, ambient temperature -50...+180°C PTFE, ambient temperature -50...+260°C
Sensor element /	Pt100 temperature sensor, DIN EN 60751, Cl. B, 2-wire
Protection fitting /	stainless steel 1.4571, aluminium, plastic
Process connection /	strap retainers, hose Binder or screw fastening
Cable length /	2500 mm standard, special lengths on request

PT-01

Compact Resistance Thermometer

Features

/ Small design

/ Integrated transmitter

/ Power- or resistance output

/ Stainless steel

/ -200°C to +400°C

Description:

A temperature-dependent electrical resistance is integrated in a stainless steel protection tube. It changes its ohmic resistance in relation to the temperature of the media. In the version with a built-in transmitter, the measured value will be converted into a 4...20 mA current signal and made available at the connections of the square-type plug point in 2-wire system. In the version without a transmitter, the plain resistance can be tapped at the plug point. The sensor element is designed in 2-, 3- or 4-wire with a system in order to compensate for the measuring errors through the electrical leads.

Application:

The PT-01 series of Compact Thermometers is unbeatable in their versatility. A choice of 2 shaft diameters, 5 different shaft lengths and various connecting threads allow the user to customize them practically in any location of measurement. In addition, the wide range of temperatures of -200...400°C contributes its part to the fact, that these sensors are used nearly in the entire industry with great success. From a temperature of 120°C upwards, the thermometers are provided with an additional neck tube that serves as a cooling section and protects the sensitive electronic components against overheating.

Versions:

PT-01 Compact Resistance Thermometer

Output: Resistance outputs PT100 2-, 3- or 4-wire without a transmitter are possible. With transmitter the device gives a 4...20 mA current signal in 2-wire circuit.

Process connection: G1/2" B male, smooth shaft (others on request)

Shaft diameter: Protective pipes with 6 mm or 8 mm are available.

Shaft length: Depends on the required depth.

Electrical Specifications:

Output /	4...20 mA, 2-wire or 1 x PT100, 2-, 3- or 4-wire
Supply voltage /	7.5...35 VDC
max. Current /	0.3...1.0 mA
Connection /	angled plug from DIN EN 175301-803 A for 2-, 3- or 4-wire
Protection class /	IP65 ENC60529
EMC /	2004/108/EG, EN 61326 emission (Group 1 Class B) and immune to interference (industrial)

Technical Specifications:

Accuracy /	Transmitter: < 0.1% from the range Class A for DIN EN 60751 $\pm(0.15^{\circ}\text{C} + 0.002^{\circ}\text{C} \times t)$ Class B for DIN EN 60751 $\pm(0.3^{\circ}\text{C} + 0.005^{\circ}\text{C} \times t)$
Material /	Stainless steel 1.4571
Process connection /	G1/2"B (others on request)
Shaft diameter /	6 mm or 8 mm (others on request)
Shaft length /	50...2000 mm
Neck tube /	55 ± 2 mm from 120°C
Storage temp. /	-40...85°C
Pressure /	max. 25 bar

PT-02

Insertion Resistance Thermometer

Features

- / All types of designs
- / Integrated transmitter
- / Current or resistance output
- / Stainless steel
- / -50. . . +550°C
- / Insertible into process-
or protection tube
- / Special type connections

Description:

A temperature-dependent electrical Pt100 resistance is situated in a protective stainless steel tube as specified by the customer. It changes its ohmic resistance value proportionally to the temperature of the media and the same is tapped at the connecting head of the PT-02 in 2-, 3- or 4-wire system. This ensures compensation of measuring errors through the electrical feeder lines. If the device has an integrated head transmitter, it generates a 4. . .20 mA current signal, proportional to the temperature, directly from the tapped resistance value as per the proven 2-wire system. The transmitter can also be supplied as ex-version with intrinsically safe operation so that the head of the device can be used in Zone 1.

Application:

The PT-02 series of insertion resistance thermometers is manufactured as per the customer specifications with regard to process connection, shaft length and shaft diameter. They are ideally suited for use in protective tubes (in high pressure applications or hostile media) as well as for direct insertion into the process. The wide range temperatures from -50. . .+550°C contributes to the fact that these sensors are used nearly in the entire industry with great success. The thermometers for temperatures +120°C and up are provided with an additional neck tube that serves as a cooling line and protects the connecting head against overheating. In order to ensure maximum accuracy, only carefully tested measuring elements as per DIN are used, thus allowing the customer to select from Classes A and B.

Versions:

PT-02 Insertion Resistance Thermometer

Neck tube: From a temperature of +120°C upwards using a neck tube is recommendable which serves as a cooling line.

Process Connection: The process connection can be designed as male thread or swivel nut. For pharmaceutical or food-processing industries aseptic glands or clamp connections are available. Chemical and petro-chemical industries can be supplied with any type of flange connection.

Measuring element: The user can select from among elements of Classes A ($\pm (0.15 + 0.002 \cdot t)$ °C) and B ($\pm (0.3 + 0.005 \cdot t)$ °C).

Output: Depending on the further processing of the signal, the Pt 100 can be designed as 2-, 3- or 4-wire system. Also available is a version with two PT 100 measuring elements in one shaft. In this case the Pt100's must be connected as 2- or 3-wire. For integrated head transmitter a 4...20 mA 2-wire signal is generated.

Insertion length: Customer can specify the inserting length from the sealing surface.

Connecting head: 6 different connecting heads as per DIN are available. Please refer to "Drawing for connecting heads". In versions with integrated head measuring transmitter the head Form B is used as a standard.

Technical Specifications:

Pressure /	max. 6 bar for protective stainless tube (mounting in high-pressure protective tubes possible)
Temperature /	max. +70°C at head transmitter
Neck tube /	from media temperature +120°C upwards the standard is a 120 mm neck tube (customized manufacturing possible)
Temperature range /	-50...+550°C
Material /	shaft, neck tube and thread in stainless steel 1.4571
Accuracy /	Pt100 Class A or B as per DIN IEC 751
Electrical connection /	ceramic clamping block in connecting head
Process connection /	welded or screwed in bushing, protective tube, compression fitting

Electrical Specifications:

Supply voltage /	24 VDC (for head transmitter)
Output /	1 x Pt100 2-wire, 1 x Pt100 3-wire, 1 x Pt100 4-wire, 2 x Pt100 2-wire, 2 x Pt100 2-wire or 4 to 20 mA 2-wire
Protection class /	IP54 EN 60529

PT-03

Resistance Thermometer or Thermocouples with Cable Connection

Features

- / With thread or smooth shaft
- / Cable tolerance up to 260°C
- / Sleeve -50 up to +1200°C
- / Pt-100, 2-, 3- or 4-wire
- / 3, 4 or 6 mm sensor diameter
- / Thermocouple K and J
- / Customer-specific solutions

Description:

The PT-03 cable thermometer is an universally applicable temperature sensor on the basis of Pt100 or a thermocouple. A temperature-sensitive measuring element is situated in a protective sleeve made of stainless steel which is permanently fixed to a cable. It can be supplied in different variants with regard to material and length. The measuring element is available as a PT100 class B (optional accuracy class A) in 2-, 3- or 4-wire technology or as a thermocouple type K or J. Using the PT-03, a temperature range of -50...+1200°C can be easily detected. However, the maximum temperature on the cable must not exceed 260°C. Customer-specific special solutions are available on request.

Application:

Cable thermometers are widely used in the industry in a variety of versions. Besides the versions with clamp connection housing or plug, the PT-03 exemplifies a simple and cost-effective method for measuring temperatures securely and accurately even in places which are difficult to access, e.g. shafts or narrow spaces, safely and accurately. By attaching an additional protective hose on the joint between the cable and protective sleeve, the protection class in some of the versions can be upgraded to IP68 so that the PT-03 is also suitable for measuring temperatures in wells. Basically, any type of fluid and gaseous media can be measured which are compatible with the material used.

Technical Specifications:

Protection sleeve /	stainless steel 1.4571, optionally 1.4541 or 2.4816 Inconel
Shaft length /	25 mm, 50 mm, 100 mm, 150 mm, 200 mm, 250 mm, 400 mm, special types on request
Shaft diameter /	3 mm, 4 mm or 6 mm
Connecting thread /	G1/2"-male or smooth shaft, optionally G1/4"-male, 1/4"-NPT, 1/2"-NPT or slidable compression fitting, special type connections on request
Media-temperature /	-50...+550°C for resistance thermometer -50...+1200°C for thermocouples
Temperature ranges /	-20...+70°C (PVC-cable) -60...+180°C (Silicone-cable) -65...+200°C (Teflon-cable) -50...+260°C (glass fibre insulated cable)
Cable length /	1000 mm standard, special type lengths on request

Electrical Specifications:

Measuring element /	1 x Pt100 2-wire, 1 x Pt100 3-wire, 1 x Pt100 4-wire, 2 x Pt100 2-wire, or 2 x Pt100 3-wire, 1 or 2 thermocouples type K or J
Accuracy /	Class B, optionally Class A for Pt100, Class 1 for thermocouples type K or J
Prot. Class /	IP65 as per IEC 751 Class B, optionally IP68 (cable material glass fibre: IP50)
EI. Connection /	bare cable ends, insulated, or core cable ends, optionally miniature plug for thermocouples

PT-05N

Resistance Thermometer in wall-mounted Housing

Features

/ Room temperature measurement

/ Wall-mounting

/ Class A or Class B

/ Optionally with analogue output

Description:

A Pt100 sensing resistor of accuracy class A or B is situated in a stainless steel tube; it changes its ohmic resistance according to the room temperature present outside the measuring tube. This resistance value is tapped either unaltered at the connecting terminals inside the wall-mounted housing of the PT-05 or, first, converted into a 4 to 20 mA output signal and then made available in 2-wire system.

Application:

The PT-05 resistance thermometer is used for simple measuring of room temperatures and is, therefore, used in building and air-conditioning technologies. Wherever room temperature plays an important role in regulating processes, it must be tapped accurately and output electrically. In this respect, PT-05 offers a cost-effective and yet robust solution.

Dimensions in mm:

Technical Specifications:

Housing /	120 x 80 x 55 mm (H x W x D)
Sensor length /	60 mm stainless steel (other lengths available on request)
Sensor diameter /	6 mm
Temperature range /	-50. . . +70°C
Accuracy of measurement /	Class A as per DIN EN 60751 ± (0.15°C + 0.002°C x t) Class B as per DIN EN 60751 ± (0.3°C + 0.005°C x t)
Output /	MU-410 4. . . 20 mA
Measuring resistance /	Pt100 as per DIN EN 60751 Load capacity: 0.3. . . 1.0 mA
Options /	PT1000 & Ni100

Electrical Spec.(Transmitter):

Protection class /	IP68
Cable gland /	M16 x 1.5
Power output /	4. . . 20 mA, 2-wire technology

PT-06

Resistance Thermometer for Pipes

Features

/ For round surfaces

/ Pt100, Pt1000, NiCr-Ni

/ Aluminium sensor

Description:

The PT-06 is a resistance temperature-sensor, specifically designed for round surfaces. The slightly angled form of the sensor helps to obtain the value from a greater area from rounded objects for a more accurate measurement of temperatures, as opposed to other, flat thermometers. A thermal-element (NiCr-Ni Typ K) or a resistance-temperature-sensor (Pt100/Pt1000) can be used for the measurement. The standard Version of the PT-06 comes with a 2 m silicone-cable with loose ends and end ferrules. Other lengths are available on request.

Application:

The PT-06 can be installed via tension belts or hose connectors, making it very easy to use. The indirect measuring does not disturb the media and only few to none mechanical work has to be done on the pipe itself. The PT-06 series thermometers are not subjected to any kind of process-pressures or chemical influences of the media, increasing their lifespan. To reach the highest efficiency, the use of thermal compound between sensor and pipe is strongly advised.

Technical Specifications:

Sensor /	Pt100 (4-wire) Pt1000 (4-wire) NiCr-Ni
Measuring range /	-50. . . +200 °C
Accuracy /	Pt100 / Pt1000: DIN class B NiCr-Ni: class 1

PT-07

Resistance thermometer for Ambient Temperatures

Features

- / Efficient temperature measuring
- / Surface mounted
- / IP66 protection for outside areas
- / Economic alternative

Description:

A Pt100 sensing resistor of accuracy class B is situated in a stainless steel tube, changing its ohmic resistance according to the room temperature present outside the measuring tube. This resistance value is tapped unaltered at the connecting terminals inside the wall-mounted housing of the PT-07, available as a 2-wire signal.

Application:

The resistance thermometer PT-07 supplies an easy way of measuring ambient temperatures and is best used within the fields of building- and climate-technologies. Whenever the room- or ambient-temperature is of concern for a process, it has to be measured accurately. The PT-07 offers a solution for that, while being very cost-effective but still resilient.

Dimensions in inch [mm]:

Technical Specifications:

Accuracy /	Thermistor temperature sensor: ±0.22°C @ 25°C (± 0.4°F @ 77°F); PT100 temperature sensor: DIN class B: ± 0.3°C @ 0°C (±0.54°F @ 32°F)
Operating temperature /	-40. . . +120°C
Probe diameter /	6 mm
Probe length /	88.9 mm

TD-01

Digital Thermometer

Features

- / Large size LCD-display
- / Optional analogue output
- / Various process connections
- / Completely from stainless steel
- / Protection class IP65

Description:

A temperature-sensitive resistor is located in the stainless steel sensor TD-01, which responds to a change of the upcoming temperature. The electronic modul of the unit evaluates this process and either purely indicates the temperature on a large LCD display. The purely indicating version of the TD-01 is supplied via a 3.6 VDC long life lithium battery and doesn't need any auxiliary energy. The version with power output however needs a 17 to 30 VDC supply voltage. To connect the TD-01 to the monitored process seven standard threads are available and can even be supplemented by customized versions. The electronic housing of the unit is either rigidly or cable connected to the stem and it is fixed either directly to the measuring spot by means of the process connection or wall or surface mounted by 3-hole flanges and wall brackets.

Application:

With the material-version (wetted parts stainless steel) and an IP65 protection class for the NG100 stainless steel housing, the TD-01 is well prepared for duty in common machine-, apparatus-, tank- or pipe-constructions, as well as in chemical- and food-production. Besides the standard versions (see ordering codes) special versions of the digital thermometer can be manufactured on demand. The advantage of this is that existing measuring points (protective tubes) as well as outdated, defective temperature indicators or transmitters can easily be replaced.

Technical Specifications:

Temp. range /	-200...+600°C DIN EN 60751
Ambient temp. /	-10...+50°C
Storage temp. /	-20...+70°C
Protection class /	IP65 EN 60529
Neck tube /	beginning with medium temperatures of +120°C a 120 mm neck tube is standard (customized version e.g. for thicker pipe or vessel isolations are possible)
Accuracy /	Display: 0,3% FS ± 1 Digit Sensor: ± 0,3K at 0°C; ±(0,3 + 0,005* t)
	Version with transmitter: Pt 100 Class 0,5

GT-04

Gas Expansion Thermometer with Nitrogen Filling

Features

/ Housing sizes from 2.5" to 10"

/ Stainless steel housing

/ Directly att. sensor or capillary tube

/ Temperature sensor and process connection, individually configurable

/ Measuring ranges up to +800°C

/ Optionally, alarm or analogue output

/ Measuring acc.: Cl. 1.0 and Cl. 0.6

Description:

The GT-04 series of gas expansion thermometers consists of a housing with integrated movement and a sensor system connected directly or through a capillary tube. The sensors are filled with neutral nitrogen gas that serves as a transmission medium for the temperature data. The nitrogen gas pressure in the sensor system is evaluated by the movement and mechanically displayed.

Application:

Thanks to a wide variety of possible versions, GT-04 gas expansion thermometers can be used in nearly any type of applications where the process temperature needs to be captured locally or by means of a remote display. Moreover, limit contacts, analogue output signals or optionally available temperature recorders enable evaluation of temperature data as well as controlling processes upstream or downstream.

Version (table 1):

with directly mounted sensor			
		connection at the bottom	A
		connection at the back, in the center	E
		connection at the bottom, at 90° angle (A to D: direction of 90° angle)	T
		connection at the back, at the center with rim at the back	F

with capillary tube			
		connection at the bottom with wall holder	A
		connection at the bottom with rim at the back for surface-mounting	B
		connection at the bottom with rim in the front for flush mounting	D
		connection at the back with rim at the back	F
		connection at the back, in the center with rim in the front	G
		connection at the back, eccentric with triangular front ring and U-clamp for flush mounting	H

Technical Specifications:

Versions and material / see the following pages

Limit contacts and analogue outputs / see table 7

Options / see table 8

max. Process pressure /

without protection sleeve: min. 16 bar (depending on temperature, sensor diameter and length)

with protection sleeve: 25 bar (special designs for higher pressure on request)

min. Sensor length / see table 5 (shorter lengths on request)

Depending on the medium and the sensor diameter different minimum sensor lengths are recommended.

Example:

Sensor diameter: 10 mm

Medium:

water: $L_{\min} = 60 \text{ mm}$

oil: $L_{\min} = 100 \text{ mm}$

air: $L_{\min} = 160 \text{ mm}$

max. Sensor length / 3 m (greater lengths on request)

max. length of capillary tube / 30 m (greater lengths on request)

Accuracy /

NG 63, 80,
NG 100, 160, 250: Cl. 1.0

Optional
NG 100, 160, 250: Cl. 0.6

Overload safety / 30 % of operating range end value however, max. +800°C (optionally 100 %)

Protection / IP65

Versions:

GT-04 Gas Expansion Thermometer

R = Thermometer with directly mounted sensor

C = Thermometer with capillary tube

Materials:

X = housing stainless steel 1.4301, with bayonet ring, IP 65 mineral glass dial, 4 mm aluminium scale, white, lettering black aluminium indicator, black brass movement

Housing diameter:

Nominal size: diameters: 63, 80, 100, 160, 250 mm

Customized designs:

(on request) rectangular housing:
72x72, 96x96,
144x144, 192x192,
72x144 vertical or horizontal,
96x192 vertical or horizontal
temperature recorder rectangular:
192 x192, 288x288 mm,
round: d = 260 mm

Damping:

X = unfilled

L = with glycerin filling for vibration attenuation

S = with silicon oil filling (increased vibration attenuation)

K = with oil filling (for devices with built-in limit contacts)

Sensor:

The temperature sensors are basically made of stainless steel 1.4541. Minimum sensor length is limited by the parameter L_s (see Table 5). This parameter indicates the sensitive part of the sensor which must be immersed into the medium in any case.

While specifying, please use the following format:

Sensor diameter x sensor length (in mm)

Example: 10x200

	lead cladding	16	-20	200	PB

Limit contacts and analogous outputs:

Limit contacts are intended for alerting when certain threshold limits are crossed in either direction. The GT-04 thermometers in housing sizes 4" (100 mm) and 6" (160 mm) as well as the rectangular housing designs can be optionally equipped with up to 4 snap action contacts or inductive contacts integrated into the housing. The contacts will be designed as NO-contact or NC-contact (as the case may be, with reference to increasing temperature). In addition, micro-switches with higher switching load, contacts mounted on the housing or pneumatic contacts can be supplied on request.

Analogue outputs are meant for transferring the measuring data to higher-level display, evaluation or control systems. Angle of rotation measuring transmitters mounted into the housing or PT-100 measuring transmitters with sensor integrated PT-100 sensor are available.

Parameter L1: for sensor connections B, C, CS3: L1 = sensor length
for sensor connection A04: L1 = sensor length + 15

Example: TS02.2.120 protection sleeve with G1/2-male sensor-side, G 3/4male process-side, length 120 mm, for sensor diameter 10 mm

BT-01

Bimetallic Thermometer

Features

/ Affordable price

/ Robust

/ Accuracy Class 1.0

/ Bayonet ring housing

/ Many possibilities of connection

/ Switching contacts

Description:

In bimetallic thermometers, varying thermal expansion of metals is utilized to measure and regulate temperatures. A spring element is present in an immersible brass or stainless steel tube that consists of two curved metallic strips rolled over each other, possessing different coefficients of thermal expansion. When the temperature rises the outer metallic strip expands more than the inner strip. The torsion of the spiral resulting from this action directly influences an indicator movement that displays the temperature on a dial.

Application:

The BT-01 series of precision bimetallic thermometers offers an excellent alternative to machine or glass thermometers considering the fact that they are just as cost-effective and accurate as their siblings, however, offer better reading comfort. The design of the bimetallic thermometer is extremely robust and the protection tubes which can be supplied in brass or stainless steel, are resistant to hostile media. These thermometers are available for direct mounting as well as for inserting into protection tubes, optionally with a smooth shaft, permanently fixed threaded stem or swivel nut in all commonly used thread variants. This makes the BT-01 compatible with nearly any type of processes. Starting from a minimum temperature of -50°C up to a maximum temperature of $+500^{\circ}\text{C}$, the BT-01 series of thermometers is capable of recording a temperature range that covers a large section of all applications.

Versions:

BT-01 Bimetallic Thermometer

Mounting position: The mounting position of BT-01 can be selected between axial and vertical positions. For most of the versions a pivoted housing that can be tilted in both directions is available on request.

Nominal size: The housing diameters can be selected between 63, 80, 100 und 160 mm.

Process connection: All versions are available with smooth shaft, permanently fixed screw on pin, turnable screw on pin or with loose-fitting swivel nut where only the variants with permanently fixed pin can be provided with NPT thread.

Immersion tube diameter: The immersion tube diameters can be selected between 6, 8 and 10 mm to facilitate mounting in protection tube as well as for direct mounting.

Shaft length: The immersion shaft is manufactured as per customer's specification for length which must be indicated in mm from the point of sealing surface.

Neck tube: If the housing and process connection are separated, for example, by means of an insulating layer, the thermometer can be fitted with a neck tube. Normally, these extensions protect the display from extreme access heat. The lengths are displayed in a table.

Housing material: St. steel – other materials on request.

Operating range: The operating ranges are between -50°C and +500°C.

Additional features: For all devices marking or maximum value indicators and fluid filled housings are available (for 4" and 6" diameters only).

Connecting thread: With regard to connecting threads various cylindrical or conical thread standards can be selected.

Material: As materials for the immersion tube and thread brass or stainless steel can be selected.

Neck tube lengths (standard):

Temperature	Length for vertical thread	Length for axial thread	Length for immersion tube
< 300 °C	37 mm	12 mm	11 mm
> 300 °C	60 mm	37 mm	37 mm
500 °C	-	60 mm	57 mm

Technical Specifications:

Ambient temp. /	-25. .+70°C
Pressure /	PN16 without immersion tube PN50 with immersion tube
Accuracy /	Class 1 according to DIN EN 13190
Housing /	Bayonet ringcap, 63, 80, 100, or 160 mm diameter
Housing material /	St. Steel 1.4301 – other materials on request
Protection class /	IP 65 according to EN 60529
Options /	· crimped ring housing with/without oil filling · Low-cost-version

MT-01

Industrial Thermometer

Features

- / Long scale
- / Robust design
- / Scratch-proof lettering
- / Legible from any direction
- / Straight or angled immersion tube
- / Connectable to any type of protection tubes

Description:

The immersion tube of the MT-01 series of industrial thermometers is either directly in contact with the medium or it is built into a protection tube to counter high processing pressure or chemically hostile environment. Within a short span of time it picks up the medium's temperature and transfers it to a glass capillary in its interior. The fluid filling in the capillary expands proportionally to the temperature. Its height is a reference for the measured temperature which can be read on a burned-in scale with an accuracy of 1% of the range end value.

Application:

The Profimess MT-01 Industrial Thermometers are deployed where temperatures need to be reliably measured without the use of electrical power. Their top portion is V-shaped and, therefore, can be comfortably read from any angle of view. It consists of brass-coloured anodized aluminium in which the lettering is placed below the anodized layer to ensure maximum mechanical strength. The prismatic capillary in the stem consists of solid glass material with a diameter of approx. 6 mm and has a black burned-in scale which is also absolutely resistant to scratches. The immersion tubes of the MT-01 series are made of brass for media temperatures up to 200°C. Moreover, steel or stainless steel tubes are also used. For special applications like sea-water, different suitable materials can be used.

Versions:

MT-01 Industrial Thermometer

Process connection: The thermometer can be connected to the process or to the protection tube without screw threads by insertion, with threads for screw mounting or by means of a brass swivel nut.

Immersion tube position: The top part and immersion tube are in vertical or rectangular position to each other. A third possibility is aligning it at 135°.

Scaling: The top part of MT-01 can have a single-side Celsius scale or a Celsius and a Fahrenheit scale on the right and left side of the capillary.

Filling: The capillary is white back with a wide, easy-to-read column with blue filling. The graduation is indelibly diffused into the glass. Other capillary fillings are available.

Insertion length: For MT-01 intended for insertion, the insertion length is according to the immersion tube length from "lower edge of the pin" and, in the screw on version and the variant with swivel nut it is the immersion tube length including the thread.

Connecting thread: Different thread types are available for the thread pin of MT-01.2 as well as for the swivel nut of MT-01.3.

Immersion tube material: The screw stems are available in brass, made from one piece, as per DIN Standard type B with threads for mounting lengths up to L1 = 63 mm. They are hard-soldered for other lengths.

customer specification

Description:

In thermocouples, the temperature dependence of the electrical voltage between two wires of different materials is utilized to which a setpoint of the temperature to be measured and to which another point of a fixed reference temperature are subjected. In the TE-01 the welded ends of both wires being used are embedded in a metallic or ceramic protection tube which are insulated from each other. The reference point is situated in the connecting head of the device. When the temperature of the measuring point at the tip of the protection tube changes in relation to the reference temperature, a thermal voltage occurs which is proportional to the change in the temperature and the same can be tapped at the connecting head. For foolproof and accurate functioning of the thermoelements, the reference temperature must be constant and 0°C. In case of values like 20...50°C, the resulting errors can be balanced by generating a compensation voltage or by taking the ratios in the evaluating software outputs into consideration. However, if the TE-01 is used with a head-mounted measuring transmitter which is capable of converting the thermal voltage directly into a 4...20 mA current signal, the compensation will be generated internally and hence minimizes the measuring errors.

Application:

Thermoelements are used in the industry wherever conventional resistance thermometers reach their limitations. This is the case, mostly, if the media temperatures are too high or if space constraints exist. For operating the TE-01, the user has a choice of three mostly used elements (Type J, Type K and Type S) depending on the required working temperature and the extent of the resulting thermal voltage. Normally, only elements belonging to Class 1 are used which ensures the maximum accuracy. Depending on the media temperature and media properties protection tubes made of stainless steel or ceramic can be supplied. A wide range of connection variants offer maximum possible compatibility with the process. Insertion lengths and shaft diameters can be implemented directly according to customer specifications so that the TE-01 can be customized to any point of measurement.

Versions:

TE-01 Thermocouples in Protection Tube

Protection tube: For temperatures up to 800°C protection tubes made of stainless steel can be used. For higher temperatures, we recommend ceramic protection tubes with a metallic support tube that is capable of managing temperatures up to 1600°C.

Process connection: The versions with a metallic protection tube can be supplied with a variety of connecting thread types or with a smooth shaft. Linking to the process can be, for example, by means of a screw in bushing or compression fitting. In the case of variants with ceramic protection tube, the materials like C610 and C799 are available which can be supplied with 15 mm or 24 mm diameters. In this case, the process connection is on the metallic support tube over a stopper flange or a screw in bushing with compression fitting.

Output: Depending on the temperature range and the required thermal voltage, thermoelements of Types J (Fe-CuNi up to 750°C), K (NiCr-Ni up to 1200°C) or S (Pt10Rh-Pt up to 1600°C) are mounted. Other DIN types can be supplied on request. In the versions with integrated head-mounted measuring transmitter the resulting thermal voltage is converted directly into a 4 to 20 mA current signal in 2-wire system.

Insertion length: The insertion length is the length of the shaft from the sealing surface and is manufactured as per the customer specifications.

Shaft diameter: In the case of stainless steel protection tubes the diameters can be selected from 6 mm, 9 mm, 11 mm and 15 mm depending on the conditions of available space. In the case of ceramic protection tubes only 15 mm or 24 mm are used.

Connecting head: Six different connecting heads as per DIN are available. Please refer to "Drawings for connecting heads". For versions with integrated head measuring transmitters, we're using head form B by standard. The connecting head BUZ-H is optional.

El. Connection /	ceramic connection terminal in connection head
Process Connection /	stopper flange, welded or screw in bushing

Electrical Specifications:

Supply voltage /	24 VDC (for head transmitter)
Output /	Typ J, Typ K, Typ S or 4...20 mA
Protection class /	IP65

Dimensions in mm:

Connecting Heads for Insertion-Thermocouples:

Form A – cover with 2 fastening screws
Material: aluminium pressure casting

Form B – cover with 2 fastening screws
Material: aluminium pressure casting

Form BUZ (DAN) – flap cover with bracket
Material: aluminium pressure casting

Form BUZ-H (DANW) – high flap cover with bracket
Material: aluminium pressure casting

Form BEG – screw cap with chain
Material: stainless steel 1.4571

Form GG – cover with screw closure
Material: steel/cast iron

Possibilities of Installation for Insertion-Thermocouples:

welded bushing for male thread

compression fitting for screwing in for smooth shaft

stopper flange for ceramic protection tube

screw in bushing for ceramic protection tube

screw in protection tube for male thread, one-piece

screw in protection tube for male thread, multi-piece

weld in protection tube for male thread

screw in protection tube for swivel nut, one-piece

screw in protection tube for swivel nut, multi-piece

weld in protection tube for swivel nut

TA-17

Temperature-Labels for recording of overheating

Features

- / More security
- / Economic alternative
- / Secure documentation
- / Proof for warranty issues

Description:

The self-adhesive temperature-labels Type TA-17 possess temperature-sensitive elements. On reaching the corresponding nominal temperature, they change their colour irreversibly. They can be chosen from a wide range of temperatures and special, resilient versions for harsher environments. The labels are manufactured and tested with a high quality in mind, after the NIST-standard (U.S.-Industry standard). Therefore, the TA-17 labels are superior in quality compared to the majority of other temperature-labels.

Application:

The temperature labels are directly applied to the object to be monitored. They are resilient against solvents, fuels, fats, oils, water and vaporized water. Irreversible labels are being used to rule out a sole and exclusive fault in warranty cases. They protect hydraulic systems, electrical and mechanical equipment in an economic manner. Process temperatures can quickly be proved or measuring devices checked for accuracy. Lower temperature labels should be cooled until applied, to prevent an early discolouration through environmental influences. Because of the additional logistic requirements, all models with a working temperature of 48°C or less will be only available in reasonable quantities.

Robust Temperature Labels:

These labels are manufactured to be very resilient and can withstand even high temperatures, vacuum areas und corrosive gases. Therefore, they are used best within semiconductor environments.

TS-01

Temperature Switch

Features

- / Any mounting position
- / Compact design
- / Brass or stainless steel
- / Cost-effective

Description:

A fully compound-filled bimetallic thermostat is embedded in a fitting from brass or stainless steel. The thermostat has a temperature value set at the factory. On reaching this temperature when the sensor is fully immersed into the medium, the switch connects either as a NO-contact or a NC-contact between pins 1 and 2 of the DIN plug which is included in the delivery. On request, the plug can be provided with an additional LED which will display the switching status.

Application:

As a temperature switch, the TS-01 is unbeatable in its simplicity. It is widely used in various applications and it is capable of reliably monitoring temperatures with fixed switch- and return points in the narrowest of space at a very affordable price. The version made of stainless steel 1.4305 is resistant to a number of extremely hostile media, thus making the TS-01 ideally suited for applications in the chemical and petrochemical industries without any problem.

Versions:

TS-01 Temperature Switches

Sensor material: Optionally the TS-01 is available in brass or stainless steel versions

Switching values: The switching point can be freely selected between 40 to 120°C at intervals of 10°C

Contact function: The TS-01 can be supplied as NC or NO.

Materials: Ni-plated brass CW614N or stainless steel 1.4305, plug material PA 6.6, NBR

Dimensions in mm:

Technical Specifications:

Connection /	G1/2"-male (G3/4"-male on request)
Pressure /	PN100
Hysteresis /	10K to 20K
Tolerance /	+/-10K
Weight /	0.12 kg
Mounting /	sensor should be fully covered from media in front

Media temperature /

Switch	Media temperature
40 °C	- 20...+90 °C
50 °C	-20...+100 °C
60 °C	-20...+110 °C
70 °C	-20...+120 °C
80 °C	-20...+130 °C
ab 90 °C	-20...+140 °C

Electrical Specifications:

Electrical connection /	plug connection DIN 43650-A (plug type "Hirschmann")
Protection class /	IP65
Switching load /	250 VAC, 10 A
Media /	e.g. water, gas/air, oil
Option /	Tolerance selection from smaller hysteresis up to 10K

Electrical Connection:

TS-03

Surface-Mounting Thermostat with Rigid or Flexible Connection

Description:

Thermostats belonging to the TS-03 series are universally applicable temperature switches which, according to the mounted evaluating unit, are designed as temperature switches, temperature controllers or temperature limiters. The limiter and switch versions can also be supplied with safety engineering which means that, in the event of a defect in the measuring system in the TS-03, an alarm signal triggers and cannot be reset again. Any contamination in the medium under surveillance with the filling in the TS-03 cannot escape undetected under any circumstances. In this, the principle of measuring is simple but very reliable. A fluid or gas is located within the sensor system of the TS-03 depending on the control range. When the temperature rises the filled medium expands. In turn, a micro-switch is activated by means of a mechanical transmission system on reaching the limiting temperature. Depending on the design as a controller, switch or limiter, this switch acts as a change-over or NC-contact which reverts to the initial position either automatically on returning to normal temperature value or manually by releasing the appropriate button. The TS-03 series is available with a rigid or flexible connection so that they can be directly screw mounted into the process or also installed away from the process. The delivery for thermostats with rigid connection includes suitable brass protection tubes, other materials and lengths are available.

Features

- / Switch, controller or limiter
- / Optionally with safety engineering
- / Temperatures up to +500°C
- / Gas or fluid-filled
- / Brass, steel or stainless steel protection tube

Application:

Thermostats belonging to the TS-03 series are used wherever any fluid or gaseous medium needs to be reliably monitored for reaching a limiting temperature. The micro-switch used is capable of processing high degree of switching performance and, therefore, capable of switching pumps, magnetic valves or heating rods directly. Thanks to the wide range of connection variants designed for universal application of brass, steel or stainless steel protection tubes including rigid or flexible versions and the various temperature ranges up to +500°C, the limits for the TS-03 are very far fetched which has enabled the devices to achieve a strong market penetration.

Versions:

TS-03 Surface-Mounting Thermostat

Temperature controller: If the media temperature at the sensor of the temperature controller exceeds the externally adjustable limiting temperature, the micro-switch is actuated by means of the transmission mechanism and the power circuit gets opened or closed. On dropping below the limit (by hysteresis) the micro-switch is reset automatically to initial position.

Temperature switch: If the media temperature at the sensor of the temperature controller exceeds the limiting temperature adjustable internally by means of a screw-driver, the micro-switch is actuated by means of the transmission mechanism and the power circuit gets opened or closed. On dropping below the limit (by hysteresis) the micro-switch is reset automatically to initial position.

Safety temperature switch: If the media temperature at the safety temperature switch exceeds the limiting temperature adjustable internally by means of a screw-driver, the micro-switch is actuated by means of the transmission mechanism and the power circuit gets broken or closed. On dropping below the limit (by hysteresis) the micro-switch is reset automatically to initial position. In case of possible damage to the measurement system, that is, if the expansion fluid escapes, the pressure in the diaphragm drops and opens the power circuit continuously. Unlocking will no longer be possible. Similarly, if the sensor cools down to below approx. -20°C the power circuit gets opened. Subsequently, on reaching a temperature above approx. -20°C the power circuit is gets closed automatically.

Safety temperature limiter: If the media temperature at the safety temperature limiter exceeds the limiting temperature adjustable internally by means of a screw-driver, the micro-switch is actuated by means of the transmission mechanism and the power circuit gets opened or closed. On dropping below the limit (by hysteresis) the micro-switch is reset automatically to initial position. In case of possible damage to the measurement system, that is, if the expansion fluid escapes, the pressure in the diaphragm drops and interrupts the power circuit continuously. Unlocking will no longer be possible. Similarly, if the sensor cools down below approx. -20°C, the power circuit gets opens. Subsequently, on reaching a temperature above approx. -20°C the safety temperature limiter must be unlocked manually.

IR-03

Compact Infrared Thermometer

Features

/ Compact, with integrated sensor

/ Low cost

/ IP 65 (NEMA 4)

/ 4...20 mA analog output

/ Constructed of

304 stainless steel

/ Temperature range up to 500°C

/ 24V DC power

Description:

The IR-02 infrared thermometer is a pyrometer with a thermopile detector. It utilizes the spectral region of 8 to 14 micrometers so as to measure temperatures in the range of 0...+500°C at a distance ratio of 20:1 without contacting. The radiation of the object of measurement in this wavelength is constantly compared with the radiation of the sensor's surroundings and the current value of the object's surface temperature is delivered to the output of the IR-03 within at least 500 milliseconds. A 4...20 mA signal proportional to the temperature is available in 2-wire system.

Application:

Non-contacting infrared thermometers are used in the industry whenever it is not possible to attach a conventional temperature sensor due to high temperature of the object being measured or due to its geometrical characteristics. Pyrometers recognize only surface temperatures; they are free from repercussions and can measure even objects of small specific heat capacity or less thermal conduction such as plastic or various types of glass. The dynamics are solely determined by the evaluation electronics, with the result that fast changing conditions of temperature can be captured. Typical applications are found, for example in the glass, paper and plastic industries as well as in Research & Development activities.

Technical Spezifikationen:

Range /	0° ..500°C
D:S Ratio /	20:1
Spectral range /	8 ..14µm
Emissivity /	0,95 fixed
Accuracy /	0° to 500°C: ± 1% of reading or ±2°C, whichever is greater
Repeatability /	1% or ±1°C
Resolution /	120 µA, 0,3°C
Response time /	500 ms
Ambient /	0° ..50°C
with air cooling	0° ..90°C
with water cooling	0° ..200°C
Storage /	-20° ..70°C
Relative humidity/	10% ..95% none-condensing
Hausing material /	304 stainless steel
Dimensions	18 x 120 mm / thread M18 x 1
Weight	270 g

Electrical Spezifikationen:

Output /	4 ..20 mA, 2-wire
Wiring /	3 m PVC-Kabel
Supply /	24 V DC
Protection Class /	IP65 (NEMA 4)

Dimensions in mm:

IR-04

Infrared Thermometer

Description:

The IR-04 series infrared thermometers measure temperatures in the range of -32°C to $+1500^{\circ}\text{C}$ at a distance ratio from 8:1 to 50:1 without contact to the object. The radiation of the object of measurement is constantly compared with the radiation of the sensor's surroundings and the current value of the object's surface temperature is displayed by the IR-04 within at least 500 milliseconds. An additional thermocouple probe can be attached to the IR-04 for measuring inside objects or fluids. The thermocouple can also be used to measure the emissivity of the target and automatically corrects the measurement accordingly. A version with USB adapter and data logging software can be used for easily recording the measured values or for stationary use over time, in intervals from 1 second to 999 hours. A tripod is optionally available. The data can be stored in a text file to be used with programs such as Excel™, Access™ or Word™ for further analysis, graphing and reports. All handheld devices use a 9 V battery as power source, offering continuous measuring up to 16 hours.

Features

/ For temperatures up to 1500°C

/ Very robust

/ Ranges up to 50:1 (D:S ratio)

/ Memory log

/ Continuous reading

/ USB connector

Application:

Handheld infrared thermometers are used in the industry whenever a quick measuring is needed. Because of their range and versatility, they can be used to measure the surface temperature of very hot and hard to reach objects from a safe distance. An additional probe expands the range of application even further, as well as various configuration options, like adjustable emissivity. The probe can be used for cooling chain testing in the food industry or automotive maintenance. The IR-04s recognize surface temperatures; they are free of repercussions and can measure even objects of small specific heat capacity or less thermal conduction such as plastic or various types of glass. The dynamics are solely determined by the evaluation electronics, with the result, that fast changing conditions of temperature can be captured.

RF-01N

Transmitter for relative humidity and temperature of Gases

Description:

A capacitance-based polymer sensor is used to measure relative humidity in the RF-01N. Polymer sensors consist of two electrodes separated by a film of thermoset polymer that absorbs or releases water as the relative humidity of the gas that surrounds the sensor changes. Capacitance measurements of the polymer film are used to determine the relative humidity. Polymer sensors can measure relative humidity from 0...100%, respond rapidly and exhibit no drift. Capacitance sensors are unaffected by most contaminants and are not damaged by freezing or inundation by water. Sophisticated integrated circuits provide a high level, fully conditioned and temperature compensated 4...20 mA or 0...10 VDC output signal. A temperature sensor is also integrated in the dual output combined humidity/temperature version transmitters.

Application:

The RF-01N is a two-wire transmitter with a 4...20 mA loop powered output or 0...10 VDC output. The sensor recovers rapidly from 100% saturation and is calibration free. The polymer capacitance sensor is not affected by condensation, fog, high humidity or contaminants. The RF-01N provides a stable, repeatable, and accurate means of measuring humidity only or both temperature and humidity in the harshest of environments. The combined humidity/temperature version provides dual 4...20 mA or 0...10 VDC output signals to control both humidity and temperature with one sensor which reduces installation costs. The duct mount version is also available with an optional alpha-numeric LCD display to provide local indication of humidity and temperature simultaneously. Typical applications are monitoring of humidity and temperature such as exhaust, outside air and supply air.

Features

/ Duct mount or outdoor installation

/ Long term stability

/ Accuracy 2%, 3% or 5%

/ Recovers rapidly from

100% saturation

/ Analog output for humidity and optional for temperature

/ Local alpha-numeric display for duct mount models (optional)

Versions:

RF-01N Transmitter for relative humidity and temperature of Gases

The series RF-01N for relative humidity and temperature can be supplied as an outside air model or as a duct mount model. To protect the sensor from damage caused by particle bombardment and damaging deposits or even dust portions both models can be supplied fitted with a sintered filter. Duct mount models are available with an optional 2-line alpha numeric LCD-display.

Options:

LCD-Display: 2-line alpha numeric LCD, 8 characters / line, display resolution: 0.1 % RH; 0.1°C (for duct mount only)

PT100 / PT1000: RTD temperature sensor DIN Class B; ± 0.3°C at 0°C, (Option only for models with a single humidity output signal)

BE-01

Inflow and Outflow Calming-Section for Flowmeters

Features

- / Brass or stainless steel versions
- / O-Ring or flat seal
- / Inflow section length 10 x DN
- / Outflow section length 5 x DN
- / Easy to mount
- / Pressure up to PN 350
- / Temperature up to 160°C
- / High chemical resistance
- / Thread as per DIN EN ISO 228-1

Description:

The BE-01 inflow and outflow sections are developed to produce a rectification of the flow profile, as well as to reduce swirl effects and thus allow accurate and repeatable flow measurement. The series BE-01 is made of brass or high quality stainless steel (1.4571) and therefore has a high chemical resistance to a number of industrially used liquids and gaseous media. The process connection is made by connecting thread to DIN EN ISO 228-1 and ensures a quick and safe installation. When using commercially available pipes and fittings as inflow or outflow sections, the seal often poses a danger to the measuring instrument. Thus, for example, excessing sealing material, such as hemp or Teflon®tape, can wind around the sensor and cause a permanent damage. The inflow and outflow sections of the series BE-01 are neatly and securely sealed with O-rings or flat seals.

Application:

BE-01 inflow and outflow sections are suitable for liquids and gaseous media. They can be used everywhere in the industry, where asymmetrical flow affect the measurement. BE-01 are ideally suited as inflow and outflow section for flow sensors, flow meters or flow switches.

Technical Specifications:

WS-64

Adapter

Features

- / Economical
- / Temperature decoupling
- / Various materials

Description:

The WS-64 is an adapter according to DIN 16281 for the installation of pressure measuring instruments. Using an adapter could make sense, wherever an instrument can not be connected directly to the pipe. This could be the case, when the plant offers not enough space or the operator wishes to observe all devices conveniently in one place. The WS-64 is also an economical, though not quite as effective, alternative to conventional cooling lines and can be used for temperature decoupling to protect heat-sensitive devices from radiated heat.

Application:

The adapter can be mounted, for example, with a wall-mounting bracket, in order to securely connect a pressure gauge with a hose or pipe. The various materials and connection sizes make the WS-64 versatile for application.

Technical Specifications:

Process connection /	G ½" or G ¼"
max. Pressure /	400 bar / brass 250 bar
max. Temperature /	
Brass:	120°C
Steel:	200°C
Stainless Steel:	200°C

SR-61

Siphon

Features

/ Cost-effective

/ Up to 400°C

/ Up to 160 bar

/ Cooling-line and particle-filtration

Description:

Siphons can be used to protect pressure measuring devices, like pressure gauges, from high temperatures or pressure surges and pulsations. They are available with a straight, circular (DIN 16282 C) or U-shaped (DIN 16282 A) pipe with 90° turn.

Application:

The large surface of the tube will cool the media with the ambient air temperature. Flowing through multiple curves or a circle dampens pressure surges and keeps the pressure at the device constant. A siphon can be used for fluids, gases and even steam. It can be installed with a G 1/2" connection. The curvature of the pipe also helps to protect the device from particles, since these can be deposited here.

Technical Specifications:

Process connection /	G 1/2"

BG-01

Flow Limiter

Features

- / Flow quantity regulation without auxiliary power supply
- / Power-saving by limiting of flow
- / Compact design
- / Easy to mount
- / All-metal version without plastics
- / Brass or stainless steel material

Description:

The BG-01 series of flow limiters has been developed for limiting the flow of water-like media to a particular value. They ensure that the flow value does not exceed even during fluctuating forward or reverse pressures. In contrast to most of the devices of this type normally available in the market, the BG-01 limiters have a stainless steel spring element instead of the commonly used plastic membrane. As a result of the differential pressure occurring over the limiter, the spring element gets pressed more or less against the sealing surface of the housing. The split opening between the sealing surface and the spring varies continually. As a result of the enlargement of the split opening when the pressure falls or, as the case may be, its decrease when the pressure rises, the quantity of fluid passing through the device is maintained at a constant rate.

Application:

These devices are used for all water-like media. They can be deployed in water distribution systems in the industry, in sanitary and car-washing installations and in other fields.

Technical Specifications:

min. Regulating pressure /	2 bar
max. Differential pressure /	10 bar
max. Temperature /	200 °C
Accuracy for H ₂ O at 20°C /	up to 2l/min ± 15% from 3l/min ± 10%
Wetted materials /	

Body:	brass / st. steel 1.4305

The flow quantities are given according to the design of the devices and cannot be changed by the customer.

By adding several individual elements nearly any flow value can be achieved (see data sheet BG-03).

BG-03

Flow Limiter for Large Quantities of Flow

Features

- / Regulation without ext. power supply
- / Power-saving
- / For diameters DN20 to DN100
- / For screw fitting in existing pipes
- / All-metal version
- / Brass or stainless steel material

Description:

The BG-03 series of flow limiters has been developed for limiting the flow of water-like media to a particular value. They ensure that the flow value does not exceed even during fluctuating forward or reverse pressures. In contrast to most of the devices of this type normally available in the market, the BG-03 limiters have a stainless steel spring element instead of the commonly used plastic membrane. As a result of the differential pressure occurring over the limiter, the spring element gets pressed more or less against the sealing surface of the housing. The split opening between the sealing surface and the spring varies continually. As a result of the enlargement of the split opening when the pressure falls or, as the case may be, its decrease when the pressure rises, the quantity of fluid passing through the device is maintained at a constant rate. A version for flanged installation is optionally available. In doing so, the BG-03 will be intermediated flange clamped (flanges/adapter not included).

Application:

These devices are used for all water-like media. They can be deployed in water distribution systems in the industry, in sanitary and car-washing installations and in sterilization and water treatment installations.

Technical Specifications:

FT-01

Strainer with and without Magnetic Separator

Features

- / For pipes of G 1/4" to G 2"
- / Filter mesh from 0.25 to 1 mm
- / Compact design
- / Gunmetal or st. steel

Description:

The FT-01 series of strainers is designed as slanted seat filter; they reliably prevent damages to the devices installed inside the pipe caused by impurities in the medium. Especially measuring devices with magnetic components can be protected by strainers with magnetic separators against malfunctioning due to ferrite particles.

Application:

The strainer has to be installed in the marked direction of flow and the filter should point downwards so particles can be deposited accordingly. The FT-01 can be used for fluids, gases (with the exception of fluids group 1 from guideline 2014/68/EU) and vapours up to 150°C, water, mineral, gear, heating and hydraulic oils etc. so as to protect pumps, gearboxes and flow measuring devices.

NV-01

Needle valve

Features

/ Brass, steel or stainless steel

/ Usable up to 550°C

/ Up to PN 400

/ Compact Design

Description:

Profimess' needle valves are intended for precise regulation of the quantity of fluids flowing through pipes. The devices body is constructed in two parts. The upper part is screwed into the body. Designs available in brass, steel and stainless steel in nominal diameters of IG 1/8" to IG 2" allow a wide range of applications which is why these devices are used in the entire industry.

Application:

Profimess' needle valves are deployed wherever flowing fluids in industrial installations need to be shut off, reduced or regulated. The stainless steel version of the valves can be deployed up to 400 bar and 350°C, whereby the dependence of maximum pressure and the operating temperature must be taken into consideration. Higher temperatures, up to 550°C are available on request. They are particularly suitable to be used as shut-off devices in measuring operations in level and flow control.

PV-01

High-Precision Control Valve for Gases and Liquids

Description:

The PV-01 high-precision control valves are intended for precise fine-flow adjustment of gases or liquids flowing through pipes. The control valves consists of an inner valve and a body with straight or angled process connection. The PV-01 has a 15-turn spindle to fully open from a closed condition. The spindle operates practically without any hysteresis and closes leak-proof clockwise or optionally counterclockwise. The valve needle is non-rotating and thus provides a stable adjustment. Various Cv-values ensure optimal control ranges.

Features

- / High accurate flow-adjustment
- / Straight or angle designs
- / Cw- or ccw-closing
- / 15-turn spindl
- / Minimal hysteresis
- / Leak-proof when closed
- / Different Cv-values
- / Aluminium, brass or SS versions

Application:

High-precision control valves are deployed wherever flowing gases or liquids in industrial installations require a very fine and accurate adjustment. They are especially suitable for measuring operations in the areas of chemical process engineering, analytical technology, biotechnology, chemical nuclear technology, medical engineering and environmental technology.

Technical Specifications:

Design type /	straight valve, angled valve or valve cartridge for selfmounting (without body)
Rotating direction /	valve cw-closed (standard) or valve ccw-closed
Valve turns /	15-turn spindle, practically without hysteresis
Housing material /	aluminium anodized / brass nickel-plated or stainless steel 1.4305
Seal /	FKM, EPDM or FFKM
Process connection /	G 1/8"-IG, G 1/4"-IG, G 1/2"-IG, NPT 1/4"-IG or G 1/4"-IG female thread for compression fittings
Media /	5 µm filtered compressed air, non-corrosive gases or liquids
max. Operating pressure /	40 bar
min. Operating temp. /	-40 °C
max. Operating temp. /	+100 °C
Leak rate /	< 1 x 10 ⁻⁵ mbar l/s He
Options /	- standard knob with locking ring - locking nut (instead of standard knob) - digi-knob, 100 divisions and with display, only right-hand closing

C_v-Values High-Precision Control Valve:

C_v-values for valves NG 1.0 to NG 6.5 (C_v-value 1 = 1 m³/h water at Δ p of 1 bar)

Process connection	1.0	1.5	2.0	2.5	3.0	4.0	6.5
C _v -Value (m ³ /h)	0.0007	0.005	0.015	0.038	0.17	0.54	1.00

C_v-Value: For these flow values of water at 20 °C exactly 1 bar pressure will drop at the relevant valve. These are taken into regard so as to assess the loss of pressure on the valve with reference to the entire range.

KG-01

Ball Valve in Brass or Stainless Steel

Features

/ High temperature resistance

/ Up to PN64

/ 2 or 3-way versions

/ FKM and PTFE sealings

Description:

The KG-01 series of ball valves are suited for shutting-off the flow of various media. Due to the materials used, such as PTFE, FKM, brass or stainless steel, they are resistant to chemically hostile, gaseous, fluid, viscous, powdery and polluted substances. Permissible ranges of pressure and temperature allow them to be deployed in difficult processes, for example, in chemical and petrochemical industries, in metal and container construction or in the air-conditioning, ventilation and thermal technologies.

Application:

Ball valves have various uses in almost every industrial and private sector. The materials can be easily fitted to the customers needs and their toughness make the Type KG-01 ball valves to reliable devices for House- & Sanitary-technology, plants, oils, petrols, compressed air, chemical processes or heating technology.

Technical Specifications:

AH-65

Manometer Gauge Stopcock According to DIN 16262 A/B & 16263

Features

/ Monitor and vent the pipe

/ Brass or stainless steel

/ -10°C to 50°C

/ Up to 25 bar

Description:

A stopcock is used for the inlet, flow or outlet in pipes to control liquids and gases. Depending on the switch position, measuring devices can receive pressure (operating mode), or be relieved from it (de-pressuring mode). In the blow-out position, fluids and gasses can pass through the stopcock.

Application:

Stopcocks are available with or without an additional test connector (DIN 16263). This connector can be used for another measuring device, to test an installed pressure gauge. The stopcock can be installed via G $\frac{1}{4}$ " or G $\frac{1}{2}$ " threads.

Technical Specifications:

Process connection / G ½" or G ¼"

AV-67

Manometer Gauge shut-off Valve according to DIN 16270 A & 16271 A

Features

/ Up to 400 bar and 200°C

/ Closing, opening and throttling

/ Additional test connector

Description:

This shut-off valve can also throttle the pressure in a pipe, instead of just opening and closing it. The AV-67 is, in its stainless steel version, very tough, and can resist pressures up to 400 bar and 200°C. An optional test connector can be used to replace measuring instruments or test the measurement result with another device, without removing it from the process or interrupting the actual operation.

Application:

Shut-off valves can be installed in front of devices operating only within a certain pressure range or a certain amount of media. This way, measuring devices can be started slowly and protected from pressure surges.

Technical Specifications:

Process connection /	G 1/2"
max. Pressure /	400 bar; 250 bar (Brass)
max. Media temperature /	-10°C to 200°C; resp. -10°C to 120°C (Brass)

RS-68

Shock Preventer

Features

/ Variable configuration

/ Easy to handle

/ Different materials

/ PN 250 and PN 400

Description:

The RS-68 is a shock preventer to limit pressure surges and pulsations from damaging pressure gauges and transmitters. It can also be integrated into any process easily, to protect a variety of other devices too. The throttling effect is generated through changing the flows inlet size with an adjusting screw.

Application:

Whether in general mechanical engineering, hydraulics, compressors, pumps or plant engineering, the RS-68 is used everywhere, where pressure peaks may occur. The adjusting screw should be screwed in completely, before installing the reducer, because it has to be adjusted to the local measuring conditions. After starting the plant or process, the screw should be screwed outwards just as much as pressure surges can not be seen on the pressure gauges scale anymore. Only fluids without impurities should be used for the reducer to work. Otherwise a clogging of the flow opening can endanger the pressure impulse reducer.

Technical Specifications:

GH-01

IP66 Connection Box 55 x 55 x 37 mm

Features

- / Protection class IP66
- / Two or three cable glands
- / Self-extinguishing
- / Fully insulated
- / Halogen-free
- / Applicable from -20°C to +90°C
- / Impact resistance 7 Joule

Description:

The connection box GH-01 adds a rough outdoor enclosure to the range of accessories supplied by Profimess. Protection class of this compact housing is IP66, therefore it may even be mounted under harsh weather conditions or in facilities, where water jet cleaning takes place. Two or three pre-assembled M16x1,5 IP68 cable glands for cable diameters from 5 mm up to 10 mm offer enough space for most applications. Optionally two more cable glands (max. four) may be mounted to the free sides of the box.

Application:

GH-01 is used, where ever the interface between a simple switch or sensor in an outdoor area and the supply or signal circuits has to be protected against environmental influences. The range of application is wide. GH-01 offers a quick, price-worth solution.

Technical Specifications:

Protection class /	IP66 acc. to EN60529
Material /	glass fibre reinforced, duroplastic polyester
Seal /	flat seal from chloroprene
Colour /	RAL7000, squirrel grey
max. Temperature without cable glands /	-40°C...+100°C
Impact resistance /	7 Joule acc. to EN60079-0
Surface resistance /	>10 ¹² Ohm, IEC60093
Flammability /	self-extinguishing; UL94 V-0
Insulation /	fully insulated VDE 0100
Disruptive strength /	18 kV/mm, IEC60243-1
Toxicity /	halogen-free
Cable glands /	2 (3) pieces M16 x 1.5 acc. to DIN 5026, pre-assembled
Material:	polyamid 6 V2
Colour:	light grey, RAL 7035
Protection class:	IP68 5 bar

UM-01

Universal Transmitter for RTD, TC, Ohm, Potentiometer, mA and V

Features

/ Ideal for evaluation of resistance
thermometers or levelmeters

/ Galv. separation of analogue signals

/ Models with relay and analogue output

/ Optionally with DNV approval

/ Universal power supply through

21.6 - 253 V AC or 19.2 - 300 V DC

/ Including sensor power supply

/ Attachable display

/ SIL 2

Description:

The UM-01 universal transmitter is a module for assembling into a switchgear cabinet that can receive at the input measured values from resistance thermometers, thermo-elements, ohmic resistors, potentiometers or devices with analogue signals and translates them into a galvanically separated analogue signal. Optionally, the UM-01 can also be equipped with two additional programmable relay outputs; alternatively it can be supplied only as a cost-effective switching unit with relay outputs. The UM-01 is programmed through a separately available mountable display PE451 which is fixed on the front side of the measurement converter to display continuously the input signal, the units, the device TAG-No. and the relay or the output status, as required. The special feature of PE451 is, however, that the UM-01 operates even without it and that the program parameters in the PE451 remain saved. Programming more than one UM-01 is, therefore, a child's play. Once the configuration is done, the settings are easily read into any new measurement converter on mounting and pressing the button; cumbersome resetting of parameters is, therefore, unnecessary. The UM-01 measurement converter is powered universally by DC or AC voltages and is compatible with most common transmitter devices like thermo-elements of type B to type LR, resistance thermometers NI100 and PT100 as 2, 3 or 4-wire and transmitters with analogue output range of 0-20 mA or 0-10 V DC. The UM-01 has been developed in accordance with the most stringent safety measures and hence can be used in installations with SIL 2.

Application:

Wherever temperatures are measured using thermo-elements or resistance thermometers or levels are output by levelmeters as a potentiometer signal, the UM-01 is the ideal supplement in the line of measuring devices. It converts the linear input signal into an analogue output signal and offers, additionally, the facility of tapping two setpoints as a potential-free relay NO contact. Since the transmitter connected at the input of UM-01 is powered directly by the UM-01, the measurement converter is perfectly suited as a signal separator that establishes a galvanic

separation between the measuring and analyzing circuits. The UM-01 has been conceived for universal application so as to enable the user to save costs on inventory, since he would only need a single device as against two to three variants earlier. Optionally, the UM-01 can be supplied with UL approval for markets in USA or with DNV approval for shipping applications.

UM-05

Universal transmitter for top hat rail mounting

Features

- / 9 adjustable supporting points
- / Tara-function
- / Programming interlock via access code
- / Plug-in screw terminals
- / Min/max value recording
- / PNP/NPN- or relay inputs
- / Current or voltage input
- / 3-digit digital display
- / Three front-taster

Description:

The Universal Transmitter UM-05 is a new development of our company and offers the possibility to convert all current sensor signals from the ranges flow, level, pressure and temperature to switching or analog signals, and to set new standards in price-performance ratio. On the input side, the device processes voltage and current signals, Pt100 and PT1000, thermocouples, frequencies and pulses. At the output, the user can use switching signals in the form of relay or PhotoMos outputs, or use the optionally installed analogue signals, the RS232 / 485 or the Bluetooth interface. The UM-05 has a standard 3-digit digital display and has become a DIN rail assembly designed.

Application:

In the development of the UM-05, the main focus was on ease of use, the suitability for the largest possible number of signals and a very low price range. The configuration therefore also takes place either via three front pushbuttons or via the optional PC software PM-TOOL with CD or USB adapter. The UM-05 is powered by DC or AC voltage and provides as standard a red, 3-digit display, nine parameterizable interpolation points and a display flashing when the limit value is exceeded or undershot. An optionally available sensor supply saves the user the additional power supply for the sensor and an optional data logger saves the recorded measured values over time.

Technical Specifications:

Protection class /	IP20 / pluggable terminal
Dimensions /	W22,5 x H117,2 x D107 mm
Fixing /	top hat rail
Housing material/	PA6, black, UL94V-0
Connection /	plug-in terminal; wire cross section up to 1,5 mm ²
Display /	3-digits
Digit height /	7 mm
Segment colour /	red
Range of display /	-199 up to 999
Switching points /	LED S1, LED S2, LED S3, LED S4
Overflow/	horizontal bars at the top
Underflow/	horizontal bars at the bottom
Display time/Meas. time /	0,1 to 10,0 seconds
Temperature drift /	100 ppm/K
Measuring time/	0,01 .. 2,0 seconds
Measuring rate /	approx. 1/s at temperature sensor, approx. 100/s with standard signals
Measuring principle /	U/F conversion
Resolution /	approx. 14 Bit at 1s measuring time
Working temperature /	-20 to +50°C
Storing temperature /	-30 to +70°C
Weathering resistance /	relative humidity 0-85% on years average without dew

Elektrical Specifications:

Supply 1 /	24 VDC ± 10% galvanic isolated, ≤ 5 VA
Supply 2 /	100-240 VAC 50/60 Hz DC ± 10%, ≤ 15 VA
Supply 3 /	15-40 VDC galvanic isolated / 20-30 VAC 50/60 Hz, ≤ 10 VA
Sensor supply /	24 VDC / 50 mA incl. digital input
Switching points /	2 Relay outputs with normally open contact Switching voltage / 30 VDC/AC, max. 2 A resistive load Operating life / < 30mV/< 10mA - min. 2,5x10 ⁶ 30 VDC / 1 A - minimum 5x10 ⁵ 30 VDC / 2 A - minimum 1x10 ⁵

Description:

The AZ-02N Digital Display offers to the user everything that the current process measuring technology demands from electronic evaluation devices. This device is freely scalable and capable of utilizing a wide spectrum of input signals. Equipped with a 5-digit LED display, it optionally provides an output for sensor power supply and a power or voltage output for further processing of the measurement as well as possible setpoints.

Application:

This universal display unit is capable of processing signals from all commonly used sensors in fill level, pressure, flow control or temperature measuring technology and displaying them visually. The relay and analogue outputs freely configurable for hysteresis and range optimally evaluate and process the measurement. The AZ-02N is, therefore, also capable of serving as a control unit for simple system operations. Particularly noteworthy is the easy handling and programming of the device, which is carried out on the frontside keys and leaves no questions open. Through the highlighted properties the universal display units are suitable for practically all applications in the industrial or laboratory operation.

Technical Specifications:

Housing dim. /	W 96 x H48 x D120 mm incl. plug-in terminal D=139 mm
Panel cut-out /	92.0 ^{+0,8} x 45.0 ^{+0,6} mm

MSR

Multifunctional Relay

Features

/ Protects your sensor elements

/ Practical time response

/ Additional DC voltage output

Description:

The MSR series includes the range of multifunctional relays MSR 10, MSR 11 and MSR 20 that cover all commonly known applications. Thus, the MSR 10 and the MSR 20 are purely contact protecting relays for one or two control signals which protect the contacts in measuring devices against overload due to high switching operations especially in inductive or capacitive loads. In these units, a smartly selected drop-out delay ensures that highly frequent switching of sensor contacts is disregarded and, therefore, the switching points are unambiguously defined. The MSR 11 has a highly qualified bistable interval relay with self-preservation that is capable of controlling the pump completely in combination with two fill level switches.

Application:

Naturally, this unit also protects the contacts of the switch connected to it against overloads. The MSR series of devices is designed for a standard supply voltage of 230 V AC, but they possess also a 24 V DC DC voltage output. Optionally, they are available for connecting to 115 V AC, 24 V AC and 24 V DC. On request, the MSR 10, MSR 11 and MSR 20 can be provided with 24 V DC PNP electronic outputs. The polyamide housing has a housing of type IP 20 protection; however, it can be equipped with an outer housing in IP 65 available as accessory. The device can be assembled on a standard mounting rail as per DIN 50022 or by means of an adapter for individual mounting through screw fitting.

Versions:

MSR Multifunctional Relay

Type: MSR10

monostable contact protective relay for single contacts

Type: MSR11

bistable interval relay with locking feature

Type: MSR20

monostable contact protective relay for double contacts

Supply voltage:

standard 230 VAC;

optional 115 VAC, 24 VAC or 24 VDC

Electrical Specifications:

MV-01

2/2-way Solenoid Valve for Fluids

Features

/ Nominal diameters 1/4"-2"

/ Pressure up to 10 bar

/ 24 V DC and all common AC variants

/ Forced-lifting

Description:

The pilot-controlled full-way valve with servo membrane and forced-lifting is currentless closed. In this status, the core closes the pilot-control boring in the center of the membrane holder due to spring action. The media pressure above the membrane builds up over a membrane throttle boring and closes the valve. When the valve's magnetic coil is supplied with current, the resulting magnetic field lifts up the core which first opens the pilot-control boring to let the closing pressure above the membrane weaken and the valve can open fully due to the excess media pressure and the coil's magnetic force.

Application:

Magnetic valves are primarily used in processes in which flow of fluids need to be switched on or shut off frequently and at precisely defined point of time. The simple but reliable devices are very frequently deployed especially in the dosing technology. A variety of possible material combinations for the valve body are in brass or stainless steel and the membrane materials like NBR, FKM or EPDM, as well as the available operating voltages in the AC and DC range, render the MV-01 into one of the most universally applicable solenoid valve in the market.

Versions:

MV-01 Solenoid Valve

Housing material: As materials for the housing brass or stainless steel can be selected. In addition, other materials such as brass nickel-plated are available on request.

Cv-value: For these flow values of water as the medium at 20°C (from 1.3 to 30.0 m³/h) exactly 1 bar pressure will drop at the relevant valve. These are taken into regard so as to assess the loss of pressure on the valve with reference to the entire range.

Connection: All cylindrical thread sizes between G1/4" and G2" are available. However, the relationship between the Cv- value and the thread must be taken into consideration.

Supply voltage: Besides 24 V DC also all commonly used variants of AC voltage can be supplied.

Membrane material: Among plastic materials, NBR (Perbunan®), FKM (Viton®) and EPDM are available. Depending on the medium and the required temperature any of the alternatives can be supplied. NBR is used for neutral fluids like water, hydraulic oil and oils and greases without additives. FKM is used for Per-solutions and hot oils with additives and EPDM should be used for oil- and greaseless fluids like hot water and alkaline washing and bleaching lye.

Accessories: Besides the required standard plug socket also sockets with LED for switching status display, varistor for surge voltage protection or integrated rectifier can be supplied.

PR-5225

Railmounted F/F- or F/I-converter

Features

- / Pulse conditioning
- / Frequency generator
- / Freq. division or multiplication
- / Buffer for fast pulse trains
- / 4...20 mA or 0...10 VDC output
- / PNP/NPN- or Relay outputs
- / Input range 0...20 kHz
- / Namur, Tacho, NPN, PNP, TTL
- / Four front-LEDs

Description:

PR-5225 converts the output frequency of nearly all Profimess flowmeters or any other units with pulse output, to an analogue output, which may be a power signal of any span between 0 mA and 20 mA with a minimum width of 5 mA or a voltage signal of either 0...1 VDC or 0...10 VDC gripped of at an internal shunt. Alternatively PR-5225 may be operated as a frequency converter, which either transforms the signal of too slow sensors up or the signal of too fast sensors down to a usable frequency. Even an operation mode as frequency generator e.g. as clock generator or time base is possible. If the FIFF-mode is chosen, PR-5225 outputs the evaluated frequency and the analogue signal simultaneously.

Application:

Pulse signals of flowmeters in practice often have to be converted into analogue outputs, because the downstream evaluating units do usually not possess any slots for frequency-based signals. Also a frequency adaption is frequently necessary, whenever the inputs of the PLC do not work with too high frequencies. PR-5225 offers therefore a reliable, cost-effective solution. The emitted pulses of PR-5225 are usually much cleaner than those of the connected flowmeters, nevertheless a 50 Hz low-pass filter can be factory-set, to fade out high-frequency interfering signals.

Technical Specifications:

Protection class /	IP20
Temperature range /	-20°C...+60°C
Calibration temperature /	+20°C...+28°C
rel. Humidity /	< 95 % RH (non-cond.)
Dimensions (HxWxD) /	109 x 23.5 x 130 mm
Weight /	app. 190 g
DIN rail type /	DIN 46277
Wire size /	max. 1 x 2.5 mm ² stranded wire
Screw terminal torque /	0,5 Nm

Electrical Specifications:

Supply voltage /	19.2...28.8 VDC
Power consumption /	max. 3.5 W
Internal consumption /	1.7 W
Warm-up time /	30 s
Power-up delay digital outputse /	0...999 s factory adjustable
Signal-noise ratio /	min. 60 dB
Response times /	
analogue output:	< 60 ms + 1 period
digital output:	< 50 ms + 1 period
concurrent f/i and f/f:	< 80 ms + 1 period
Effect of supply voltage /	≤ 0.002 % of span per %V
Temperature coefficient /	< ± 0.01% of span per °C
Linearity error /	< ± 0.1% of span
EMC-immunity influence /	< ± 0.5%
Auxiliary voltages /	
Supply NAMUR:	8.3 V ± 0.5 VDC / 8 mA
Supply S0:	17 V / 20 mA
Supply NPN / PNP:	17 V / 20 mA
Additional supply:	5...17 V / 20 mA factory adjustable

Inputs:

Common specifications /	
Input range:	0...20 kHz
max. Offset:	50% of selected max. frequency
min. Frequency:	0.001 Hz
Low cut-off frequency:	0.001 Hz
min. Pulse width:	25 µs
min. Period time:	50 µs
max. Frequency:	20 kHz
Trigger level:	0.025...6.5 V (nom.), factory adjustable
Trigger level LOW:	50 % of trigger HIGH

NAMUR-input acc. to DIN 19234 /

Trigger level LOW:	≤ 1.2 mA
Trigger level HIGH:	≥ 2.1 mA
Input impedance:	1000 Ω
Sensor break:	≤ 0.1 mA
Short-circuit:	≥ 7 mA
Response time:	≤ 400 ms

Tacho-input /

Trigger level LOW:	≤ -50 mV
Trigger level HIGH:	≥ +50 mV
Input impedance:	≥ 100 kΩ
max. Input voltage:	80 V AC pp

NPN-/PNP-input /

Trigger level LOW:	≤ 4,0 V
Trigger level HIGH:	≥ 7,0 V
Standard input impedance:	3.48 kΩ
Input impedance special version:	13.3 kΩ / NPN

TTL-input /

Trigger level LOW:	≤ 0.8 V DC
Trigger level HIGH:	≥ 2.0 V DC
Input impedance:	≥ 100 kΩ

S0-input acc. to DIN 43864 /

Trigger level LOW:	≤ 2.2 mA
Trigger level HIGH:	≥ 9.0 mA
Input impedance:	800 Ω

Outputs:

Digital outputs (PNP/NPN) /

max. Current source:	30 mA
max. Current sink:	130 mA
max. Voltage:	28.5 V

Power output /

Signal range:	0 .. 20 mA
min. Span:	5 mA
Signal dynamics:	16 bit
max. Offset:	50% of selected max. value
Updating time:	max. 20 ms
Updating time for concurrent f/f and f/i:	max. 40 ms
max. Load:	20 mA / 600 Ω / 12 VDC
Load stability:	≤ 0.01% of span per 100 Ω
Current limit:	< 23 mA

Voltage output through internal shunt /

Signal range:	0 .. 10 VDC
min. Span:	250 mV
max. Offset:	50% of selected max. value
Load:	min. 500 kΩ

FF-converter output /

Signal range:	0 .. 1000 Hz
Multiplicator / Divisor:	1 .. 1000000
min. Pulse width:	500 μs
max. Pulse width:	999 ms
max. Duty Cycle:	50 %

Frequency generator /

min. Periodic time:	50 μs
max. Frequency:	20 kHz
Duty Cycle:	50 %

Relay outputs /

max. Output frequency:	20 Hz
Isolation voltage test / operation:	3.75 kV AC / 250 V AC
max. Voltage:	250 VRMS
max. Current:	2 A AC
max. Power (AC):	500 VA
max. Relay load at 24 VDC:	1 A

Connections:

Ordering Codes:

Order number PR-5225. 1. FI

PR-5225 Railmounted F/F- or F/I-Converter

Digital outputs /

- 1 = two PNP / NPN-outputs
- 2 = two relay outputs (max. 20 Hz)

Mode of operation /

FI = F/I-converter

digital outputs are configured as setpoint outputs
analogue output is switched on

FF = F/F-converter

digital output 1 outputs the evaluated frequency
analogue output is switched off

FG = Frequency generator

digital output 1 outputs the selected frequency
analogue output is switched off

FIFF = F/I and F/F-converter

digital output 1 outputs the evaluated frequency,
digital output 2 is configured as setpoint
analogue output is switched on

Please specify the analogue output range (how many mA at what frequency) and the setpoints for increasing or decreasing values in % (for FI or FIFF), the divisor or multiplicator (for FF or FIFF) respectively the generated frequency (for FG) in clear text. Please specify additionally the mode of the digital outputs (PNP or NPN for transistor outputs respectively open-circuit current or closed current for relay outputs).

Electrical Connections:

1. General

The following terms & conditions apply to all transactions, superseding hereby all other terms & conditions governing business, sales and purchase by the client. Deviations from these terms & conditions require prior approval in writing. On conclusion of a contract, latest by receipt of goods or part thereof, the client acknowledges these terms & conditions as the solely valid terms & conditions. Agreements, assurances and additional agreements by our employees and representatives shall have no collecting powers. These terms & conditions may be supplemented by the „General Terms & Conditions of Supply for Products and Services in the Electrical Industry“.

2. Offers

2.1 Offers by the seller refer to customary qualities in the trade and are non-binding. The seller shall not undertake any guarantee for the ownership of his deliveries for a special purpose of use unless expressly agreed upon in writing.

2.2 Drawings and descriptions of the offered goods are only approximately authoritative. The seller is at liberty to deliver the goods, as the case may be, as per his own latest status of manufacturing of goods in question.

2.3 Purchase Orders, additional agreements and assurances are only deemed to be accepted by the seller on confirmation in writing. The same shall also apply to actions by employees or representative of the seller.

3. Prices

3.1 Pricelists are non-binding, while mutually agreed prices in writing are authoritative.

3.2 Hikes in public and private charges and in freight charges after submission of the offer shall be borne by the client.

3.3 Dead freight is at the expense of the client unless the seller is at fault.

4. Delivery

4.1 Confirmation of the order by the seller shall be authoritative for the scope of delivery. The scope of services concerns only the delivery of goods as specified in the confirmation of order. Additional services such as commissioning, assembly or instructions in respect of the goods to be delivered require express agreements in writing.

4.2 On handing over the goods to the forwarding agent or freight agent, the risk is commuted to the client even in the case of carriage-paid deliveries, latest, however, as soon as the goods leave the premises of the seller. Should the insurance risk be covered by the client, it shall not have effect on the above clause defining risk. As the case may be, the client must incorporate such condition at his expense that is imposed on the seller by the forwarding agency and insurance company.

4.3 Acceptance and certification by experts are not part of the delivery by the seller. At the most, the seller may engage the services of an expert on behalf of the client.

5. Delivery schedules

5.1 The conditions of delivery as indicated in the confirmation of order by the seller shall apply under following clauses:

5.1.1 The confirmation of order shall not have any ambiguities in respect of the delivery and characteristics of the goods. The client shall be responsible for acquiring all necessary documents, details, approvals, releases and similar.

5.1.2 The client shall not modify his order after dispatch of confirmation of his order.

5.1.3 Under normal circumstances, manufacturing and dispatches shall not be deferred due to force majeure, for example, mobilization, war, uprisings and so on. Such events may entitle the seller to fully or partially withdraw from the contract. The client may request the seller to explain whether he intends to deliver goods within a reasonable time or withdraw from the contract. Should he fail to provide an explanation, then the client is entitled to withdraw from the contract. If necessary,

the client shall be obligated to extend the period of specified letters of credit, instructions and similar.

5.2 If the seller is in default, the rights and obligations of the client shall be in accordance with Articles 281 ff of the German Civil Code. The liability of the seller is limited to such instances of intention or gross negligence, in all other cases a liability is ruled out.

5.3 The date of delivery as indicated by the seller shall be assumed to have been complied with, when the goods are handed over to a forwarding agent or freight agent on that date for dispatch to the address as indicated by the client. The seller shall not be liable for delays during transportation.

5.4 The seller is entitled to partial deliveries.

6. Payments

6.1 Payments to the seller shall be made as per scheduled date without any deductions and surcharges even before the due date.

6.2 The seller shall accept checks and bills of exchange eligible for discounts only for the sake of settlement without affecting the maturity of his claims. Commitment of bills of exchange shall require an agreement in writing.

6.3 If the client defaults the targeted payment as indicated in the invoice, the seller may claim interest on delayed payment in accordance with Article 288 of the German Civil Code.

6.4 If the financial position of the client deteriorates or his payment are irregular, the seller shall be entitled to demand immediate payment or securities for his claims and/or advance payment for further deliveries or to withdraw from the contract fully or partially; the same shall also apply if the seller has accepted bills of exchange. In the event of a withdrawal, claim on the client shall be due immediately regardless of the accepted bills of exchange. The seller shall receive compensation for his costs arising from such withdrawal and for other damages. Claims of compensation by the client on this account shall be ruled out. Moreover, the rights of the seller shall be in accordance with the law in the event of default by the client.

6.5 The client may exercise his right of retention or right to set-off in respect of claims by the seller only in regard to an undisputed or legally tenable claim. All other rights of retention or set-off of the client are ruled out.

7. Retention of title

7.1 The seller shall reserve the rights on his deliveries, which may only be offered for sale in the normal course of business, until payments for all claims arising from the relevant business transaction including those arising from bills of exchange are duly settled.

7.2 The client shall not acquire any ownership of fully or partially manufactured goods as a result of processing such goods; the processing shall be exclusively for the seller without payment. If, however, the right of retention should lapse due to any factual or legal circumstances, the seller and the client agree even at this point that the ownership of the items following their processing shall be commuted to the seller who shall accept the conveyance.

7.3 In the case of processing involving goods that are under ownership of a third party, the seller shall acquire co-ownership of the new items proportionate to the value of goods supplied by him under retention of title.

7.4 The client is only entitled to sell goods to others under retention of title. The receivables arising from the sale of goods, regardless of whether processed, unprocessed or conveyed to him as security, shall be deemed ceded to him fully along with all subsidiary rights. Sale to buyers who may rule out cession or stipulate their approval shall be prohibited. The client shall exclude a provision where his buyers exercise rights (such as set-off) in respect of accounts receivable arising from sale of goods under retention of title.

7.5 For determining the garnishees as per first and last names, address and sum of accounts receivable, the books maintained by the client shall be authoritative.

Cessions shall be hereby excluded by the seller in advance. Any other cession or pledging shall be excluded. If through such cession the total accounts receivable of the seller are unequivocally ensured for more than 120%, the excess of the accounts receivable shall be released on demand by the client as per choice of the seller.

7.6 The client may, as long as he fulfills his obligation of payments to the seller, indent the accounts receivable for himself until revocation of the same. The right of resale, processing of unpaid goods and indent of accounts receivable shall expire in the event of suspension of payments, proposal for opening of solvency proceedings, judicial or non-judicial litigation of settlement of debts, protest of a check or a bill. Accounts receivable conveyed and received thereafter shall be collected immediately into a special account under the title of „Accounts Receivable of Profimess GmbH“. The conveyed accounts receivable shall be intimated to the seller with details of first and last names, address and amount of receivables from the garnishees and the garnishees shall be informed about the transacted conveyance. At the same time, a list of remaining goods shall be forwarded to the seller.

7.7 The seller shall be entitled, for good reasons, to demand immediate return of goods under retention of title particularly in the event of default of payments or difficulty to comply with payments by the client. Until settlement of payments, the client shall store the goods under retention of title separately from other goods, mark them as property of the seller, not dispose of them and, on request hand over a list of goods under retention of title to the seller.

7.8 Pledging of seller's goods for the purpose of conveyance as security to third parties and cession or pledging of deferred benefits shall be excluded. In the event of pledging and confiscation by third parties, for example, on the basis of laws governing lessor or lien, the seller shall be informed of the same immediately. The cost of an intervention shall be borne by the client in any case.

8. Warranty and complaints

8.1 The seller shall be liable for the use of fault-free materials, faultless processing and trouble free functioning and the special characteristics of his goods as assured in his confirmation of order in writing.

8.2 The liability shall exclusively extend to improvement or redelivery of defective components as per the option of the seller. In the event of failure of improvement or replacement of goods, the client shall reserve the right to demand decrease of payment or annulment of the contract. In principle, any improvement activity shall take place at the premises of the seller, as chosen by the seller even at his place of residence or at the commercial branch office of the receiver at the time of signing of the contract. The modalities of bearing the costs for such improvement shall adhere to statutory regulations. The seller shall not be liable for damages occurring at the client's location or, in the case of transfer of risk, at the location of third party due to incorrect handling of the goods.

8.3 Claims by the client from the seller or his service personnel beyond the scope of the above-mentioned liability shall be excluded unless they are based on intention or gross negligence on the part of the seller.

8.4 The duration of liability shall adhere to statutory regulations. In the case of delivery of used items, the seller shall only be liable for the presence of assured characteristics. In such cases, all other claims of warranty shall be excluded.

9. Minimum wage

9.1 The vendor complies with the provisions of the minimum wage law and is obliged to exempt every purchaser from any employees' claims, which result from his liability in conformity with § 13 of the minimum wage law and to compensate any damages incurred by this liability.

10. Place of performance and jurisdiction

10.1 Place of performance in regard to payments and deliveries shall be the location of our company. In the event of disputes arising from or in connection with the business relationship including those relating to litigations on checks or bills of exchange, the place of jurisdiction for both the parties shall be the location of the seller, provided the businessman is a full-time businessman, a legal person of the public law or a public fund asset or a general court of jurisdiction is absent locally. In any case, the statutory provisions shall be applicable. If the seller so desires, also the court of jurisdiction at the location of the client shall be responsible. If the seller so desires, even a court of arbitration shall be appointed for mediation in case of disputes. If the seller exercises his right to vote, he shall inform the client about the same in writing. In that case, each party shall nominate an arbitrator within four weeks after notice by the other party. Within four additional weeks both the parties shall agree on a chairman. If agreement cannot be reached on the person of chairman or, if a party delays nomination of its arbitrator, then the chair-

man or the arbitrator shall be nominated by the president of the provincial high court of Bremen. The court of arbitration shall decide on the basis of the mutually agreed conditions of delivery including in accordance with the applicable laws of the Federal Republic of Germany. At the proceedings of the court of arbitration, the rules § 1025 to § 1048 of the civil law shall be applied.

10.2 The relationship of the contract shall adhere to the laws of the Federal Republic of Germany.

10.3 The legal inefficacy of individual clauses of the contract shall not affect the efficacy of the remaining clauses. An invalid clause shall be interpreted in such manner to fulfill the intended business purpose.

10.4 Without permission by the seller in writing, the rights of the client arising from this contract shall not be commutable.

10.5 This version of terms & conditions of the seller shall abrogate all previous versions of the same.

11 Creditworthiness Check

11.1 We will forward your information (name, address, date of birth - if necessary) for the sole purpose of checking for your creditworthiness, to gain access to mathematical-statistical information concerning the risks of a potential payment default, by using address information supplied by LEGIAL AG, Thomas-Dehler-Str. 2, 81737 Munich, to the infoscore Consumer Data GmbH, Rheinstr. 99, 76532 Baden-Baden. Legal basis for these transfers are article 6 paragraph 1 letter b and article 6 paragraph 1 letter f of the GDPR. Transfers based on this legal conduct can only be made, as long as the attendance of justified interests of our company or third parties is necessary, and no interests or legal rights and legal freedom of the affected person, all of which would require the protection of personal data, outweigh the initial reason. Detailed information on the ICD in the sense of article 14 European General Data Protection Regulation („EU GDPR“), that is, information on the object of business, about the purpose of data storage, about the data recipients, about the rights of self-disclosure, about the right of deletion, etc. can be found in the privacy policy.

12 Software Usage

12.1 If software is contained in the scope of supply, the orderer shall be granted a non-exclusive right to use the supplied software, including its documentation. It is provided for use together with the delivered item. Use of the software on more than one system is not permitted.

12.2 The orderer may only copy, revise, translate or convert the software from object code to source code to the extent permitted by law (§§ 69 a ff. UrhG (German Copyright Act)). The orderer agrees not to remove the manufacturer's data, in particular the copyright notice, nor to change any of this data without our express consent.

12.3 Any other rights associated with the software and documentation including copies thereof remain vested with us or the software manufacturer. Granting sub-licenses is prohibited.

13 E-commerce

13.1 If the orderer purchases products or services from us through a website or other e-commerce process, the following stipulation applies additionally:

13.2 The orderer is responsible for the protection of his password and acknowledges that purchases carried out using his password are binding for him.

13.3 An order can be placed after completion of the registration process. By entering your log-in data and clicking the "Order" button in the final step of the order process you then place a binding order for the products in the shopping cart. You will receive a confirmation of receipt immediately after sending your order. The sales contract is not valid until you receive our order confirmation. The order confirmation is sent in electronic form. The decision to declare an order confirmation is within our discretion.

13.4 We have made all reasonable efforts to ensure that all websites and access points are secure; however, we refuse to accept any liability in the event of misuse of the information that was transmitted to or from these websites and / or access points, namely by outside parties who are not our employees.

13.5 The orderer agrees to our use of cookies through the website of the orderer or other ecommerce processes.
